Ask Dr. Mueller Cookie Mueller 1997 Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear Water in a Pool Painted Black* and other publications. Also the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before *Bright Lights, Big City*, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

THE KALEVALA or Land of Heroes - New Improved Edition Anon E Mouse 2010-03 THE following translation was undertaken from a desire to lay before the English-speaking people the full treasury of epical beauty, folklore, and mythology comprised in The Kalevala (the Land of Heroes, the national epic of the Finns.) The Kalevala describes Finnish nature very minutely and very beautifully. Grimm says that no poem is to be compared with it in this respect. A deeper and more esoteric meaning of the Kalevala, however, points to a contest between Light and Darkness. The numerous myths of the poem are likewise full of significance and beauty, and the Kalevala should be read between the lines, in order that the full meaning of this great epic may be comprehended. The whole poem is replete with the most fascinating folk-lore about the mysteries of nature, the origin of things, the enigmas of human tears, and, true to the character of a national epic, it represents not only the poetry, but the entire wisdom and accumulated experience of a nation. One of the most notable characteristics of the Finnish mythology is the interdependence among the gods. The Finnish deities, like the ancient gods of Italy and Greece, are generally represented in pairs. They have their individual abodes and are surrounded by their respective families. The Sun and the Moon each have a consort, and sons and daughters. Only two sons of Paeivae appear in The Kalevala, one comes to aid of Wainamoinen in his efforts to destroy the mystic Fire-fish, by throwing from the heavens to the girdle of the hero, a "magic knife, silver-edged, and golden-handled;" the other son, Panu, the Fire-child, brings back to Kalevala the fire that had been stolen by Louhi, the wicked hostess of Pohyola. 10% of the net profit from the sale of this book will be donated to charities.

A Free People's Suicide Os Guinness 2012-06-11 Cultural observer Os Guinness argues that the American experiment in freedom is at risk. Only within the framework of what is true, right and good can freedom be found.

Nigerian Video Films Jonathan Haynes 2000 Nigerian video films--dramatic features shot on video and sold as cassettes--are being produced at the rate of nearly one a day, making them the major contemporary art form in Nigeria. The history of African film offers no precedent for such a huge, popularly based industry. The contributors to this volume, who include film and television directors, an anthropologist, and scholars of film studies and literature, take a variety of approaches to this flourishing popular art. Topics include aesthetic forms and distribution; the configurations of various ethnic audiences; the new media environment dominated by cassette technology; the video's materialism in a period of economic collapse; transformation of the traditional Yoruba traveling theater; individualism and the moral crisis in Igbo society; Hausa cultural values; the negotiation of gender roles, and the genre of Christian videos.

Coasters 101 Nick Weisenberger 2013-11-04 Have you always wanted to learn more about how roller coasters work? I'm not talking about the basic "roller coasters use gravity!" descriptions you're used to. I'm talking about learning in-depth about the nitty gritty engineering details, like: How do roller coaster engineers know what size motor is needed to pull the train to the top of the lift hill and how much will it cost to operate it? What material are the wheels made out of and how does it affect the performance of the ride? What is the difference between LIM and LSM propulsion? How does the control system on a racing or dueling coaster time up the near collision moments perfectly every single time? All of these questions and more are answered in the latest edition of *Coasters 101: An Engineer's Guide to Roller Coaster Design*. "I thought it was great. It was a good first look at roller coaster design. It also gave great information and details about roller coasters in general." - Adrina from Goodreads "Thanks for writing a very good book. I could not put it down. Lot's of great information. I am a technology and engineering teacher and the information I found here is very helpful in trying to get students more excited about engineering." -Amazon reviewer

