Enhancing Police Integrity Carl B. Klockars 2007-04-27 How can we enhance police integrity? After surveying more than 3,000 police officers on how they would respond, the authors went on to study three police agencies which scored highly. The authors conclude that effective administration focuses on organizational rulemaking; detecting, investigating and disciplining rule violations; circumscribing the "code of silence" that prohibits police from reporting the misconduct of their colleagues; and understanding the influence of public expectations and agency history.

The Contours of Police Integrity Carl B. Klockars 2004 The Contours of Police Integrity presents a comprehensive overview of the potential for police misconduct worldwide. A topic of great concern around the world, the top criminal justice scholars have compiled survey and case data from 10 countries chronicling police integrity and misconduct. The book begins with a chapter on the methodology and issues surrounding police studies and is followed by in-depth chapters on the USA and the UK, written by leading academics in these countries. The book concludes with a capstone summary of this rapidly growing international concern.

Thinking about Police Carl B. Klockars 1991 This is a book of readings for the introduction to policing course taught in sociology or criminal justice departments. It includes selected readings from fictional works by such authors as Joseph Wambaugh to articles from sociological and criminal justice journals.

The Making of a Police Officer Tore Bjørge 2020-03-11 Does a more academic type of police education produce new police officers that are reluctant to patrol the streets? What is the impact of gender diversity and political orientation on a police students' career aspirations and attitudes to policing? These are some of the questions addressed by this longitudinal project, following police students in seven European countries. The unique data material makes it possible to explore a wide range of topics relevant to the future development of policing, police education and police science more generally. Part I presents an overview of the different goals and models of police education in the seven participating countries. Part II describes what type of student is attracted to police education, taking into

consideration educational background, political orientation and career aspirations. Part III shows the social impact of police education by examining students' orientations towards emerging competence areas; students' career aspirations; and students' attitudes concerning trust, cynicism and legalism. The overall results show that police students are strikingly similar across different types of police education. Students in academic institutions are at least as interested in street patrolling as students in vocational training institutions. Gender and recruitment policies matters more in relation to career preferences than education models. The national context plays a more important role than the type of police education system. Written in a clear and direct style, this book will appeal to students and scholars in policing, criminology, sociology, social theory and cultural studies and those interested in how police education shapes its graduates.

Police Integrity in South Africa Sanja Kutnjak Ivkovich 2020-05-28 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement. In 1994, as the country's apartheid system was replaced with a democratic order, the new government faced the significant challenge of transforming the South African police force into a democratic police agency—the South African Police Service (SAPS)—that would provide unbiased policing to all the country's people. More than two decades since the initiation of the reforms, it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity. This book offers a unique perspective by providing in-depth analyses of police integrity in South Africa. It is a case study that systematically and empirically explores the contours of police integrity in a young democracy. Using the organizational theory of police integrity, the book analyzes the complex set of historical, legal, political, social, and economic circumstances shaping police integrity. A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers, probing their familiarity with official rules, their expectations of discipline within the SAPS, and their willingness to report misconduct. The book also examines the influence of the respondents' race, gender, and supervisory status on police integrity. Written in a clear and direct style, this book will appeal to students and scholars of criminology, policing, sociology, political science, as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations.

The League of Protectors Christian Green 2014-08-27 The world as we know it has changed. With each passing day more and more individuals are displaying extraordinary abilities. How do you stop someone strong enough to lift a truck with ease? How do you cool off someone that can produce fire from their hands? How do you defend yourself from someone that can move objects with their minds? This

story documents the trials and tribulations of a team capable of stopping these threats. They are known as The League of Protectors.

Policing and Mental Health John McDaniel 2020-02-26 This book explores the relationship between policing and mental health. Police services around the world are innovating at pace in order to develop solutions to the problems presented, and popular models are being shared internationally. Nevertheless, disparities and perceptions of unfairness remain commonplace. Innovations remain poorly funded and largely unproven. Drawing together the insights of eminent academics in the UK, the US, Australia and South Africa, the edited collection evaluates the condition of mental health and policing as an interlocked policy area, uncovering and addressing a number of key issues which are shaping police responses to mental health. Due to a relative lack of academic texts pertaining to developments in England and Wales, the volume contains a distinct section on relevant policies and practices. It also includes sections on US and Australian approaches, focusing on Crisis Intervention Teams (CITs), Mental Health Intervention Teams (MHITs), stressors and innovations from Boston in the US to Queensland in Australia. Written in a clear and direct style, this book will appeal to students and scholars in policing, criminology, sociology, mental health, cultural studies, social theory and those interested in learning about the condition and trajectory of police responses to mental health. Foreword written by Professor Maurice Punch.

