Life - Pre-Intermediate John Hughes 2012-02-21 Life is an exciting new six-level adult series that turns learning English into an exploration of the world we live in by drawing on National Geographic content such as images, articles and videos. Student's Book contains: engaging tasks with fascinating NG content ; review at end of each unit ; grammar reference with practice activities. CEF: A1-C1.

Click on Virginia Evans 2001 Click On is a five-level course consisting of five modules each for learners of English from complete beginner to intermediate level. In full colour, the course combines active English language learning with a variety of lively topics presented in themed units. Its well-organised syllabus promotes the gradual development of all four language skills needed by learners to communicate effectively in English. The cross-cultural approach of the course stimulates learners' interest, focusing on topics carefully chosen to motivate. The Student's Book and the Workbook for each level are designed to be covered in approximately

70 to 80 hours of classroom work.

Twórczość 1979

Cześć, jak się masz? Władysław Miodunka 2012 "It is the first communicative coursebook of Polish as a foreign language for level A2. Each unit contains dialogs in Polish with a Polish-English dictionary, a lexical table, grammatical and communicative commentaries in English, as well as grammatical exercises, passages for reading and listening comprehension practice, and communicative tasks. The coursebook presents information about Poland and its culture and for the first time in a coursebook of Polish as a foreign language information about Poland and the Poles in the European Union. At the back of the coursebook there is a Polish-English dictionary for both volumes A1 & A2 as well as a language proficiency test in Polish for level A2 (listening comprehension, reading comprehension, accuracy, writing and speaking)."--Editor.

Language in Cognition and Affect Ewa Piechurska-Kuciel 2013-01-30 The volume contains most updated theoretical and empirical research on foreign or second language processes analyzed from the perspective of cognition and affect. It consists of articles devoted to various issues related to such broad topics as gender, literacy, translation or culture, to mention a few. The collection of papers offers a constructive and inspiring insight into a fuller understanding of the interconnection of the language-cognition-affect trichotomy.

Head First Physics Heather Lang 2008-09-24 Wouldn't it be great if there were a physics book that showed you how things work instead of telling you how? Finally, with Head First Physics, there is. This comprehensive book takes the stress out of learning mechanics and practical physics by providing a fun and engaging experience, especially for students who "just don't get it." Head First Physics offers a format that's rich in visuals and full of activities, including pictures, illustrations, puzzles, stories, and quizzes -- a mixed-media style proven to stimulate learning and retention. One look will convince you: This isn't mere theory, this is physics brought to life through real-world scenarios, simple experiments, and hypothetical projects. Head First Physics is perfect for anyone who's intrigued by how things work in the

natural world. You'll quickly discover that physics isn't a dry subject. It's all about the world we live in, encompassing everything from falling objects and speeding cars, to conservation of energy and gravity and weightlessness, and orbital behavior. This book: Helps you think like a physicist so you can understand why things really work the way they do Gives you relevant examples so you can fully grasp the principles before moving on to more complex concepts Designed to be used as a supplement study guide for the College Board's Advanced Placement Physics B Exam Introduces principles for the purpose of solving real-world problems, not memorization Teaches you how to measure, observe, calculate -- and yes -- how to do the math Covers scientific notation, SI units, vectors, motion, momentum conservation, Newton's Laws, energy conservation, weight and mass, gravitation and orbits, circular motion and simple harmonic motion, and much more If "Myth Busters" and other TV programs make you curious about our physical world -- or if you're a student forced to take a physics course -- now you can pursue the subject without the dread of boredom or the fear that it will be over your head. Head First Physics comes to rescue with an innovative, engaging, and inspirational way to learn physics!
