The Body of Evidence Francesco Paolo De Ceglia 2020 "When, why and how was it first believed that the corpse could reveal 'signs' useful for understanding the causes of death and eventually identifying those responsible for it? The Body of Evidence. Corpses and Proofs in Early Modern European Medicine, edited by Francesco Paolo de Ceglia, shows how in the late Middle Ages the dead body, which had previously rarely been questioned, became a specific object of investigation by doctors, philosophers, theologians and jurists. The volume sheds new light on the elements of continuity, but also on the effort made to liberate the semantization of the corpse from what were, broadly speaking, necromantic practices, which would eventually merge into forensic medicine"--

Byzantium After Byzantium Nicolae Iorga 2023-01-24 Originally published in French in 1935, the author's formula Byzantium after Byzantium defines several centuries of world history. Iorga points out the great contributions of Byzantine civilization to the Western world, especially during the Renaissance. He demonstrates that Byzantium survived through its people and local autonomies, as well as through its exiles--clerics, scholars, merchants, and political officials. One of the most important expressions of this was found in the Romanian principalities where Greeks from the Phanar district of Istanbul played a major role in Romanian political life, defining an entire period of Romanian history--the Phanariot Period. They continued the Byzantine ideas, aspirations, education, and way of life. All of this allows us to speak of a Byzantium after Byzantium.

Pre-Text/Text/Context Robert L. Mitchell 2015-12-18 The nineteenth century in France is a nightmare for literary historians. Their thirst for categorization is more easily quenched by prior centuries, to which,

because they seem unified by cohesive preoccupations and common goals, such appellations as the Renaissance, the Classical Age or "le grand siècle," and the Enlightenment or Age of Ideas are appropriately applied. For the protean nineteenth century, for which no such handy tag has been or can be devised, is beyond all else distinguished by extreme heterogeneity and eclecticism. A period of chaotic social and political instability, of scientific and industrial revolution, it is, in literature, a time not of solidarity, but of unprecedented individualism. If such diversity precludes coherence in nineteenth-century French literature, it can itself be recognized as the "organizing" element of this literary epoch. And it is precisely this paradox that the essays in this volume intend to reflect. They are not unified, as orthodoxy might dictate, by a common approach or theme or author. Rather they are marked, as was the century that is their context, by divergence and variety, not harmony and consistency. Eclecticism, indeed, has shaped the basic conception of the collection. Part 1 examines themes, presented as "pre-text," that inform either authorial motivation or the orientation of a text prior to its actual inscription. Part 2 approaches the process of writing from the perspective of the text itself. And Part 3 is concerned with those spatial, temporal, and linguistic elements ("context") that surround the literary text. Robert L. Mitchell is assistant professor of Romance languages and literatures at the Ohio State University."

Contemporary Indonesian Fashion Alessandra Lopez y Royo 2019-10-31 Indonesian fashion has undergone a period of rapid growth over the last three decades. This book explores how through years of social, political, and cultural upheaval, the country's fashion has moved away from "colonial fashion" and "national dress" to claim its own distinct identity as contemporary fashion in a global world. With specific reference to women's wear, *Contemporary Indonesian Fashion* explores the diversity and complexity of the country's sartorial offerings, which weave together local textile traditions like batik and ikat-making with contemporary narratives. The book questions concepts of "tradition" and "modernity" in the developing world, taking stock of the elite consumption of luxury brands and the large-scale manufacturing of fast fashion, and introduces us to the rise of new trends such as busana muslim (or "modest wear"), creating a portrait of a vibrant and growing national and, increasingly, international, industry. Exploring clothing in shopping malls, on the catwalk, in magazines, and online, the book examines how Indonesian fashion is made, presented, and consumed, combining research in Indonesia with analysis and personal reflection. *Contemporary Indonesian Fashion* ultimately questions the deeply entrenched eurocentrism of "global fashion", simultaneously interrogating current homogenizing beauty and body image discourses posited as universal, by pointing to absences, silences, and erasures as reflected by contemporary Indonesian fashion- hence the "looking glass" of the title. Aptly illustrated, the book offers a new perspective on a rapidly developing new fashion capital, Jakarta.

Thoughts on Unconventional Computing Andrew Adamatzky 2021-02-28 There is no strict definition of unconventional computing. Being an unconventional computist is not a matter of training but thinking and living. Phenomenologically most works on unconventional computing are about implementation of computing in novel substrates (chemical, physical, biological), development of computing schemes and algorithms not fitting into the mainstream framework, or designing of computing architectures inspired by chemical or biological systems. This short book gives a snapshot of the unconventional computing

field. The world-leading experts in the unconventional computing author all articles of the issue. The topics include analog computation, sensing and computing with fungi, chemical computing, swarms of minimalist agents, computational universality, mega-computing in the universe, information and music, universal sensing, art of deduction, reversible computing, philosophy of machine learning, epistemic incompleteness, post-quantum unconventional computing, complexity of natural computing, arts and cellular automata. Articles presented are punchy and well illustrated. All articles are short and self-contained. The book will serve well as a light-touch introduction to unconventional computing for people not familiar with computing and might inspire artists and humanitarians to enter the field.

