Blizzards Mary B. Woods 2008-01-01 A winter snowfall can be beautiful. But if conditions call for dense snow, freezing temperatures, and bone-chilling wind, you are in for a dangerous blizzard. These blinding, swirling storms can shut down roads and damage buildings. Violent winds can thrash vehicles driving on icy roads. Snowdrifts can pile up to block streets or even cover houses. Blizzards can knock out power and threaten the lives of people stranded inside for days—or worse, those caught outside in the storm. With dramatic images and first-hand survivor stories—plus the latest facts and figures—this book shows you blizzard disasters up close.

Adrian Frutiger - Typefaces Heidrun Osterer 2014-05-08 The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types - from the design phase to the marketing stage - are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture. This second, revised and expanded study edition, which now has an index, makes Frutiger's achievement even more accessible.

American Wood Type: 1828-1900 Rob Roy Kelly 2010 The first and most authoritative history of wood type in the United States is now reissued in paperback. This book tells the complete story of wood type, beginning with the history of wood as a printing material, the development of decorated letters and large letters, and the invention of machinery for mass-producing wood letters. The 19th-century heyday of wood type is explored in great detail, including all aspects of design, manufacture, and marketing, and the evolution of styles. Many related trades interacted with wood type production; the book examines the influence of lithography, letterpress, metal-plate and wood engraving, sign painting and calligraphy, poster printing, and type-founding. Long out of print, the book is still regarded by scholars and designers as an invaluable resource for a rich legacy of typographic art. More than 600 specimens of wood type are classified and annotated, as are more than 100 specimens of complete fonts. This reissue includes a new foreword by David Shields, Design Curator of the Rob Roy Kelly Wood Type Collection at the University of Texas at Austin, discussing the renewed interest in the subject since the mid-1990s as well as ongoing research into the history of wood type.

The Nearly Man J. S. Nearey 2013-09-05 This is the true moving story of a young man growing up in the 1950's, of staunch Roman Catholic parents. Encouraged by family and teachers, the eleven years old holds a burning desire to become a Missionary Priest. His story unfolds against the backdrop of a Catholic Church going through massive change, yet stuck firmly in the past, with teachings and traditions going back hundreds of years. Leaving the love of his family he joins a junior seminary where he begins his progress towards becoming a priest. It describes his fears and concerns about his calling from God and his life at a boarding school. It tracks his adolescent life, desperately trying to come to terms with being

a youth with normal feelings, whilst living in the unusual environment of a Monastery. It tells of his emotional turmoil and inability to make a definite decision about his future, as he becomes more and more institutionalised. It follows his time in a Scottish Monastery where he is initiated into strict Monastic ways, then moves onto a Seminary where he struggles with Monastic life, his studies and emotional relationships. Finally, illness and love are the catalysts for The Nearly Man making the decision of his lifetime.

The Theater of the Bauhaus Walter Gropius 2014-11-15 Few creative movements have been more influential than the Bauhaus, under the leadership of Walter Gropius. The art of the theater commanded special attention. The text in this volume is a loose collection of essays by Oskar Schlemmer, Laszlo Moholy-Nagy, and Farkas Molnár (who in an illustrated essay shares his vision of a total theatre space), with an introduction by Bauhaus leader Walter Gropius. Originally published in German in 1924, *Die Bühne im Bauhaus* was translated by A. S. Wensinger and published by Wesleyan in 1961. It was prepared with the full cooperation of Walter Gropius and his introduction was written specially for this edition. From Bauhaus experiments there emerged a new aesthetic of stage design and presentation, a new concept of "total theater." Its principles and practices, revolutionary in their time and far in advance of all but the most experimental stagecraft today, were largely the work of Oskar Schlemmer, Laszlo Moholy-Nagy, and their students. Profusely illustrated and startling in its typography (the work of Moholy-Nagy), the 1924 volume quickly became a collector's item and is now virtually unobtainable. Those interested in the stage, the modern visual arts, or in the bold steps of the men of genius who broadened the horizons of aesthetic experience will appreciate that this translation is available again.

Milk Production and Processing C. Ibraheem Kutty 2014-01-01 The book covers various aspects of dairying and milk products such as dairy farm establishment, management, production and utilisation of various dairy products. Information has been included on various aspects of dairy farming starting with selection and purchase of dairy cattle, their care and management, with respect to housing, feeding, breeding and health care during various physiological states such as growth, pregnancy and lactation and during different seasons. Details of health care management along with common diseases have been covered with all information required for educated farmers and technicians working in these areas. Various means for consistent improvement of the stock has also been included. Production of clean milk, its procurement, processing and distribution has been covered with more emphasis on common processing technologies such as pasteurisation and sterilisation. Different forms of liquid milk available in the market has been described along with its standards and other specifications for the knowledge of common man and technicians. Manufacturing methods of milk products have been included with appropriate flow chart wherever required and various categories of milk products have been covered in detail under different chapters under milk products. This book has been prepared with emphasis on second year syllabus of Vocational higher secondary course on milk products and dairying and considering the lack of a suitable textbook for this subject. Hence the book is expected to fill the gap of a textbook for the above said and similar courses. Also the book may be accepted as a textbook/manual for educated farmers, other teaching and training programmes covering similar syllabus like that of dairy farm instructors and as a handbook for Veterinary Students and Dairy Extension Officers. With these introductory notes, we presume that the book will satisfy its readers' requirements and form a valuable textbook/reference book for all those concerned with dairy animal production and utilisation of their products ultimately benefiting the farming community.
