Jawless Fishes of the World Richard Beamish 2016-02-29 Hagfishes and lampreys, both examples of jawless fishes, are elongated, eel-like animals lacking paired fins, and are the only living representatives of ancient creatures that gave rise to current species of fish and, eventually, humans. This volume provides an overview of the current status of knowledge on a variety of topics related to jawless fishes, including their taxonomy, zoogeography, phylogeny, molecular biology, evolution, life history, role in the ecosystem, and fisheries and management of hagfishes and lampreys worldwide. This is the first book dealing exclusively with the various aspects of jawless fish species throughout the world. It brings together a number of papers providing new data on jawless fishes, and offers readers a range of useful information within a single reference, reflecting the growing appreciation for hagfishes and lampreys worldwide.

Listen to the Heron's Words Gloria Goodwin Raheja 1994-04-29 In many South Asian oral traditions, herons are viewed as duplicitous and conniving. These traditions tend also to view women as fragmented identities, dangerously split between virtue and virtuosity, between loyalties to their own families and those of their husbands. In women's songs, however, symbolic herons speak, telling of alternative moral perspectives shaped by women. The heron's words—and women's expressive genres more

generally—criticize pervasive North Indian ideologies of gender and kinship that place women in subordinate positions. By inviting readers to "listen to the heron's words," the authors convey this shift in moral perspective and suggest that these spoken truths are compelling and consequential for the women in North India. The songs and narratives bear witness to a provocative cultural dissonance embedded in women's speech. This book reveals the power of these critical commentaries and the fluid and permeable boundaries between spoken words and the lives of ordinary village women.

Asha Parekh The Hit Girl Khalid Mohamed 2017-04-10 Asha Parekh was to the movies born. Ever since she was knee-high, she faced the camera as a child artiste, while performing simultaneously at dance fetes. An alumna of Bombay's The J. B. Petit Girls' High School, she devoted after-school hours to learning classical dance from exacting gurus. Given a break as a leading lady by Filmalaya Studio's Sashadhar Mukherjee, she debuted opposite Shammi Kapoor in the romantic entertainer *Dil Deke Dekho*. Instantaneously, the audience and the critics agreed: "A star is born." Followed a concatenation of silver and golden jubilee hits, which established her as the quintessential Hit Girl. Possessed of all the requisites of the cinema of the 1960s and the '70s - felicity at instinctive acting, intricate dance skills and the ability to invest conviction into the roles of zestful, glamour-exuding film heroines - she made an impact, too, with parts demanding gravitas. Apart from films in Hindi, she has also acted in films in Gujarati, Punjabi and a film in Kannada. The Mumbai film trade, to date, acknowledges her as one of the heroines with the highest number of successes. Her innumerable dance ballets on stage have earned her untold acclaim, at home and overseas. Among her other facets, she has been involved since decades in running a charitable hospital. She was Chairperson of the Central Board of Film Certification (1998-2001) and has been associated with the Cine and TV Artistes' Associations and other organisations dedicated to the welfare of film industry workers, technicians and actors. She turned producer and director with several top TRP-rated TV serials like 'Kora Kagaz' and 'Palash ke Phool' and programmes like 'Baaje Paayal'. Currently she has chosen to retire from acting, but adds, "Never say never." She lives by the famed Juhu shoreline in Mumbai.

Short-Scar Face Lift Patrick L. Tonnard 2007-07-01 In the highly popular MACS-Lift Short-Scar Rhytidectomy, Drs. Patrick Tonnard and Alexis Verpaele introduced surgeons to an exciting new concept in facial rejuvenation—one that offered shorter incisions, minimal morbidity, and reduced recovery time. In this companion volume, *Short-Scar Face Lift: Operative Strategies and Techniques*, Drs. Tonnard and Verpaele build on that foundation and expand their scope. The book is organized into two sections. Part I, *Short-Scar Face-Lift Techniques*, discusses indications, applications, and alternate short-scar face-lift techniques. The editors elaborate on the different aspects of the MACS-lift and short-scar face-lifting. They review the important lessons they have learned during years of experience with the MACS-lift, including a discussion of complications, problems, limitations, and technical tips and tricks. They are joined by Dr. Foad Nahai, who discusses technical considerations; Dr. Joseph Hunstad, who provides a systematic step-by-step guide to his approach; Dr. Mark Jewell, who describes the biomechanics of the MACS-lift and offers technical tips for success; and Dr. Daniel Baker, who describes his personal lateral SMASectomy short-scar face-lift technique and compares it to other comparable and convergent techniques. Part II focuses on Combined Approaches and Ancillary Treatments for facial rejuvenation. In this section, Dr. Daniel Labb discusses the anatomic basis of minimally invasive neck correction through a short scar and Dr. Alain Fogli details his simple, safe technique for temporal lifting. Finally, Dr. Thomas Roberts brings all of these techniques and treatments into perspective through his analysis of the volumetric concept of facial rejuvenation. He provides an in-depth discussion of facial fat micrografting and describes how the synergistic use of multiple surgical and nonsurgical modalities can lead to superior results. With beautiful, four-color illustrations, numerous case examples, and an accompanying DVD with operative videos, this book provides the ultimate surgical instruction that will allow surgeons to incorporate this procedure into their practice.

