How Epistemic Modifiers Emerge Jakob Maché 2019-03-04 This book delivers the first comprehensive study on German modal verbs which summarises and critically reflects the discussion of the last 500 years, checks these findings against large corpus data and is accessible to the English reader. It is shown that non-epistemic modal verbs modify events, whereas their epistemic counterparts modify the proposition, and how the latter developed from the former.

Early History of Cosmic Ray Studies Yataro Sekido 2012-12-06 On the occasion of the International Conference on Cosmic Rays held in Kyoto in August 1979 five aged members of the cosmic ray fraternity, H. Elliot, V. L. Ginzburg, B. Peters, Y. Sekido, and J. A. Simpson met together as a dinner party devoted to the enjoyment of Japanese cuisine and reminiscences of our younger days. This pleasant occasion called to of our own age as well as some eminent seniors not present at the mind the many friends conference whose recollections would have further enriched and enlivened our evening. By the time the dinner came to an end we had agreed that the compilation of a more extensive collection of personal reminiscences would be an interesting and worthwhile undertaking. Accordingly, the next day we held an editorial meeting to draw up a list of potential authors and two of us, the present editors, started work on the

project. In putting the book together our intention has been to try to capture and record through these personal accounts something of the atmosphere, the excitement and the frustrations of research in cosmic rays as experienced at first hand by some of the practitioners in the field. It has never been our intention that it should comprise a systematic history of the subject. Neither, unfortunately, can it be a fully representative collection since practical limits to the size of the volume alone would preclude that.

A history of the case study Birgit Lang 2017-03-31 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This collection tells the story of the case study genre at a time when it became the genre par excellence for discussing human sexuality across the humanities and life sciences. It is a transcontinental journey from the imperial world of fin-de-siècle Central Europe to the interwar metropolises of Weimar Germany and to the United States of America in the post-war years. Foregrounding the figures of case study pioneers, and highlighting their often radical engagements with the genre, the book scrutinises the case writing practices of Sigmund Freud and his predecessor sexologist Richard von Krafft-Ebing; writers including Leopold von Sacher-Masoch and Alfred Döblin; Weimar intellectuals such as Erich Wulffen and psychoanalyst Viola Bernard. The results are important new insights into the continuing legacy of such writers and into the agency increasingly claimed by the readerships that emerged with the development of modernity.

Slapstick: An Interdisciplinary Companion Ervin Malakaj 2021-10-25 Despite its unabated popularity with audiences, slapstick has received rather little scholarly attention, mostly by scholars concentrating on the US theater and cinema traditions. Nonetheless, as a form of physical humor slapstick has a long history across various areas of cultural production. This volume approaches slapstick both as a genre of situational physical comedy and as a mode of communicating an affective situation captured in various cultural products. Contributors to the volume examine cinematic, literary, dramatic, musical, and photographic texts and performances. From medieval chivalric romance and nineteenth-century theater to contemporary photography, the contributors study treatments of slapstick across media, periods and geographic locations. The aim of a study of such wide scope is to demonstrate how slapstick emerged from a variety of complex interactions among different traditions and by extension, to illustrate that slapstick can be highly productive for interdisciplinary research.

From Goethe to Gundolf Roger Paulin 2021-08-24 From Goethe to Gundolf: Essays on German Literature and Culture is a collection of Roger Paulin's groundbreaking essays, spanning the last forty years. The work represents his major research interests of Romanticism and the reception of Shakespeare in Germany, but also explores a broader range of themes, from poetry and the public memorialization of poets to fairy stories - all meticulously researched, yet highly accessible. As a comprehensive examination of German literary history in the period 1700-1900, the collection not only includes accounts of the lives and work of Goethe, Schiller, the Schlegels, and Gundolf (amongst others), serving to nuance our understanding of these figures in history, but also considers diverse (and often underexplored) topics, from academic freedom

to the rise of travel literature. The essays have been reformulated, corrected, and updated to add references to recent works. However, the core foundations of the originals remain, and just as when they were first published, the value of these essays – to researchers, students, and all those who are interested in German literary history – cannot be overstated.

The Continuous Katherine Mortenhoe D. G. Compton 2016-07-05 Katherine Mortenhoe lives in a near future very similar to the present day. Only in her time, dying from anything but old age is unheard of; death has been cured. So when Katherine is diagnosed with a terminal brain disease brought on by an inability to process an ever increasing volume of sensory input, she immediately becomes a celebrity to the "pain-starved public." But Katherine rejects her tragic role: She will not agree to be the star of a Human Destiny TV show, her last days will not be documented or broadcast. What she doesn't realize is that from the moment of diagnosis she's been watched, not only by television producers but by a new kind of program host, a man with a camera behind his unsleeping eyes. Like Margaret Atwood's MaddAddam trilogy, Kazuo Ishiguro's Never Let Me Go, and the television series Black Mirror, The Continuous Katherine Mortenhoe is a thrilling psychological drama that is as wise about human nature as it is about the nature of technology.

Political Participation in the Digital Age Julia Tiemann-Kollipost 2020-02-29
This book explores the potential of the Internet for enabling new and flexible political participation modes. It meticulously illustrates how the Internet is responsible for citizens' participation practices from being general, high-threshold, temporally constricted, and dependent on physical presence to being topic-centered, low-threshold, temporally discontinuous, and independent from physical presence. With its ethnographic focus on Icelandic and German online participation tools *Betri Reykjavík* and *LiquidFriesland*, the book offers plentiful advice for citizens, programmers, politicians, and administrations alike on how to get the most out of online participation formats.

The Films of Wim Wenders Robert Phillip Kolker 1993-01-29 The authors trace the development of one of the most well-known directors of the New German Cinema that flourished in the 1970s and early 1980s. Examining Wim Wenders' career from his early film school productions through his mature works of the 1970s, this book also analyses the most recent works, as well as the themes and preoccupations that unite his oeuvre. As the authors note, Wenders' works have been profoundly influenced by American films, especially the 'road movie' genre. His own work often features characters who are always on the move, in an attempt to capture a glimpse of their identity and place in the world. They also represent a generation of postwar Germans seeking to redeem themselves and the history of their country by turning to American popular culture, particularly its music and movies.
