Haunted Museum Jonah Siegel 2021-04-13 For centuries, southern Europe, and Italy in particular, has offered writers far more than an evocative setting for important works of literature. The voyage south has been an integral part of the imagination of inspiration. Haunted Museum is a groundbreaking, in-depth look at fantasies of Italy from the late eighteenth to the early twentieth centuries, focusing on a literary tradition Jonah Siegel terms the "art romance"--the fantastic voyage south understood as the register of an ambivalent desire for art and a heightened experience of reality. Siegel argues that Italy's allure derives not only from its celebrated promise of unique natural beauty and prized antiquities, but from the opportunity it offers writers to place themselves in relation to a web of prior accounts of travel to the native land of genius. Beginning with Goethe as the founding figure of the tradition, Haunted Museum moves from a rich reframing of literature from the first half of the nineteenth century--including new readings of works by Byron, de Staël, Barrett Browning, and others--to an ambitious examination of Henry James's well-known engagement with Europe, newly understood as a response to this important literary legacy. Readings of works by Freud, Forster, Mann, and Proust demonstrate the longevity of the tradition of looking to Italy for the representation of desires as impossible to satisfy as they are to deny.

Rebuilding Coventry Sue Townsend 2013-01-31 From the bestselling author of the Adrian Mole series and The Woman who Went to Bed for a Year comes a brilliant, laugh-out-loud satire on modern Britain

and the battle of the sexes 'There are two things that you should know about me immediately: the first is that I am beautiful, the second is that yesterday I killed a man. Both things were accidents . . .' When Midlands housewife Coventry Dakin kills her neighbour in a wild bid to prevent him from strangling his wife, she goes on the run. Finding herself alone and friendless in London she tries to lose herself in the city's maze of streets. There, she meets a bewildering cast of eccentric characters. From Professor Willoughby D'Eresby and his perpetually naked wife Letitia to Dodo, a care-in-the-community inhabitant of Cardboard City, all of whom contrive to change Coventry in ways she could never have foreseen . . .

The Artist as Curator Tiziana Caianiello 2015 This massive publication, initiated by the ZERO foundation in Dusseldorf, presents the result of several years of collaboration by an international group of scholars composed of art historians from Belgium, Germany, Italy, the Netherlands and Switzerland. The texts are based on extensive research in various archives in Europe and the United States that has brought to light unpublished material. They reflect the cooperation of the ZERO foundation with other institutions, foundations and private archives. Formed at the beginning of the 1960s, the ZERO group was an international network of like-minded artists from Europe, Japan and North and South America that included among its ranks such artists as Lucio Fontana, Yves Klein, Yayoi Kusama, Piero Manzoni, Almir Mavignier, Jan Schoonhoven and Jesus Rafael Soto.

Negative Space Peter Weibel 2021-12-28 A bold new spatial perspective on modern sculpture, with 800 color images of work by artists including Henry Moore, Lygia Clark, Anish Kapoor, and Ana Mendieta. This monumental, richly illustrated volume from ZKM | Karlsruhe approaches modern sculpture from a spatial perspective, interpreting it through contour, emptiness, and levitation rather than the conventional categories of unbroken volume, mass, and gravity. It examines works by dozens of twentieth- and twenty-first-century artists, including Hans Arp, Marcel Duchamp, Henry Moore, Barbara Hepworth, Lygia Clark, Anish Kapoor, Olafur Eliasson, Ana Mendieta, Fujiko Nakaya, Tomás Saraceno, and Alicja Kwade. The large-scale book contains over 800 color images. Negative Space comes out of an epic exhibition at ZKM, and volume editor Peter Weibel (Chairman and CEO of ZKM) takes a curatorial approach to the topic. The last exhibition to deal comprehensively with the question "What is modern sculpture?" was at the Centre Georges Pompidou in 1986. Weibel and ZKM pick up where the Pompidou left off, examining sculptures not as figurative, solid, and self-contained monoliths but in terms of open and hollow spaces; reflection, light, shadow; innovative materials; data; and the moving image. Weibel puts advances in science, architecture, and mathematics in the context of avant-garde sensibilities to show how modern sculpture significantly deviates from the work of the past. Texts in the volume include an introduction and twelve chapters written by Weibel with contributions by cocurators as well as facsimiles and reproductions of artist-authored manifestos.

