

Johannesburg Metro Police Trainees For 2014

Thank you very much for downloading **johannesburg metro police trainees for 2014**. Maybe you have knowledge that, people have search numerous times for their chosen novels like this johannesburg metro police trainees for 2014, but end up in infectious downloads. Rather than enjoying a good book with a cup of coffee in the afternoon, instead they are facing with some infectious virus inside their desktop computer.

johannesburg metro police trainees for 2014 is available in our book collection an online access to it is set as public so you can download it instantly. Our books collection hosts in multiple countries, allowing you to get the most less latency time to download any of our books like this one. Merely said, the johannesburg metro police trainees for 2014 is universally compatible with any devices to read

Policing Bodies I. India Thusi 2021-12-21 Sex work occupies a legally gray space in Johannesburg, South Africa, and police attitudes towards it are inconsistent and largely unregulated. As I. India Thusi argues in *Policing Bodies*, this results in both room for negotiation that can benefit sex workers and also extreme precarity in which the security police officers provide can be offered and taken away at a moment's notice. Sex work straddles the line between formal and informal. Attitudes about beauty and subjective value are manifest in formal tasks, including police activities, which are often conducted in a seemingly ad hoc manner. However, high-level organizational directives intended to regulate police obligations and duties toward sex workers also influence police action and tilt the exercise of discretion to the formal. In this liminal space, this book considers how sex work is policed and how it should be policed. Challenging discourses about sexuality and gender that inform its regulation, Thusi exposes the limitations of dominant feminist arguments regarding the legal treatment of sex work. This in-depth, historically informed ethnography illustrates the tension between enforcing a country's laws and protecting citizens' human rights.

Transforming the Future (Open Access) Riel Miller 2018-04-27 People are using the future to search for better ways to achieve sustainability, inclusiveness, prosperity, well-being and peace. In addition, the way the future is understood and used is changing in almost all domains, from social science to daily life. This book presents the results of significant research undertaken by UNESCO with a number of partners to detect and define the theory and practice of anticipation around the world today. It uses the concept of 'Futures Literacy'

as a tool to define the understanding of anticipatory systems and processes – also known as the Discipline of Anticipation. This innovative title explores: • new topics such as Futures Literacy and the Discipline of Anticipation; • the evidence collected from over 30 Futures Literacy Laboratories and presented in 14 full case studies; • the need and opportunity for significant innovation in human decision-making systems. This book will be of great interest to scholars, researchers, policy-makers and students, as well as activists working on sustainability issues and innovation, future studies and anticipation studies. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351047999>, has been made available under a Attribution-NonCommercial-NoDerivs 3.0 IGO (CC-BY-NC-ND 3.0 IGO) license.

International Express Stéphane Tonnelat 2017-04-18 Nicknamed the International Express, the New York City Transit Authority 7 subway line runs through a highly diverse series of ethnic and immigrant neighborhoods in Queens. People from Andean South America, Central America, China, India, Italy, Korea, Mexico, Pakistan, Poland, Romania, and Vietnam, as well as residents of a number of gentrifying blue-collar and industrial neighborhoods, fill the busy streets around the stations. The 7 train is a microcosm of a specifically urban, New York experience, in which individuals from a variety of cultures and social classes are forced to interact and get along with one another. For newcomers to the city, mastery of life in the subway space is a step toward assimilation into their new home. In *International Express*, the French ethnographer Stéphane Tonnelat and his collaborator William Kornblum, a native New Yorker, ride the 7 subway line to better understand the intricacies of this phenomenon. They also ask a group of students with immigrant backgrounds to keep diaries of their daily rides on the 7 train. What develops over time, they find, is a set of shared subway competences leading to a practical cosmopolitanism among riders, including immigrants and their children, that changes their personal values and attitudes toward others in small, subtle ways. This growing civility helps newcomers feel at home in an alien city and builds what the authors call a "situational community in transit." Yet riding the subway can be problematic, especially for women and teenagers. Tonnelat and Kornblum pay particular attention to gender and age relations on the 7 train. Their portrait of integrated mass transit, including a discussion of the relationship between urban density and diversity, is invaluable for social scientists and urban planners eager to enhance the cooperative experience of city living for immigrants and ease the process of cultural transition.

