The Vintage Mencken Alistair Cooke 2008-11 This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth. r' = radius of moon, or other body. P = moon's horizontal parallax = earth's angular semidiameter as seen from the moon. f = moon's angular semidiameter. $\text{Now} = P$ (in circular measure), $r'-r = r$ (in circular measure);'. $r: r':: P: P'$, or (radius of earth): (radius of moon):: (moon's parallax): (moon's semidiameter). Examples. 1. Taking the moon's horizontal parallax as $57'$, and its angular diameter as $32'$, find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter = $16'$;.-. $4000:: 57': 16'$;.-. $r = 400 \cdot 16 = 1123$ miles. 2. The sun's horizontal parallax being $8''8$, and his angular diameter $32V$ find his diameter in miles. ' Am. 872,727 miles. 3. The synodic period of Venus being 584 days, find the angle gained in each minute of time on the earth round the sun as centre. Am. $l''-54$ per minute. 4. Find the angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50) $S V: VA:: 7: 3$. But Sr has a relative angular velocity round the sun of $l''-54$ per minute (see Example 3); therefore, the relative angular velocity of $A V$ round A is greater than this in the ratio of 7: 3, which gives an approximate result of $3''-6$ per minute, the true rate being about $4''$ per minute. Annual ParaUax. 95. We have already seen that no displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

Dragondoom Dennis L. McKiernan 2002-05-01 A thousand years before the Winter War, Elgo, prince of the Vanadurin, killed the Dragon Sleeth and returned home with the fabulous wealth from the dead beast's lair. But there was more in the bounty than gems and gold, for the treasure was cursed, and in time it brought death to noble and peasant, war between Man and Dwarf, strife and destruction beyond reckoning. Now, generations later, as the conflict continues, the great Dragon Black Kalgalath, in league with the Wizard Andrak, appears to avenge Sleeth's death and claim the Dragon-cursed hoard. Against this unholy alliance, two sworn enemies set forth to find a legendary long-lost weapon: a warhammer of incalculable power that may be the only hope of victory. But neither the Warrior Maiden Elyn nor the Dwarf Thork is prepared for the dangers awaiting them on this quest....

Yvain Chretien de Troyes 1987-09-10 The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

The Last Vispo Anthology Crag Hill 2012-11-03 This book collects experimental “visual poetry.” With The Last Vispo Anthology, Fantagraphics spotlights the intersection of art and language in this innovative new collection — without peer in English — that gathers the work of visual poets from around the world into one stunning volume. The alphabet is turned on its head and inside-out and the results culminate in a compilation of daring and surprising verbo-visual gems. The Last Vispo is composed of visual poetry (a portmanteau of the words “visual” and “poetry”) from the years 1998 to 2008, during a burst of creative activity fueled by file sharing and e-mail, which made it possible for the vispo community to establish a more heightened and sophisticated dialogue with one another. The collection extends the dialectic between art and literature that began with ancient “shaped text,” medieval pattern poetry, and dada typography, pushing past the concrete poetics of the 1950s and the subsequent mail art movement of the 1980s to its current incarnation. Rather than settle into predictable, unchallenged patterns, this vibrant poetry seizes new tools to expand the body of work that inhabits the borderlands of visual art and poetic language. The Last Vispo features 148 contributors from 23 countries on five continents. It includes 12 essays that illuminate the abundant history and the state of vispo today. The anthology offers a broad amalgam of long-time practitioners and poets new to visual poetry over the last decade, underscoring the longevity and the continued vitality of the art form.

Abstract Algebra Jonathan K. Hodge 2013-12-21 To learn and understand mathematics, students must engage in the process of doing mathematics. Emphasizing active learning, Abstract Algebra: An Inquiry-Based Approach not only teaches abstract algebra but also provides a deeper understanding of what mathematics is, how it is done, and how mathematicians think. The book can be used in both rings-first and groups-first abstract algebra courses. Numerous activities, examples, and exercises illustrate the definitions, theorems, and concepts. Through this engaging learning process, students discover new ideas and develop the necessary communication skills and rigor to understand and apply concepts from abstract algebra. In addition to the activities and exercises, each chapter includes a short discussion of the connections among topics in ring theory and group theory. These discussions help students see the relationships between the two main types of algebraic objects studied throughout the text. Encouraging students to do mathematics and be more than passive learners, this text shows students that the way mathematics is developed is often different than how it is presented; that definitions, theorems, and proofs do not simply appear fully formed in the minds of mathematicians; that mathematical ideas are highly interconnected; and that even in a field like abstract algebra, there is a considerable amount of intuition to be found.

308 Circuits Jan Buiting 2003 This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

Human Health and Disease Richard Fosbery 1997 Human Health and Disease is part of the Cambridge Modular Sciences series, developed in collaboration with the University of Cambridge Local Examinations Syndicate to support its A and AS level modular syllabuses. The books in the series can also be used with other syllabuses. Human Health and Disease studies the various factors related to health and disease in a global context. The effects on health of diet, exercise and drugs are discussed. Infectious diseases and the immune system are also studied in some depth. To help students with study and revision, there are self-assessment questions throughout the text, a list of learning objectives at the start of each chapter and a summary of contents at the end. Structured and essay questions also appear at the end of each chapter.

Merleau-Ponty's Reading of Husserl Ted Toadvine 2013-03-09 Merleau-Ponty's Reading of Husserl explores the relationship between two of the greatest thinkers of the twentieth century: Edmund Husserl, the father of modern phenomenology, and Maurice Merleau-Ponty, considered by many to be his greatest philosophical heir. While Merleau-Ponty's influence on the dissemination and reception of Husserl's thought is indisputable, unresolved questions remain concerning the philosophical projects of these two thinkers: Does phenomenology first reach its true potential in Merleau-Ponty's hands, guided by his appreciation of the tacit goals underlying Husserl's philosophical project? Or is Merleau-Ponty's phenomenology a creative but ultimately misdirected appropriation of Husserl's work? In this volume, the first devoted to a comparison of the work of these two philosophers, ten leading scholars draw on the latest research and newly available manuscripts to offer novel insights into Merleau-Ponty's reading of Husserl - with implications for our understanding of phenomenology's significance, its method, and the future of philosophy.