A Compulsion for Antiquity Richard H. Armstrong 2018-07-05 "If psychoanalysis is the return of repressed antiquity, distorted to be sure by modern desire, yet still bearing the telltale traces of the ancient archive, then would not our growing distance from the archive of antiquity also imply that we are in the process of losing our grip on psychoanalysis itself, as Freud conceived it?"—from Chapter 1

As he developed his striking new science of the mind, Sigmund Freud had frequent recourse to ancient culture and the historical disciplines that draw on it. *A Compulsion for Antiquity* fully explores how Freud appropriated figures and themes from classical mythology and how the theory and practice of psychoanalysis paralleled contemporary developments in historiography, archaeology, philology, and the history of religions. Drawing extensively from Freud's private correspondence and other notes and documents, Richard H. Armstrong touches on Freud's indebtedness to Sophocles and the Oedipus complex, his interest in Moses and the Jewish religion, and his travels to Athens and Rome. Armstrong shows how Freud turned to the ancient world to deal with the challenges posed by his own scientific ambitions and how these lessons influenced the way he handled psychic "evidence" and formulated the universal application of what were initially isolated clinical truths. Freud's narrative reconstructions of the past also related to his sense of Jewishness, linking the historical trajectory of psychoanalysis with contemporary central European Jewish culture. Ranging across the breadth of Freud's work, *A Compulsion for Antiquity* offers fresh insights into the roots of psychoanalysis and fin de siècle European culture, and makes an important contribution to the burgeoning discipline of mnemohistory.

Pathologies of Travel Richard Wrigley 2000 The essays in this volume, which range across Europe, America and Africa, and from the 18th to the 20th centuries, argue that the experience of travel, and the business of representing that experience, involved an obligatory engagement with the disturbing perception that travel's pleasures were inseparable from its dangers and ennui. Despite the confidence of some medical authorities in their recommendations of the therapeutic benefits to be derived from 'change of air' as a way of restoring a state of health, such opinions failed to establish a consensus, either amongst those who followed such peripatetic prescriptions, or amongst the medical professions in general. Mad doctors and climatologists alike were forced to adopt an essentially partisan stance in arguing their case for such recommendations, and were confronted by rival practitioners who could marshal counter-case histories which demonstrated diametrically opposed conclusions concerning the advisability of travel. To this extent, the history of travel and its pathologies is a particularly revealing instance of the way medical thinking was dependent on localised studies which might do more to challenge the universal applicability of generally accepted theories than they did to confirm their diagnostic reliability. The essays collected here not only contribute to our understanding of the conception and application of a variety of medical ideas, showing how they depended on beliefs about climate and corporeal constitution as well as often inconsistent data or récits culled from travellers and geographically dispersed case histories, but also open up illuminatingly complex perspectives on the uncertainties and dangers of the phenomenon of modern travel.

By the Way, Did I Ever Tell You Sibylle Berg 2007 Writer Sibylle Berg has the eye of an entomologist: Under her gaze, humanity falls into a taxonomy of wretched characters, full of dramas and impossible dreams--though she always manages to carry them through their travails with a dose of empathy and a sense of humor. In this novella, previously unpublished in English, Berg boldly relates the lives of two children growing up in East Germany. They communicate through the things that were not said, the projects that came to nothing, their loneliness, boredom and confinement. The story allows for positive endings, but is no average coming of age narrative. Berg was born in Weimar in 1962, and though she currently lives in Zurich, she is still heralded as one of Germany's most provocative writers. This beautifully produced, small-edition volume includes illustrations by Swiss artist, Andro Wekua and American Rita Ackermann.

Variation, Change, and Phonological Theory Frans L. Hinskens 1997-12-11 There is a growing awareness that a fruitful cooperation between the (diachronic and synchronic) study of language variation and change and work in phonological theory is both possible and desirable. The study of

language variation and change would benefit from this kind of cooperation on the conceptual and theoretical levels. Phonological theory may well profit from a greater use of what is commonly called 'external evidence'. This volume contains contributions by outstanding representatives from the more data-oriented fields and phonological theory. They discuss possibilities and problems for a further integration of both areas, by considering questions such as where and to which extent the two may need each other, and whether there is a need for an interdisciplinary conceptual framework and methodology. Attention is also paid to questions regarding the cause and actuation, linguistic constraints and the internal spread of linguistic change, as well as to possible and impossible processes of language change.

