*Odes* Sharon Olds 2016-09-20 Following the Pulitzer prize-winning collection *Stag's Leap*, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

*Introduction to Public Librarianship, Third Edition* Kathleen de la Pena McCook 2018-12-18 Put simply, there is no text about public librarianship more rigorous or comprehensive than McCook's survey. Now, the REFORMA Lifetime Achievement Award-winning author has teamed up with noted public library scholar and advocate Bossaller to update and expand her work to incorporate the field's renewed emphasis on outcomes and transformation. This "essential tool" (*Library Journal*) remains the definitive handbook on this branch of the profession. It covers every aspect of the public library, from its earliest history through its current incarnation on the cutting edge of the information environment, including statistics, standards, planning, evaluations, and results; legal issues, funding, and politics; organization, administration, and staffing; all aspects of library technology, from structure and infrastructure to

websites and makerspaces; adult services, youth services, and children's services; associations, state library agencies, and other professional organizations; global perspectives on public libraries; and advocacy, outreach, and human rights. Exhaustively researched and expansive in its scope, this benchmark text continues to serve both LIS students and working professionals.

**The Son** Michel Rostain 2013-05-23 Selected for the Waterstones Eleven list for 2013. We first meet Michel eleven days after the death of his son Lion. Lion was lost, suddenly, to a virulent strain of meningitis and it's left his father and entire family reeling. We join Michel on his personal journey through grief, but the twist that makes the journey truly remarkable, and tips this true story into fiction, is the fact that we see it all through Lion's eyes. In a stunningly original blurring of memoir and fiction, THE SON tackles the very hardest of subjects in the most readable of ways. Michel Rostain resolutely ducks away from sentimentality and pathos, and tells his story instead with wit, wisdom and vitality. For this is not a book about death; it's a book about life.

Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young

siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

*Defining National Piano Schools* Wojciech Wisniewski 2016-03-08 This book is the result of a six-year investigation into the phenomenon of 'national piano schools' with a particular focus on establishing a definition of it. The book describes the current state of national schools and their evolution - particularly in the twentieth and twenty-first centuries. From references in topic related literature to Russian, Austro-German and French piano schools, as well as other less well documented ones, the author identifies key areas through which they may be defined. The book describes current perceptions of national piano schools, collected through interviews with contemporary piano professionals and an internationally distributed questionnaire. To add another dimension to the topic, the author explores issues related to teacher-student lineages across the ages as one of the supposedly main carriers of piano tradition. As a result, this book proposes a definition of a national piano school in terms of three broad areas: national characteristics, traditions of interpretation, and individual personality. The descriptions derived from the literature, interviews and questionnaire data resulted in various national piano schools (most notably Russian, French, German and American) being identifiable in such areas as: history, political circumstances, cultural and compositional heritage, language, conditioning, instrument type, key archetypes, generalized personality traits, technique, sound, aesthetics, phrasing, repertoire and individual personality. The changes in national schools are summarized as conforming to a trend towards unification and homogeneity, and the author presents a case that currently their unique character is much less pronounced, in some cases, as suggested by the data, to the extent of complete extinction. A nice addition to this book is the inclusion of the author's custom designed 'genealogical trees of pianism', presented here, in full, in Appendix A. This publication is a near-verbatim reproduction of the author's doctoral research of the same title. The decision to publish in book form was driven by the goal of introducing this academic research to a wider audience, and ensuring that the work invested in this study would foster further discussion.

*Physical Sciences for NGSS* Dr Tracey Greenwood 2020-05 Physical Sciences for NGSS has been specifically written to meet the requirements of the Next Generation Science Standards (NGSS) for High School Physical Sciences (HS-PS). It encompasses all three dimensions of the standards (science and engineering practices, crosscutting concepts, and disciplinary core ideas), addressing the program content through a wide range of engaging student-focused activities and investigations. Through completion of these activities, students build a sound understanding of science and engineering practices, recognize and understand the concepts that link all domains of science, and build the knowledge base required to integrate the three dimensions of the standards to meet the program's performance expectations.

*Bodyscapes* Allan I. Teger 2012 Can there be more than one reality at a time, and can we experience them both? These were the questions that led photographer and former psychology professor Allan I. Teger to create this collection of black and white *Bodyscapes*(R). At first glance, *Bodyscapes* appear to be landscapes; a second look shows that they are in fact nude bodies with small toys and miniatures set on them. Spanning a 35-year period, this collection shows more than 110 black and white images photographed in a single exposure without any post processing or manipulation. The body becomes the setting for golfing, skiing, mountain climbing, surfing, and other sports. Other images feature landscapes ranging from rolling farmlands to beaches and outer space. They are fun, beautiful, and sensual, but always in good taste. This elegant portfolio of Teger's images is an ideal, reality-bending addition to any art photography library.

**Verification and Validation of Complex Systems: Human Factors Issues** John A. Wise 2013-06-29 Despite its increasing importance, the verification and validation of the human-machine interface is perhaps the most overlooked aspect of system development. Although much has been written about the design and development process, very little organized information is available on how to verify and validate highly complex and highly coupled dynamic systems. Inability to evaluate such systems adequately may become the limiting factor in our ability to employ systems that our technology and knowledge allow us to design. This volume, based on a NATO Advanced Science Institute held in 1992, is designed to provide guidance for the verification and validation of all highly complex and coupled systems. Air traffic control is used as an example to ensure that the theory is described in terms that will allow its implementation, but the results can be applied to all complex and coupled systems. The volume presents the knowledge and theory in a format that will allow readers from a wide variety of backgrounds to apply it to the systems for which they are responsible. The emphasis is on domains where significant advances have been made in the methods of identifying potential problems and in new testing methods and tools. Also emphasized are techniques to identify the assumptions on which a system is built and to spot their weaknesses.

**Designing Designing** John Chris Jones 2021-02-25 designing designing is one of the most extraordinary books on design ever written. First published in 1984 and reprinted with this title and cover in 1991, the book was the product of ten years of auto-critique, reflection and experimentation on writing on designing. Offering a savage auto-critique of his own work on "methods", as well as of the wider methods and ends of advanced industrial societies as a whole, this book challenges the traditional product- and progress- orientated focus on design by insisting that the world now coming into being requires designing to be understood as 'a response to the whole of life.' But designing designing is also unique in modern design thinking in its exploration of what writing on designing might be. Combining essays, interviews,

reflections, performances, plays, poems, chance procedures, photographs, collages and quotes, Jones experiments with both form and content in an attempt to make a book which 'is not simply about designing but is instead itself an instance of the ideas and processes explored within it.'

*The Rejection of Consequentialism* Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

*30-Second Brain* Anil Seth 2014-03-06 Are we all at the mercy of our brain chemistry? Do you think that the amygdala and the hippocampus are fantastical sea monsters? What can an MRI scan tell us? The Life of Benedict de Spinosa Johannes Colerus 1706

Do the Americas Have a Common Literary History? Barbara Buchenau 2002 This book is based on the assumption that the problem of American literatures written in European languages is not the burden of Europe but the fact that they are second or further literatures written in the same language as older ones that happen to be located in Europe. The papers collected here address the following questions: Is it possible for two or more distinct literatures to coexist in the same language? If the distinction is more than merely ideological and convenient, what are the differences, and how did they come about? Is it reasonable to assume that differentiation followed similar patterns in the various literatures? The volume combines textual and theoretical studies of programmatic writings, literary works, and literary histories in English, French, and Spanish.

**The Omega Prize** S. L. Millward 2010 This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.
