The Indian Vernaculars. [Letters, Etc.] Sayyid 'ABD ALLĀH IBN MUĤAMMAD 1872

Uremic Toxins Severin Ringoir 2012-12-06 The present book contains the Proceedings of a two day Symposium on Uremic Toxins organized at the University of Ghent in Belgium. A series of guest lectures, free communications and posters have been presented. An international audience of 163 scientists from 16 nationalities listened to and discussed extensively a spectrum of topics brought forward by colleagues and researchers who worked for many years in the field of Uremic Toxins. There is a striking contrast between all the new dialysis strategies available in the work to "clean" the uremic patients and the almost non-progression of our knowledge on uremic toxins in the past decade. In this sense the symposium was felt by all participants as a new start for the research in the biochemical field of the definition of uremia. If the present volume would stimulate new work in this field in order to define uremia, or identify the uremic toxins, the purpose of the organizers would be maximally fulfilled.

Phosphate Metabolism Shaul Massry 2013-11-21 We present to our readers the proceedings of the Second International Workshop on Phosphate. A short account of the history of the effort led to the Phosphate Workshops is appropriate and can be of interest to the reader. The idea for Phosphate Workshops was born in the early days of November, 1974. One of us (S. G. M.) suggested the thought to a group of scientists gathered for a luncheon in one of the attractive small restaurants in Weisbaden, Germany. The purpose of the workshop was to bring together interested scientists to discuss the newer developments and the recent advances in the field of phosphate metabolism and the other related minerals. An Organizing Committee made of Shaul G. Massry (USA), Louis V. Avioli (USA), Philippe Bordier (France), Herbert Fleisch (Switzerland), and Eduardo Slatopolsky (USA) was formed. The First Workshop was held in Paris during June 5-6, 1975 and was hosted by Dr. Philippe Bordier. Its proceeding was already published. The Second Workshop took place in Heidelberg during June 28-30, 1976 and was hosted by Dr. Eberhard Ritz. Both of these workshops were extremely successful scientific endeavors, and the need for them was demonstrated by the great interest they generated among the scientific community. The Organizing Committee, therefore, decided to continue with the tradition to hold additional Workshops annually or every other year.

Vengeance in Medieval Europe Daniel Lord Smail 2009-01-01 How did medieval society deal with private justice, with grudges, and with violent emotions? This ground-breaking reader collects for the first time a number of unpublished or difficult-to-find texts that address violence and emotion in the Middle Ages. The sources collected here illustrate the power and reach of the language of vengeance in medieval European society. They span the early, high, and later middle ages, and capture a range of perspectives including legal sources, learned commentaries, narratives, and documents of practice. Though social elites necessarily figure prominently in all medieval sources, sources concerning relatively low-status individuals and sources pertaining to women are included. The sources range from saints' lives that illustrate the idea of vengeance to later medieval court records concerning vengeful practices. A secondary goal of the collection is to illustrate the prominence of mechanisms for peacemaking in medieval European society. The introduction traces recent scholarly developments in the study of vengeance and discusses the significance of these concepts for medieval political and social history.

Contemporary Approaches to Public Policy B. Guy Peters 2016-05-25 This book considers a range of contemporary approaches to public policy studies. These approaches are based on a number of theoretical perspectives on decision-making, as well as alternative perspectives on policy instruments and implementation. The range of approaches covered in the volume includes punctuated equilibrium

models, the advocacy-coalition framework, multiple streams approaches, institutional analyses, constructivist approaches, behavioural models, and the use of instruments as an approach to public policy. The volume concludes with a discussion of fundamental issues of democracy in public policy.

The Languages of Japan and Korea Nicolas Tranter 2012 The Languages of Japan and Korea provides detailed descriptions of the major varieties of languages in the region, both modern and pre-modern, within a common format, producing a long-needed introductory reference source. Korean, Japanese, Ainu, and representative members of the main groupings of the Ryukyuan chain are discussed for the first time in great detail in a single work. The volume is divided into language sketches, the majority of which are broken down into sections on phonology, orthography, morphology, syntax and lexicon. Specific emphasis is placed on aspects of syntactic interest, including speech levels, honorifics and classifiers. Each language variety is represented in Roman-based transcription, although its own script (where there is such orthography) and IPA transcriptions are used sparingly where appropriate. The dialects of both the modern and oldest forms of the languages are given extensive treatment, with a primary focus on the differences from the standard language. These synchronic snapshots are complemented by a discussion of both the genetic and areal relationships between languages in the region. With contributions from a variety of scholars of the highest reputation, The Language of Japan and Korea is a much needed and highly useful tool for professionals and students in linguistics, as well as area studies specialists.