Eight Centuries of Troubadours and Trouvères John Haines 2004-07-08 This 2004 book traces the changing interpretation of troubadour and trouvere music, a repertoire of songs which have successfully maintained public interest for eight centuries, from the medieval chansonniers to contemporary rap renditions. A study of their reception therefore serves to illustrate the development of the modern concept of 'medieval music'. Important stages include sixteenth-century antiquarianism, the Enlightenment synthesis of scholarly and popular traditions and the infusion of archaeology and philology in the nineteenth century, leading to more recent theories on medieval rhythm. More often than now, writers and performers have negotiated a compromise between historical research and a more imaginative approach to envisioning the music of troubadours and trouveres. This book points not so much to a resurrection of medieval music in modern times as to a continuous tradition of interpreting these songs over eight centuries.

African Philosophy Guttorm Fløistad 2012-12-06 This publication is a continuation of two earlier series of chronicles, *Philosophy of the Mid-Century* (Firenze 1958/59) and *Contemporary Philosophy* (Firenze 1968), edited by Raymond Klibansky. Like the other series, these chronicles provide a survey of significant trends in contemporary philosophical discussion from 1970 to 1985. The need for such surveys has, I believe, increased rather than decreased over the last years. The philosophical scene appears, for various reasons, more complex than ever before. The continuing process of specialization in most branches, the emergence of new schools of thought, the convergence of interest (thought not necessarily of opinion) of different traditions upon certain problems, the increasing attention being paid to the history of philosophy in discussions of contemporary problems, and the growing significance for philosophical discourse of the social, political and cultural situation in various regions of the world are the most important contributory factors. Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems. The surveys, it is to be hoped, may also help to strengthen a world-wide Socratic element of modern philosophy, the dialogue or *Kommunikationsgemeinschaft*. So far, five volumes have been prepared for the new series.

Multi-Agent Programming: Rafael H. Bordini 2009-06-13 Multi-Agent Systems are a promising technology to develop the next generation open distributed complex software systems. The main focus of the research community has been on the development of concepts (concerning both mental and social attitudes), architectures, techniques, and general approaches to the analysis and specification of multi-agent systems. This contribution has been fragmented, without any clear way of “putting it all together”, rendering it inaccessible to students and young researchers, non-experts, and practitioners. Successful multi-agent systems development is guaranteed only if we can bridge the gap from analysis and design to effective implementation. Multi-Agent Programming: Languages, Tools and Applications presents a number of mature and influential multi-agent programming languages, platforms, development tools and methodologies, and realistic applications, summarizing the state of the art in an accessible manner for professionals and computer science students at all levels.

Material Histories of Time Gianenrico Bernasconi 2020-12-16 The historiography of timekeeping is traditionally characterized by a dichotomy between research that investigates the evolution of technical devices on the one hand, and research that is concerned with the examination of the cultures and uses of time on the other hand. Material Histories of Time opens a dialogue between these two approaches by taking monumental clocks, table clocks, portable watches, carriage clocks, and other forms of timekeeping as the starting point of a joint reflection of specialists of the history of horology together with scholars studying the social and cultural history of time. The contributions range from the apparition of the first timekeeping mechanical systems in the Middle Ages to the first evidence of industrialization in the 18th and 19th centuries.

The Irrigation Sector 1999 India's irrigated agriculture sector has been basic to India's economic development and poverty alleviation. One of India's major achievements is its rapid expansion of irrigation and drainage infrastructure. However, the major emphasis on development has been achieved at a cost. The importance put on new construction has diverted attention away from the need to ensure the quality, productivity, and sustainability of the services. Further, a governmental subsidy based approach has been used and this has resulted in irrigation and drainage services which, while enabling significantly higher productivity than from non-irrigated lands, are well below their potential. 'The Irrigation Sector' discusses directions for future growth, the framework for reform, and the reform agenda.

Propaganda and the Public Mind Noam Chomsky 2015-04-13 One of our greatest political minds “challenges us to think more independently and more deeply about the human consequences of power and privilege” (Norman Solomon, author of *Made Love, Got War*). Renowned interviewer David Barsamian showcases his unique access to Chomsky’s thinking on a number of topics of contemporary and historical import. Chomsky offers insights into the institutions that shape the public mind in the service of power and profit. In an interview conducted after the important November 1999 “Battle in Seattle,” Chomsky discusses prospects for building a movement to challenge corporate domination of the media, the environment, and even our private lives. Whether discussing US military escalation in Colombia, attacks on Social Security, or growing inequality worldwide, Chomsky shows how ordinary people, if they work together, have the power to make meaningful change. “In *Propaganda and the Public Mind*, we have unique insight into Noam Chomsky’s decades of penetrating analyses . . . drawn together in one slender volume by a brilliant radio interviewer, David Barsamian.” —Ben H. Bagdikian, Pulitzer Prize-winning journalist “To anyone who wonders if ideas, information, and activism can make a profound difference in the twenty-first century, I say: ‘Read this book.’” —Norman Solomon, author of *The Habits of Highly Deceptive Media* Praise for Noam Chomsky “The conscience of the American people.” —*New Statesman* “Chomsky is a global phenomenon . . . perhaps the most widely read voice on foreign policy on the planet.” —*The New York Times Book Review* “There is no living political writer who has more radically changed how more people think in more parts of the world about political issues.” —Glenn Greenwald, journalist “A truth-teller on an epic scale.
