**I Want You to Know We're Still Here** Esther Safran Foer 2021-03-30 NATIONAL JEWISH BOOK AWARDS FINALIST • “Part personal quest, part testament, and all thoughtfully, compassionately written.”—The Washington Post “Esther Safran Foer is a force of nature: a leader of the Jewish people, the matriarch of America’s leading literary family, an eloquent defender of the proposition that memory matters. And now, a riveting memoirist.”—Jeffrey Goldberg, editor in chief of The Atlantic NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR Esther Safran Foer grew up in a home where the past was too terrible to speak of. The child of parents who were each the sole survivors of their respective families, for Esther the Holocaust loomed in the backdrop of daily life, felt but never discussed. The result was a childhood marked by painful silences and continued tragedy. Even as she built a successful career, married, and raised three children, Esther always felt herself searching. So when Esther’s mother casually mentions an astonishing revelation—that her father had a previous wife and daughter, both killed in the Holocaust—Esther resolves to find out who they were, and how her father survived. Armed with only a black-and-white photo and a hand-drawn map, she travels to Ukraine, determined to find the shtetl where her father hid during the war. What she finds reshapes her identity and gives her the opportunity to finally mourn. *I Want You to Know We’re Still Here* is the poignant and deeply moving story not only of Esther’s journey but of four generations living in the shadow of the Holocaust. They are four generations of survivors, storytellers, and memory keepers, determined not just to keep the past alive but to imbue the present with life and more life.

My Stroke of Insight Jill Bolte Taylor 2008-05-12 "Transformative...[Taylor's] experience...will shatter [your] own perception of the world."—ABC News The astonishing New York Times bestseller that chronicles how a brain scientist's own stroke led to enlightenment On December 10, 1996, Jill Bolte Taylor, a thirty-seven-year-old Harvard-trained brain scientist experienced a massive stroke in the left hemisphere of her brain. As she observed her mind deteriorate to the point that she could not walk, talk, read, write, or recall any of her life—all within four hours—Taylor alternated between the euphoria of the intuitive and kinesthetic right brain, in which she felt a sense of complete well-being and peace, and the logical, sequential left brain, which recognized she was having a stroke and enabled her to seek help before she was completely lost. It would take her eight years to fully recover. For Taylor, her stroke was a blessing and a revelation. It taught her that by "stepping to the right" of our left brains, we can uncover feelings of well-being that are often sidelined by "brain chatter." Reaching wide audiences through her talk at the Technology, Entertainment, Design (TED) conference and her appearance on Oprah's online Soul Series, Taylor provides a valuable recovery guide for those touched by brain injury and an inspiring testimony that inner peace is accessible to anyone.

Wilhelm Gustloff Edward Petruskevich 2017-01-14 All of the current literature on the Wilhelm Gustloff is written about her time in Gotenhafen as an accommodation liner, final voyage and her sinking, but what of her pleasure voyages? Inside, you will find menus, photographs, souvenirs, and a passenger journal published in English from her 24th voyage to Italy from December 28th, 1938 to January 9th, 1939.

*Alienated Wisdom* Giuseppe Veltri 2018-08-21 The present study addresses problems of an epistemological nature which hinge on the question of how to define Jewish thought. It will take its start in an ancient question, that of the relationship between Jewish culture, Greek philosophy, and then Greco-Roman (and Christian) thought in connection with the query into the history and genealogy of wisdom and knowledge. Our journey into the history of the denomination 'Jewish philosophy' will include a leg that will lead us to certain declarations of political, moral, and scientific principles, and then on to the birth of what is called philosophia perennis or, in Christian circles, prisca theologia. Our subject of inquiry will thus be the birth of the concept of Jewish philosophy, Jewish theology and Jewish philosophy of religion. A special emphasis will fall on the topic treated in the last part of this study: Jewish scepticism, a theme that involves a philosophical attitude founded on dialectical "enquiry", as the etymology of the Greek word skepsis properly means.

**Broken Music** Ursula Block 2018-11 Broken Music is an essential compendium for records created by visual artists. The publication was edited by Ursula Block and Michael Glasmeier and originally published in 1989 by DAAD. Broken Music focuses on recordings, record-objects, artwork for records, and record installations made by thousands of artists between WWII and 1989. It also includes essays by both editors as well as Theodor W. Adorno, René Block, Jean Dubuffet, Milan Knizak, László Moholy-Nagy, Christiane Seiffert, and Hans Rudolf Zeller, as well as a flexi disc of the Arditti Quartet performing Knizak's "Broken Music." The centerpiece of the publication is a nearly 200-page bibliography of artists' records. Works chosen for the publication revolved around four criteria: (1) record covers created as original work by visual artists; (2) record or sound-producing objects (multiples/editions/sculptures); (3) books and publications that contain a record or recorded-media object; and (4) records or recorded media that have sound by visual artists.

**Simon Marius and His Research** Hans Gaab 2019-06-19 The margravian court astronomer Simon Marius, was involved in all of the new observations made with the recently invented telescope in the early part of the seventeenth century. He also discovered the Moons of Jupiter in January 1610, but lost the priority dispute with Galileo Galilei, because he missed to publish his findings in a timely manner. The history of astronomy neglected Marius for a long time, finding only the apologists for the Copernican system worthy of attention. In contrast the papers presented on the occasion of the Simon Marius Anniversary Conference 2014, and collected in this volume, demonstrate that it is just this struggle to find the correct astronomical system that makes him particularly interesting. His research into comets, sunspots, the Moons of Jupiter and the phases of Venus led him to abandon the Ptolemaic system and adopt the Tychoic one. He could not take the final step to heliocentricity but his rejection was based on empirical arguments of his time. This volume presents a translation of the main work of Marius and shows the current state of historical research on Marius.
