*Delivering regulatory reform* Great Britain: National Audit Office 2011-02-17 The Better Regulation Executive and government departments are not yet in a position to achieve value for money in their management of regulation. However, the Better Regulation Executive, created in 2005, and departments have developed important elements of a structured approach to achieving sustainable reductions in regulatory costs and have delivered significant benefits. Businesses generally recognise the purpose of regulation, but they believe that it can be unnecessarily burdensome, particularly on the smallest businesses. Businesses interviewed by the NAO typically have to consider as many as 60 regulations, governed by many different regulatory bodies. Businesses, particularly small and medium enterprises, are not clear on how to comply fully with regulation. The NAO found that departments are not communicating effectively with businesses about regulation. Businesses find it difficult to keep up with the extent of new regulation and changes to legislation. The Coalition Government's programme included several commitments to regulatory reform. Departments are currently conducting evaluations of their existing regulations, but they have not been taking a systematic approach and no overall attempt has been made to review the total number of regulations that businesses face. Furthermore, there is as yet no detailed plan for achieving the new Government's regulatory reform objectives. Departments do not routinely evaluate the impact on business of regulation once it has come into effect. They are, therefore, not in a good position to make adjustments to improve regulation in light of experience.

Frontiers of the Roman Empire Hugh Elton 2013-04-15 With its succinct analysis of the overriding issues and

detailed case-studies based on the latest archaeological research, this social and economic study of Roman Imperial frontiers is essential reading. Too often the frontier has been represented as a simple linear boundary. The reality, argues Dr Elton, was rather a fuzzy set of interlocking zones - political, military, judicial and financial. After discussion of frontier theory and types of frontier, the author analyses the acquisition of an empire and the ways in which it was ruled. He addresses the vexed question of how to define the edges of provinces, and covers the relationship with allied kingdoms. Regional variation and different rates of change are seen as significant - as is illustrated by Civilis' revolt on the Rhine in AD 69. He uses another case-study - Dura-Europos - to exemplify the role of the army on the frontier, especially its relations with the population on both sides of the border. The central importance of trade is highlighted by special consideration of Palmyra.

**Romanization in the Time of Augustus** Ramsay MacMullen 2000-01-01 During the lifetime of Augustus (from 63 B.C. to A.D. 14), Roman civilization spread at a remarkable rate throughout the ancient world, influencing such areas as art and architecture, religion, law, local speech, city design, clothing, and leisure and family activities. In his newest book, Ramsay MacMullen investigates why the adoption of Roman ways was so prevalent during this period. Drawing largely on archaeological sources, MacMullen discovers that during this period more than half a million Roman veterans were resettled in colonies overseas, and an additional hundred or more urban centers in the provinces took on normal Italian-Roman town constitutions. Great sums of expendable wealth came into the hands of ambitious Roman and local notables, some of which was spent in establishing and advertising Roman ways. MacMullen argues that acculturation of the ancient world was due not to cultural imperialism on the part of the conquerors but to eagerness of imitation among the conquered, and that the Romans were able to respond with surprisingly effective techniques of mass production and standardization.

*Parallax* Alan W. Hirshfeld 2013-01-01 This lively and entertaining history of the long struggle to measure the distance to the stars will appeal to general readers as well as to amateur and professional astronomers. Readers will encounter fascinating historical characters, from ancient Greeks to 19th-century scientists. Well illustrated, with contemporary pictures plus extensive notes on further reading. 2002 edition.

The Local Magistrates of Roman Spain Leonard A. Curchin 1990 Local aristocracies were crucial to the administrative and social assimilation of provincial communities in the Roman world. Leonard Curchin focuses on local political elites in the Iberian Peninsula, providing the first comprehensive and up-to-date prosopographical catalogue of all known local magistrates in Roman Spain. Curchin makes full use of the latest epigraphic discoveries, including not only the recorded careers of local magistrates but also the new Lex Irnitana. In his introduction he examines both the political role of the magistrates and the social mechanics of elite romanization. Among the traditional assumptions he challenges are the standard size of the local senates, the fixed order of offices, and the nature of the 'quattuorvirate.' He also discusses magistrates' origins, career progression, duties, social status, personal nomenclature, and private wealth. Entries in the catalogue are arranged alphabetically by city within each province. Indexes of names and magistracies facilitate cross-

referencing. The volume includes statistical tables as well as maps.

