**The Class Size Debate** Blatchford, Peter 2003-04-01 "This is a very important book which may become a classic. The research study is remarkable in its magnitude, breadth and duration.... it is described in a form accessible to practitioners and policy makers." - Professor Jeremy D. Finn, State University of New York at Buffalo, USA "This fascinating book is one that should be compulsory reading for student teachers... It also provides challenge and insight for experienced teachers. ...a stimulating source of evidence which will challenge people to consider their own approaches and what might constitute good practice. ...an important contribution to the class size debate." - Inservice Journal One of the most important debates in education in recent years has been about the effects of class size differences in schools. This book provides the most complete analysis to date of the educational consequences of class size differences, and sets out to solve the puzzling gap between professional experience and research findings. This book: Examines results from a pioneering research project of international significance, unique in its scale and methodology Investigates the relationships between class size and pupil achievements by detailed examination of classroom processes Considers the view that small classes provide better teaching and learning, and why this is not supported by past research findings Identifies implications for policy at government, LEA and school level, teacher education and professional development Indicates implications for practice - maximising opportunities of small classes and minimising problems in large classes. Written in an accessible style and drawing upon examples from classroom life, this book is important reading for student and practising primary school teachers, M.Ed and doctoral students, teacher educators, researchers and

policymakers.

*Ebook: Talk for Writing Across the Curriculum, How to Teach Non-Fiction Writing to 5-12 Year Olds (Revised Edition)* Pie Corbett 2020-08-26 This bestselling resource has been fully updated, putting formative assessment at the heart of the Talk for Writing process and showing how to help children love writing across the curriculum. By helping children speak the language of non-fiction in a fun engaging way before they attempt to write, the Talk for Writing approach builds children's confidence and linguistic ability enabling them to craft

their own writing. In the new edition, this practical resource offers:

- Fully worked, tried and tested examples of how to apply Talk for Writing to each non-fiction text type
- A wide range of fun activities helping children internalise how to express and link text effectively
- A process that co-constructs learning so that children learn how to structure text and create toolkits of key ingredients
- Guidance for teachers in England on how to apply the approach across the primary curriculum
- An OLC including new footage of Pie Corbett demonstrating Talk for Writing and new footage of classes engaged in the approach
- Advice on how to use the DVD and handouts to train all staff in the approach
- Evidence of impact from cold to hot tasks

Designed for busy teachers, Talk for Writing across the Curriculum, second edition, will help transform children's writing and attainment across the curriculum. "This book celebrates the importance of talk in becoming and growing as a writer: talk to share ideas; talk to analyse text; talk to co-construct writing; and to talk to evaluate writing. Throughout the book constantly underlines the importance of talk for learning and the many creative and rich ways talk can be used to help young writers internalise the rhythms and patterns of text. Full of practical ideas and activities, the teaching combines being creative and being critical in a wholly integrated way. An invaluable resource for primary school teachers!" Debra Myhill, Professor of Education at the University of Exeter, UK

"The teaching of reading has always taken priority in policy and practice in literacy. Pie Corbett and Julia Strong have produced a very welcome counterweight to that dominance in their Talk for Writing Across the Curriculum. It is so refreshing to see suggestions for teaching to bring elements of language together, especially when done in such an entertaining and engaging way as this. This new edition makes a 'classic' even better." David Wray, Emeritus Professor, University of Warwick, UK

"This latest update of Pie and Julia's best-selling book reflects changes in the curriculum, strengthening the T4W approach, using cold and hot tasks, showing new worked examples of how to apply T4W to each non-fiction type and placing formative assessment at the heart of the process. It is exciting to see how all the best ideas and findings in education are converging, evidenced in this latest 'up to the minute' excellent publication." Shirley Clarke, Formative Assessment Expert

**The Psychology of Education** Martyn Long 2010-11-05 Written in an accessible and engaging style, this second edition of The Psychology of Education addresses key concepts from psychology which relate to education. Throughout the text the author team emphasise an evidence-based approach, providing practical suggestions to improve learning outcomes, while fictional case studies are used in this new edition to provide students with a sense of what psychological

issues can look like in the classroom. Activities around these case studies give students the chance to think about how to apply their theoretical knowledge to these real-world contexts. 'Key implications' are drawn out at appropriate points, and throughout the book students are provided with strategies for interrogating evidence. Key terms are glossed throughout the book and chapters are summarised and followed by suggestions for further reading. A chapter on Learning interactions and social worlds is new to this edition. The following chapters have all been extensively updated: Learning Assessment Individual differences and achievement Student engagement and motivation The educational context Society and culture Language Literacy Inclusive education and special educational needs Behaviour problems Dealing with behaviour problems. This book is essential reading for undergraduate students of Education Studies and Psychology as well as trainee teachers on BA, BEd and PGCE courses. It will also be of use to postgraduates training to be educational psychologists.

Towards Dialogic Teaching R. J. Alexander 2006-01-01 With dialogue and dialogic teaching as upcoming buzz-words, we face a familiar mix of danger and opportunity. The opportunity is to transform classroom talk, increase pupil engagement, and lift literacy standards from their current plateau. The danger is that a powerful idea will be jargonised before it is even understood, let alone implemented, and that practice claiming to be dialogic will be little more than re-branded chalk and talk or ill-focused discussion. Dialogic teaching is about more than applying tips such as less hands-up bidding. It demands changes - in the handling of classroom space and time; in the balance

of talk, reading and writing; in the relationship between speaker and listener; and in the content and dynamics of talk itself.

Written in a clear and accessible style, this is the essential core text for all beginning students on undergraduate and postgraduate courses in Education Studies and all those interested in education today, where it came from and where it is going.

**The importance of teaching** Great Britain: Department for Education 2010-11-24  
England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

*Building Communities of Engaged Readers* Teresa Cremin 2014-06-20 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. *Building Communities of Engaged Readers* highlights the concept of 'Reading

Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

**Rethinking Class Size: The complex story of impact on teaching and learning** Peter Blatchford 2020-11-12 The debate over whether class size matters for teaching and learning is one of the most enduring, and aggressive, in education research. Teachers often insist that small classes benefit their work. But many

experts argue that evidence from research shows class size has little impact on pupil outcomes, so does not matter, and this dominant view has informed policymaking internationally. Here, the lead researchers on the world's biggest study into class size effects present a counter-argument. Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers' experience, and conclude that class size matters very much indeed. Drawing on 20 years of systematic classroom observations, surveys of practitioners, detailed case studies and extensive reviews of research, Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided. While class size may have no direct effect on pupil outcomes, it has, they say, significant force through interconnections with classroom processes. In describing these connections, the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere. It impacts on teaching, grouping practices and classroom management, the quality of peer relations, tasks given to pupils, and on the time teachers have for marking, assessments and understanding the strengths and challenges for individual pupils. From their analysis, the authors develop a new social pedagogical model of how class size influences work, and identify policy conclusions and implications for teachers and schools.