Maciunas' Learning Machines Astrit Schmidt-Burkhardt 2011-06-29 The art of cross-linked thinking consists in facilitating dealing with complexity and admitting new insights. This approach, prevailing in all realms of knowledge, determines also the artistic praxis of Fluxus initiator George Maciunas. This book shows some hundred diagrams and maps related to history from antiquity to postmodernism; they serve to visualize artistic, political, and economic correlations. If it were up to Maciunas, there wouldn't be any real concept of the past without percepts. With his maps, diagrams, and tables, a big part of which is published for the first time, he tries to draw a picture of history in a different way. The result seems fascinating both on a scientific and artistic level. It opens insights into eye-opening correlations between dates and facts as well as makes appear completely novel forms of knowledge transfer.

Picasso and Photography Anne Baldassari 1997 The extent to which photography influenced the work of Pablo Picasso is now considered by scholars to be of great importance in the understanding of the artist's entire oeuvre. Linked to a major exhibition, this beautifully illustrated books present a unique view into Picasso's relationship with the photographic arts. The presence in his personal estate of several thousand photographic images, donated to the French government upon his death, prompted this study and bears powerful witness to the artist's versatility and imaginative depth. The collection featured here includes nineteenth-century portraits, postcards featuring colonial themes or ethnic groups in regional dress, as well as portraits, self-portraits and studio views taken by Picasso himself. Already at the turn of the century, they contributed to the artist's figurative expression as well as to his major cubist interpretations. The artist commanded a wealth of themes, styles, and media over his long and productive career, and he explored drawing, painting, and sculpture. His voracious appetite for experimentation led him to push the medium to unorthodox extremes, both stylistically and technically. The range of Picasso's photographic production comprises a variety of forms and techniques and resulted in independent works of art: superimposed photographs, cliché-verres, photo-based engravings, photograms and original drawings on photographs, slides, collages, and photographic cutouts. His collaborations with other artists such as Dora Maar, Brassai, Gjon Mili, and André Villers reveal a playful inventiveness, and demonstrate his ability to push photography in unexpected directions. The works featured in this study provide new insight into Picasso's creative world. An outstanding text by Anne Baldassari makes a major contribution to Picasso scholarship by examining what could be the last unknown area of the artist's work.

Gentlemen of Instinct and Breeding Fikret K. Yegul 1991 The American Academy in Rome developed out of the pioneering spirit of an American artistic Renaissance at the turn of the century. At the time, the predominate view held that classical and renaissance styles in architecture represented the most refined taste and were best suited to meeting the future needs of America. The Academy was considered to be the final stage in the education of promising young Americans. Between its founding in 1894 and World War II, some 46 Fellows in architecture and landscape architecture studied at the Academy. This book presents the first historical overview of the education the Fellows received, placing their work in the context of the time, and discussing their relationship and changing obligations to the institution. The text is accompanied by 150 outstanding architectural renderings, many of which have not been reproduced before.

Witness to Phenomenon Joseph D. Ketner II 2017-12-28 Witness of Phenomenon articulates a fresh examination of the German Group Zero-Heinz Mack, Otto Piene, and Günter Uecker-and other new tendency artists, who rejected painting and introduced new art media in postwar Europe. Group ZERO evolved into a network across Europe- Amsterdam, Milan, Paris, and Zagreb. This pan-European affiliation of artists generated a continuous stream of innovative artistic statements through the 1960s, incorporating non-traditional materials and new technologies to create kinetic art, light installations, performances, immersive multimedia installations, monumental land art, and the communication media of video and television. They transformed the visual arts from the inanimate objet d'art to a sensory experience by adopting the ascendant philosophy of Phenomenology as their conceptual foundation. Drawing from a decade of research on unpublished archives of the artists and critics of this period, this publication positions Group ZERO as a catalytic art moment in the transition from modern to contemporary art.

Venetians Dale Chihuly 2001 This book presents the most flamboyant and whimsical of all Chihuly's series. The voluptuous glass pieces, shown in full-colour, were inspired by Art Deco Venetian glass during Chihuly's Fullbright scholarship in Venice. With collaboration between Chihuly and glass master Lino Tagliapietra, the series evolved over a period of only seven blowing sessions. Though at their core, the Venetians are vessels of some sort, they explode outward when wrapped with spiralling coils, leaves, feathers, and claws in startling colour combinations. Chihuly chronicles the evolution of the series in his reflective essay included in this volume. His bold and colourful drawings illustrate how the artist guided his team to make these pieces. This oversized book offers a breathtaking view of Chihuly's Venetians, which, more than any other of his series, embody personality and individual character. This book begins with an essay by Ron Glöwen.

