Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Sacred Landscapes in Antiquity Ralph Haussler 2020-07-31 From generation to generation, people experience their landscapes differently. Humans depend on their natural environment: it shapes their behavior while it is often felt that deities responsible for both natural benefits

and natural calamities (such as droughts, famines, floods and landslides) need to be appeased. We presume that, in many societies, lakes, rivers, rocks, mountains, caves and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end as different societies had very different understandings, beliefs and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were 'rewritten', adapted and redefined in the course of time to suit new cultural, political and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized - especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative humanmade, seemingly 'non-natural' landscape, with perfectly astronomically aligned buildings that define a cosmological order? Sacred Landscapes therefore aims to analyze the complex links between landscape, 'religiosity' and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual and historical perspective.

Instigations Ernest Fenollosa 2013-05-13 The time when the intellectual affairs of America could be conducted on a monolingual basis is over. It has been irksome for long. The intellectual life of London is dependent on people who understand the French language about as well as their own. America's part in contemporary culture is based chiefly upon two men familiar with Paris: Whistler and Henry James. It is something in the nature of a national disgrace that a New Zealand paper, "The Triad," should be more alert to, and have better regular criticism of, contemporary French publications than any American periodical has yet had. I had wished to give but a brief anthology of French poems, interposing no comment of my own between author and reader; confining my criticism to selection. But that plan was not feasible. I was indebted to MM. Davray and Valette for cordial semi-permissions to quote the "Mercure" publications.

Whistleblowing for Change Tatiana Bazzichelli 2021-11-30 The courageous acts of whistleblowing that inspired the world over the past few years have changed our perception of surveillance and control in today's information society. But what are the wider effects of

whistleblowing as an act of dissent on politics, society, and the arts? How does it contribute to new courses of action, digital tools, and contents? This urgent intervention based on the work of Berlin's Disruption Network Lab examines this growing phenomenon, offering interdisciplinary pathways to empower the public by investigating whistleblowing as a developing political practice that has the ability to provoke change from within.

Drug Discovery and Evaluation Hans G. Vogel 2013-04-17 This reference book contains a comprehensive selection of the most frequently used assays for reliably detecting pharmacological effects of potential drugs, including tests for cardiovascular, analgesic, psychotropic, metabolic, endocrine, respiratory, renal, and immunomodulatory activities. Each of the over 700 assays comprises a detailed protocol with the purpose and rationale of the method, a description of the experimental procedure, a critical assessment of the results and their pharmacological and clinical relevance, and pertinent references. Identification of specific tests is facilitated by the enclosed CD-ROM which allows for a quick and full text research. An appendix with guidelines and legal regulations for animal experiments in various countries will help to plan these experiments properly in accordance with the welfare of laboratory animals.

This Is Not an Atlas kollektiv orangotango+ 2018-11-30 This Is Not an Atlas gathers more than 40 counter-cartographies from all over the world. This collection shows how maps are created and transformed as a part of political struggle, for critical research or in art and education: from indigenous territories in the Amazon to the anti-eviction movement in San Francisco; from defending commons in Mexico to mapping refugee camps with balloons in Lebanon; from slums in Nairobi to squats in Berlin; from supporting communities in the Philippines to reporting sexual harassment in Cairo. This Is Not an Atlas seeks to inspire, to document the underrepresented, and to be a useful companion when becoming a counter-cartographer yourself.

Toxines et cancer GOUDEY-PERRIÈRE Françoise 2006-11-26 De tout temps, l'homme a eu conscience de l'intérêt thérapeutique des toxines. Certaines toxines végétales depuis longtemps utilisées figurent encore dans la pharmacopée actuelle. Viennent s'y ajouter depuis peu des toxines microbiennes. Cependant le maniement des toxines natives ou à peine modifiées reste délicat tant est faible la marge entre les effets toxiques et l'efficacité thérapeutique. Comment, dans une perspective médicale, canaliser la puissance d'action et l'efficacité d'une toxine ? Connaître sa structure, comprendre son mécanisme d'action n'est

pas suffisant : il faut aussi identifier sa cible privilégiée, autrement dit un récepteur cellulaire, faute de quoi l'entreprise apparemment chimérique d'un détournement de sa puissance et de sa spécificité reste aveugle. Ce cap est franchi, depuis un certain nombre d'années, et le développement des recherches sur les toxines axées sur la thérapeutique est devenu foisonnant. Voyez telle ou telle toxine protéique ternaire, avec ses trois domaines, de fixation sur un récepteur membranaire, de translocation qui lui permet de franchir la membrane cellulaire, et d'activité enzymatique qui va alors pouvoir s'exercer dans la cellule. Qu'on parvienne à dissocier chacun de ces trois domaines en leur conservant leurs propriétés, et des possibilités nouvelles d'utilisation thérapeutique vont s'ouvrir, presque à l'infini semble-t-il. Car chacun d'entre eux pourra être couplé à une molécule active bien ciblée, et leur efficacité sera même améliorée pour peu qu'on parvienne à conjuguer leur action. Qu'un récepteur, qu'une molécule, propres au métabolisme ou à la physiologie d'une cellule cancéreuse soient identifiés, et des toxines conjuguées à un ligand de ce récepteur, de cette molécule (ce peut être un anticorps) bloqueront les canaux ioniques ou exerceront leur effet cytolytique sur cette seule cellule, sans nuire aux cellules saines. Nous voilà dégagés de l'utopie, le contenu de cet ouvrage le prouve abondamment. Et même si la concrétisation des promesses reste délicate, le champ d'action est si vaste initialement qu'il ne saurait rester improductif : il ne l'est d'ailleurs déjà plus.

Louisiana Place Names of Indian Origin William A. Read 2008-10-12 His writings spanned five decades and have been instrumental across a wide range of academic disciplines. Most importantly, Read devoted a good portion of his research to the meaning of place names in the southeastern United States—especially as they related to Indian word adoption by Europeans. This volume includes his three Louisiana articles combined: Louisiana: Louisiana Place-Names of Indian Origin (1927), More Indian Place-Names in Louisiana (1928), and Indian Words (1931). Joining Alabama's reprint of Indian Places Names in Alabama and Florida Place Names of Indian Origin and Seminole Personal Names, this volume completes the republication of the southern place name writings of William A. Read.

The Person of Christ. The Miracle of History. With a Reply to Strauss and Renan, and a Collection of Testimonies of Unbelievers. [Translated from the German.] Philipp SCHAFF 1865

The Person of Christ Philip Schaff 2020-06-03 The question of Christ is the question of Christianity, which is the manifestation of his life in the world; it is the question of the Church, which rests upon him as the immovable rock; it is the question of history, which revolves around him as the central sun of the moral universe; it is the question of every man, who instinctively yearns after him as the object of his noblest and purest aspirations; it is a question of personal salvation, which can only be obtained in the blessed name of Jesus. The

whole fabric of Christianity stands or falls with its divine-human Founder; and if it can never perish, it is because Christ lives, the same yesterday, to-day, and for ever. The object of this book is simply to show, in a popular style, that the Person of Christ is the great central miracle of history, and the strongest evidence of Christianity. The very perfection of his humanity is a proof of his Divinity. The indwelling of God in him is the only satisfactory solution of the problem of his amazing character.