Elementary Probability for Applications Rick Durrett 2009-07-31 This clear and lively introduction to probability theory concentrates on the results that are the most useful for applications, including combinatorial probability and Markov chains. Concise and focused, it is designed for a one-semester introductory course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.

Exploring Police Integrity Sanja Kutnjak Ivković 2019-11-09 This work provides an innovative new look at police ethics, including results from an updated version of the classic Police Integrity Questionnaire, including new social and technological advances. It aims to push the study of police research further, expanding on and testing police integrity theory and methodology, the relationship between community and integrity, and the influence of multiculturalism and globalization on policing and community attitudes. This work brings together experienced scholars who have used the police integrity theory and the accompanying methodology to measure police integrity in eleven countries, and provide advance and sophisticated explorations of the topic. Organized into three thematic sections, it explores the testing methodology for international comparisons, insights into police-community relations, and explores police subcultures. This innovative book will be of interest to researchers in criminology & criminal justice, particularly with an interest in policing, as well as related fields such as sociology, public policy, and comparative law.

My Only Story Deon Wiggert 2020-10-02 In November 2019, Deon Wiggert's sensational weekly podcasts held South Africa in thrall as he hunted down the paedophile who raped him as a schoolboy.

Now, in *My Only Story*, he completes his exposé of Willem Breytenbach, the once brilliant teacher and later media luminary who led a predatory life. Deon's mission to expose his abuser takes him from Breytenbach's high-school years at an agricultural school in South Africa's hinterland to the famous Grey College in Bloemfontein and the media titan Naspers. But his quest reveals so much more. As he traces systemic failures through schools great and small, he uncovers a culture of complicity that presents a clear and horrid danger to South Africa's children. While investigating men who prey on boys and girls, Deon devises a model that anyone can use to identify paedophiles in their midst. In his own words: 'It's pleasant to pretend that men don't rape children, but once you accept that they do, it becomes surprisingly easy to recognise their trickery. Once you match a universal pattern to a specific man's profile, you can spot the deceit before it is too late.' *My Only Story* is a riveting, thoughtful and often irreverent account of one man's determination to overcome childhood trauma; to help others face their demons; and to extract some beauty from the boyhood he lost.

Fallen Blue Knights Sanja Kutnjak Ivkovic 2005-10-27 Despite its suspected prevalence, no comprehensive analysis of police corruption has been published for nearly three decades. *Fallen Blue Knights* provides a systematic, in-depth analysis of the subject, while also addressing the question of what can be done to ensure successful corruption control. Kutnjak Ivkovic? argues that the current mechanisms for control--the courts, prosecutors, independent commissions, and the media, as well as the internal control mechanisms within a police agency itself--suffer from severe shortcomings that substantially limit their effectiveness. In this much-needed analysis, Kutnjak Ivkovic? redefines the roles of major players and develops a novel, comprehensive model of corruption control.

Effective Directors Charlotte Valeur 2021-09 The ebook will be Open Access and made available on publication. Being a good board member is not about knowing everything; it is about asking the right questions and challenging appropriately. *Effective Directors: Questions To Ask (QTA)* is a reference book for board members and executives globally to support them in their work. With chapters written by senior company board members and respected figures in corporate governance, the questions have been

drawn together to offer food for thought and useful prompts that take Boards beyond operational discussions. The book clearly presents the key areas to be considered by the Board (there are over 50 in total) and range from Board composition, to data security, diversity and inclusion, and succession planning. The questions are ones that boards, in any organisation, should be asking themselves, their fellow board members, service providers, executives and other stakeholders to ensure that the right issues are raised, transparency and effective oversight are achieved, and the Board is fulfilling its role in governing the organisation. In addition to being invaluable for board members, the book is also a very useful tool for executives in understanding the kind of questions their board members are likely to ask, and the kind of questions that should be asked and discussed in the boardroom.

