Business Anthropology Ann T. Jordan 2012-10-02 Viewed as a breakthrough in applied anthropology, Business Anthropology was the first concise work to juxtapose, compare, and integrate anthropological methods and theories with those of contemporary business practices and theories. In this latest edition, Jordan retains enduring, illustrative examples and adds fresh insights to familiarize readers with anthropological techniques and show their ever-growing utility in a variety of organizational and consumer settings. Business Anthropology explains how anthropologists distinctive training and skills equip them to address issues ranging from work processes, diversity, and globalization to product design and consumer behavior, in both for-profit and nonprofit organizations. Anthropologists use a holistic approach to gather and analyze data. They get to know people both inside and outside the organization, understand diverse perspectives from an objective viewpoint, gain in-depth knowledge about local wants and needs, and see old realities in new ways.

I'm Off Then Hape Kerkeling 2009-06-16 *I'm Off Then* has sold more than three million copies in Germany and has been translated into eleven languages. The number of pilgrims along the Camino has increased by 20 percent since the book was published. Hape Kerkeling's spiritual journey has struck a chord. Overweight, overworked, and disenchanting, Kerkeling was an unlikely candidate to make the arduous pilgrimage across the Pyrenees to the Spanish shrine of St. James, a 1,200-year-old journey undertaken by nearly 100,000 people every year. But he decided to get off the couch and do it anyway. Lonely and searching for meaning along the way, he began the journal that turned into this utterly

frank, engaging book. Filled with unforgettable characters, historic landscapes, and Kerkeling's self-deprecating humor, *I'm Off* Then is an inspiring travelogue, a publishing phenomenon, and a spiritual journey unlike any other.

Compasito Nancy Flowers 2007-01-01 Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for. 'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

Dracfried: Dracula versus Diesel Cornel Stan This is a thriller about Dracula and Dracula's offspring and about the vampire's native land, Transylvania. Based on actual historical and geographical facts, expanded with local legends and beliefs, this vampire novel speaks about Dracula's spirit's influencing the contemporary world. "Dracfried: Dracula versus Diesel. A Vampire Novel," written in German by world famous Professor for burning processes Cornel Stan and translated into English by Adriana Crăciun, is a captivating vampire epic, presenting Dracula's history as well as the history of Dracula's offspring, coming all the way down to present-day Transylvania. In the midst of a huge international scandal in the automobile world, triggered by handling pollutant emissions, a young and brave hero aspires, from Transylvania, to the stars: Siegfried--laughed at, but also feared, under the nickname of Dracfried. On his way, Dracfried doesn't ride the broomstick, but a motorcycle with absolutely visionary technique. The hero isn't a magician, but he pushes his limits to physics' boundaries, which he uses to create revolutionary propulsion systems. His existence, however, is determined by a form of metaphysics, fascinating and not explainable, related to the legendary Count Dracula of Transylvania. Until one day... Cornel Stan delivers lectures on mobility of the future, from Saxony and Paris to California and Transylvania. After two dozen specialized books that have been translated into several languages, he published his first novel, Carmakers, which is welcomed by readers. His writer career continues with Dracfried, who is just starting his hero career. Scientific and Technical Revolution: Yesterday, Today and Tomorrow Elena G. Popkova 2020-06-05 This book presents a system view of the digital scientific and technological revolution, including its genesis and prerequisites, current trends, as well as current and potential issues and future prospects. It gathers selected research papers presented at the 12th International Scientific and Practical Conference, organized by the Institute of Scientific Communications. The conference "Artificial Intelligence: Anthropogenic Nature vs. Social Origin" took place on December 5–7, 2019 in Krasnoyarsk, Russia. The book is intended for academic researchers and independent experts studying the social and human aspects of the Fourth Industrial Revolution and the associated transition to the digital economy and Industry 4.0, as well as the creators of the legal framework for this process and its participants – entrepreneurs, managers, employees and consumers. It covers a variety of topics, including "intelligent" technologies and artificial intelligence, the digital economy, the social environment of the Fourth Industrial Revolution and its consequences for humans, the regulatory framework of the Fourth Industrial Revolution, and the "green" consequences, prospects and financing of the Fourth Industrial Revolution.

Applied Anthropology John Van Willigen 2002 Focuses on the use of the methods and theories of anthropology to solve the practical problems of human communities. It addresses a wide range of problem-solving practices in both development action and applied research. The core of the book is chapters focused on specific practices such as evaluation and action research. In addition, there are chapters on history, employment strategies, and ethics.

