Lesson 3: Calculations used when compounding medications

answer this way, it is also possible to get the incorrect answer. This is particularly true if you don't write out the units for (a), (b), and (c), and if there other variables such as (d) and (e) involved. Because you are dealing with medications that could harm and in some cases even kill patients if the dose is miscalculated, you must use ...

20 QUESTIONS - Chris Beat Cancer

Feb 20, 2016 · Frankly, doctors are busy. They're just not telling patients everything they really need to know. They're glossing over a lot of important stuff. I created this to serve a need in the cancer community, because patients have no idea what they're getting into, and they don't know the right questions to ask.