Foundations and Earth Retaining Structures M. Foundations of Sensation and Perception George Mather 2016-08-12 Do you wonder how movies – sequences of static frames – appear to move, or why 3-D films look different from traditional movies? Why does ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of Foundations of Sensation and Perception. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems (smell, taste, touch and balance) before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). Foundations of Sensation and Perception will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

Police in Africa Jan Beek 2017 State police forces in Africa are a curiously neglected subject of study, even within the study of security issues and African states. This book brings together important new work on the subject from a group of criminologists, anthropologists, sociologists, historians, political scientists and others, who have engaged with police forces and the publics with whom they interact across the continent to provide street-level perspectives from below and inside Africa's police forces. The collection is in three parts; first it considers historical trajectories and particular configurations of police power within wider political systems, then examines the "inside view" of police forces as state institutions - the challenges, preoccupations, professional ethics and self-perceptions of police officers, and finally looks at how African police officers go about their work, in terms of everyday practices and engagements with the public, and the meanings that are construed in the course of doing so. The studies span the continent from South Africa to Sierra Leone, and illustrate similarities and differences in Anglo- phone, Francophone and Lusophone states, post- socialist, post-military and post-conflict contexts, and amid both

centralisation and devolution of policing powers, democratic transitions and new illiberal regimes, while keeping a strong ethnographic focus on ordinary police officers and police work at their core.

Managing the City John Diamond 2007-01-24 Taking a problem based approach to regeneration management, this exciting new book, authored by renowned academics and practitioners, examines how issues of ethics, equality, sustainability, local governance, civic renewal and learning are addressed within the areas of social and economic development and transformation. The issues covered here have significant implications for the ways in which regeneration initiatives are put together (in their design, development and delivery), as well as for the skills and learning needs of practitioners and the ways in which initiatives are then managed and led. This informative book provides the tools and techniques, using a mixture of rigorous academic theory and practical insights, to enable any reader to gain insight into this important subject. Drawing upon a breadth of experience both in practice and in academia, the contributors present the gaps and challenges within regeneration management, and the editors provide a framework within which the practical difficulties facing those engaged in the process of regeneration can be managed. Engaging and comprehensive, this book is an invaluable resource for all those involved in regeneration.

Indigenous Social Security Systems in Southern and West Africa Ndangwa Noyoo 2018-08-14 The desire exists within Governments to provide for those who are on the fringes of society. Therefore, indigenous approaches seem relevant in the redistribution of resources among citizens. This book is therefore not only essential, but also timely. Indigenous Social Security Systems in Southern and West Africa (ISSS) contributes to human service literature for Africa, Southern Africa and West Africa in particular. The richness of the book lies within the variety of contributions that encourage its origin. The book's value is extensive and captures many essential and current topics that have an appeal to academicians, policy-makers, analysts and practitioners in the field of social welfare and social security. Ultimately, the book serves as a pragmatic and expedient tool for human service practitioners and any enthusiast of social security systems.

Police Work and Identity Andrew Faull 2017-09-07 This is a book about the men and women who police contemporary South Africa. Drawing on rich, original ethnographical data, it considers how officers make sense of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds, and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour, and reminds readers that most officers' lives are entangled in, and shaped by a range of social, political and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once

employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure, and to rationalize their coercive practices. In an era where 'evidence' and 'what works' reigns supreme, and where 'cop culture' is often deemed a primary socializing force, this book emphasises how officers' personal histories, ambitions, and vulnerabilities remain central to how policing unfolds on the street.

Transitioning from the Informal to the Formal Economy International Labour Conference 2013 Provides an overview of the phenomenon of the informal economy, its impact on the attainment of decent work for all workers and employers and the ILO's approach to the transition to formality, as set out in the 2002 Conclusions. Looks at the regulatory environment relating to the informal economy at the international and national levels, with examples of existing laws and practice from different regions, legal systems, traditions and circumstances adopted by ILO constituents to ensure a progressive transition to the formal economy. Examines the need for an integrated policy framework, encompassing the ILO's four strategic objectives (fundamental principles and rights at work, employment, social protection and social dialogue) adapted to the national context of each member State for a progressive transition to the formal economy and decent work.