**Indonesian Houses** R. Schefold 2008-01-01 This collection aims to attract attention to the admirable achievements of indigenous builders in Indonesia and to contribute to a broader sense of commitment to the endangered architectural heritage in the region. It presents the second part of the results of a research project on vernacular architecture in western Indonesia, sponsored by the Royal Netherlands Academy of Sciences. The volume is intended to provide an introduction to all relevant vernacular architectural traditions and developments in western Indonesia.

**Manors and Markets** Bas van Bavel 2016-08-25 The Low Countries — an area roughly embracing the present-day Netherlands and Belgium — formed a patchwork of varied economic and social development in the Middle Ages, with some regions displaying a remarkable dynamism. *Manors and Markets* charts the history of these vibrant economies and societies, and contrasts them with alternative paths of development, from the early medieval period to the beginning of the seventeenth century. Providing a concise overview of social and economic changes over more than a thousand years, Bas van Bavel assesses the impact of the social and institutional organization that saw the Low Countries become the most urbanized and densely populated part of Europe by the end of the Middle Ages. By delving into the early and high medieval history of society, van Bavel uncovers the foundations of the flourishing of the medieval Flemish towns and the forces that propelled Holland towards its Golden Age. Exploring the Low Countries at a regional level, van Bavel highlights the importance of localized structures for determining the nature of social transitions and economic growth. He assesses the role of manorial organization, the emergence of markets, the rise of towns, the quest for self-determination by ordinary people, and the sharp regional differences in development that can be observed in the very long run. In doing so, the book offers a significant contribution to the debate about the causes of economic and social change, both past and present.

*Labour Law and Industrial Relations in Recessionary Times* Anthony Forsyth 2014-01-14 This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference – in both conceptual and legal terms – that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which – in accordance with the programmatic approach of Marco Biagi – will also feed the debate at the national level.

**The Oxford Handbook of Papyrology** Roger S. Bagnall 2011-12 Thousands of documentary and literary texts written on papyri and potsherds, in Egyptian, Greek, Latin, Aramaic, Hebrew, and Persian, have transformed our knowledge of many aspects of life in the ancient Mediterranean and Near Eastern worlds. Here experts provide a comprehensive guide to understanding this ancient documentary evidence.

**Communicating the Environment to Save the Planet** Maurizio Abbati 2019-01-30 This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

**Gender and Assimilation in Modern Jewish History** Paula E. Hyman 2017-05-01 Paula Hyman broadens and revises earlier analyses of Jewish assimilation, which depicted ♦the Jews♦ as though they were all men, by focusing on women and the domestic as well as the public realms. Surveying Jewish accommodations to new conditions in Europe and the United States in the years between 1850 and 1950, she retrieves the experience of women as reflected in their writings--memoirs, newspaper and journal articles, and texts of speeches--and finds that Jewish women♦s patterns of assimilation differed from men♦s and that an examination of those differences exposes the tensions inherent in the project of Jewish assimilation. Patterns of assimilation varied not only between men and women but also according to geographical locale and social class. Germany, France, England, and the United States offered some degree of civic equality to their Jewish populations, and by the last third of the nineteenth century, their relatively small Jewish communities were generally defined by their middle-class characteristics. In contrast, the eastern European nations contained relatively large and overwhelmingly non-middle-class Jewish population. Hyman considers how these differences between East and West influenced gender norms, which in turn shaped Jewish women♦s responses to the changing conditions of the modern world, and how they merged in the large communities of eastern European Jewish immigrants in the United States. The book concludes with an exploration of the sexual politics of Jewish identity. Hyman argues that the frustration of Jewish men at their ♦feminization♦ in societies in which they had achieved political equality and economic success was manifested in their criticism of, and distancing from, Jewish women. The book integrates a wide range of primary and secondary sources to incorporate Jewish women♦s history into one of the salient themes in modern Jewish history, that of assimilation. The book is

addressed to a wide audience: those with an interest in modern Jewish history, in women's history, and in ethnic studies and all who are concerned with the experience and identity of Jews in the modern world.