Searching and Seizing Computers and Obtaining Electronic Evidence in Criminal Investigations Orin S. Kerr 2001

Police Integrity in South Africa Sanja Kutnjak Ivkovich 2020-05-28 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement. In 1994, as the country's apartheid system was replaced with a democratic order, the new government faced the significant challenge of transforming the South African police force into a democratic police agency—the

South African Police Service (SAPS)—that would provide unbiased policing to all the country's people. More than two decades since the initiation of the reforms, it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity. This book offers a unique perspective by providing in-depth analyses of police integrity in South Africa. It is a case study that systematically and empirically explores the contours of police integrity in a young democracy. Using the organizational theory of police integrity, the book analyzes the complex set of historical, legal, political, social, and economic circumstances shaping police integrity. A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers, probing their familiarity with official rules, their expectations of discipline within the SAPS, and their willingness to report misconduct. The book also examines the influence of the respondents' race, gender, and supervisory status on police integrity. Written in a clear and direct style, this book will appeal to students and scholars of criminology, policing, sociology, political science, as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations.

Handbook on the Crime Prevention Guidelines Margaret Shaw 2010 All countries strive to ensure safety and security for their citizens and to increase the quality of their lives. The Handbook offers a concise overview of the main considerations to be taken into account in planning and implementing crime prevention strategies and interventions. It also recognises that there are some major differences between regions and countries in terms of the challenges posed by crime and victimization and the importance of adapting programmes to local contexts. The main emphasis is on how crime prevention strategies based on the guidelines developed by the United Nations can be entrenched and sustained over time. It includes information on the kinds of methods and tools that can be utilised and are becoming increasingly available.

Safe Management of Wastes from Health-care Activities A. Prüss 1999

Political Handbook of the World 2020-2021 Tom Lansford 2021-03-23 The Political Handbook of the World by Tom Lansford provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2020-2021 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. The Political Handbook of the World 2020-2021 also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. And this update will aim to include coverage of current events, issues, crises, and controversies from the course of the last two years.

The Innovation Illusion Fredrik Erixon 2016-10-11 Timely, compelling, and certain to be controversial—a deeply researched study that reveals how companies and policy makers are hindering innovation-led growth. Conventional wisdom holds that Western economies are on the threshold of fast-and-furious technological development. Fredrik Erixon and Bjorn Weigel refute this idea, bringing together a vast array of data and case studies to tell a very different story. With expertise spanning academia and the business world, Erixon and Weigel illustrate how innovation is being hampered by existing government regulations and corporate practices. Capitalism, they argue, has lost its mojo. Assessing the experiences of global companies, including Nokia, Uber, IBM, and Apple, the authors explore three key themes: declining economic dynamism in Western economies; growing corporate reluctance to contest markets and innovate; and excessive regulation limiting the diffusion of innovation. At a time of low growth, high unemployment, and increasing income inequality, innovation-led growth is more necessary than ever. This book unequivocally details the obstacles hindering our future prosperity.

Foreign Operations, Export Financing, and Related Programs Appropriations for 2006 United States. Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs 2004

Digital Evidence and the U.S. Criminal Justice System Sean E. Goodison 2015 This report describes the results of a National Institute of Justice (NIJ)-sponsored research effort to identify and prioritize criminal justice needs related to digital evidence collection, management, analysis, and use. With digital devices becoming ubiquitous, digital evidence is increasingly important to the investigation and prosecution of many types of crimes. These devices often contain information about crimes committed, movement of suspects, and criminal associates. However, there are significant challenges to successfully using digital evidence in prosecutions, including inexperience of patrol officers and detectives in preserving and collecting digital evidence, lack of familiarity with digital evidence on the part of court officials, and an overwhelming volume of work for digital evidence examiners. Through structured interaction with police digital forensic experts, prosecuting attorneys, a privacy advocate, and industry representatives, the effort identified and prioritized specific needs to improve utilization of digital evidence in criminal justice. Several top-tier needs emerged from the analysis, including education of prosecutors and judges regarding digital evidence opportunities and challenges; training for patrol officers and investigators to promote better collection and preservation of digital evidence; tools for detectives to triage analysis of digital evidence in the field; development of regional models to make digital evidence analysis capability available to small departments; and training to address concerns about maintaining the currency of training and technology available to digital forensic examiners.