Digital Light Daniel Palmer 2020-10-09 Light symbolises the highest good, it enables all visual art, and today it lies at the heart of billion-dollar industries. The control of light forms the foundation of contemporary vision. Digital Light brings together artists, curators, technologists and media archaeologists to study the historical evolution of digital light-based technologies. Digital Light provides a critical account of the capacities and limitations of contemporary digital light-based technologies and techniques by tracing their genealogies and comparing them with their predecessor media. As digital light remediates multiple historical forms (photography, print, film, video, projection, paint), the collection draws from all of these histories, connecting them to the digital present and placing them in dialogue with one another. Light is at once universal and deeply historical. The invention of mechanical media (including photography and cinematography) allied with changing print technologies (half-tone, lithography) helped structure the emerging electronic media of television and video, which in turn shaped the bitmap processing and raster display of digital visual media. Digital light is, as Stephen Jones points out in his contribution, an oxymoron: light is photons, particulate and discrete, and therefore always digital. But photons are also waveforms, subject to manipulation in myriad ways. From Fourier transforms to chip design, colour management to the translation of vector graphics into arithmetic displays, light is constantly disciplined to human purposes. In the form of fibre optics, light is now the infrastructure of all our media; in urban plazas and handheld devices, screens have become ubiquitous, and also standardised. This collection addresses how this occurred, what it means, and how

artists, curators and engineers confront and challenge the constraints of increasingly normalised digital visual media. While various art pieces and other content are considered throughout the collection, the focus is specifically on what such pieces suggest about the intersection of technique and technology. Including accounts by prominent artists and professionals, the collection emphasises the centrality of use and experimentation in the shaping of technological platforms. Indeed, a recurring theme is how techniques of previous media become technologies, inscribed in both digital software and hardware. Contributions include considerations of image-oriented software and file formats; screen technologies; projection and urban screen surfaces; histories of computer graphics, 2D and 3D image editing software, photography and cinematic art; and transformations of light-based art resulting from the distributed architectures of the internet and the logic of the database. *Digital Light* brings together high profile figures in diverse but increasingly convergent fields, from academy award-winner and co-founder of Pixar, Alvy Ray Smith to feminist philosopher Cathryn Vasseleu. Bodies of Evidence Nan Alamilla Boyd 2012-02-06 *Bodies of Evidence: The Practice of Queer Oral History* is the first book to provide serious scholarly insight into the methodological practices that shape lesbian, gay, bisexual, transgender, and queer oral histories. Each chapter pairs an oral history excerpt with an essay in which the oral historian addresses his or her methods and practices. With an afterword by John D'Emilio, this collection enables readers to examine the role memory, desire, sexuality, and gender play in documenting LGBTQ communities and cultures. The historical themes addressed include 1950s and '60s lesbian bar culture; social life after the Cuban revolution; the organization of transvestite social clubs in the U.S. midwest in the 1960s; Australian gay liberation activism in the 1970s; San Francisco electoral politics and the career of Harvey Milk; Asian American community organizing in pre-AIDS Los Angeles; lesbian feminist "sex war" cultural politics; 1980s and '90s Latina/o transgender community memory and activism in San Francisco; and the war in Iraq and Afghanistan. The methodological themes include questions of silence, sexual self-disclosure and voyeurism, the intimacy between researcher and narrator, and the social and political commitments negotiated through multiple oral history interviews. The book also examines the production of comparative racial and sexual identities and the relative strengths of same-sexuality, cross-sexuality, and cross-ideology interviewing.

Network Aesthetics Patrick Jagoda 2016-03-22 The term "network" is now applied to everything from the Internet to terrorist-cell systems. But the word's ubiquity has also made it a cliché, a concept at once recognizable yet hard to explain. *Network Aesthetics*, in exploring how popular culture mediates our experience with interconnected life, reveals the network's role as a way for people to construct and manage their world—and their view of themselves. Each chapter considers how popular media and artistic forms make sense of decentralized network metaphors and infrastructures. Patrick Jagoda first examines narratives from the 1990s and 2000s, including the novel *Underworld*, the film *Syriana*, and the television series *The Wire*, all of which play with network forms to promote reflection on domestic crisis and imperial decline in contemporary America. Jagoda then looks at digital media that are interactive, nonlinear, and dependent on connected audiences to show how recent approaches, such as those in the videogame *Journey*, open up space for participatory and improvisational thought. Contributing to fields as diverse as literary criticism, digital studies, media theory, and American studies, *Network Aesthetics* brilliantly demonstrates that, in today's world, networks are something that can not only be known, but also felt, inhabited, and, crucially, transformed.