The Development of Transnational Policing Taylor & Francis Group 2021-06-30 This book draws together the insights of eminent academics and specialists to present an overview of past and present approaches to transnational policing throughout the Anglophone world. It aims to revitalize the study of transnational policing by showing that past and present developments in this field remain poorly understood, while also suggesting future avenues of research. Containing chapters on police history, police accountability, gendered hate crime in an increasingly online world, counter-radicalisation strategies being pursued around the world, internet-facilitated sex trafficking and changes in organised crime, amongst others, the authors adopt revisionist, orthodox and progressive views in order to challenge our understanding and appreciation of developments in transnational policing. All of the chapters in the book use policing models employed within the UK as either their focal point or as a point of comparison so that direct comparisons and contrasts can be examined. The Development of Transnational Policing illustrates distinctive and separate aspects of what remains an undoubtedly complex and dynamic field, but also forms an overview of developments and the dearth of academic research which surround them, in order hopefully to inspire researchers, policymakers and practitioners alike.

Police Corruption in Comparative Perspective George Chak Man Lee 2019-08-26 How has rapid economic modernization in China and India impacted upon policing? To what extent are the two police forces trusted by its citizens? Do the police carry out their duties in a fair and unbiased fashion? What does police corruption look like and why does it persist? And what are the influencing factors in decision-making at the moments-of-truth? Filling the lacuna of research into the police in China and India, this book offers a unique comparative study of the prevalence, nature and organization of police corruption in these countries. This book provides key insights into the relationships between rapid economic modernisation, urbanisation and crime, and its effects on police organisational culture and behaviour as well as on ethical decision making. Moreover, this book performs an audit on which country is better placed to tackle corruption and professionalise their police service. It offers a major contribution to comparative research on criminal justice. It is essential reading for all policing scholars and will be of interest to students of criminology, social and political sciences, development studies, Asian studies, and post-colonial studies.

Truth Commissions and Transitional Societies Eric Wiebelhaus-Brahm 2010-01-05 Despite the increasing frequency of truth commissions, there has been little agreement as to their long-term impact on a state's political and social development. This book uses a multi-method approach to examine the impact of truth commissions on subsequent human rights protection and democratic practice. Providing the first cross-national analysis of the impact of truth commissions and presenting detailed analytical case studies on South Africa, El Salvador, Chile, and Uganda, author Eric Wiebelhaus-Brahm examines how truth commission investigations and their final reports have shaped the respective societies. The author demonstrates that in the longer term, truth commissions have often had appreciable effects on human rights, but more limited impact in terms of democratic development. The book concludes by considering how future research can build upon these findings to provide policymakers with strong recommendations on whether and how a truth commission is likely to help fragile post-conflict societies. This book will be of

interest to students and scholars of Transition Justice, Human Rights, Peace and Conflict Studies, Democratization Studies, International Law and International Relations.

Violence Against Children in the Criminal Justice System Wendy O'Brien 2019-09-30 Children who come into conflict with the law are more likely to have experienced violence or adversity than their non-offending peers. Exacerbating the deleterious effects of this childhood trauma, children's contact with the criminal justice system poses undue risks of physical, sexual, and psychological violence. This book examines the specific forms of violence that children experience through their contact with the criminal justice system. Comprising contributions from leading scholars and practitioners in children's rights and youth justice, this book profiles evidence-based prevention strategies and case studies from around the world. It illustrates the diversity of contexts in which various forms of violence against children unfold and advances knowledge about both the nature and extent of violence against children in criminal justice settings, and the specific situational factors that contribute to, or inhibit, the successful implementation of violence prevention strategies. It demonstrates that specialised child justice systems, in which children's rights are upheld, are crucial in preventing the violence inherent to conventional criminal justice regimes. Written in a clear and accessible style, this book will be of interest to students and researchers engaged in studies of criminology and criminal justice, youth justice, victimology, crime prevention, and children's rights.
