**International Environmental Law** Ulrich Beyerlin 2011-08-11 International Environmental Law is a new textbook written for students, practitioners, and anyone interested in the subject. The overall aim of the book is to provide a fresh understanding of international environmental law as a whole, seen in the light of climate change, biodiversity loss, and the other serious environmental challenges facing the world. The book has also been kept deliberately manageable in size by careful selection of topics and by adopting a cross-cutting synthesis of regulatory interaction in the field. This enables the reader to place international environmental law in the broader context of public international law in general, revealing at the same time that international environmental law is experimental ground for developing new legal approaches towards global governance. To this end, the authors have combined theory and practice. Apart from discussing concepts, rule-making and compliance, the book looks at options for improved coordination, harmonisation and even integration of existing multilateral environmental agreements, analysing how conflicts between various environmental regimes can be avoided or, at least, adequately managed. The authors argue that an appropriate management of international environmental relations must address the North-South divide, which continues to be a major obstacle to global environmental cooperation. Furthermore, the authors emphasise the growing human rights dimension of international environmental law. This book is an ideal 'door opener' for the further study of international environmental law. Focusing on 'international environmental governance' in a comprehensive way, it serves to explain that each institution, each actor, and each instrument is part of a multi-dimensional process in international environmental law and relations.

*The Law of Finance* Alastair Hudson 2009 The Law of Finance aims, for the first time in a single volume, to account for the whole of international finance as understood in English law. The volume is divided into two halves with section one considering the principles of the law of finance and section two considering the full range of modern financial techniques in their legal context.

Comparative Law Uwe Kischel 2019-02-21 Uwe Kischel's comprehensive treatise on comparative law offers a critical introduction to the central tenets of comparative legal scholarship. The first part of the book is dedicated to general aspects of comparative law. The controversial question of methods, in particular, is addressed by explaining and discussing different approaches, and by developing a contextual approach that seeks to engage with real-world issues and takes a practical perspective on contemporary comparative legal scholarship. The second part of the book offers a detailed treatment of the major legal contexts across the globe, including common law, civil law systems (based on Germany and France, and extended to Eastern Europe, Scandinavia, and Latin America, among others), the African context (with an emphasis on customary law), different contexts in Asia, Islamic law and law in Islamic countries (plus a brief treatment of Jewish law and canon law), and transnational contexts (public international law, European Union law, and lex mercatoria). The book offers a coherent

treatment of global legal systems that aims not only to describe their varying norms and legal institutions but to propose a better way of seeking to understand how the overall context of legal systems influences legal thinking and legal practice.

**European Contract Law** Hein Kötz 2017 This edition includes many updates and revisions to the first edition, especially in light of the changes to the French Code Civil. Furthermore, the book comprises a wealth of translated extracts of legislation, cases, and academic literature. This text comprehensively covers all aspects of contract law in several European jurisdictions.

*A History of Interpretation of Hebrews 7, 1-10 from the Reformation to the Present* Bruce A. Demarest 1976 A revision of the author's thesis, University of Manchester, 1973.

Law in Modern Society Roberto Mangabeira Unger 1977-07 "Law in Modern Society" is a comparative study of the place of law in societies as well as a criticism of social theory. Under what conditions do different kinds of law emerge? What are the bases of the rule of law ideal that marks advanced liberal, capitalist societies? What can the study of law teach us about social hierarchy and moral vision in these societies, and, indeed, about the specificity of Western civilization? Why do we find it necessary to struggle for the rule of law and impossible to achieve it? What political possibilities are closed or opened by present-day changes in the established styles of legality and legal thought? Unger deals with these questions in a broad range of historical settings. But he also relates them to the central issues of social theory: the method of explanation, the conditions of social order, and the nature of 'modern' society. the book argues that to resolve its own internal dilemmas the science of society must once again become both metaphysical and political.

*Funktionale Schadensbewertung* Jörg Wasmuth 2018-05-17 Streitigkeiten über Unternehmenswerte nehmen zu. Als alleinige Vorgehensweise zur Entscheidungsfindung deutscher Gerichte hat sich die Bewertung nach IDW S 1 durchgesetzt, obwohl zahlreiche Einwände dagegen hervorgebracht werden. Zudem vermengt die dabei von der Rechtsprechung verwendete Terminologie diverse Bewertungsverfahren in einer nicht sinnvollen Weise. Jörg Wasmuth erarbeitet als Jurist anhand des zivilrechtlichen Erkenntnisverfahrens die Unzulänglichkeiten der Rechtsprechung. Als Ökonom zeigt er auf, dass die funktionale Bewertungslehre in der Lage ist, fundierte Unternehmenswerte zu liefern, die sowohl für die Prozesseingehung durch die Parteien benötigt werden als auch als Entscheidungsgrundlage der Gerichte dienen sollten. Der Autor Dr. Jörg Wasmuth (Volljurist, Diplom-Kaufmann) ist wissenschaftlicher Mitarbeiter am Lehrstuhl für Betriebswirtschaftslehre, insbesondere Wirtschaftsprüfung, von Herrn Prof. Dr. Gerrit Brösel an der FernUniversität in Hagen und wurde ebenda promoviert.

