Burning Beethoven Erik Kirschbaum 2015-05-01 "Burning Beethoven explores how a flourishing culture in America was wiped out by an eruption of anti-German hysteria during World War I, when jingoistic Americans eradicated German from schools, churches, libraries, and newspapers. Germans made up the biggest, proudest, and most successful ethnic group but became targets of hate, and sometimes victims of tarring and feathering - - even vigilante hangings. Zealous Americans slaughtered dachshunds and renamed sauerkraut "liberty cabbage" - - the "freedom fries" of that era. This book sheds light on a dark chapter of American history." --Back cover.

Dreaming in Books Andrew Piper 2011-08-22 At the turn of the nineteenth century, publishing houses in London, New York, Paris, Stuttgart, and Berlin produced books in ever greater numbers. But it was not just the advent of mass printing that created the era's "bookish" culture. According to Andrew Piper, romantic writing and romantic writers played a crucial role in adjusting readers to this increasingly international and overflowing literary environment. Learning how to use and to want books occurred through more than the technological, commercial, or legal conditions that made the growing proliferation of books possible; the making of such bibliographic fantasies was importantly a product of the symbolic operations contained within books as well. Examining novels, critical editions, gift books, translations, and illustrated books, as well as the communities who made them, *Dreaming in Books* tells a wide-ranging story of the book's identity at the turn of the

nineteenth century. In so doing, it shows how many of the most pressing modern communicative concerns are not unique to the digital age but emerged with a particular sense of urgency during the bookish upheavals of the romantic era. In revisiting the book's rise through the prism of romantic literature, Piper aims to revise our assumptions about romanticism, the medium of the printed book, and, ultimately, the future of the book in our so-called digital age.

The Bilingual Reform Wolfgang Butzkamm 2009

Step by Step Ana Maria Rojo Lopez 2009 This book is a course in contrastive linguistics and translation which introduces the basics of linguistic analysis as applied to translation. Translation is presented as a problem-solving activity and linguistic analysis is proposed as a useful methodological tool to identify a wide range of translation problems. The course adopts a method which starts with the translation of words and goes up, step by step, through the different levels of linguistic structure to the level of pragmatic context. Myriad examples and a wide variety of exercises enable readers to acquire and practise some of the most common strategies translators use to solve the problems encountered at the different levels of linguistic analysis. The book aims at providing students with the theoretical and methodological tools needed to reinforce their linguistic and textual competence in the languages involved and make adequate progress along the translation process. As theoretical tools, students are given an overview of basic translation concepts and linguistic tools central to contrastive linguistics and textual analysis. As methodological tools, students are presented with a working method that, at the beginning, will allow them to grasp the principles and strategies that govern general translation, and which they could later extrapolate to specialised translation.

The Position of the German Language in the World Ulrich Ammon 2019 The Position of the German Language in the World focuses on the global position of German and the factors which work towards sustaining its use and utility for international communication. From the perspective of the global language constellation, the detailed data analysis of this substantial research project depicts German as an example of a second-rank language. The book also provides a model for analysis and description of international languages other than English. It offers a framework for strengthening the position of languages such as Arabic, Chinese, French, Portuguese, Spanish and others and for countering exaggerated claims about the global monopoly position of English. This comprehensive handbook of the state of the German language in the world was originally published in 2015 by Walter de Gruyter in German and has been critically acclaimed. Suitable for scholars and researchers of the German language, the handbook shows in detail how intricately and thoroughly German and other second-rank languages are tied up with a great number of societies and how these statistics support or weaken the languages' functions and maintenance.

