MyMathLab for Trigsted Trigonometry -- Access Card -- PLUS EText Reference Kirk Trigsted 2014-05-22 MyMathLab, used by more than 6 million math students, provides a wide range of homework, tutorial, and assessment tools that make it easy to manage your course online. This is the product access code card for MyMathLab and does not include the actual bound book, but does include the eBook. Kirk Trigsted revolutionized the way this course is taught when he created College Algebra, a completely clickable eText that was written from the ground up within MyMathLab(R). Recognizing that today's students start with the homework instead of reading the text, Trigsted created an online learning environment that is a seamless mix of exposition, videos, interactive animations, tutorials, and assessment. This approach leverages the power of MyMathLab and leads students to interact with course materials in a way that is proving to be more effective. With this new edition, Trigsted continues to innovate with a revised design with improved navigation and usability, expanded videos, and increased animation coverage. As with the prior edition, all multimedia elements, exercises, feedback, and content are written by the author himself, so that the students have a consistent voice throughout the eText. Kirk Trigsted saw marked improvements in student learning when he started teaching with MyMathLab, but he noticed that most students started their assignments by going directly to the MyMathLab homework exercises without consulting their textbook. This inspired Kirk to write a true eText, built within MyMathLab, to create a dynamic, seamless learning experience that would better meet the needs and expectations of his students. Completely clickable and fully integrated--the Trigsted eText is designed for today's learners. Beginning Algebra is also available with two printed resources to provide additional support for you: The eText Reference is a spiral-bound, printed version of the eText that provides a place for students to do practice work and summarize key concepts from the online videos and animations. In addition to the benefits it provides students, the eText Reference is also a nice resource for those instructors that prefer a printed text for class preparation. The Guided Notebook is an interactive workbook that guides students through the course by asking them to write down key definitions and work through important examples for each section of the eText. This resource is available in a three-hole-punched, unbound format to provide the foundation for a personalized course notebook. Students can integrate their class notes and homework notes within the appropriate section of the Guided Notebook. Instructors can customize the Guided Notebook files found within MyMathLab. This is the MyMathLab Student Access Kit only, and does not include the supplementary materials listed above.

Elementary & Intermediate Algebra Michael Sullivan, III 2013-01-22 Normal 0 false false false MicrosoftInternetExplorer4 This edition features the exact same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value--this format costs significantly less than a new textbook. The Sullivan/Struve/Mazzarella Algebra program is designed to motivate students to "do the math"-- at home or in the lab--and supports a variety of learning environments. The text is known for its two-column example format that provides annotations to the left of the algebra. These annotations explain what the authors are about to do in each step (instead of what was just done), just as an instructor would do.

With this new edition, Trigsted continues to innovate with a revised design with improved navigation and usability, expanded videos, and increased animation coverage. As with the prior edition, all multimedia elements, exercises, feedback, and content are written by the author himself, so that the students have a consistent voice throughout the eText. **ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. --