"the recitation," also romanised (Koran) is the central religious text of Islam, which Muslims believe to be a revelation from God (Arabic: Allah). It is widely regarded as the finest piece of literature in the Arabic language. Muslims consider the Quran to be the only book that has been protected by God from distortion or corruption. Quranic chapters are called suras and verses are called ayahs. Muslims believe that the Quran was verbally revealed from God to Muhammad through the angel Gabriel (Jibril), gradually over a period of approximately 23 years, beginning on 22 December 609 CE, when Muhammad (Peace be upon Him) was 40, and concluding in 632 CE, the year of his death. Shortly after Muhammad's death, the Quran was collected by his companions using written Quranic materials and everything that had been memorized of the Quran. Muslims regard the Quran as the most important miracle of Muhammad, the proof of his prophet hood and the culmination of a series of divine messages that started with the messages revealed to Adam and ended with Muhammad. The Quran assumes familiarity with major narratives recounted in the Jewish and Christian scriptures. It summarizes some, dwells at length on others and, in some cases, presents alternative accounts and interpretations of events. The Quran describes itself as a book of guidance. It sometimes offers detailed accounts of specific historical events, and it often emphasizes the moral significance of an event over its narrative sequence. The Quran is used along with the hadith to interpret sharia law. During prayers, the Quran is recited only in Arabic. Someone who has memorized the entire Quran is called a hafiz. Some Muslims read Quranic ayahs (verses) with elocution, which is often called tajweed. During the month of Ramadan, Muslims typically complete the recitation of the whole Quran during tarawih prayers. Inimitability of the Quran (or "I'jaz") is the belief that no human speech can match the Quran in its content and form. The Quran is considered an inimitable miracle by Muslims, effective until the Day of Resurrection-and, thereby, the central proof granted to Muhammad in authentication of his prophetic status. The concept of inimitability originates in the Quran where in five different verses challenges opponents to produce something like the Quran: "If men and sprites banded together to produce the like of this Quran they would never produce its like not though they backed one another" (17:88). So the suggestion is that if there are doubts concerning the divine authorship of the Quran come forward and create something like it. From the ninth century, numerous works appeared which studied the Quran and examined its style and content. Medieval Muslim scholars including al-Jurjani (d. 1078CE) and al-Baqillani (d. 1013CE) have written treatises on the subject, discussed its various aspects, and used linguistic approaches to study the Quran. Others argue that the Quran contains noble ideas, has inner meanings, maintained its freshness through the ages and has caused great transformations in individual level and in the history. Some scholars state that the Quran contains scientific information that agrees with modern science. The doctrine of miraculousness of the Quran is further emphasized by Muhammad's illiteracy since the unlettered prophet could not have been suspected of composing the Quran.

A Princess of Mars Illustrated Edgar Rice Burroughs 2021-04-10 "A Princess of Mars is a science fantasy novel by American writer Edgar Rice Burroughs, the first of his Barsoom series. It was first serialized in the pulp magazine All-Story Magazine from February-July, 1912. Full of swordplay and daring feats, the novel is considered a classic example of 20th-century pulp fiction. It is also a seminal instance of the planetary romance, a subgenre of science fantasy that became highly popular in the decades following its publication. Its early chapters also contain elements of the Western. The story is set on Mars, imagined as a dying planet with a harsh desert environment. This vision of Mars was based on the work of the astronomer Percival Lowell, whose ideas were widely popularized in the late 19th and early 20th centuries. The Barsoom series inspired a number of well-known 20th-century science fiction writers, including Jack Vance, Ray Bradbury, Arthur C. Clarke, Robert A. Heinlein, and John Norman. The series was also inspirational for many scientists in the fields of space exploration and the search for extraterrestrial life, including Carl Sagan, who read A Princess of Mars when he was a child."

Hema Malini Ram Kamal Mukherjee 2017-10-10 One of the most enduring divas of Hindi cinema, a producer and director for films and television, dancer and choreographer par excellence, magazine editor, an active member of Parliament and now a singer, Hema Malini wears many hats with admirable ease. No other industry name comes close to matching the breadth of her achievements. In an industry where the male star has traditionally driven the commercial success of films, Hema was an exception, with her name alone sufficing to ensure a film's box-office glory. She was, arguably, India's first female superstar. Apart from starring in mainstream super-hits like *Johnny Mera Naam*, *Jugnu*, *Andaz*, *Seeta Aur Geeta*, *Sholay* and, more recently, *Baghban*, she received critical acclaim for her performances in *Lal Patthar*, *Khushboo*, *Kinara*, *Meera*, *Ek Chadar Maili Si* and *Razia Sultan*. But there is much more to her than just her Bollywood journey. From her efforts at reviving and sustaining classical dance to her graceful handling of her personal life and the controversies that have plagued her in her political avatar, from her relationships to her religious beliefs and her recent tryst with singing, *Hema Malini: Beyond the Dream Girl* covers it all. With detailed interviews and exclusive anecdotes from her family, friends and co-actors, this is an inside look at the remarkable life of one of our greatest cinema icons, someone who has truly lived life on her own terms.