Library and Information Sciences Chuanfu Chen 2014-09-30 This book explores the development, trends and research of library and information sciences (LIS) in the digital age. Inside, readers will find research and case studies written by LIS experts, educators and theorists, most of whom have visited China, delivered presentations there and drafted their articles based on feedback they received. As a result, readers will discover the LIS issues and concerns that China and the international community have in common. The book first introduces the opportunities and challenges faced by the library and information literacy profession and discusses the key role of librarians in the future of information literacy education. Next, it covers trends in LIS education by examining the vision of the iSchool movement and detailing its practice in Syracuse University. The book then covers issues in information seeking and retrieval by showing how visual data mining technology can be used to detect the relationship and pattern between terms on the Q&A of a social media site. It also includes a case study regarding tracing information seeking behavior and usage on a multimedia website. Next, the book stresses the importance of building an academic accreditation framework for scientific datasets, explores the relationship between bibliometrics and university rankings, and details the birth and development of East Asian Libraries in North America. Overall, the book offers readers insight into the changing nature of LIS, including the electronic dissemination of information, the impact of the Internet on libraries, the changing responsibilities of library professionals, the new paradigm for evaluating information, and characteristics and functions of today's library personnel.

Lutheran Patristic Catholicity Quentin D. Stewart 2015 This book examines how Lutheranism continued to define itself as the evangelical catholic faith during almost two centuries of struggle over "ownership" of the fathers. Central to the discussion is Martin Chemnitz, who grappled with charges of theological novelty, appealed to a qualified consensus of the fathers, and responded to Trent's claim to the ancient ecumenical consensus. Subsequent responses of Lutheran Orthodoxy to the Roman Catholic defense of Tridentine dogma - and its particular appeal to the ancient consensus and, later, to the patristic ecumenism of Georg Calixt - are also explored. In My Brother's Shadow Uwe Timm 2006 Uwe Timm was born in Germany in 1940. Just three years later his brother, Karl-Heinz, who was sixteen years his senior and a sapper in the elite SS Death's Head Division, was killed. His notebook was returned to the family, and the last entry read- 'I close my diary here because I don't see any point in recording the cruel things that sometimes happen.' When Timm decided to write this astonishing memoir, he feared the possibility that his brother's unit had taken part in the shooting of civilians and Jews. Yet he wanted to piece together his brother's experience, and also that of his nation, which once considered the qualities of an SS man so exemplary. As Timm unleashes his memories of this devastating time, he also pinpoints the questions that his parents' generation seemed unable to face, and offers new insights into the impact of the war on ordinary Germans.

The Isaianic Denkschrift and a Socio-Cultural Crisis in Yehud Alexander V. Prokhorov 2015-05-20 This study of the Isaianic Denkschrift (Isaiah 6:1-9:6) is both a traditional and an innovative one. It defends the integrity of the Denkschrift, yet on grounds wholly other than those outlined by the early proponents of the unity of the composition. The present work is founded on an inquiry into the ideological matrix of the composition on one hand and, on the other, on the understanding of the activity of mantic (prophetic) figures in the Near East during the early first millennium BCE that has emerged in recent scholarship. The presentation of Yahweh as a royal character in the Denkschrift is interpreted as an integral part of the symbolic universe promoted by the composition. Several levels of social discourse of the Denkschrift are identified: the author(s) is simultaneously engaged in the creation of Judaeon autonomous cultural identity, in polemical activity with the rival Yahwist community (the North, or Samaria) and in the safeguarding of the privileged position of the former Babylonian exiles among the community of Jerusalem and Judah. Two interrelated hypotheses are developed in the book: regarding the historical milieu in which the Denkschrift was composed and regarding the place of the composition in the formation of First Isaiah. As for the first, Prokhorov proposes that the early second-temple community of Yehud matches the profile of a society whose problems the Denkschrift is addressing and reflecting. As for the second, the author maintains the view that the Denkschrift marks one of the final stages of the creation of First Isaiah whose original nucleus consisted of the Hezekiah narrative (now found in chapters 36-39 of Isaiah), which, in turn, modified the respective Deuteronomistic material.