Making Russians Darius Staliūnas 2007-01 Making Russians is an innovative study dealing with Russian nationalities policy in Lithuania and Belarus in the aftermath of the 1863 Uprising. The book devotes most attention to imperial confessional and language policy, for in Russian discourse at that time it was religion and language that were considered to be the most important criteria determining nationality. The account of Russian nationalities policy presented here differs considerably from the assessments usually offered by historians from east-central Europe primarily because the author provides a more subtle description of the aims of imperial nationalities policy, rejecting the claim that the Russian authorities consistently sought to assimilate members of other national groups. At the same time the interpretation this study offers opens a discussion with western and Russian historians, especially those, who lay heavy emphasis on discourse analysis. This study asserts that the rhetoric of officials and certain public campaigners was influenced by a concept of political correctness, which condemned all forms of ethnic denationalisation. A closer look at the implementation of discriminatory policy allows us to discern within Russian imperial policy more attempts to assimilate or otherwise repress the cultures of non-dominant national groups than it is possible to appreciate simply by analysing discourse alone.

Sensory and Metabolic Control of Energy Balance Wolfgang Meyerhof 2010-09-24 During the last two decades, the prevalence of obesity has dramatically increased in western and westernized societies. Its devastating health consequences include hypertension, cardiovascular diseases, or diabetes and make obesity the second leading cause of unnecessary deaths in the USA. As a consequence, obesity has a strong negative impact on the public health care systems. Recently emerging scientific insight has helped understanding obesity as a complex chronic disease with multiple causes. A multileveled gene-environment interaction appears to involve a substantial number of susceptibility genes, as well as associations with low physical activity levels and intake of high-calorie, low-cost, foods. Unfortunately, therapeutic options to prevent or cure this disease are extremely limited, posing an extraordinary challenge for today's biomedical research community. Obesity results from imbalanced energy metabolism leading to lipid storage. Only detailed understanding of the multiple molecular underpinnings of energy metabolism can provide the basis for future therapeutic options. Numerous aspects of obesity are currently studied, including the essential role of neural and endocrine control circuits, adaptive responses of catabolic and anabolic pathways, metabolic fuel sensors, regulation of appetite and satiation, sensory information processing, transcriptional control of metabolic processes, and the endocrine role of adipose tissue. These studies are predominantly fuelled by basic research on mammalian models or clinical studies, but these findings were paralleled by important insights, which have emerged from studying invertebrate models.

A Case of Exploding Mangoes Mohammed Hanif 2010-10-29 Teasing, provocative, and very funny, Mohammed Hanif's debut novel takes one of the subcontinent's enduring mysteries and out if it spins a tale as rich and colourful as a beggar's dream. Why did a Hercules C130, the world's sturdiest plane, carrying Pakistan's military dictator General Zia ul Haq, go down on 17 August, 1988? Was it because of: 1. Mechanical failure 2. Human error 3. The CIA's impatience 4. A blind woman's curse 5. Generals not happy with their pension plans 6. The mango season Or could it be your narrator, Ali Shigri? Here are the facts: • A military dictator reads the Quran every morning as if it was his daily horoscope. • Under Officer Ali Shigri carries a deadly message on the tip of his sword. • His friend Obaid answers all life's questions with a splash of eau de cologne and a quote from Rilke. • A crow has crossed the Pakistani border illegally. As young Shigri moves from a mosque hall to his military barracks before ending up in a Mughal dungeon, there are questions that haunt him: What does it mean to betray someone and still love them? How many names does Allah really have? Who killed his father, Colonel Shigri? Who will kill his killers? And where the hell has Obaid disappeared to?