**The Grand Strategy of the Roman Empire** Edward Luttwak 2016-05-18 A newly updated edition of this classic, hugely influential account of how the Romans defended their vast empire. At the height of its power, the Roman Empire encompassed the entire Mediterranean basin, extending much beyond it from Britain to Mesopotamia, from the Rhine to the Black Sea. Rome prospered for centuries while successfully resisting attack, fending off everything from overnight robbery raids to full-scale invasion attempts by entire nations on the move. How were troops able to defend the Empire's vast territories from constant attacks? And how did they do so at such moderate cost that their treasury could pay for an immensity of highways, aqueducts, amphitheaters, city baths, and magnificent temples? In *The Grand Strategy of the Roman Empire*, seasoned defense analyst Edward N. Luttwak reveals how the Romans were able to combine military strength, diplomacy, and fortifications to effectively respond to changing threats. Rome's secret was not ceaseless fighting, but comprehensive strategies that unified force, diplomacy, and an immense infrastructure of roads, forts, walls, and barriers. Initially relying on client states to buffer attacks, Rome moved to a permanent frontier defense around 117 CE. Finally, as barbarians began to penetrate the empire, Rome fielded large armies in a strategy of "defense-in-depth," allowing invaders to pierce Rome's borders. This updated edition has been extensively revised to incorporate recent scholarship and archeological findings. A new preface explores Roman imperial statecraft. This illuminating book remains essential to both ancient historians and students of modern strategy.

**Territorial Impact Assessment** Eduardo Medeiros 2020-11-19 This book presents a comprehensive debate and analysis of existing Territorial Impact Assessment (TIA) methodologies, designed under the auspices of the ESPON programme since the mid-2000s. This is intended to serve as a TIA handbook for the reader, to better understand the main differences, advantages and shortcomings of each presented TIA methodology. It also serves as a manual for professors and students in the field of policy evaluation, and territorial analysis, as it presents concrete examples of the implementation of each TIA methodology, their formulas and intrinsic evaluation elements. The purpose of policy evaluation methodologies is to check the main effects of private and public investments, in order to report back to policymakers and citizens on their efficiency and effectiveness. Over the past decades, both in Europe and worldwide, there has been an increasingly awareness of the need to implement/reinforce policy evaluation practices, at all territorial levels. At the same time, it has become widely accepted that many policy interventions produce impacts in more than one dimensions of territorial development. In this context, the use of a holistic and territorial approach for policy impact assessment evaluation has rapidly been adopted by the European Commission as a mainstream policy evaluation procedure.

**Sarawak Style** Luca Invernizzi 1996 The richness of indigenous Sarawak arts, crafts, interior design and architecture is celebrated in this superbly illustrated book. The album of over 350 strikingly beautiful photographs captures the essence of a unique design statement. Privileged glimpses into the interiors of private homes, from architect-designed contemporary houses to centuries-old long-houses represent the dual influences of tradition and change.

Francisco Jerónimo de León Nuria Verdet Martínez 2014-10-06 La trayectoria vital de Francisco Jerónimo de León estuvo marcada por su formación jurídica y su vocación de servicio a la corona. Desde estas coordenadas el letrado protagonizó un extenso 'cursus honorum' que culminó con su promoción a la Real Audiencia y al Consejo Supremo de Aragón. Como resultado de su experiencia en la judicatura de la más alta instancia compuso una vastísima obra de jurisprudencia doctrinal -Decisiones Sacrae Regiae Audientiae Valentinae-, publicada en tres volúmenes. La relevancia alcanzada por el magistrado no ha impedido que su biografía haya permanecido prácticamente inédita hasta el momento. En esta monografía se ofrece una caracterización de su personalidad desde un doble enfoque: el entorno personal, familiar y social del jurista es perfilado en la primera parte del trabajo, mientras la segunda se consagra al estudio de su carrera profesional.

Hellenistic and Roman Egypt Roger S. Bagnall 2006 This second collection by Roger Bagnall brings together a further two dozen of his studies, this time covering Hellenistic, Roman, and Byzantine Egypt, published over the last thirty years. Many of the articles deal with issues of historical and papyrological method: the restoration of papyrus texts, the direction of archaeological work in Egypt, economic models for Roman Egypt, the usefulness of postcolonial theory, and approaches to the defective literary tradition for the Library of Alexandria. Others concentrate on particular bodies of evidence, ranging from inscriptions to ascetic literature, from registers to women's letters.

*Attic Script* Henry R. Immerwahr 1990 This study places the inscriptions found on Athenian vases in the context of the early development of writing in Athens. Focusing on the period from the invention of the alphabet in the 8th century B.C. to the early 4th century B.C., when the local alphabet had been supplanted by the common Ionic script, the book presents inscriptions on stone, both public and private, scratched inscriptions on pottery, including the political ostraca, and some inscriptions on lead tablets. Although the vase inscriptions are brief, they number in the thousands and give an accurate picture of the art of writing and the state of literacy in the Classical Period.
