Urban Climate Change Adaptation in Developing Countries Mohsen M. Aboulnaga 2019-03-14 This book describes the risks, impacts, measures, actions and adaptation policies that have developed globally as a result of the severe impacts of global climate change. In-depth chapters focus on climate change assessment (CCA) in terms of vulnerabilities and reflection on the built environment and measures and actions for infrastructure and urban areas. Adaptation actions specific to developing countries such as Egypt are presented and illustrated. Global Climate change adaptation projects (CCAPs) in developing countries, in terms of their targets and performance, are presented and compared with those existing CCAPs in Egypt to draw learned lessons. Climate change scenarios 2080 using simulations are portrayed and discussed with emphasis on a case-study model from existing social housing projects in hot-arid urban areas in Cairo; in an effort to put forward an assessment and evaluation of current CCA techniques. This book helps researchers realize the global impacts of climate change on the built environment and economic sectors, and enhances their understanding of current climate change measures, actions, policies, projects and scenarios. Reviews and illustrates the impact of global climate change risks; Provides an understanding of global climate change risks in seven continents; Illustrates policies and action plans implemented at the global level and developing countries' level; Discusses climate change assessment and vulnerabilities with emphasis on urban areas; Presents measures and action plans to mitigate climate change scenarios by 2080.

Why Governments and Parties Manipulate Elections Alberto Simpser 2013-03-18 This book documents the widespread use of blatant and excessive manipulation of elections and explains what drives this practice. Alberto Simpser shows that, in many instances, governments and parties manipulate elections not only to gain votes, but also to transmit or distort information. This manipulation conveys an image of strength, shaping others' behavior to the benefit of the manipulators, increasing the scope for the manipulators to pursue their goals while in government and mitigating future challenges to their hold on power.

Adaptive Collaborative Management in Forest Landscapes Carol J. Pierce Colfer 2021-11-30 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond, utilising detailed studies of forest

landscapes and communities. Many forest management proposals are based on top-down strategies, such as the Million Tree Initiatives, Forest Landscape Restoration (FLR) and REDD+, often neglecting local communities. In the context of the climate crisis, it is imperative that local peoples and communities are an integral part of all decisions relating to resource management. Rather than being seen as beneficiaries or people to be safeguarded, they should be seen as full partners, and Adaptive Collaborative Management is an approach which prioritises the rights and roles of communities alongside the need to address the environmental crisis. The volume presents detailed case studies and real life examples from across the globe, promoting and prioritizing the voices of women and scholars and practitioners from the Global South who are often under-represented. Providing concrete examples of ways that a bottom-up approach can function to enhance development sustainably, via its practitioners and far beyond the locale in which they initially worked, this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasize local control, inclusiveness and local creativity in management. This book will be of great interest to students, scholars and practitioners working in the fields of conservation, forest management, community development and natural resource management and development studies more broadly.

Public Perception of International Crises Dmitry Chernobrov 2019-06-24 The book captures evidence of self-affirming political imagining in how the general public in the West and Russia understood the Arab Uprisings and makes an argument both about and beyond this particular case.

Why States Recover Greg Mills 2015-01-03 State failure takes many forms. Somalia offers one extreme. The country's prolonged civil war led to the collapse of central authority, with state control devolving to warlord-led factions that competed for the spoils of local commerce, political power, and international aid. Malawi, on the other hand, is at the other end of the scale. During President Bingu's second term in office, the country's economy collapsed as a result of poor policies and Bingu's brand of personal politics. On the surface, Malawi's economy seemed largely stable; underneath, however, the polity was fractured and the economy broken. In between these two extremes of state failure are all manner of examples, many of which Mills explores in the fascinating and profoundly personal *Why States Recover*. Throughout he returns to his key questions: how do countries recover? What roles should both insiders and outsiders play to aid that process? Drawing on research in more than thirty countries, and incorporating interviews with a dozen leaders, Mills examines state failure and identifies instances of recovery in Latin America, Asia, and Africa. For anyone interested in the reasons behind states' failure, and remedies to ensure future economic stability, it is important reading.