German Studies in English-speaking countries is in crisis and the situation in British Higher Education can be seen as a paradigmatic example. Symptoms of the crisis are a dramatic decrease in the number of students, financial difficulties and the resulting closures of German Departments. Furthermore, the language skills which finally emerge from universities are not always satisfactory. The present book sheds light on key aspects of the institutionalised teaching and learning of German language in the UK. The first part - the macro-context - surveys the socio-political developments that have recently affected the sector of modern languages and specifically the discipline of German Studies. The second part - the micro-context -, zooms in to the teaching and learning as experienced from both students' and teachers' perspective. Ultimately, by linking the macro-analysis with the micro findings, the present book proposes a number of strategies which could contribute to the optimisation and enhancement of teaching and learning German in British Higher Education.

Homoerotic Sensibilities in Late Imperial China Cuncun Wu 2004-08-02 Homoerotic Sensibilities in Late Imperial China is the richest exploration to date of late imperial Chinese literati interest in male love. Employing primary sources such as miscellanies, poetry, fiction and 'flower guides', Wu Cuncun argues that male homoeroticism played a central role in the cultural life of late imperial Chinese literati elites. Countering recent arguments that homosexuality was marginal and disparaged during this period, the book also seeks to trace the relationship of homoeroticism to status and power. In addition to historical portraits and analysis, the book also advances the concept of 'sensibilities' as a method for interpreting the complex range of homoerotic texts produced in late imperial China.

A Dictionary of Australian Underworld Slang Gary Simes 1993 Edited by Gary Simes, Australian Underworld Slang contains two previously unpublished glossaries of Australian prison and underworld slang compiled in the 1940s and 1950s. The first was compiled in 1944 by Ted Hartley, a conscientious objector imprisoned for his political beliefs. On Hartley's release, the novelist Kylie Tennant asked him to produce the glossary to assist her in the writing of a novel about prisoners. The glossary then lay forgotten and unrecognized in the National Library until Gary Simes's fortuitous discovery of it. The second glossary was compiled by a prisoner calling himself '35', whose identity has never been divulged. The 'Argot', as it was called, was revised by '35' in 1975, but this edition has not been located. Dr Simes combines the glossaries and draws on the full resources of the OED and the AND and his own formidable database of underworld and sexual language to place them in a broader lexicographical and historical context. He also contributes a long and important essay on the criminal literature since the Middle Ages.

Linguistic Awareness in Multilinguals Ulrike Jessner 2006-03-15 This book discusses cognitive and psycholinguistic aspects of third language acquisition and trilingualism, and explores the key role of linguistic awareness in multilingual proficiency and language learning. In view of the widespread acquisition of English by those who are already bilingual or are also acquiring a regional lingua franca this study will contribute to the current discussion of multilingualism with English in Europe and beyond, as well as the understanding of multilingual speech processing. The author supports a dynamic view of multilingualism by stressing the cognitive advantages that the contact with more languages can offer and uses this approach as the basis for future language teaching and learning. Chapters cover topics such as performing in a third language, metalinguistic awareness in multilinguals and in multilingual education, and English as a third language in Europe.

The Elements of Academic Style Eric Hayot 2014-08-26 Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

Beginning Logic Edward John Lemmon 1978-01-01 "One of the most careful and intensive among the introductory texts that can be used with a wide range of students. It builds remarkably sophisticated technical skills, a good sense of the nature of a formal system, and a solid and extensive background for more advanced work in logic. . . . The emphasis throughout is on natural deduction derivations, and the text's deductive systems are its greatest strength. Lemmon's unusual procedure of presenting derivations before truth tables is very effective." --Sarah Stebbins, *The Journal of Symbolic Logic*