Hitmen for Hire Mark Shaw 2017-07-10 Hitmen for Hire takes the reader on a journey like no other, navigating a world of paid hitmen, informers, rogue policemen, criminal taxi bosses, gang leaders, and crooked politicians and

businessmen. Criminologist Mark Shaw examines a society in which contract killings have become commonplace, looking at who arranges hits, where to find a hitman, and even what it is like to operate as a hitman – or woman. Since 1994, South Africa has seen a worrying increase in the commercialisation of murder – and has been rocked by several high-profile contract killings. Drawing on his research of over a thousand incidents of hired assassinations, from 2000 to 2016, Shaw reveals how these murders are used to exert a mafia-type control over the country's legal and illegal economic activity. Contracted assassinations, and the organised criminal activity behind them, contain sinister linkages with the underworld, most visibly in relation to disputes over tenders and access to government resources. State security actors increasingly mediate relations between the under and upper worlds, with serious implications for the long-term success of the post-apartheid democratic project.

Changing Space, Changing City Peter Ahmad 2014-10-01 As the dynamo of South Africa's economy, Johannesburg commands a central position in the nation's imagination, and scholars throughout the world monitor the city as an exemplar of urbanity in the global South. This book offers detailed empirical analyses of changes in the city's physical space, as well as a host of chapters on the character of specific neighbourhoods and the social identities being forged within them. Informing all of these is a consideration of underlying economic, social and political processes shaping the wider Gauteng province. A mix of respected academics, practising urban planners and experienced policymakers offer compelling overviews of the rapid and complex spatial developments that have taken place in Johannesburg since the end of apartheid, along with tantalising glimpses into life on the streets and behind the high walls of this diverse city. The book has three sections. Section A provides an overview of macro spatial trends and the policies that have influenced them. Section B explores the shaping of the city at district and suburban level, revealing the peculiarity of processes in different areas. This analysis elucidates the larger trends, while identifying shifts that are not easily detected at the macro level. Section C is an assembly of chapters and short vignettes that focus on the interweaving of place and identity at a micro level. With empirical data supported by new data sets including the 2011 Census, the city's Development Planning and Urban Management Department's information system, and Gauteng City-Region Observatory's substantial archive, the book is an essential reference for planning practitioners, urban geographers, sociologists, and social anthropologists, among others.

Uniting a Divided City Jo Beall 2014-10-14 For many, Johannesburg resembles the imagined spectre of the urban future. Global anxieties about catastrophic urban explosion, social fracture, environmental degradation, escalating crime and violence, and rampant consumerism alongside grinding poverty, are projected onto this city as a microcosm of things to come. Decision-makers in cities worldwide have attempted to balance harsh fiscal and administrative realities with growing demands for political, economic and social justice. This book investigates pragmatic approaches to urban economic development, service

delivery, spatial restructuring, environmental sustainability and institutional reform in Johannesburg. It explores the conditions and processes that are determining the city's transformation into a cosmopolitan metropole and magnet for the continent.

Biometric State Keith Breckenridge 2014-10-02 A groundbreaking study of South Africa's role as a site for global experiments in biometric identification throughout the twentieth century.

