An Immense World Ed Yong 2022-06-21 NEW YORK TIMES BESTSELLER • A "thrilling" (The New York Times), "dazzling" (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you

with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong "One of this year's finest works of narrative nonfiction."—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The Washington Post, Kirkus Reviews The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called "the only true voyage . . . not to visit strange lands, but to possess other eyes." FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE ANDREW CARNEGIE MEDAL

Animal DK 2017-09-12 View the animal kingdom up close as never before in this breathtaking title, which has already sold over 1.5 million copies. Written by 70 specialists, it features stunning wildlife photography of more than 2000 of the world's most important wild mammals, birds, reptiles, amphibians, and

insects. With around two million species identified to date, animals are the dominant and most varied form of life on the planet. Animal presents a representative selection, ranging from the giant baleen whale, to fast-moving predators such as sharks, big cats, and birds of prey, as well as microscopic beetles barely 1mm long and other insects. It presents some of the latest species to be described: meet the cute but elusive olinguito from South America, which was only identified in 2013, or the skywalker hoolock gibbon that was named after a Star Wars character in 2017. Animal also explains how the earth's biodiversity is in sharp decline and the conservation projects underway to safeguard precious species. For each one, it gives a locator map and statistics, including its conservation status. For anyone who wants a reliable and enthralling reference, in which you can find the answers to everything - from why zebras are striped or how the sunbear got its name - Animal is your essential one-stop guide.

Life-Size Animals Riva M. Schiavo 2020 "You probably know what your favorite animals look like, but do you really have any idea how big or small they really are? Could you picture the size of a tiger's face, or an elephant's tail, or an ostrich's egg? Life-Size Animals has pages and pages of life-size illustrations of different animals' tongues, teeth, claws, eggs, tails, and more. It encourages readers to compare the sizes of the different animals to themselves-seeing how long their tongues compared to a giraffe or how big their eyes are compared to a giant squid's-and it helps to put in context just how big or small these incredible creatures are. Packed with facts and incredible illustrations, this is the kind of book that curious readers can pore over for hours and return to again and again"--

Caught Between Two Worlds: Judith L. Cameron, Ph.D. 2014-06-25 This book by Judith Cameron, PhD, is the true story of her ongoing encounters with benevolent extraterrestrials and the education that she has received from them throughout her life. She had a lucid dream that told her that part of her life's work was to train to be an ambassador-a liaison between Earth humans and extraterrestrials when those extraterrestrials came en masse on their first contact mission. Follow Judy's adventure, from being a child of six and meeting her first extraterrestrials, to the present-day encounters, many of which are a result of her training to become an ambassador to the universe. You will learn about the Galactic Federation of Light and their representatives on Earth who have continued her learning and training. Sheldon Nidle of the Planetary Activation Organization and Dr. Steven Greer, MD, founder of CSETI, are two of the selected teachers whom Judy has chosen to work with. Judy's encounters have taken her around the globe to places such as Bora Bora, one of the Tahitian Islands, Orpheus Island, Australia on the Great Barrier Reef, Hawaii, and the Great Southwest of the United States. Working as a public school teacher for forty years teaching all grade levels and at NASA as an education consultant, along with her work as a doctor of clinical hypnotherapy, has given Judy the background and credibility that she needs to carry out her mission. Follow Judy now as you learn of the wonderful possibilities for our future Earth.

My Family and Other Animals Gerald Durrell 2016-10-11 The inspiration for *The Durrells in Corfu*, a Masterpiece production on public television: A naturalist's account of his childhood on the exotic Greek island. When the Durrells could no longer endure the gray English climate, they did what any sensible family would do: sold their house and relocated to the sun-soaked island of Corfu. As they settled into their new home, hilarious mishaps ensued as a ten-year-old Gerald Durrell pursued his interest in natural history and explored the island's fauna. Soon, toads and tortoises, bats and butterflies—as well as scorpions, geckos, ladybugs, praying mantises, octopuses, pigeons, and gulls—became a common sight in the Durrell villa. Uproarious tales of the island's animals and Durrell's fond reflections on his family bring this delightful memoir to life. Capturing the joyous chaos of growing up in an unconventional household, *My Family and Other Animals* will transport you to a place you won't want to leave. This ebook features an illustrated biography of Gerald Durrell including rare photos from the author's estate.

A Stitch in Time Daphne Kalmar 2018-06-19 NPR's Best Book of 2018 An orphan grapples with her unpleasant aunt and the even more unpleasant idea of moving to Boston in this poignant middle-grade debut that handles loss and renewal. "Heartbreaking and heartwarming at the same time, Donut's story is gritty, hopeful and ultimately all about the various ways that love shows up. I loved it."--Kathi Appelt, author of the Newbery Honor and National Book Award finalist novel *The Underneath* "Taxidermy? What better journey to uncover the true stuff of character! A classic, indelible debut."--Rita Williams-Garcia, author of the Newbery Honor novel *One Crazy Summer* Donut is an eleven-year old geography buff who keeps her taxidermied mice hidden in her late mother's hope chest. Her pops passed away, leaving her an orphan. Aunt Agnes has moved in, bringing along her lumpy oatmeal, knitting, and a plan to drag Donut off to Boston forever. Donut stands to lose everything: her friends, her village, her home, the woods, and walks where the memories of her pops are stored up. While Donut dodges the ache of missing her pops, she and her best friend Tiny plan how to keep her where she belongs. *A Stitch in Time* by Daphne Kalmar is shot through with gorgeous, evocative language, and gets right to Donut's heart.

