Dark Age Ahead Jane Jacobs 2007-12-18 In this indispensable book, urban visionary Jane Jacobs argues that as agrarianism gives way to a technology-based future, we're at risk of cultural collapse. Jacobs—renowned author of *The Death and Life of Great American Cities* and *The Economy of Cities*—pinpoints five pillars of our culture that are in serious decay: community and family; higher education; the effective practice of science; taxation, and government; and the self-regulation of the learned professions. The corrosion of these pillars, Jacobs argues, is linked to societal ills such as environmental crisis, racism, and the growing gulf between rich and poor. But this is a hopeful book as well as a warning. Drawing on a vast frame of reference—from fifteenth-century Chinese shipbuilding to Ireland's cultural rebirth—Jacobs suggests how the cycles of decay can be arrested and our way of life renewed. Invigorating and accessible, *Dark Age Ahead* is not only the crowning achievement of Jane Jacobs' career, but one of the most important works of our time.

Ecological Literacy Michael K. Stone 2005 Our efforts to build a sustainable world cannot succeed unless future generations learn how to partner with natural systems to our mutual benefit. In other words, children must become “ecologically literate.” The concept of ecological literacy advanced by this book’s creators, the Center for Ecoliteracy in Berkeley, California, goes beyond the discipline of environmental education. It aims, says David Orr in his foreword, “toward a deeper transformation of the substance, process, and scope of education at all levels”—familial, geographic, ecological, and political. The reports and essays gathered here reveal the remarkable work being done by the Center’s network of partners. In one middle school, for example, culinary icon Alice Waters founded a program that not only gives students healthy meals but teaches them to garden—and thus to study life cycles and energy flows. Other hands-on student projects described here range from stream restoration and watershed exploration to confronting environmental justice issues at the neighborhood level. With contributions from distinguished writers and educators, such as Fritjof Capra, Wendell Berry, and Michael Ableman, *Ecological Literacy* reflects the best thinking about how the world actually works and how learning occurs. Parents and educators everywhere will find it an invaluable resource.

Social learning towards a sustainable world Arjen E.J. Wals 2007-03-02 This comprehensive volume - containing 27 chapters and contributions from six continents - presents and discusses key principles, perspectives, and practices of social learning in the context of sustainability. Social learning is explored from a range of fields challenged by sustainability including: organizational learning, environmental management and corporate social responsibility; multi-stakeholder governance; education, learning and educational psychology; multiple land-use and integrated rural development; and consumerism and critical consumer education. An entire section of the book is devoted to a number of reflective case studies of people, organizations and communities using forms of social learning in moving towards sustainability. 'This book brings together a range of ideas, stories, and discussions about purposeful learning in communities aimed at creating a world that is more sustainable than the one currently in prospect. ...The book is designed to expand the network of conversations through which our society can confront various perspectives, discover emerging patterns, and apply learning to a variety of emotional and social contexts.' From the Foreword by Fritjof Capra, co-founder of the Center of Ecoliteracy. 'Joining what is so clear and refreshing in this book with the larger movements toward a critically democratic and activist education that is worthy of its name, is but one step in the struggle for sustainability. But it is an essential step if we are to use the insights that are included in this book.' From the Afterword by Michael Apple, author of 'Educating the "Right" Way: Markets, Standards, God, and Inequality'.

Ask Dr. Mueller Cookie Mueller 1997 Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from Walking Through Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

to cook food than deep fryers? Were you aware of the fact that air fryers cook food with lower fat content and thus help decrease calorie consumption? Air fryers can encourage weight loss due to the way in which foods are cooked. Compared to deep-frying, utilizing an air fryer may minimize the use of dietary acrylamide, a chemical which is associated with some forms of cancer. Air-fried foods are comparatively lower than deep-fried foods in calories, fat, and acrylamide, which makes consuming such foods healthier. Air fryers have witnessed a surge in popularity because of an increase in health awareness among people. Air fryers facilitate healthy lifestyles because they help "fry" food without having the harmful health effects that ensue when foods are fried in oil. You can also cook many foods in an air fryer, including chicken, fries, pastries, or fish. Moreover, if you are cooking rice, you will need little or no oil at all. This book is helpful for anyone who is concerned about his or her health and wants to live a longer life. Scalia Dissents Antonin Scalia 2012-04-01 Brilliant. Colorful. Visionary. Tenacious. Witty. Since his appointment to the Supreme Court in 1986, Associate Justice Antonin Scalia has been described as all of these things and for good reason. He is perhaps the best-known justice on the Supreme Court today and certainly the most controversial. Yet most Americans have probably not read even one of his several hundred Supreme Court opinions. In *Scalia Dissents*, Kevin Ring, former counsel to the U.S. Senate's Constitution Subcommittee, lets Justice Scalia speak for himself. This volume—the first of its kind—showcases the quotable justice's take on many of today's most contentious constitutional debates. *Scalia Dissents* contains over a dozen of the justice's most compelling and controversial opinions. Ring also provides helpful background on the opinions and a primer on Justice Scalia's judicial philosophy. *Scalia Dissents* is the perfect book for readers who love scintillating prose and penetrating insight on the most important constitutional issues of our time.

Envisioning a Sustainable Society Lester W. Milbrath 1989-01-01 The evidence is increasingly persuasive. We are changing the way our planet's physical systems work—irrevocably. These changes are global and interconnected and unavoidable. They are upon us already, making it virtually impossible for any modern society to continue its present trajectory of growth. This book provides a penetrating analysis of how we have come to this point, of why science and technology will fail to solve these problems, and of how we as a society must change in order to avoid ecological catastrophe. The scope is broad, the urgency of the message is impossible to ignore.

Crystallographic and pharmacological approaches to the study of calcium channels of epithelial cells are also discussed. Calcium ion is a messenger in most cell types. Whereas voltage gated calcium channels have been studied extensively, the non-voltage gated calcium entry channel genes have only been identified relatively recently. The book will fill this important niche.

The Sustainable World C. A. Brebbia 2011 This book contains a collection of papers presented at a series of meetings organised by the Wessex Institute of Technology (WIT) dealing with sustainability, the environment and ecological issues. The complexity of the modern world presents new challenges to scientists and engineers that requires finding interdisciplinary solutions. Any problem solving carried out in the isolation of a particular field of expertise may give rise to a series of damaging effects which can create new and unintentional environmental and ecological problems. Specialisation, while required in our culture, needs to be kept under control by the understanding of the whole, which leads to the need of relying on interdisciplinary teams. Nowadays this can be easily achieved thanks to the massive advances in information technology which ensure continuous and immediate contact between all partners. This collaboration needs to be effective and to produce results that will lead to a better world. For this to happen, it is necessary that different groups of scientists and engineers acquire the necessary skills to be able to talk to each other. Furthermore, they need to understand the social and economic aspects of a given problem, in addition to the scientific and engineering issues involved. The Wessex Institute of Technology (WIT) has a long and very successful record in organising interdisciplinary conferences. The papers in this book are a reflection of the proceedings of some of those meetings.

Learning about Corporate Social Responsibility Jacqueline Cramer 2003 For two years, representatives of 19 Dutch companies have been working together to find out what corporate social responsibility actually means in practice and what the added value of these efforts is. These activities have been carried out in the context of the Dutch National Initiative for Sustainable Development. The meaning of corporate social responsibility turns out to be a search process. It is not a clear-cut set of activities which any company can simply copy. "Learning about Corporate Social Responsibility" reports on the practical results of the NIDO programme and also reflects on the learning experiences gained from implementing corporate social responsibility in Dutch business practices