Brothers in War Michael Walsh 2007 The Beecheys were a close-knit family: eight brothers and five sisters under the loving eye of their mother. But swept into the devastation of the Great War, the brothers paid the ultimate price for King and country, one after another. A family sacrifice almost without parallel, it was forgotten and unmarked - until now. In a small case handed down through the family were hundreds of letters from the boys. Scraps of paper scribbled on in the firing line, heartfelt deathbed letters and exasperated notes detailing

life in the trenches. Piecing together the Beechey story, Michael Walsh interweaves these letters with a moving account of the war, and its shattering effects at home and abroad.

Diverse Teams at Work Lee Gardenswartz 2003 Strategies for making differences in work teams an asset, not a liability are provided in this practical guide. Team members are helped to understand and make the most of their differences and to overcome barriers to achievement that are sometimes the result of diversity. More than 50 worksheets provide teams, team leaders, trainers, and consultants with processes, guidance, and tools to learn how to diversify groups while building relationships. An appendix provides an annotated list of resources, including books, training activities, and videos that are helpful in developing group members and training team leaders.

How Social Movements Can Save Democracy Donatella della Porta 2020-04-03 The birth of democracies owes much to the interventions and mobilizations of ordinary people. Yet many feel as though they have inherited democratic institutions which do not deliver for the people – that a rigid democratic process has been imposed from above, with increasing numbers of people feeling left out or left behind. In this well-researched volume, leading political sociologist Donatella della Porta rehabilitates the role social movements have long played in fostering and deepening democracy, particularly focusing on progressive movements of the Left which have sought to broaden the plurality of voices and knowledge in democratic debate. Bridging social movement studies and democratic theory, della Porta investigates contemporary innovations in times of crisis, particularly those in the direction of participatory and deliberative practices – ‘crowd-sourced constitutions’, referendums from below and movement parties – and reflects on the potential and limits of such alternative politics. In a moment in which concerns increase for the potential disruption of a Great Regression led by xenophobic movements and parties, the cases and analyses of resistance in this volume offer important material for students and scholars of political sociology, political science and social movement studies.

The Future of the Social Investment State Marius R. Busemeyer 2020-04-02 Social investment is part of a strategy to modernize the European welfare states by focusing on human resource development throughout the life-course, while ensuring financial sustainability. The last decades have seen cost containment in areas such as pensions and health care, but also expansion in areas such as early childhood education, higher education and active labor market policies. This development is linked to a Social Investment (SI) approach, which should, ideally, promote a better reconciliation of work and family life, high levels of labor market productivity and strong economic growth, while also mitigating social inequality. However, institutionalization of policies that may mainly benefit the middle class has some unintended effects, such as perpetuating new inequalities and the creation of other Matthew effects. While research on the

rise of the social investment state as a new paradigm of social policy-making for European welfare states has grown significantly, there are still important gaps in the literature. The chapters in this book address the controversies around social investment related to inequalities, individual preferences and the politics of social investment. This volume is therefore organized around policies, politics and outcomes. The contributing authors bring together expert knowledge and different perspectives on SI from several disciplines, with original path-breaking empirical contributions, addressing some key questions that thus far are unanswered, related to Matthew effects, inequalities, ambiguities of social investment and institutional complementarities. Furthermore, it is the first volume that covers the core policy areas of social investment: childcare, education and labour market policies. The chapters in this book were originally published in a special issue of the Journal of European Public Policy.

The Sell Fredrik Eklund 2015-04-14 The nation's #1 real estate broker and star of Bravo's Million Dollar Listing New York shares his secrets for superstar success and getting what you want out of life—no matter who you are or what you do. Ten years ago, Fredrik Eklund moved to New York City from his native Sweden with nothing but a pair of worn-out sneakers and a dream: to make it big in the city that never sleeps. Since then, he's become the top seller in the most competitive real estate market on the planet, brokering multimillion-dollar deals for celebrities, selling out properties all over the city, and charming audiences around the world as one of the stars of the hit Bravo series Million Dollar Listing New York. Now, for the first time, Fredrik shares his secrets so that anyone can find success doing what they love. According to Fredrik, even if you don't consider yourself a salesperson, you've been in sales your whole life because every day you are selling your most important asset: yourself. Whenever you influence, persuade or convince someone to give you something in exchange for what you've got—whether it's a luxury home, a great idea at work, or your profile on Match.com—you are selling. And if you know how to sell the right way, you can live your dream. That is what *The Sell* is all about. Blending personal stories, hilarious anecdotes, and the expertise he's gained from his meteoric rise, Fredrik has written the modern guide on becoming successful, a book that tells you how to recognize and cultivate your true talents and make the ultimate sell. From the importance of being your most authentic self to looking like a million bucks even if you don't have a million bucks (yet!), he shows how intangible factors like personality and charm can get you noticed and make you shine. He also shares his tips and tricks for preparing, persuading, and negotiating so that in any of life's dealings, you'll come out a winner. Whether you work on Wall Street or at Wal-Mart, aim

to become the top seller at your company or want to impress a first date, *The Sell* will help you have more personal and professional success, lead a rich and fulfilling life, and have fun along the way.

