Cognitive Perspectives on Word Formation Alexander Onysko 2010 The series provides a comprehensive forum for publications in linguistics covering the entire range of language, including its variation and variability in space and time, its acquisition, theories on the nature of human language in general, and descriptions of individual languages. The series welcomes publications addressing the state of the art of linguistics as a whole or of specific subfields, and publications that offer challenging new approaches to linguistics. This volume is the first one to illuminate diverse aspects of word formation from cognitive perspectives. Guided by methodological pluralism, the contributions shed light on a variety of issues in word formation theory and on the interfaces between word formation and phraseology, phonology, and inflection. The majority of the studies focuses on individual types of word formation, reframing our understanding of these processes. Overall, the various contributions add to a yet marginal body of research in cognitive word formation and advance our awareness about the benefits of applying cognitive linguistic thoughts for investigating processes of lexical creation.

The Politics of the Governed Partha Chatterjee 2004-03-10 Often dismissed as the rumblings of "the street," popular politics is where political modernity is being formed today, according to Partha Chatterjee. The rise of mass politics all over the world in the twentieth century led to the development of new techniques of governing population groups. On the one hand, the idea of popular sovereignty has gained wide acceptance. On the other hand, the proliferation of security and welfare technologies has created modern governmental bodies that administer populations, but do not provide citizens with an arena for democratic deliberation. Under these conditions, democracy is no longer government of, by, and for the people. Rather, it has become a world of power whose startling dimensions and unwritten rules of engagement Chatterjee provocatively lays bare. This book argues that the rise of ethnic or identity politics—particularly in the postcolonial world—is a consequence of new techniques of governmental administration. Using contemporary examples from India, the book examines the different forms taken by the politics of the governed. Many of these operate outside of the traditionally defined arena of civil society and the formal legal institutions of the state. This book

considers the global conditions within which such local forms of popular politics have appeared and shows us how both community and global society have been transformed. Chatterjee's analysis explores the strategic as well as the ethical dimensions of the new democratic politics of rights, claims, and entitlements of population groups and permits a new understanding of the dynamics of world politics both before and after the events of September 11, 2001. The Politics of the Governed consists of three essays, originally given as the Leonard Hastings Schoff Lectures at Columbia University in November 2001, and four additional essays that complement and extend the analyses presented there. By combining these essays between the covers of a single volume, Chatterjee has given us a major and urgent work that provides a full perspective on the possibilities and limits of democracy in the postcolonial world.

Ancient Divination and Experience Lindsay Gayle Driediger-Murphy 2019 This is an open access title available under the terms of a CC BY-NC-ND 4.0 licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. This volume sets out to re-examine what ancient people - primarily those in ancient Greek and Roman communities, but also Mesopotamian and Chinese cultures - thought they were doing through divination, and what this can tell us about the religions and cultures in which divination was practised. The chapters, authored by a range of established experts and upcoming early-career scholars, engage with four shared questions: What kinds of gods do ancient forms of divination presuppose? What beliefs, anxieties, and hopes did divination seek to address? What were the limits of human 'control' of divination? What kinds of human-divine relationships did divination create/sustain? The volume as a whole seeks to move beyond functionalist approaches to divination in order to identify and elucidate previously understudied aspects of ancient divinatory experience and practice. Special attention is paid to the experiences of non-elites, the perception of divine presence, the ways in which divinatory techniques could surprise their users by yielding unexpected or unwanted results, the difficulties of interpretation with which divinatory experts were thought to contend, and the possibility that divination could not just ease, but also exacerbate, anxiety in practitioners and consultants.

Standard Acupuncture Nomenclature 1993 Now in its second edition, Standard Acupuncture Nomenclature has been extensively revised following a number of consultations with experts representing all the major traditions of acupuncture. The nomenclature covers the 361 classical acupuncture points organized according to the fourteen meridians. Each entry gives the standardized name of the point in its three elements: an alphanumeric code derived from the English language translation of the meridian name the Chinese phonetic alphabet (Pinyin) name, and the Han (Chinese) character. The original form of the writing is shown first followed by a simplified form of the character. Each entry also provides a brief comment on the point explaining the meaning of the Han character and the significance of the point's location. Use of the nomenclature is facilitated by the inclusion of two indexes. The first lists the equivalent names and code names of the acupuncture points as used in English French Japanese Korean and Vietnamese. The second lists the Han characters for the 361 points.

The Forgotten Cradle of the Hungarian Culture Sándor Nagy 1973 "It is generally believed that the Hungarians are descended from the primitive Vogul people who live in Siberia, and that the Hungarian language belongs to the Finn-Ugrian language family. In this book, Dr. Sándor disproves this theory and he states and convincingly proves that the Magyar (Hungarian) language and people are directly descended from the Sumerians. He does not take his material from books already written, but presents his readers with the results of fifty years of research and offers his conclusions."--Provided by publisher.

Traditional Techniques in Classical Hebrew Verse Wilfred G. E. Watson 1994-09-01 Before, during and after the preparation of *Classical Hebrew Poetry: A Guide to its Techniques*, Wilfred Watson published several articles on Hebrew poetry in a wide range of periodicals. The present volume collects together the most significant of these writings, including a chapter from a book on chiasmus, as well as a few unpublished items. After an opening survey of current work on Hebrew verse the articles cover the following topics: parallelism (including half-line parallelism, previously almost unnoticed), antithesis, word pairs, chiasmus, figurative language and introductions to speech in verse. The last section deals with structural devices and a folktale motif in narrative verse, hyperbole, apostrophe and alliteration. Previously unpublished items are on the contribution of ethnopoetics, from the study of Native American literature to Hebrew narrative verse (a new topic in biblical studies), parallelism in the Song of Songs and a metaphor in Jeremiah. This anthology is intended as a companion volume to *Classical Hebrew Poetry*. It includes additions and corrections to that book and there are also several indices.