Intelligence-Led Policing Jerry H. Ratcliffe 2016-04-14 What is intelligence-led policing? Who came up with the idea? Where did it come from? How does it relate to other policing paradigms? What distinguishes an intelligence-led approach to crime reduction? How is it designed to have an impact on crime? Does it prevent crime? These are just a few of the questions that this book seeks to answer. This revised and updated second edition includes new case studies and viewpoints, a revised crime funnel based on new data, and a new chapter examining the expanding role of technology and big data in intelligence-led policing. Most importantly, the author builds upon an updated definition of intelligence-led policing as it has evolved into a framework capable of encompassing more operational police activity than simply organized crime and recidivist offenders. Topics covered in this book include: • The origins and aims of intelligence-led policing • A comparison of intelligence-led policing with other conceptual models of policing • An exploration of analysis concepts and the role of analysis in target-selection • Evaluations of intelligence-led policing as a crime-control strategy Written by an expert in the field, this book offers a comprehensive and engaging introduction to intelligence-led policing for students, practitioners and scholars of policing, criminal intelligence and crime analysis. This book will be of particular interest to professionals within the law enforcement environment; senior officers, middle management, analysts and operational staff. A companion website offers a range of resources for students and instructors, including slides, chapter headings with supporting notes, key terms and names, critical-thinking questions, and quizzes.

Policing and the Politics of Order-Making Peter Albrecht 2014-10-30 This anthology explores the political nature of making order through policing activities in densely populated spaces across Africa, Asia and Latin America. Based on ethnographic research, the chapters analyze this complex with respect to marginalized young men in Haiti, community policing members and national politicians in Swaziland as well as other individual and collective actors engaged in policing and politics in Indonesia, Swaziland, Ghana, South Africa, Mexico, Bolivia, Haiti and Sierra Leone. What these contexts have in common is a plurality of order-making practices. Not one institution monopolizes the means of violence or a de facto sovereign position to do so. A number of interests are played out simultaneously, entailing re-negotiations over the very definition of what 'order' is. How and by whom a particular order is enforced is contested, at times violently so, and is therefore inherently political. In the existing literature on weak states, legal pluralism and

policing in the Global South it is seldom made explicit that making order is a route to power and positions of political decision-making. It is this gap in the literature that this anthology fills, as it analyses the politics at stake in processes of order-making.

Economic, Social and Cultural Rights in International Law Manisuli Ssenyonjo 2016-10-06 Since the first edition (published in 2009), there have been several important treaty developments, including the entry into force of the Optional Protocol to the International Covenant on Economic, Social and Cultural Rights (ICESCR) on individual communications, and significant developments in the case law on economic, social and cultural (ESC) rights. The second edition addresses these developments and explores ESC rights from foundational issues to substantive rights and systems of protection. It has been fully updated to include new material and up-to-date coverage of the case law of human rights bodies and national courts on ESC rights. In addition to the rights to health, education and work covered in the first edition, the second edition analyses new developments, such as the rights to adequate food, water and sanitation, adequate housing, social security and cultural rights. It also considers several contemporary issues including the extraterritorial human rights obligations of states in the area of economic, social and cultural rights; non-state actors; relationship of the ICESCR to other areas of international law; the Optional Protocol to the ICESCR; regional protection of ESC rights; more examples of the domestic protection of ESC rights; the protection of ESC rights of vulnerable groups; contemporary challenges to ESC rights, including poverty, corruption, armed conflicts and terrorism. It concludes by exploring the possible establishment of a World Court of Human Rights.

Triumph of the City Edward Glaeser 2011-02-10 Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 "A masterpiece." –Steven D. Levitt, coauthor of *Freakonomics* "Bursting with insights." –The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

Black Opera Naomi Andre 2018-05-04 From classic films like *Carmen Jones* to contemporary works like *The Diary of Sally Hemmings* and *U-Carmen eKhayelitsa*, American and South African artists and composers have used opera to reclaim black people's place in history. Naomi André draws on the experiences of performers and audiences to explore this music's resonance with today's listeners. Interacting with creators and performers, as well as with the works

themselves, André reveals how black opera unearths suppressed truths. These truths provoke complex, if uncomfortable, reconsideration of racial, gender, sexual, and other oppressive ideologies. Opera, in turn, operates as a cultural and political force that employs an immense, transformative power to represent or even liberate. Viewing opera as a fertile site for critical inquiry, political activism, and social change, Black Opera lays the foundation for innovative new approaches to applied scholarship.