Directed by Allen Smithee Jeremy Braddock 2001 Allen Smithee specializes in the mediocre. He is versatile. He is prolific. And he doesn't exist. From 1969 until 1999, Allen Smithee was the pseudonym adopted by Hollywood directors when they wished not to be associated with films ostensibly of their making . Encompassing over fifty films of various stripes -- B movies, sequels, music videos, made-for-TV movies -- Smithee's three decades of work affords the authors of this volume a unique opportunity to reassess the claims of auteurism, both in its traditional guise and in the more commodified form it currently assumes. Sometimes treating Smithee as an auteur in much the same way critics and scholars have treated directors as diverse as Douglas Sirk, Abbas Kiarostami, and Quentin Tarantino, the contributors reclaim new possibilities for auteurist filmmaking and film studies, even as they show what an empty display it has recently become. In accounting for this change, the essays in this volume employ innovative theories of authorship to recapture the subversive effect that auteurism once enjoyed. Thus the Smithee name becomes part of a larger discussion of the economics and history of pseudonyms in filmmaking -- notably in the blacklist of the 1950s -- as well as an opportunity to employ Jacques Derrida's theory of the signature to recover obscured economic and historic contexts within Smithee's films. Unique in its focus, innovative in its approach, Directed by Allen Smithee argues that it is precisely through throwaway films such as Smithee's that recent Hollywood cinema can best be studied.

A Case Study in Contextualization Fred W. McRae 2014-01-30 The content of the gospel never changes; however, communicating it constantly fluctuates. Conveying the gospel to a homeless, hungry woman may include providing a hot bowl of chili, while an agnostic co-worker might be open after several rounds of golf. The message is the same, but the method of communicating it is as wide and varied as life itself. Finding the correct method is like hitting the "sweet spot" on a tennis racket or golf club. It takes time, study, and practice, but once you find it you have more success. The "sweet spot" in missions is called contextualization and involves much more than learning a new language. It means knowing a country's religious, political, and social conditions. Correct theology, financial backing, and language acquisition are meaningless without contextualization. This book tells the story of a German organization struggling to contextualize the gospel in a very hostile environment. Its mission was to revive a dying church, characterized by centuries-old religious pride and pluralism. This study details the challenges of faithfully communicating the gospel in a post-Christian culture and serves as a study to enable missionaries to recognize and respond to cultural issues affecting the contextualization process.

The Sophia Mystery in Our Time Mario Betti 2013 "The confrontation with evil manifests as a battle taking place on many levels, the outcome of which lies in the hands of each one of us alive today. The most important requisite is the creating of a space within us in which a new consciousness, the Imagination, will gradually be able to arise. Much in the future depends on whether a sufficient number of people succeed in reaching this level of experience" (Maria Betti). With the world in turmoil, the greatest challenge facing us today, says Mario Betti, is the inner transformation of our whole being. Rebirth from within heralds a new form of consciousness--a creative imaginative faculty--that is also a reawakening of the mysterious Sophia, the Divine Feminine. Imagination allows us to behold the spiritual forces actively at work in the world, leading to the possibility of a comprehensive rebirth and renewal of culture. Handbook of Language and Communication: Diversity and Change Marlis Hellinger 2007-01-01 In line with the overall perspective of the Handbook series, the focus of Vol.9 is on language-related problems arising in the context of linguistic diversity and change, and the contributions Applied Linguistics can offer for solutions. Part I, "Language minorities and inequality," presents situations of language contact and linguistic diversity as world-wide phenomena. The focus is on indigenous and immigrant linguistic minorities, their (lack of) access to linguistic rights through language policies and the impact on their linguistic future .Part II "Language planning and language change," focuses on the impact of colonialism, imperialism, globalisation and economics as factors that language policies and planning

measures must account for in responding to problems deriving from language contact and linguistic diversity. Part III, "Language variation and change in institutional contexts," examines language-related problems in selected institutional areas of communication (education, the law, religion, science, the Internet) which will often derive from socioeconomic, cultural and other non-linguistic asymmetries. Part IV, "The discourse of linguistic diversity and language change," analyses linguistic diversity, language change and language reform as issues of public debates which are informed by different ideological positions, values and attitudes (e.g. with reference to sexism, racism, and political correctness). The volume also contains extensive reference sections and index material.
