**The Icarus Deception** Seth Godin 2012-12-31 In The Icarus Deception, Seth Godin's most inspiring book, he challenges readers to find the courage to treat their work as a form of art. Everyone knows that Icarus's father made him wings and told him not to fly too close to the sun; he ignored the warning and plunged to his doom. The lesson: Play it safe. Listen to the experts. It was the perfect propaganda for the industrial economy. What boss wouldn't want employees to believe that obedience and conformity are the keys to success? But we tend to forget that Icarus was also warned not to fly too low, because seawater would ruin the lift in his wings. Flying too low is even more dangerous than flying too high, because it feels deceptively safe. The safety zone has moved. Conformity no longer leads to comfort. But the good news is that creativity is scarce and more valuable than ever. So is choosing to do something unpredictable and brave: Make art. Being an artist isn't a genetic disposition or a specific talent. It's an attitude we can all adopt. It's a hunger to seize new ground, make connections, and work without a map. If you do those things you're an artist, no matter what it says on your business card. Godin shows us how it's possible and convinces us why it's essential. 'If Seth Godin didn't exist, we'd need to invent him' Fast Company 'Seth Godin is a demigod on the web, a bestselling author, highly sought-after lecturer, successful entrepreneur, respected pundit and high-profile blogger' Forbes Seth Godin is the author of thirteen international bestsellers that have changed the way people think about marketing, the ways ideas spread, leadership and change including Permission Marketing, Purple Cow, All Marketers are Liars, The Dip and Tribes. He is the CEO of Squidoo.com and a very popular lecturer. His blog, [www.sethgodin.typepad.com](http://www.sethgodin.typepad.com), is the most influential business blog in the world, and consistently one of the 100 most popular blogs on any subject..

[The Cambridge Introduction to Russian Literature](#) Caryl Emerson 2008-07-10 Russian literature arrived late on the European scene. Within several generations, its great novelists had shocked - and then conquered - the world. In this introduction to the rich and vibrant Russian tradition, Caryl Emerson weaves a narrative of recurring themes and fascinations across several centuries. Beginning with traditional Russian narratives (saints' lives, folk tales, epic and rogue narratives), the book moves through literary history chronologically and thematically, juxtaposing literary texts from each major period. Detailed attention is given to canonical writers including Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Bulgakov and Solzhenitsyn, as well as to some current bestsellers from the post-Communist period. Fully accessible to students and readers with no knowledge of Russian, the volume includes a glossary and pronunciation guide of key Russian terms as well as a list of useful secondary works. The book will be of great interest to students of Russian as well as of comparative literature.

[Nobody's Child: A Tragedy, a Trial, and a History of the Insanity Defense](#) Susan Vinocour 2020-03-24 A powerful and humane exploration of the history of the "insanity defense," through the story of one poignant case. When a three-year-old child was found with a head wound and other injuries, it looked like an open-and-shut case of second-degree murder. Psychologist and attorney Susan Vinocour agreed to evaluate the defendant, the child's mentally ill and impoverished grandmother, to determine whether she was competent to stand

trial. Even if she had caused the child's death, had she realized at the time that her actions were wrong or was she legally "insane"? What followed was anything but an open-and-shut case. *Nobody's Child* traces the legal definition of "insanity" back to its inception in Victorian Britain nearly two hundred years ago, from when our understanding of the human mind was in its infancy, to today, when questions of race, class, and ability so often determine who is legally "insane" and who is criminally guilty. Vinocour explains how "competency" and "insanity" are creatures of a legal system, not of psychiatric reality, and how, in criminal law, the insanity defense has too often been a luxury of the rich and white. *Nobody's Child* is a profoundly dignified portrait of injustice in America and a complex examination of the troubling intersection of mental health and the law. When prisons are now the largest institutions for the mentally ill, Vinocour demands that we reckon with our conceptions of "insanity" with clarity, empathy, and responsibility.

Managing Disaster Risk in Emerging Economies Alcira Kreimer 2000-01-01 In 1999 natural catastrophes and man-made disasters claimed more than 105,000 lives, 95 percent of them in the developing world, and caused economic losses of around US\$100 billion. In 1998 the twin disasters of the Yangtze and Hurricane Mitch accounted for two-thirds of the US\$65 billion loss. The geographical areas affected may vary, but one constant is that the per capita burden of catastrophic losses is dramatically higher in developing countries. To respond to an increased demand to assist disaster recovery programmes, the World Bank set up the Disaster Management Facility in 1998, to help provide the Bank with a more rapid and strategic response to disaster emergencies. The DMF focuses on risk identification, risk reduction, and risk sharing/transfer, the three major topics in this volume. The DMF also promotes strategic alliances with key private, government, multilateral and nongovernmental organisations to ensure the inclusion of disaster risk reduction as a central value of development. The most important of these partnerships is the ProVention Consortium, launched in February 2000, based on the premise that we must all take responsibility for making the new millennium a safer one.

**Middle Egyptian Grammar** James E. Hoch 1997 This is a practical, modern introductory grammar for classroom and self-instruction. Unlike Alan Gardiner's monumental *Egyptian Grammar*, this is not intended as a reference work, and it is designed to be as user-friendly as possible by, for example, presenting simplified forms of genuine texts rather than diving straight into the originals. It is suggested that the 16 lessons be spread over about 30 weeks study. The book is widely used in North American courses.