The Accidental Prime Minister Sanjaya Baru 2015-07-05 When The Accidental Prime Minister was published in 2014, it created a storm and became the publishing sensation of the year. The Prime Minister's Office called the book a work of 'fiction', the press hailed it as a revelatory account of Prime Minister Manmohan Singh's first term in UPA. Written by Singh's media adviser and trusted aide, the book describes Singh's often troubled relations with his ministers, his cautious equation with Sonia Gandhi and how he handled the big crises from managing the Left to pushing through the nuclear deal. Insightful, acute and packed with political anecdotes, The Accidental Prime Minister is one of the great insider accounts of Indian political life.

Urban food systems governance Food and Agriculture Organization of the United Nations 2021-04-30 This report presents insights and emerging lessons on food systems governance from the experience of nine cities that have developed urban food interventions – Baltimore, Belo Horizonte, Lima, Medellín, Nairobi, Quito, Seoul, Shanghai and Toronto – and draws on diverse sources of secondary information regarding the experiences of other cities throughout the world. It highlights entry points for the governance of urban food systems issues; common procedural and content-related considerations when addressing those issues; predominant governance models; and operational opportunities for future investment. Successful examples can encourage other local governments to adapt new approaches and innovate within their own context. Every city will need to navigate the political economy to customize their choices and interventions to local circumstances, priority problems and economic opportunities.

Exploring the Conditions that Impact Local Administration Responsiveness work to Migrants in selected Metropolitan Municipalities of South Africa Kibreab Habtemichael Gebereselassie 2022-01-03 Research on local administration responsiveness towards migrant's and non-citizens revealed that demographic characteristics in local municipalities have often caused challenges for local administrations to be responsive to the diverse needs of their communities (Lucio et.al., 2013, Lucio, 2016). The objective of this study was to explore the conditions that impact on the local administration's responsiveness work to migrants in Durban, Cape Town & Johannesburg metropolitan municipalities of South Africa. The study's goal is met by identifying five major conditions that impact the local administration's responsiveness work to migrants in the study areas. Conducted in two rounds field research, the study used qualitative research design methods. Semistructured interviews, group discussions, field memos and observations were used to collect data. Thematic analysis method was implemented to investigate and analyze the collected raw data. This

dissertation also used relevant theory as framework and guide to uncover elements of local administrative responsiveness which are associated with migrants. The study identified and demonstrated that five major conditions impact the local administration's responsiveness work to migrants in the study areas. Local administration work environment, administration organizational structure and professionalism, external control from elected officials and local politics, migrant's community association, and economic contribution of migrants are the main conditions that impact on the responsiveness work of the local administration. The findings also showed that, anchored in the above five conditions, administrative responsiveness also varies across the selected study areas. This study also contributed by adding new insights about the mechanisms on how the local administration can address the issues of migrants who do not have a direct representation in the local government structure. Accordingly, for a better responsiveness work to migrants and to support the inclusion of migrants who do not have a direct political representation, the study proposes recommendation for policy, practice and research that targets on local administration responsiveness work to migrants.