Transitional Justice and the 'Disappeared' of Northern Ireland Lauren Dempster 2019-06-11 This book employs a transitional justice lens to address the 'disappearances' that occurred during the Northern Ireland conflict - or 'Troubles' - and the post-conflict response to these 'disappearances.' Despite an extensive literature around 'dealing with the past' in Northern Ireland, as well as a substantial body of scholarship on 'disappearances' in other national contexts, there has been little scholarly scrutiny of 'disappearances' in post-conflict Northern Ireland. Although the Good Friday Agreement brought relative peace to Northern Ireland, no provision was made for the establishment of some form of overarching truth and reconciliation commission aimed at comprehensively addressing the legacy of violence.

Nevertheless, a mechanism to recover the remains of the 'disappeared' – the Independent Commission for the Location of Victims' Remains (ICLVR) – was established, and has in fact proven to be quite effective. As a result, the reactions of key constituencies to the 'disappearances' can be used as a prism through which to comprehensively explore issues of relevance to transitional justice scholars and practitioners. Pursuing an interdisciplinary approach, and based on extensive empirical research, this book provides a multifaceted exploration of the responses of these constituencies to the practice of 'disappearing.' It engages with transitional justice themes including silence, memory, truth, acknowledgement, and apology. Key issues examined include the mobilisation efforts of families of the 'disappeared,' efforts by a (former) non-state armed group to address its legacy of violence, the utility of a limited immunity mechanism to incentivise information provision, and the interplay between silence and memory in the shaping of a collective, societal understanding of the 'disappeared.'

Klara and the Sun Kazuo Ishiguro 2021 From her place in the store, Klara, an Artificial Friend with outstanding observational qualities, watches carefully the behaviour of those who come in to browse, and of those who pass in the street outside. She remains hopeful a customer will soon choose her, but when the possibility emerges that her circumstances may change for ever, Klara is warned not to invest too much in the promises of humans. In 'Klara and the Sun', Kazuo Ishiguro looks at our rapidly-changing modern world through the eyes of an unforgettable narrator to explore a fundamental question: what does it mean to love?

The Relationship between Human Security Discourse and International Law Shireen Daft 2017-12-01 The concept of human security has emerged in international relations and policy as an idea which not only seeks to relocate the focus of international society on the individual, but also challenges the current priorities of the international community. In particular it places emphasis on promoting and facilitating a nexus between security, development and human rights. It is potentially a paradigm in the making, gaining considerable momentum within the UN, international relations scholarship and regional bodies. And yet by-and-large it continues to be unexplored by the international legal community, despite the success of a number of international treaties being attributed to the discourse. This book seeks to address this gap, and establish the nature of the relationship between human security discourse and international law, determining whether human security can meaningfully contribute to the international legal framework. To determine this, the book analyses the core principles of human security discourse and examines the degree to which they find parallels in the existing normative structure of international law. The book examines the how the broad-narrow debate that dominates human security discourse has

played out in international law-making. It goes on to consider the processes for the creation of so called 'human security' treaties in order to determine a blueprint for future development of international human security treaty law. In concluding Shireen Daft sets out a structured principled approach through which international legal scholarship can engage with human security, highlighting the ways in which engagement between the two fields can be sustained.

The Role of Education in Enabling the Sustainable Development Agenda Stephanie E.L. Bengtsson 2018-03-05 The Role of Education in Enabling the Sustainable Development Agenda explores the relationship between education and other key sectors of development in the context of the new global Sustainable Development Goals (SDG) agenda. While it is widely understood that there is a positive relationship between education and other dimensions of development, and populations around the world show a clear desire for more and better education, education remains an under-financed and under-prioritised sector within development. When education does make it onto the agenda, investment is usually diverted towards increasing access to formal schooling, without focusing on the intrinsic value of education as a tool for development within the international development community more broadly. The authors explore these tensions through a review of literature from a range of disciplines, providing a clearer picture of the relationship between education and other development sectors. The book challenges silo-thinking in the SDGs by exploring how achieving the SDG education targets can be expected to support or hinder progress towards other targets, and vice-versa. Drawing on examples from both low and high income countries, the book demonstrates how 'good' education functions as an 'enabling right', impacting positively on many other areas. The book's scope ranges across education and development studies, economics, geography, sociology and environmental studies, and will be of interest to any researchers and students with an interest in education and the SDGs.