Does Education Matter? Alison Wolf 2002-05-30 "Education, education, education" has become an obsession for politicians and the public alike. It is seen as an economic panacea: an engine for growth and prosperity. But is there a link between increased spending on higher education and economic growth? Professor Alison Wolf takes a critical look at successive governments' education policy and challenges many of the tenets of received wisdom: there are no economic reasons for spending more on higher education in order to stimulate growth. The conclusion of this devastating book is that a large proportion of the billions poured into vocational training and university provision might be better spent on teaching the basics at primary school.

The Curated Closet Anuschka Rees 2016-09-20 Is your closet jam-packed and yet you have absolutely nothing to wear? Can you describe your personal style in one sentence? If someone grabbed a random piece from your closet right now, how likely is it that it would be something you love and wear regularly? With so many style and shopping options, it can be difficult to create a streamlined closet of pieces that can be worn easily and confidently. In *The Curated Closet*, style writer Anuschka Rees presents a fascinatingly strategic approach to identifying, refining, and expressing personal style and building the ideal wardrobe to match it, with style and shopping strategies that women can use every day. Using *The Curated Closet* method, you'll learn to:

- Shop smarter and more selectively
- Make the most of your budget
- Master outfit formulas and color palettes
- Tweak your wardrobe for work
- Assess garment fit and quality like a pro
- Curate a closet of fewer, better pieces

Including useful infographics, charts, and activities, as well as beautiful fashion photography, *The Curated Closet* is the ultimate practical guide to authentic and unique style.

Applying Anthropology in the Global Village Christina Wasson 2016-06-16 The realities of the globalized world have revolutionized traditional concepts of culture, community, and identity—so how do applied social scientists use complicated, fluid new ideas such as translocality and ethnoscape to solve pressing human problems? In this book, leading scholar/practitioners survey the development of different subfields over at least two decades, then offer concrete case studies to show how they have incorporated and refined new concepts and methods. After an introduction synthesizing anthropological practice, key theoretical concepts, and ethnographic methods, chapters examine the arenas of public health, community development, finance, technology, transportation, gender, environment, immigration, aging, and child welfare. An innovative guide to joining dynamic theoretical concepts with on-the-ground problem solving, this book will be of interest to practitioners from a wide

range of disciplines who work on social change, as well as an excellent addition to graduate and undergraduate courses.

The Workforce Scorecard Mark A. Huselid 2005-03-15 In a marketplace fueled by intangible assets, anything less than optimal workforce success can threaten a firm's survival. Yet, in most organizations, employee performance is both poorly managed and underutilized. The Workforce Scorecard argues that current management and human resources practices hinder employees' ability to contribute to strategic goals. To maximize the power of their workforce, organizations must meet three challenges: view their workforce in terms of contribution rather than cost; replace benchmarking metrics with measures that differentiate levels of strategic impact; and make line managers and HR professionals jointly responsible for executing workforce initiatives. Building on the proven model outlined in their best-selling book *The HR Scorecard*, Mark Huselid, Brian Becker, and co-author Richard Beatty show how to create a Workforce Scorecard that identifies and measures the behaviors, competencies, mind-set, and culture required for workforce success and reveals how each dimension impacts the bottom line. Practical and timely, *The Workforce Scorecard* offers crucial lessons for leveraging human capital to achieve strategic success.

A New German Idealism Adrian Johnston 2018-05-01 In 2012, philosopher and public intellectual Slavoj Žižek published what arguably is his magnum opus, the one-thousand-page tome *Less Than Nothing: Hegel and the Shadow of Dialectical Materialism*. A sizable sequel appeared in 2014, *Absolute Recoil: Towards a New Foundation of Dialectical Materialism*. In these two books, Žižek returns to the German idealist G. W. F. Hegel in order to forge a new materialism for the twenty-first century. Žižek's reinvention of Hegelian dialectics explores perennial and contemporary concerns: humanity's relations with nature, the place of human freedom, the limits of rationality, the roles of spirituality and religion, and the prospects for radical sociopolitical change. In *A New German Idealism*, Adrian Johnston offers a first-of-its-kind sustained critical response to *Less Than Nothing* and *Absolute Recoil*. Johnston, a leading authority on and interlocutor of Žižek, assesses the recent return to Hegel against the backdrop of Kantian and post-Kantian German idealism. He also presents alternate reconstructions of Hegel's positions that differ in important respects from Žižek's version of dialectical materialism. In particular, Johnston criticizes Žižek's deviations from the secular naturalism

and Enlightenment optimism of his chosen sources of inspiration: not only Hegel, but Karl Marx and Sigmund Freud too. In response, Johnston develops what he calls transcendental materialism, an antireductive and leftist materialism capable of preserving and advancing the core legacies of the Hegelian, Marxian, and Freudian traditions central to Žižek.

