Chicago Noir Neal Pollack 2005-09-01 “If ever a city was made to be the home of noir, it’s Chicago. These writers go straight to Chicago’s noir heart” (Aleksandar Hemon, National Book Award finalist and New York Times–bestselling author of *The Lazarus Project*). Chicago’s rough-and-tumble tough-guy reputation may have been replaced in recent years by the image of a tourist- and family-friendly town—but that original city isn’t gone. The hard-bitten streets once represented by James Farrell and Nelson Algren may have shifted locales, and they may be populated by different ethnicities, but Chicago is still a place where people struggle to survive and where, for many, crime is the only means for their survival. The stories in *Chicago Noir* reclaim that territory, in tales of hired killers and jazz men, drunks and dreamers, corrupt cops and ticket scalpers and junkies, of a place where hard cases face their sad fates, and pay for their sins in blood. Brand new stories by Neal Pollack, Achy Obejas, Alexai Galaviz-Budziszewski, Adam Langer, Joe Meno, Peter Orner, Kevin Guilfoile, Bayo Ojikutu, Jeffery Renard Allen, Luciano Guerriero, Claire Zulkey, Andrew Ervin, M.K. Meyers, Todd Dills, C.J. Sullivan, Daniel Buckman, Amy Sayre-Roberts, and Jim Arndorfer. “Chicago Noir is a legitimate heir to the noble literary tradition of the greatest city in America.” —Stephen Elliott, author of *Happy Baby*

Eager to Learn National Research Council 2001-01-22 Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers--and learners--every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early

childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? *Eager to Learn* explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. *Eager to Learn* presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

Ditch That Textbook Matt Miller 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

The Roots of Prosocial Behavior in Children Nancy Eisenberg 1989-08-25 What kinds of childbearing practices foster the development of helping, sharing, and other prosocial behaviours? What roles do biology and culture play in the development of prosocial behaviour? In this book, Nancy Eisenberg and Paul Mussen review and summarize scholarly research that has been devoted to the development of prosocial behaviour in children, and examine the variety of influences that contribute to children's prosocial development, including the media, parents, peers, biology, culture, personal characteristics, as well as situational determinants. The authors argue that prosocial behaviour can be learned and is modifiable, and they suggest ways that parents, teachers, and other can enhance prosocial development. In addition, the authors attempt to communicate the advances in the study of prosocial development that have taken place over the last decade. The book highlights some questions that have not yet been addressed adequately by researchers, and suggests areas for future work.

The Dawn of Everything David Graeber 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and

warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

Organized crime runs every franchise, games are fixed and rival players are assassinated. Follow the story of Quentin Barnes, a 19-year-old quarterback prodigy that has been raised all his life to hate, and kill, those aliens. Quentin must deal with his racism and learn to lead, or he'll wind up just another stat in the column marked "killed on the field." Ritual, Play, and Belief in Evolution and Early Human Societies Colin Renfrew 2017-11-30 The origins of religion and ritual in humans have been the focus of centuries of thought in archaeology, anthropology, theology, evolutionary psychology and more. Play and ritual have many aspects in common, and ritual is a key component of the early cult practices that underlie the religious systems of the first complex societies in all parts of the world. This book examines the formative cults and the roots of religious practice from the earliest times until the development of early religion in the Near East, in China, in Peru, in Mesoamerica and beyond. Here, leading prehistorians and other specialists bring a fresh approach to the early practices that underlie the faiths and religions of the world. They demonstrate the profound role of play ritual and belief systems and offer powerful new insights into the emergence of early civilization.