Cities, Slums and Gender in the Global South Sylvia Chant 2015-12-22 Developing regions are set to account for the vast majority of future urban growth, and women and girls will become the majority inhabitants of these locations in the Global South. This is one of the first books to detail the challenges facing poorer segments of the female population who commonly reside in 'slums'. It explores the variegated disadvantages of urban poverty and slum-dwelling from a gender perspective. This book revolves around conceptualisation of the 'gender-urban-slum interface' which explains key elements to understanding women's experiences in slum environments. It has a specific focus on the ways in which gender inequalities are can be entrenched but also alleviated. Included is a review of the demographic factors which are increasingly making cities everywhere 'feminised spaces', such as increased rural-urban migration among women, demographic ageing, and rising proportions of female-headed households in urban areas. Discussions focus in particular on education, paid and unpaid work, access to land, property and urban services, violence, intra-urban mobility, and political participation and representation. This book will be of use to researchers and professionals concerned with gender and development, urbanisation and rural-urban migration.

Digital Financial Inclusion and Regulation Ogochukwu Monye 2022-10-20 This book explores the various considerations for achieving an effective regulatory strategy to improve financial access and usage in Nigeria and beyond. Gaps in the legal and institutional framework for digital financial services (DFS) as well as the barriers that contribute to financial exclusion are identified as are the policy changes needed to provide more extensive, accessible and sustainable financial inclusion value. In addition, the book covers divergent themes around the use of and insights for regulating industry financial services providers and challenger entities that herald industry disruption. The book adopts three research methods. The doctrinal research method is used to buttress the law and development analysis and the themes around regulation, adoption and usage of financial services. To elucidate the application of financial innovations, comparative case studies are drawn from selected jurisdictions including Kenya, South Africa, Ghana, The Philippines, Brazil, Mexico, Uganda, Pakistan, India, and Bangladesh. Lastly, using the empirical research method, the author reports the burden experienced by the residents of a community without banks in accessing finance. Included in this discussion are the barriers to finance as well as the coping strategies adopted by the community residents to access formal and informal finance.

Keeping the Republic Christine Barbour 2016-11-19 This refreshed and dynamic Eighth Edition of *Keeping the Republic* revitalizes the twin themes of power and citizenship by adding to the imperative for students to navigate competing political narratives about who should get what, and how they should get it. The exploding possibilities of the digital age make this task all the more urgent and complex. Christine Barbour and Gerald Wright, the authors of this bestseller, continue to meet students where they are in order to give them a sophisticated understanding of American politics and teach them the skills to think critically about it. The entire book has been refocused to look not just at power and citizenship but at the role that control of information and its savvy consumption play in keeping the republic.

Edible Insects Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the

conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Global Study on Homicide 2013 United Nations 2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

Reading in the mobile era West, Mark 2014-04-28 Millions of people do not read for one reason: they do not have access to text. But mobile phones and cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

The Conflict in Syria and the Failure of International Law to Protect People Globally Jeremy Julian Sarkin 2021-11-29 This book explores, through the lens of the conflict in Syria, why international law and the United Nations have failed to halt conflict and massive human rights violations in many places around the world which has allowed tens of millions of people to be killed and hundreds of millions more to be harmed. The work presents a critical socio-legal analysis of the failures of international law and the United Nations (UN) to deal with mass atrocities and conflict. It argues that international law, in the way it is set up and operates, falls short in dealing with these issues in many respects. The argument is that international law is state-centred rather than victim-friendly, is, to some extent, outdated, is vague and often difficult to understand and, therefore, at times, hard to apply. While various accountability processes have come to the fore recently, processes do not exist to assist individual victims while the conflict occurs or the abuses are being perpetrated. The book focuses on the problems of international law and the UN and, in the context of the many

enforced disappearances and arbitrary detentions in Syria, why nothing has been done to deal with a rogue state that has regularly violated international law. It examines why the responsibility to protect (R2P) has not been applied and why it ought to be used, generally, and in Syria. It uses the Syrian context to evaluate the weaknesses of the system and why reform is needed. It examines the UN institutional mechanisms, the role they play and why a civilian protection system is needed. It examines what mechanism ought to be set up to deal with the possible one million people who have been disappeared and detained in Syria. The book will be a valuable resource for students, academics and policy-makers working in the areas of public international law, international human rights law, political science and peace and security studies.