Rethinking Politicisation in Politics, Sociology and International Relations

Claudia Wiesner 2021-01-04 This book decisively advances the academic debate on politicisation beyond the state of the art. It is the first book to theorise and conceptualise 'politicisation' across the epistemic communities of different subdisciplines, bringing together the different strands in the debate: (international) political theory, political sociology, comparative politics, EU studies, legal theory and international relations. This provides a comprehensive discussion of different concepts of politicisation, their ontological and theoretical backgrounds, and their analytical value, including speech-act, practice- and actor-oriented approaches. Furthermore, the linkages of politicisation to the concepts of politics and the political, democracy, depoliticisation, juridification, populism, and Euroscepticism are clarified. Finally, the book shows how the methodological toolbox in empirical politicisation research can be completed regarding different arenas, actors and modes of politicisation. The volume thus provides a much-needed theoretical and conceptual reflection to the newly emerging research field of politicisation in order to recognise and define the key issues and build a solid foundation for further debate and empirical research. 'When does something come to be considered political - for good or for ill? In social scientific terms, what is politicisation, under what conditions does it occur, created by whom, and with what consequences. These questions drive this outstanding collection of papers that explore how politicization is to be theorized and methodologies for its study. Rather than just a special sphere of activity, the volume demonstrates how politics is best thought of as an activity that can occur across individual and various collective levels. One of the signature contributions of this volume is its exploration of these issues across disciplines: political science, philosophy, sociology and international relations. The texts will be of interest to all students of politics at a time when the very basis of political identity, action, and organization is contested, normatively and analytically. The texts will help bring clarity to these debates.' –David L. Swartz, Department of Sociology, Boston University, USA 'Politization has become a widely used and disputed term In International Relations (IR) and more recently in comparative politics as well. This edited volume tries to elevate the term politization onto an analytical concept by i.a. opening it up for action theoretical and organizational approaches. One of the great achievements of the editor is to bring conceptual order into a dispersed debate across political science and its subdisciplines. Moreover, the contributions show how to apply the concept(s) of politization on such different subjects such as democratization, de-democratization, transitions, denationalization or the emergence of populism and Euroscepticism. This is a much-awaited book which can become a conceptual point of reference for better understanding the evolution of national and international regimes.' –Wolfgang Merkel, Humboldt University

of Berlin, Germany

Understanding Human Rights Wolfgang Benedek 2012 This third edition of Understanding Human Rights has been elaborated by the European Training and Research Center for Human Rights and Democracy (ETC) in Graz, originally for the Human Security Network (HSN) at the initiative of the Austrian Ministry for Foreign Affairs. The objective is to assist human rights education efforts worldwide. The book's thematic modules on selected human rights issues cover topics such as: the prohibition of torture, freedom from poverty, human rights of women and children, human rights in armed conflict, freedom of expression, and democracy. New to this updated edition are chapters reflecting current trends in human rights, including new modules on privacy (such as challenges posed by Internet use), minority rights, and the right to asylum. Translations of the earlier editions already exist in 15 languages, among them all the official United Nations languages. Understanding Human Rights has become a basic text for human rights education and training in different countries, on different levels, and for different audiences, from university lectures in China to NGO training in Mali to police training in Kosovo.

Visible Learning John Hattie 2008-11-19 This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers – an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

The European Central Bank between the Financial Crisis and Populisms Corrado Macchiarelli 2020-08-25 □In light of the handover from the European Central Bank President Mario Draghi to Christine Lagarde in November 2019, this book provides an in-depth analysis of the events which unfolded since the euro area sovereign debt crisis in 2010 up until today. The book focuses on the far-reaching implications of the last decade, shedding light on a wide spectrum of political, economic and financial aspects of the European poly-crises and how monetary policy reacted to these challenges. The book places particular emphasis on the tensions that the supranational central bank was subject to during this period, and on their outcomes in terms of the policies, their legitimacy, and their public reception. As such, this book will be relevant not

only to understand the political implications of the past crisis but also, and foremost, in understanding "what is next".
