The Archaeology of Knowledge Michel Foucault 2012-07-11 Madness, sexuality, power, knowledge—are these facts of life or simply parts of speech? In a series of works of astonishing brilliance, historian Michel Foucault excavated the hidden assumptions that govern the way we live and the way we think. The Archaeology of Knowledge begins at the level of "things aid" and moves quickly to illuminate the connections between knowledge, language, and action in a style at once profound and personal. A summing up of Foucault's own methadological assumptions, this book is also a first step toward a genealogy of the way we live now. Challenging, at times infuriating, it is an absolute indispensable guide to one of hte most innovative thinkers of our time.

The Psychic Life of Power Judith Butler 1997 Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

The Measurement of Sensation C. Wade Savage 2021-01-08 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1970.

Echinoderm Research 1991 L. Scalera-Liaci 1992-06-01 A selection of papers, reports and posters presented at the third European conference on echinoderms - a thorny-skinned group of marine animals considered of great zoological interest. The contributions look at morphology, development biology, ecology and symbiosis.

Power/Knowledge Michel Foucault 1980-11-12 Michel Foucault has become famous for a series of books that have permanently altered our understanding of many institutions of Western society. He analyzed mental institutions in the remarkable *Madness and Civilization*; hospitals in *The Birth of the Clinic*; prisons in *Discipline and Punish*; and schools and families in *The History of Sexuality*. But the general reader as well as the specialist is apt to miss the consistent purposes that lay behind these difficult individual studies, thus losing sight of the broad social vision and political aims that unified them. Now, in this superb set of essays and interviews, Foucault has provided a much-needed guide to Foucault. These pieces, ranging over the entire spectrum of his concerns, enabled Foucault, in his most intimate and accessible voice, to interpret the conclusions of his research in each area and to demonstrate the contribution of each to the magnificent -- and terrifying -- portrait of society that he was patiently compiling. For, as Foucault shows, what he was always describing was the nature of power in society; not the conventional treatment of power that concentrates on powerful individuals and repressive institutions, but the much more pervasive and insidious mechanisms by which power "reaches into the very grain of individuals, touches their bodies and inserts itself into their actions and attitudes, their discourses, learning processes and everyday lives" Foucault's investigations of prisons, schools, barracks, hospitals, factories, cities, lodgings, families, and other organized forms of social life are each a segment of one of the most astonishing intellectual enterprises of all time -- and, as this book proves, one which possesses profound implications for understanding the social control of our bodies and our minds.

The Postmodern Condition Jean-François Lyotard 1984 In this book it explores science and technology, makes connections between these epistemic, cultural, and political trends, and develops profound insights into the nature of our postmodernity.

Le roman du Big Bang Simon Singh 2005-11-02 Auteur des best-sellers *Le dernier théorème de Fermat* et *Histoire des codes secrets*, Simon Singh retrace ici la fabuleuse histoire de la théorie du Big Bang. Albert Einstein a dit un jour : « La chose la plus incompréhensible à propos de l'Univers est qu'il soit compréhensible ». Simon Singh estime que les génies comme Einstein ne sont pas les seuls humains à pouvoir accéder aux lois physiques régissant l'Univers. Nous pouvons tous les comprendre. En expliquant ce qu'est véritablement la théorie du Big Bang, le livre tente de montrer pourquoi il s'agit, aux yeux des cosmologistes d'une description exacte et pertinente des origines de l'Univers. Avec un sens du récit digne d'un roman, il fait également revivre pour nous les destinées de ces savants qui, génération après génération, ont défié toutes les résistances pour comprendre la création, et combattu l'idée - défendue par l'establishment scientifique - d'un cosmos éternel et immuable. Connu pour rendre simples et évidentes les questions les plus ardues, Simon Singh est le guide parfait de ce voyage. Tout le monde a entendu parler de la théorie du Big Bang, mais combien d'entre nous peuvent prétendre la comprendre ? Avec la clarté qui caractérise tous ces ouvrages, Simon Singh a écrit l'histoire de la plus importante théorie scientifique jamais formulée. Museum-Making in Vietnam, Laos, and Cambodia Jonathan Paquette 2022-06-03 Building on archival work undertaken in France and fieldwork undertaken in Southeast Asia, *Museum-Making in Vietnam, Laos, and Cambodia* provides a critical analysis of museum histories and development in three former colonial territories. This work documents the development of museums in French Indochina (1862-1954), specifically Vietnam, Laos, and Cambodia. The book explores the colonial culture of exhibition, traces the growth of museum collections through archaeological missions to Indochina and other parts of Asia, and examines the role of museums in the cultural life of this colonial society. In particular, the author re-contextualizes the role and part played by colonial museums in the implementation of heritage policies during the colonial era in French Indochina, a dimension that is often overlooked. Additionally, the book addresses the effects that the Second World War, the Vichy Regime, and the Japanese occupation had on these cultural institutions. The transformation of these museums in post-independence Vietnam, Laos, and Cambodia is also discussed. Providing comparisons with other colonial and post-colonial experiences, *Museum-Making in Vietnam, Laos, and Cambodia* will be a valuable resource for researchers in museum and heritage studies. It will also appeal to researchers and graduate students engaged in the study of history, anthropology, sociology, political science, and development and international studies.

The Transformation of Contemporary Health Care Tiago Moreira 2013-05-07 The past three decades have seen enormous changes in the organisation of health care. This book explores the role of knowledge production and technology on these transformations, focusing on the market (attempts to embed principles of economic rationality and efficient use of resources in the shaping and delivery of health care), the laboratory (science, experiments and 'evidence' in the management of research, practice and policy) and the forum (the application of deliberative procedures and other forms of public consultation to health care decision making).