Paratransit in African Cities Roger Behrens 2015-09-07 Public transport systems in contemporary Sub-Saharan African cities are heavily reliant upon paratransit services. These services are defined as informal transportation which operates between the public and individual private spheres. In Africa paratransit is characterized by low quality of vehicles and chaotic management but it also provides cheap, accessible and flexible transport solutions for the urban poor. It is typically poorly regulated and operates as a set of informal businesses. A common result of weak public sector regulation and a fare strategy in which owners claim a fixed daily revenue target and drivers who keep the variable balance as income, is destructive competition and poor quality of service. There is an incontrovertible case for improving the quality, reliability and coverage of public transport systems, and some city governments have attempted to do so by initiating reform projects that envisage the phased replacement of paratransit operations with formalised bus rapid transit systems. In this book the authors argue that there are, however, path dependencies and constraints that limit the possible extent of public transport system reform. Paratransit operations also have some inherent advantages with respect to demand responsiveness and service innovation. Attempts to eradicate paratransit may be neither pragmatic nor strategic. Two future scenarios are likely: hybrid systems comprised of both paratransit and formally planned modes; and systems improved by upgrades and strengthened regulation of existing paratransit services. The business strategies and aspirations of incumbent paratransit operators in three case cities – Cape Town, Dar es Salaam and Nairobi – are discussed, as well as their attitudes towards emerging public transport reform projects. International experiences of hybrid system regulation and paratransit business development are reviewed in order to explore policy options. The authors contend that policies recognising paratransit operators, and seeking contextually appropriate complementarity with formalised planned services, will produce greater benefits than policies ignoring their continued existence.

Peace, Human Security and Conflict Prevention in Africa Janine Rauch 2001

South Africa and the Transvaal War Louis Creswicke 1900

Critique of Black Reason Achille Mbembe 2017-02-17 In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

The Transformation of the World Jürgen Osterhammel 2015-09-15 A panoramic global history of the nineteenth century A monumental history of the nineteenth century, *The Transformation of the World* offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, *The Transformation of the World* sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

Coldsleep Lullaby Andrew Brown 2014-06-17 "A finely crafted novel with an unstoppable plot." –Top Billing In the sleepy Cape Winelands of South Africa the body of a young woman is found drifting in a river, and Detective Eberard Februarie is called in to investigate the case. It doesn't help matters that

the young woman—Melanie Du Preez—was the daughter of a prominent local citizen. Professor du Preez is a lecturer in the University's Faculty of Law, and a conservative activist in the defense of the Afrikaans culture. Has a murder happened here, and if so, is the motive politics or something much more personal? Eberard discovers a scrapbook of lullabies that Melanie had collected over the years, it's a clue that could unlock the case for him, if only he could figure out what he's looking for? A man struggling with his own demons, Eberard discovers even more secrets that lead him to the rotten core of this old university town. Andrew Brown's Coldsleep Lullaby weaves a spellbinding story about prejudice and deceit, courage and redemption. The swift twists in the plot will keep the reader riveted and breathless. Intelligent, chilling, compelling.

Socio-Economic Rights in South Africa Malcolm Langford 2014 This book sets out to assess the role and impact of socio-economic strategies used by civil society actors in South Africa. Focusing on a range of socio-economic rights and national trends in law and political economy, the book's authors show how socio-economic rights have influenced the development of civil society discourse and action.

The Routledge Handbook on Cities of the Global South Susan Parnell 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism. This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting, the imperative for multiple genealogies of knowledge production, as well as a diversity of empirical entry points to understand contemporary urban dynamics. The Handbook works towards a geographical realignment in urban studies, bringing into conversation a wide array of cities across the global south – the 'ordinary', 'mega', 'global' and 'peripheral'. With interdisciplinary contributions from a range of leading international experts, it profiles an emergent and geographically diverse body of work. The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in, or of, the global south; arguments that are fluid and increasingly contested geographically and conceptually. It reflects on critical urbanism, the macro- and micro-scale forces that shape cities, including ideological, demographic and technological shifts, and constantly changing global and regional economic dynamics. Working with southern reference points, the chapters present themes in urban politics, identity and environment in ways that (re)frame our thinking about cities. The Handbook engages the twenty-first-century city through a 'southern urban' lens to stimulate scholarly, professional and activist engagements with the city.