**Comparative Succession Law** Kenneth G C Reid 2020-10-09 This third volume in a series on Comparative Succession Law concerns the entitlement of family members to override the provisions of a deceased person's will to obtain money or assets (or more money or assets) from the person's estate. Some countries, notably those in the civil law tradition (such as France or Germany), confer a pre-ordained share of the deceased's estate or of its value on certain members of the deceased's family, and especially on the deceased's children and spouse. Other countries, notably those in the common law tradition (such as England, Canada,

or Australia), leave the matter to the discretion of the court, the amount awarded depending primarily on financial need. Whichever form it takes, mandatory family provision is both a protection against disinheritance and also, therefore, a restriction on testamentary freedom. The volume focuses on Europe and on countries influenced by the European experience. In addition to detailed treatment of the law in Austria, England and Wales, France, Germany, Hungary, Italy, the Netherlands, Norway, Poland, Scotland, and Spain, the book also has chapters on Australia and New Zealand, South Africa, the United States, Canada, the countries of Latin America, and the People's Republic of China. Some other countries are covered more briefly, and there is a separate chapter on Islamic law. The book opens with accounts of Roman law and of the law in medieval and early-modern Europe, and it concludes with a comparative assessment of the law as it is today in the countries and legal traditions surveyed in this volume.

European Legal Methodology Karl Riesenhuber 2017 EU law is an autonomous legal system. It requires its own methodology, independent of the national traditions of the Member States. The contributions to this volume provide elements of a genuinely European legal method, discussing the foundations of European legal methodology in Roman law and in the development of national legal methods in the 19th century, as well as the economic and comparative background. Core issues of legal methods-such as the sources of law, the interpretation of EU primary law and secondary legislation, the concretization of general clauses, and judicial development of the law-are also analyzed. Furthermore, the temporal effects of EU directives and of judgments of the Court of Justice of the European Union raise specific issues of EU law. Contributions are also devoted to issues of a multi-level legal system. Beyond general aspects, directives in particular raise special questions: what is their impact on the interpretation of national law, and what are the methodological consequences of a transposition of directives beyond their original scope ('gold-plating')? Further contributions inquire into methodological issues in contract law, employment law, company law, capital market law, and competition law. They illustrate the general aspects of European legal methods with a view to specific applications, and they also reveal specific issues of methods which occur in these areas. Finally, legal methods from national perspectives of different Member States-namely France, Germany, Italy, Poland, Spain, and the UK-are examined. The book reveals the national traditions of legal methods and the national preconceptions, and it illustrates the application of EU legal methods in different national contexts. **Good Law** H. J. M. Boukema 1982 The purpose of the book is to provide a list of technical criteria for good law. The word «technical» is used in contradistinction to moral criteria for good law.

*Media and Convergence Management* Sandra Diehl 2013-05-24 Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this

area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

**Vilnius between Nations, 1795–2000** Theodore R. Weeks 2015-12-04 The inhabitants of Vilnius, the present-day capital of Lithuania, have spoken various languages and professed different religions while living together in relative harmony over the years. The city has played a significant role in the history and development of at least three separate cultures—Polish, Lithuanian, and Jewish—and until very recently, no single cultural-linguistic group composed the clear majority of its population. *Vilnius between Nations, 1795–2000* is the first study to undertake a balanced assessment of this particularly diverse city. Theodore Weeks examines Vilnius as a physical entity where people lived, worked, and died; as the object of rhetorical struggles between disparate cultures; and as a space where the state attempted to legitimize a specific version of cultural politics through street names, monuments, and urban planning. In investigating these aspects, Weeks avoids promoting any one national narrative of the history of the city, while acknowledging the importance of national cultures and their opposing myths of the city's identity. The story of Vilnius as a multicultural city and the negotiations that allowed several national groups to inhabit a single urban space can provide lessons that are easily applied to other diverse cities. This study will appeal to scholars of Eastern Europe, urban studies, and multiculturalism, as well as general readers interested in the region.