China, Africa, and the Future of the Internet Iginio Gagliardone 2019-06-15 China is transforming Africa's information space. It is assisting African broadcasters with extensive loans, training and exchange programmes and has set up its own media operations on the continent in the form of CCTV Africa. In the telecommunications sector, China is helping African governments to expand access to the internet and mobile phones, with rapid and large-scale success. While Western countries have ambiguously linked the need to fight security threats with restrictions of the information space, China has been vocal in asserting the need to control communication to ensure stability and development. Featuring a wealth of interviews with a variety of actors – from Chinese and African journalists in Chinese media to Chinese workers for major telecommunication companies – this highly original book demonstrates how China is both contributing to the 'Africa rising' narrative while exploiting the weaknesses of Western approaches to Africa, which remain trapped between an emphasis on stability and service delivery, on the one hand, and the desire to advocate human rights and freedom of expression on the other. Arguing no state can be understood without attention to its information structure, the book provides the first assessment of China's new model for the media strategies of developing states, and the consequences of policing Africa's information space for geopolitics, security and citizenship.

The Oxford Handbook of Intellectual Property Law Rochelle C. Dreyfuss 2018-04-12 We live in an age in which expressive, informational, and technological subject matter are becoming increasingly important. Intellectual property is the primary means by which the law seeks to regulate such subject matter. It aims to promote innovation and creativity, and in doing so to support solutions to global environmental and health problems, as well as freedom of expression and democracy. It also seeks to stimulate economic growth and competition, accounting for its centrality to EU Internal Market and international trade and development policies. Additionally, it is of enormous and increasing importance to business. As a result there is a substantial and ever-growing interest in intellectual property law across all spheres of industry and social policy, including an interest in its legal principles, its social and normative foundations, and its place and operation in the political economy. This handbook written by leading academics and practitioners from the field of intellectual property law, and suitable for both a specialist legal readership and an intelligent but non-specialist legal and non-legal readership, provides a comprehensive account of the following areas: - The foundations of IP law, including its emergence and development in different jurisdictions and regions; - The substantive rules and principles of IP; and - Important issues arising from the existence and operation of IP in the political economy.

The European Union, the World Bank and the Policymaking of Aid Eugenia Baroncelli
2019-01-03 Based on the experience of the author, an IPE scholar and former trade policy consultant at the World Bank (WB), the book offers an in-depth exploration of the EU-WB relations, conceptualized as hybrid delegation. Coupling cross-time analyses of their interaction in the regions of the Middle East and North Africa, Europe and Central Asia and Sub-Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the 'voice and participation reform' of 2008–2010, the book advances an innovative theoretical framework to assess the EU-WB joint institutional and field policy performances. Augmented PA models of delegation, role theory and performance analyses are engaged, and selectively recombined, to investigate the nature, evolution and impact of the interactions of the two organizations, both in their everyday and constituent politics. Hybrid delegation-in-motion is reconstructed, against the background of post-Washington Consensus and post-Lisbon EU, to unveil the changing division of labour between the two largest development multilaterals of the new global context. The book will be of interest to scholars, students and practitioners in European Politics, Development, International Relations, International Political Economy and Global Economic Governance.

Food Jennifer Clapp 2020-04-20 We all need food to survive, and forty percent of the world's population relies on agriculture for their livelihood. Yet control over food is concentrated in relatively few hands. Turmoil in the world food economy in recent decades has highlighted a number of vulnerabilities and contradictions inherent in the way we currently organize this vital sector. Extremes of both undernourishment and overnourishment affect a significant proportion of humanity. And attempts to increase production through the spread of an industrial model of agriculture has resulted in serious ecological consequences. The fully revised and expanded third edition of this popular book explores how the rise of industrial agriculture, corporate control, inequitable agricultural trade rules, and the financialization of food have each enabled powerful actors to gain fundamental influence over the practices that dominate the world food economy and result in uneven consequences for both people and planet. A variety of movements have emerged that are making important progress in establishing alternative food systems, but, as Clapp's penetrating analysis ably shows, significant challenges remain.