New South African Review 5 Gilbert M Khadiagala 2015-11-01 A series of essays explaining the impact of the events at Marikana upon the South African perspective of police and the keeping of order. This fifth volume in the New South African Review series takes as its starting point the shock wave emanating from the events at Marikana on 16 August 2012 and how it has

reverberated throughout politics and society. Some of the chapters in the volume refer directly to Marikana. In others, the influence of that fateful day is pervasive if not direct. Marikana has, for instance, made us look differently at the police and at how order is imposed on society. Monique Marks and David Bruce write that the massacre 'has come to hold a central place in the analysis of policing, and broader political events since 2012...'. The chapters highlight a range of current concerns - political, economic and social. David Dickinson's chapter looks at the life of the poor in a township from within. In contrast, the chapter on foreign policy by Garth le Pere analyses South Africa's approach to international relations in the Mandela, Mbeki and Zuma eras. Anthony Turton's account, 'When gold mining ends' is a chilling forecast of an impending environmental catastrophe. Both Devan Pillay and Noor Nieftagodien focus attention on the left and, in different ways, ascribe its rise to a new politics in the wake of Marikana. The essays in NSAR 5: Beyond Marikana present a range of topics and perspectives of interest to general readers, but the book will also be a useful work of reference for students and researchers.

Last of the Lancasters Martin W Bowman 2014-11-30 The Lancasters looked like enormous deadly black birds going off into the night; somehow they looked different when they came back. The planes carried from this field 117,000 pounds of high explosives and the crews flew all night to drop the load as ordered. Now the trains would not run between France and Italy for a while, not on those bombed tracks anyhow. Here are the men who did it, with mussed hair and weary faces, dirty sweaters under their flying suits, sleep-bright eyes, making humble comradely little jokes and eating their saved-up chocolate bars' _ Martha Gellhorn??This riveting and highly intriguing collection of pilot and civilian reminiscences works to commemorate the spirit of the almighty Lancaster bomber. Each chapter is dedicated to a unique individual or group of individuals who took part in its history in some capacity. Be they pilot, civilian, or journalist, each played their own part and their accounts offer a host of fascinating insights. ??Episodes featured include the battle for Munich and the Nuremburg and Berlin Raids. Stories of POWs downed in their Lancasters and captured in enemy territory also feature, communicating a real sense of peril experienced behind enemy lines. Two sections of fascinating black and white photographs supplement and complete this trawl through the history of the Lancaster bomber and the men and women who witnessed its glory days.

South African Law Reports 2015

The Oxford Handbook of Police and Policing Michael D. Reisig 2014-03-31 The police are perhaps the most visible representation of government. They are charged with what has been characterized as an "impossible" mandate -- control and prevent crime, keep the peace, provide public services -- and do so within the constraints of democratic principles. The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency. In fact, police departments are one of the few government agencies that can be mobilized by a simple phone call, 24 hours a day, 7 days a week.

They are ubiquitous within our society, but their actions are often not well understood. The Oxford Handbook of Police and Policing brings together research on the development and operation of policing in the United States and elsewhere. Accomplished policing researchers Michael D. Reisig and Robert J. Kane have assembled a cast of renowned scholars to provide an authoritative and comprehensive overview of the institution of policing. The different sections of the Handbook explore policing contexts, strategies, authority, and issues relating to race and ethnicity. The Handbook also includes reviews of the research methodologies used by policing scholars and considerations of the factors that will ultimately shape the future of policing, thus providing persuasive insights into why and how policing has developed, what it is today, and what to expect in the future. Aimed at a wide audience of scholars and students in criminology and criminal justice, as well as police professionals, the Handbook serves as the definitive resource for information on this important institution.

World Migration Report 2020 United Nations 2019-11-27 Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Police Work and Identity Andrew Faull 2017-09-07 This is a book about the men and women who police contemporary South Africa. Drawing on rich, original ethnographical data, it considers how officers make sense of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds, and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour, and reminds readers that most officers' lives are entangled in, and shaped by a range of social, political and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure, and to rationalize their coercive practices. In an era where 'evidence' and 'what works' reigns supreme, and where 'cop culture' is often deemed a primary socializing force, this book emphasises how officers' personal histories,

ambitions, and vulnerabilities remain central to how policing unfolds on the street.