**Exotic No More** Jeremy MacClancy 2010-04-08 Since its founding in the nineteenth century, social anthropology has been seen as the study of exotic peoples in faraway places. But today more and more anthropologists are dedicating themselves not just to observing but to understanding and helping solve social problems wherever they occur—in international aid organizations, British TV studios, American hospitals, or racist enclaves in Eastern Europe, for example. In *Exotic No More*, an initiative of the Royal Anthropological Institute, some of today's

most respected anthropologists demonstrate, in clear, unpretentious prose, the tremendous contributions that anthropology can make to contemporary society. They cover issues ranging from fundamentalism to forced migration, child labor to crack dealing, human rights to hunger, ethnicity to environmentalism, intellectual property rights to international capitalisms. But *Exotic No More* is more than a litany of gloom and doom; the essays also explore topics usually associated with leisure or "high" culture, including the media, visual arts, tourism, and music. Each author uses specific examples from their fieldwork to illustrate their discussions, and 62 photographs enliven the text. Throughout the book, the contributors highlight anthropology's commitment to taking people seriously on their own terms, paying close attention to what they are saying and doing, and trying to understand how they see the world and why. Sometimes this bottom-up perspective makes the strange familiar, but it can also make the familiar strange, exposing the cultural basis of seemingly "natural" behaviors and challenging us to rethink some of our most cherished ideas—about gender, "free" markets, "race," and "refugees," among many others. **Transnational Commercial Law: International Instruments and Commentary** Roy Goode 2012-03-29 Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

*Regulating Dispute Resolution* Felix Steffek 2013-09-25 This book proposes a principled approach to the regulation of dispute resolution. It covers dispute resolution mechanisms in all their varieties, including negotiation, mediation, conciliation, expert opinion, mini-trial, ombud

procedures, arbitration and court adjudication. The authors present a transnational Guide for Regulating Dispute Resolution (GRDR). The regulatory principles contained in this Guide are based on a functional taxonomy of dispute resolution mechanisms, an open normative framework and a modular structure of regulatory topics. The Guide for Regulating Dispute Resolution is formulated and commented upon in a concise manner to assist legislators, policy-makers, professional associations, practitioners and academics in thinking about which solutions best suit local and regional circumstances. The aim of this book is to contribute to the understanding and development of the legal framework governing national and international dispute resolution. Theory, empirical research and regulatory models have been taken from the wealth of experience in 12 jurisdictions: Austria, Belgium, Denmark, England and Wales, France, Germany, Italy, Japan, the Netherlands, Norway, Switzerland and the United States of America. Experts with a background in academia, practice and law-making describe and analyse the regulatory framework and social reality of dispute resolution in these countries. On this basis the authors draw conclusions about policy choices, regulatory strategies and the practice of conflict resolution.

A Casebook on Roman Property Law Herbert Hausmaninger 2012-02-07 This volume introduces Roman property law by means of "cases" consisting of brief excerpts from Roman juristic sources in Latin with English translations. The cases are followed by series of analytical questions and translated excerpts from modern civil codes to illustrate the dynamic character and continuing life of the Roman legal tradition.

*Commentaries on European Contract Laws* Nils Jansen 2018-07-13 The book provides rule-by-rule commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition, the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further development of European contract law.

**Legal Fictions in Theory and Practice** Maksymilian Del Mar 2015-03-11 This multi-disciplinary, multi-jurisdictional collection offers the first ever full-scale analysis of legal

fictions. Its focus is on fictions in legal practice, examining and evaluating their roles in a variety of different areas of practice (e.g. in Tort Law, Criminal Law and Intellectual Property Law) and in different times and places (e.g. in Roman Law, Rabbinic Law and the Common Law). The collection approaches the topic in part through the discussion of certain key classical statements by theorists including Jeremy Bentham, Alf Ross, Hans Vaihinger, Hans Kelsen and Lon Fuller. The collection opens with the first-ever translation into English of Kelsen's review of Vaihinger's *As If*. The 17 chapters are divided into four parts: 1) a discussion of the principal theories of fictions, as above, with a focus on Kelsen, Bentham, Fuller and classical pragmatism; 2) a discussion of the relationship between fictions and language; 3) a theoretical and historical examination and evaluation of fictions in the common law; and 4) an account of fictions in different practice areas and in different legal cultures. The collection will be of interest to theorists and historians of legal reasoning, as well as scholars and practitioners of the law more generally, in both common and civil law traditions.

