**A Student Grammar of French** Malcolm Offord 2006-04-13 A Student Grammar of French is a concise introduction to French grammar, designed specifically for English-speaking undergraduates. Keeping technical detail to a minimum, it explains the fundamentals of the grammar in accessible and simple terms, and helps students to put their learning into practice through a range of fun and engaging exercises. All the essential topics are covered, with chapters on verbs, nouns, adjectives, pronouns, determiners, prepositions, adverbs, negation, numerals, sentences, and clauses. Every grammatical point is illustrated with a range of authentic examples drawn from magazines and newspapers, covering many areas of contemporary life such as fashion, health issues, relationships and sport. It is clearly organized into a user-friendly, numbered indexing system, allowing the learner to quickly and easily locate any grammatical topic. Functioning both as an indispensable reference guide and a comprehensive workbook, this grammar will become the perfect accompaniment to any first or second year undergraduate course.

In addition to taxonomic and location information, entries contain applicable details about the history of entomophagy, collecting,

cooking, and medicinal uses.

Directory of Crocodilian Farming Operations R. A. Luxmoore 1992 This is the second edition of the *Directory of Crocodilian Farming Operations*, first published in 1985. The first edition attempted to list all commercial farms, and was primarily intended as a conservation tool to assist government agencies in identifying legal sources of crocodilian skins, and wildlife managers in developing farming projects to benefit the conservation of the wild resource. The farming of crocodilians has increased substantially since 1985, and the need for up-to-date information on existing farms has led to this revised edition. Very little technical literature is available on crocodilian farming, and to try and meet the demand for more information and advice, the second edition provides a brief technical introduction designed to alert prospective farmers to the factors which should be taken into account before embarking on such a venture.

*Privatising the State* Béatrice Hibou 2004 Privatisation is supposed to bring about the retreat of the state. But what happens when the state privatises itself and even its core functions - tax collection, internal security, customs - are auctioned to the highest bidder? Does this imply a weakening of the state? Or, rather, does it lead to a scrutiny and control? The contributors to this work examine these phenomena in the former Second and Third World (Central and Eastern Europe, China and other parts of Asia and Africa) highlighting the very different ways in which continuing state interference and privatisation are implemented. What we are witnessing, according to this study, is not the eclipse of the state under the impact of globalisation but the end of the relatively short era of the development state and its commanding role. privatisation does not necessarily lead to a weakening of state control; it leads to new, and often more informal, forms of interference and influence, and it is these that are the book's central theme.

*Methodology and African Prehistory* Unesco. **Building Competitiveness in Africa's Agriculture** C. Martin Webber 2009-12-16  
Value chain based approaches offer tremendous scope for market-based improvements in production, productivity, rural economy diversification, and household incomes, but are often covered by literature that is too conceptual or heavily focused on analysis. This has created a gap in the information available to planners, practitioners, and value chain participants. Furthermore, few references are available on how these approaches can be applied specifically to developing agriculture in Africa. 'Building Competitiveness in Africa's Agriculture: A Guide to Value Chain Concepts and Applications' describes practical implementation approaches and illustrates them with scores of real African agribusiness case studies. Using these examples, the 'Guide' presents a range of concepts, analytical tools, and methodologies centered on the value chain that can be used to design, implement, and evaluate agricultural and agribusiness development initiatives. It stresses principles of market focus, collaboration, information sharing, and innovation. The 'Guide' begins by examining core concepts and issues related to value chains. A brief literature review then focuses on five topics of particular relevance to African agricultural value chains. These topics address challenges faced by value chain participants and practitioners that resonate through the many cases described in the book. The core of the book presents methodological tools and approaches that blend important value chain concepts with the topics and with sound business principles. The tools and case studies have been selected for their usefulness in supporting market-driven, private-sector initiatives to improve value chains. The 'Guide' offers 13 implementation approaches, presented within the implementation cycle of a value chain program, followed by descriptions of actual cases. Roughly 60 percent of the examples are from Africa, while the rest come from Europe, Latin America, and Asia. The 'Guide' offers useful guidance to businesspeople, policy makers, representatives of farmer or trade organizations, and others who are engaged in agro-enterprise and agribusiness development. These readers will learn how to use value chain approaches in ways that can contribute to sound operational decisions, improved market linkage, and better results for enterprise and industry development.

Empowerment and Poverty Reduction Deepa Narayan-Parker 2002-01-01 This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment: information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved

local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.

**African Women and ICTs** Ineke Buskens 2009-04 This book explores the ways in which women in Africa utilize Information and Communication Technologies to facilitate their empowerment; whether through the mobile village phone business, through internet use, or through new career and ICT employment opportunities. Based on the outcome of an extensive research project, this timely book features chapters based on original primary field research undertaken by academics and activists who have investigated situations within their own communities and countries. The discussion includes such issues as the notion of ICTs for empowerment and as agents of change, ICTs in the fight against gender-based violence, and how ICTs could be used to re-conceptualize public and private spaces.

**Waiting For The Wild Beasts To Vote** Ahmadou Kourouma 2011-01-25 Ahmadou Kourouma's remarkable novel is narrated by Bingo, a West African sora - storyteller and king's fool. Over the course of five nights he tells the life story of Koyaga, President and Dictator of the Gulf Coast. Orphaned at the age of seven, Koyaga grows up to be a terrible hunter; he fights mythical beasts, and is a shape-shifter, capable of changing himself into beasts and birds. He fights in the French colonial armies, in Vietnam and Algeria, but on his return he mounts a coup and becomes ruler and dictator of the Gulf Coast. For thirty years he runs a corrupt but 'clean' state, surviving repeated assassination attempts and gaining support and investment from abroad. But when the 'First World' decides it no longer want to support dictatorships and call for democracy, he needs another ruse to maintain himself in power... Part magic, part history, part savage satire, *Waiting for the Wild Beasts to Vote* is nothing less than a history of post-colonial Africa itself.