Human Rights and the Judicialisation of African Politics Peter Brett 2018-09-21 Human Rights and the Judicialisation of African Politics shows readers how central questions in African politics have entered courtrooms over the last three decades, and provides the first transnational explanation for this development. The book begins with three conditions that have made judicialisation possible in Africa as a whole; new corporate rights norms (including the expansion of indigenous rights), the proliferation of new avenues for legal proceedings, and the development of new support structures enabling litigation. It then studies the effects of these changes based on fieldwork in three Southern African countries – Zimbabwe, Namibia and Botswana. Examining three recent court cases involving international law, international courts and transnational NGOs, it looks beyond some of international relations' established models to explain when and why and legal rights can be clarified. This text will be of key interest to scholars and students of African politics and human rights, and more broadly to international relations and international law and justice.

The Handbook of European Defence Policies and Armed Forces Hugo Meijer

2018-06-21 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union. The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies, strategies, doctrines, capabilities, and military operations, as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war. A truly cross-European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature. The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty-one contributions on European defence and international security from around the world. The six parts focus on: country-based assessments of the evolution of the national defence policies of Europe's major, medium, and lesser powers since the end of the cold war; the alliances and security partnerships developed by European states to cooperate in the provision of national security; the security challenges faced by European states and their armed forces, ranging from interstate through intra-state and transnational; the national security strategies and doctrines developed in response to these challenges; the military capabilities, and the underlying defence and technological industrial base, brought to bear to support national strategies and doctrines; and, finally, the national or multilateral military operations by European armed forces. The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe.

Cities Transformed Mark R. Montgomery 2013-10-31 Over the next 20 years, most low-income countries will, for the first time, become more urban than rural. Understanding demographic trends in the cities of the developing world is critical to those countries - their societies, economies, and environments. The benefits from urbanization cannot be overlooked, but the speed and sheer scale of this transformation presents many challenges. In this uniquely thorough and authoritative volume, 16 of the world's leading scholars on urban population and development have worked together to produce the most comprehensive and detailed analysis of the changes taking place in cities and their implications and impacts. They focus on population dynamics, social and economic differentiation, fertility and reproductive health, mortality and morbidity, labor force, and urban governance. As many national governments decentralize and devolve their functions, the nature of urban management and governance is undergoing fundamental transformation, with programs in

poverty alleviation, health, education, and public services increasingly being deposited in the hands of untested municipal and regional governments. *Cities Transformed* identifies a new class of policy maker emerging to take up the growing responsibilities. Drawing from a wide variety of data sources, many of them previously inaccessible, this essential text will become the benchmark for all involved in city-level research, policy, planning, and investment decisions. The National Research Council is a private, non-profit institution based in Washington, DC, providing services to the US government, the public, and the scientific and engineering communities. The editors are members of the Council's Panel on Urban Population Dynamics.

[Hacking Diversity](#) Christina Dunbar-Hester 2019-12-10 "We regularly read and hear exhortations for women to take up positions in STEM. The call comes from both government and private corporate circles, and it also emanates from enthusiasts for free and open source software (FOSS), i.e. software that anyone is free to use, copy, study, and change in any way. Ironically, rate of participation in FOSS-related work is far lower than in other areas of computing. A 2002 European Union study showed that fewer than 2 percent of software developers in the FOSS world were women. How is it that an intellectual community of activists so open in principle to one and all - a community that prides itself for its enlightened politics and its commitment to social change - should have such a low rate of participation by women? This book is an ethnographic investigation of efforts to improve the diversity in software and hackerspace communities, with particular attention paid to gender diversity advocacy"--

Toward a World Free from Violence United Nations Office of the Special Representative of the Secretary-General on Violence against Children 2016-03-28 This Global Survey conducted by the Special Representative of the Secretary-General on Violence against Children confirms that recommendations made in the 2006 UN Study on Violence against Children (VAC) are as urgent as they were at the time of the Study's release and continue to serve as a fundamental reference for child protection initiatives the world over. It highlights some progress including awareness raising laws and policies to prevent and address VAC. However, progress has been slow, uneven and too fragmented to bring violence to an end. Most children exposed to violence live in isolation, loneliness, and fear and do not know where to turn for help, especially when the perpetrator is someone close and on whom they depend for their protection and well-being. Governments must increase efforts to practice these recommendations identified in the 2006 UN Study to make them a reality for every child in every country. This comprehensive survey provides important examples of initiatives that successfully shield children from violence and address the attitudes that allow it to flourish. It is being issued as Member States deepen their efforts to define a post-2015 development agenda and ensure an appropriate institutional response.
