African Arabic: Approaches to Dialectology Mena Lafkioui 2013-04-30 This present book studies from a dialectological perspective various African Arabic varieties, such as Maghreb Arabic, Bongor Arabic, Juba Arabic and Logorí Arabic. On the one hand, different specific linguistic aspects related to phonetics and phonology as well as to morphology, syntax and lexicology are discussed in this volume; e.g. the Arabic loanwords in Somali with regard to the strata in South Arabian, the structural features of Logorí Arabic and its use as Lingua Franca or native language, the contact-induced innovation processes in North African Arabic negation by analogy with Berber negation. On the other hand, the African Arabic theme is approached from a more general perspective analysing the contact effects on linguistic features and systems from a broader comparative, typological and universal viewpoint, e.g. a general typology of Arabic in Africa, the question of possible universal features of pidginization and creolization drawn on evidence from Arabic-based pidgins and creoles. Its outcomes offer important insights for all linguistic studies and approaches, and directly connect with other research fields such as sociolinguistics, ethnolinguistics and language acquisition.

Lake Pavin Téléphore Sime-Ngando 2018-07-07 This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its

substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.