**Terra 2008** Leslie Rainer 2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

**Congo** David Van Reybrouck 2015-02-17 From the beginnings of the slave trade through colonization, the struggle for independence, Mobutu's brutal three

decades of rule, and the civil war that has raged from 1996 to the present day, Congo: The Epic History of a People traces the history of one of the most devastated nations in the world. Esteemed scholar David Van Reybrouck balances hundreds of interviews with a diverse range of Congolese with meticulous historical research to construct a multidimensional portrait of a nation and its people. Epic in scope yet eminently readable, both penetrating and deeply moving, Congo—a finalist for the Cundill Prize—takes a deeply humane approach to political history, focusing squarely on the Congolese perspective, and returns a nation's history to its people.

The Coffee Paradox Benoit Daviron 2013-07-18 Can developing countries trade their way out of poverty? International trade has grown dramatically in the last two decades in the global economy, and trade is an important source of revenue in developing countries. Yet, many low-income countries have been producing and exporting tropical commodities for a long time. They are still poor. This book is a major analytical contribution to understanding commodity production and trade, as well as putting forward policy-relevant suggestions for 'solving' the commodity problem. Through the study of the global value chain for coffee, the authors recast the 'development problem' for countries relying on commodity exports in entirely new ways. They do so by analysing the so-called coffee paradox – the coexistence of a 'coffee boom' in consuming countries and of a 'coffee crisis' in producing countries. New consumption patterns have emerged with the growing importance of specialty, fair trade and other 'sustainable' coffees. In consuming countries, coffee has become a fashionable drink and coffee bar chains have expanded rapidly. At the same time, international coffee prices have fallen dramatically and producers receive the lowest prices in decades. This book shows that the coffee paradox exists because what farmers sell and what consumers buy are becoming increasingly 'different' coffees. It is not material quality that contemporary coffee consumers pay for, but mostly symbolic quality and in-person services. As long as coffee farmers and their organizations do not control at least parts of this 'immaterial' production, they will keep receiving low prices. The Coffee Paradox seeks ways out from this situation by addressing some key questions: What kinds of quality attributes are combined in a coffee cup or coffee package? Who is producing these attributes? How can part of these attributes be produced by developing country farmers? To what extent are specialty and sustainable coffees achieving these objectives?

*Citizen and Subject* Mahmood Mamdani 2018-04-24 In analyzing the obstacles to democratization in post-independence Africa, Mahmood Mamdani offers a bold, insightful account of colonialism's legacy--a bifurcated power that mediated racial domination through tribally organized local authorities, reproducing racial identity in citizens and ethnic identity in subjects. Many writers have understood colonial rule as either "direct" (French) or "indirect" (British), with a third variant--apartheid--as exceptional. This benign terminology, Mamdani shows, masks the fact that these were actually variants of a despotism. While direct rule denied rights to subjects on racial grounds, indirect rule incorporated them into a "customary" mode of rule, with state-appointed Native Authorities defining custom. By tapping authoritarian possibilities in culture, and by giving culture an authoritarian bent, indirect rule (decentralized despotism) set the pace for Africa; the French followed suit by changing from direct to indirect administration, while apartheid emerged relatively later. Apartheid, Mamdani shows, was actually the generic form of the colonial state in Africa. Through case studies of rural (Uganda) and urban (South Africa) resistance movements, we learn how these institutional features fragment

resistance and how states tend to play off reform in one sector against repression in the other. The result is a groundbreaking reassessment of colonial rule in Africa and its enduring aftereffects. Reforming a power that institutionally enforces tension between town and country, and between ethnicities, is the key challenge for anyone interested in democratic reform in Africa.

**African Rhino** Richard Emslie 1999 The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild.

**Cinderella Or Cyberella?** Nancy J. Hafkin 2006 \* Multidisciplinary, with authors widely recognized as experts on issues of gender and technology in the developing world \* Focuses on ICTs and economic empowerment of women in developing countries Cinderella or Cyberella: what is the future for women in the knowledge society? Cyberella is fluent in the uses of technology, comfortable using and designing computer technology, and working in virtual spaces. Cinderella works in the basement of the knowledge society with little opportunity to reap its benefits. Promoting women's empowerment through ICTs is one of the critical development challenges of the 21st century. Nancy Hafkin and Sophia Huyer, acknowledged as leading scholars on gender and information technology, have assembled a stellar group of authors for this collection. Each essay in the collection depicts ways in which ICTs provide opportunities for women to improve their incomes, gain awareness of their rights, and improve their own and their families' well-being. Illustrative case studies from Africa, Asia and Latin America, show the global possibilities for women's empowerment through ICTs.

*The Tale of Tea* George L. van Driem 2020-12-11 The Tale of Teas the saga of globalisation. Tea gave birth to paper money, the Opium Wars and Hong Kong, triggered the Anglo-Dutch wars and the American war of independence, shaped the economies and military history of Táng and Sòng China and moulded Chinese art and culture. Whilst black tea dominates the global market today, such tea is a recent invention. No tea plantations existed in the world's largest black tea producing countries, India, Kenya and Sri Lanka, when the Dutch and the English went to war about tea in the 17th century. This book replaces popular myths about tea with recondite knowledge on the hidden origins and detailed history of today's globalised beverage in its many modern guises.
