Creative Biblical Exegesis Benjamin Uffenheimer 1988-01-01 These papers were presented to a unique conference held in Israel in December 1985, sponsored by Tel Aviv University and the University of Bochum in the Federal Republic of Germany. Discussion of Christian and Jewish exegesis in historical perspective was not only mutually illuminating, but also laid the foundations for a new level of Jewish-Christian dialogue. The papers presented in this volume are: H. Graf Reventlow, Humanist Exegesis: The famous Hugo Grotius. Y. Hoffman, The Technique of Quotation as an Interpretative Device. D. Flusser, Past and Future according to the Creative Exegesis of the Hebrew Bible in Paul's Epistle to the Hebrews. P. Carny, Uniqueness And Particularity in Philo's Exegesis. J.S. Supplement to "Walt Whitman Joel Myerson 2011-04-15 Focusing on actual publications by Whitman rather than those about him, Joel Myerson's painstakingly compiled supplement to his 1993 *Walt Whitman: A Descriptive Bibliography* (Oak Knoll, ISBN 0-82293-739-5) includes almost twenty years of newly discovered and updated materials that will be invaluable to Whitman scholars. The entries describe in detail the various forms of Whitman's books, newspaper articles, broadsheets, reprints, translations, and so on. Myerson includes facsimiles of title pages as well as information on pagination, illustrations, dimensions, contents, publication history, typography, paper, binding, and dust jackets. The sections incorporate the following: all books and pamphlets written wholly by Whitman through 1892, the year of his death, and all editions and reprintings in English through 2009; all collected editions of Whitman's writings through 2009; all miscellaneous collections of his writings through 2009; all books in which material by Whitman appears for the first time; all first American and English publications in newspapers and magazines of material by Whitman through 2009; all proof copies as well as circulars and broadsides of his poetry and prose published during his lifetime; prose and poetry by Whitman reprinted in books and pamphlets through 1892; separate publications of individual poems and prose works through 2009; and references to possible publications by Whitman that are not dealt with elsewhere in the bibliography. The volume is thoroughly indexed. Based on evidence gathered from personal inspection of multiple copies of Whitman's works in American, Canadian, British, and New Zealand libraries, Myerson's

Drawdown Paul Hawken 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” –Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” –David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” –Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