Just Call Me Superhero Alina Bronsky 2014-10-09 An atmospheric evocation of modern Berlin, a vivid portrait of youth under pressure, and a moving story about learning to love, this new novel from the author of *Broken Glass Park* is an irreverent look at the sometimes difficult work of self-acceptance. Badly disfigured as a result of an encounter with a dog, seventeen-year-old Marek begins attending a support group for young people with physical disabilities, which he dubs "the cripple group," led by an

eccentric older man known only as The Guru. Marek is dismissive of the other members of the support group, seeing little connection between their misfortunes and his own. The one exception to this is Janne, the beautiful wheelchair-bound girl with whom he has fallen in love. When a family crisis forces Marek to face his demons, with or without the group, he finds himself in dire need of support. But the distance he has put between himself and The Guru's misshapen acolytes may well be too great to bridge. Just Call Me Superhero is destined to consolidate Alina Bronsky's reputation as one of her generation's most compelling and stylish young authors.

Zero Valerie Hillings 2014-10-06 ZERO: Countdown to Tomorrow, 1950s60s, is the first large-scale historical survey in the United States dedicated to the German artist group Zero (195766). Founded by Heinz Mack and Otto Piene, joined by Günther Uecker in 1961, the group expanded to include ZERO, an international network of like-minded artists who shared the group's aspiration to redefine art in the aftermath of World War II. Featuring more than thirty artists from nine countries, the catalogue explores the experimental practices developed by this extensive network of artists whose work anticipated aspects of Land art, Minimalism, and Conceptual art. The publication is organized around points of intersection, exchange, and collaboration that defined these artists' shared history. Among the themes explored are the establishment of new definitions of painting; the introduction of movement and light as both formal and idea-based aspects of art; the use of space as subject and material; the interrogation of the relationship between nature, technology, and humankind; and the production of live actions or demonstrations. At once a snapshot of a specific group and a portrait of a generation, this title celebrates the pioneering nature of both the art and the transnational vision advanced by the ZERO network.

Art & Today Eleanor Heartney 2013-09-02 Art & Today is an innovative and extensive survey of international contemporary art from the 1980s to the present. Over four hundred of the most significant contemporary artists from around the world are represented in this comprehensive overview - some emerging, some mid-career, and others long established. Each of the book's sixteen chapters address recurring and relevant themes as diverse as "Art & Popular Culture," "Art & Its Institutions," and "Art & Globalism," rather than follow a strict chronological, geographical, or stylistic structure. Lively and up-to-date, Art & Today explores an era in which art defies simple categorization. The result is a surprising and original yet clear and reasoned perspective on contemporary art that breaks from prescribed classifications to offer a survey as expansive as the art it describes. For instance, in the chapter "Art & the Body," one might find performance discussed alongside figurative painting, sculpture and photography alongside video, and North American artists alongside Asian artists. The chapter "Art and Globalism" discusses artists whose nationality, generation, and medium are as diverse as those of Alan Sekula, Michal Rovner, Cildo Meireles, Manuel Ocampo, Chen Zhen, and Andreas Gursky. Internationally renowned art critic and scholar Eleanor Heartney is respected for her clear language and pragmatic approach to contemporary art. Her straightforward, engaging descriptions and explanations will appeal to both experts and newcomers alike, and will serve as an invaluable resource for years to come.

Stories Peter Lindbergh 2002 This retrospective features not only the acclaimed fashion photographer's print photo campaigns but also the outtakes, Polaroids, and scouting photos of the photographer's "little films" that have redefined the art with their compelling realism and depth of emotion. 250 color & duotone photos.

Martin Schoeller: Survivors 2020-06-25 Haunting images of 75 Israeli Holocaust survivors by renowned portrait photographer Martin Schoeller Marking the 75th anniversary of the liberation of

Auschwitz on 27 January 1945, these portraits by New York-based photographer Martin Schoeller (born 1968) were photographed in cooperation with Yad Vashem, the World Holocaust Remembrance Center. Schoeller's compelling images capture the weathered faces of Jewish men and women who lived through and witnessed the atrocities of the Holocaust, and allow viewers to look into their eyes for traces of the experiences they endured and to be inspired by their resilience and remarkable strength of spirit. Targets of baseless anguish and suffering simply because they were Jewish, their lives were forever altered during the dark years of the Holocaust. Each photograph offers a portal to the vast legacy of the victims and the survivors.

Negro Sculpture Carl Einstein 2016-12-05 Negro Sculpture (1915) was the first critical response to African sculpture, challenging prejudices and misconceptions around this subject. It quickly became a crucial text for the European avant-garde and today remains indispensable to understanding the shift in discussion towards non-European art taking place at the time.
