## About the Tutorial - [tutorialspoint.com](http://tutorialspoint.com)

Webframework based on Java language and iOS provides a native framework based on Objective-C / Shift language. However, to develop an application supporting both the OSs, we need to code in two different languages using two different frameworks. To help overcome this complexity, there exists mobile frameworks supporting both OS.

## Working Towards a Debian RISC-V Port

WebSteps: 1)Bootstrap and create viable, basic OS disk images 2)Get it to the state of “unofficial” / “unsupported”, until all criteria for “stable” are met Prepare infrastructure (build daemons, etc.), documentation, etc Import bootstrapped set in the infrastructure Fully rebootstrap Build as many packages as possible