Wisdom Luca Mazzinghi 2019-07-24 For the first time, the present commentary brings together all relevant aspects necessary to understand and appreciate this late portion of Old Testament Scripture: textual criticism; detailed philological and literary analysis; the text's two-fold historical context in its Hellenistic environment, on the one hand, and in the biblical tradition on the other; and ultimately the very innovative theology of the book of Wisdom. Aspects of the book's reception history as well as hermeneutical questions round off the commentary on the text.

**Digitization and the Law** Eric Hilgendorf 2018-03-02 Neue Technologien bedeuten neue Herausforderungen für das Recht. Das Internet ist kein Neuland mehr, kritische Themen wie Cyberattacken, Privatsphäre, der Schutz Minderjähriger oder auch das Cloud Computing sind jedoch keinesfalls ausdiskutiert. Die zunehmende Digitalisierung und Technisierung beschränkt sich nicht auf das World Wide Web. Der automatisierte Straßenverkehr ist ein ebenso zukunftsweisendes Thema, dessen Entwicklung rechtlich begleitet werden muss. Im vorliegenden Band sind Forschungsarbeiten von Rechtswissenschaftlern aus Deutschland, den USA, Kanada und Griechenland zusammengefasst. Die von Prof. Eric Hilgendorf und Prof. Susanne Beck herausgegebene Reihe Robotik und Recht widmet sich der Diskussion praxisrelevanter Rechtsfragen zu Robotik, Technisierung und Digitalisierung. **Law and Revolution, II** Harold Joseph Berman 2009-07 Harold Berman's masterwork narrates the interaction of evolution and revolution in the development of Western law. This new volume explores two successive transformations of the Western legal tradition under the impact of the sixteenth-century German Reformation and the seventeenth-century English Revolution, with particular emphasis on Lutheran and Calvinist influences. Berman examines the far-reaching consequences of these apocalyptic political and social upheavals on the systems of legal philosophy, legal science, criminal law, civil and economic law, and social law in Germany and England and throughout Europe as a whole. Berman challenges both conventional approaches to legal history, which have neglected the religious foundations of Western legal systems, and standard social theory, which has paid insufficient attention to the communitarian dimensions of early modern economic law, including corporation law and social welfare. Clearly written and cogently argued, this long-awaited, magisterial work is a major contribution to an understanding of the relationship of law to Western belief systems.

**Procedure and Evidence in International Arbitration** Jeffrey Waincymer 2012-05-23 Central to the book's purpose is the procedural challenge facing arbitrators at each and every stage of the arbitral process when fairness arguments conflict with efficiency concerns and trade-offs must be determined. Some key themes include how can a tribunal be fair, and in particular be neutral, if parties are so diverse? How can arbitration be made efficient and cost-effective without undue inroads into fairness and accuracy? How does a tribunal do what is best if the parties are choosing a suboptimal process? When can or must an arbitrator ignore procedural choices made by the parties? The author thoroughly evaluates competing arguments and adds his own practical tips, expertly synthesizing and engaging with the conference literature and differing authors' views. He identifies criteria that offer a harmonized approach to each stage of the arbitral process, with particular attention to such aspects of international arbitration as: appropriate trade-offs between flexibility and certainty; the rights, duties and powers of arbitrators; appointment and challenge of arbitrators; responses to 'guerilla' tactics; drafting of arbitration agreements, including specialty clauses; drafting of required commencement notices and response documents; set-off; fast track arbitration and other efficiency options; strategic use of preliminary conferences and timetabling; online arbitration; multi-party, multi-contract, class arbitration; amicus and third party funders; pre-arbitral referees and interim relief; witness evidence, both factual and expert; documentary evidence, production obligations, and challenges to production; identifying applicable law; and remedies and costs.

*Doing What Comes Naturally* Stanley Fish 1989 "In literary theory, the philosophy of law, and the sociology of knowledge, no issue has been more central to current debate than the status of our interpretations. Do they rest on a ground of rationality or are they subjective impositions of a merely personal point of view? In *Doing What Comes Naturally*, Stanley Fish refuses the dilemma posed by this question and argues that while we can never separate our judgments from the contexts in which they are made, those judgments are nevertheless authoritative and even, in the only way that matters, objective. He thus rejects both the demand for an ahistorical foundation, and the conclusion that in the absence of such a foundation we reside in an indeterminate world. In a succession of provocative and wide-

ranging chapters, Fish explores the implications of his position for our understanding of legal, literary, and psychoanalytic interpretation, the nature of professional and institutional culture, and the place of reason in a world that is rhetorical through and through."--Publisher description.