Evolve Graeme Findlay 2018-10-12 We see patterns of leadership throughout human history. Prehistoric leaders who, just as leaders do today, used power and influence to create co-operation amongst their group, have all played their part in our surviving, thriving and evolving as a species. Of course, leadership is infinitely more complex in the modern world, comprising of global teams, large anonymous networks and communications technology. But have our brains evolved as quickly as our societies? In this fascinating, enlightening and useful book, leadership development coach and change agent Graeme Findlay walks you through the evolutionary basis for the dramatic increases in leadership power from pre-history through to today. He explains how the brain function that made our primate ancestors successful still exists within us, and how this "inner primate" can sabotage your leadership effectiveness. He then proceeds to outline effective strategies for transcending this "inner voice" to empower your leadership. In the same way, he shows how you can tap into the motivations of the inner primate within members of your extended team, to better understand dynamics, and transform your leadership impact. With the inner primate dealt with, he moves on to explore the next two major evolutionary steps, personified as the gossip and the dreamer. Drawing from a wide variety of case studies, including Donald Trump, Kim Jong-Un, and Martin Luther King, as well as the author's own consulting experiences, this book consistently shows you how to apply evolutionary leadership theory to your own

practice, to become a more aware, mindful, impactful, and successful leader.

I Am Just Right David McPhail 2019-03-19 The boy in this book is growing and changing-- but that isn't a bad thing. A sweet Level C story that teaches kids that it's okay to change. I am too big for my crib. I am too big for my shirt. Celebrate growth and self-acceptance in this simple, sweetly illustrated story about a bunny who is getting too big for baby things-- but who is just right all the same. The boy in this book is too big for his crib, his shoes, and his tricycle. And he is too big for Grandpa to pick up. But he is just right for his big-boy bed, his new shirt, and his bicycle. And he is just right for a hug from Grandpa, for his sister, and for this book. David McPhail's simple story and softly colored, warm illustrations create a book that's just right for preschoolers and kindergarteners, who are growing up themselves. It's just right to share with the little ones in your life. For readers who have mastered basic sight words, Level C books feature slightly longer sentences and a wider range of high-frequency words than Level B books. Level C books are suitable

for mid-to-latekindergarten readers. When Level C is mastered, follow up with Level D. The award-winning I Like to Read® series focuses on guided reading levels A through G, based upon Fountas and Pinnell standards. Acclaimed author-illustrators--including winners of Caldecott, Theodor Seuss Geisel, and Coretta Scott King honors--create original, high quality illustrations that support comprehension of simple text and are fun for kids to read with parents, teachers, or on their own!

A Family of Readers Martha V. Parravano 2012-10-09 Two of the most trusted reviewers in the field join with top authors, illustrators, and critics in a definitive guide to choosing books for children--and nurturing their love of reading. A FAMILY OF READERS is the definitive resource for parents interested in enriching the reading lives of their children. It's divided into four sections: 1. Reading to Them: Choosing and sharing board books and picture books with babies and very young children. 2. Reading with Them: Launching the new reader with easy readers and chapter books. 3. Reading on Their Own: Exploring what children read--and how they read--by genre and gender. 4. Leaving Them Alone: Respecting the reading privacy of the young adult. Roger Sutton knows how and why children read. He must, as the editor in chief of THE HORN BOOK, which since 1924 has been America's best source for reviews of books for young readers. But for many parents, selecting books for their children can make them feel lost. Now, in this essential resource, Roger Sutton and Martha V. Parravano, executive editor at the magazine, offer thoughtful essays that consider how books are read to (and then by) young people. They invite such leading authors and artists as Maurice Sendak, Katherine Paterson, Margaret Mahy, and Jon Scieszka, as well as a selection of top critics, to add their voices about the genres they know best. The result is an indispensable readers' companion to everything from wordless board books to the most complex and daring young adult novels.

Big Red Barn Board Book Margaret Wise Brown 1995-01-06 By the big red barn In the great green field, There was a pink pig Who was learning to squeal. There were horses and sheep and goats and geese--and a jaunty old scarecrow leaning on his hoe. And they all lived together by the big red barn. In joyous and exuberant Pictures, Felicia Bond lovingly evokes Margaret Wise Brown's simple, rhythmic text about the cycle of a day on a farm, where a family of animals peacefully plays and sleeps. In the barnyard there are roosters and cows,

horses and goats, and a pink piglet who is learning to squeal. Margaret Wise Brown's lulling story about a day in the life of a barnyard is now available as a sturdy board book. Felicia Bond's atmospheric illustrations add to the tranquil simplicity of this story.
