Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Parenting Without Guilt Charles C. Larson, Ph.d. 2014-04-01 There are times when what a youngster does or says is absolutely baffling to mom or dad. How can 15-year-old Sarah spend hours prepping her hair and not give one second to cleaning her room? Likewise, what's wrong with 10-year-old Mark who knows he shouldn't bully his little brother but does so anyway? Certainly parents want answers, and no one is surprised when a parent falls back on interrogating a child or teen with repeated "Why?" or "What were you thinking?" questions. Unfortunately, searching for the reasons children behave as they do by asking the ubiquitous "Why?" is ultimately unsuccessful and, frankly, irrelevant. "I don't know," "Because," or "I wasn't thinking," is the usual child response, resulting in frustrated parents and youngsters who feel embarrassed, stupid or annoyed. Drs. Charles C. Larson and John B. Dockstader, each with more than thirty years of experience working with parents and youngsters, advise parents to step back from situations such as those described and offer, instead, techniques for evaluating and solving family problems without needing to know "Why?". The authors counsel parents how to determine if a problem exists, who owns the problem and who is best equipped to solve it. Numerous real-life examples are presented to illustrate the problem-solving process and solutions. In *Parenting Without Guilt*, parents learn not only to solve family problems, but also why the challenges parents and youngsters face today are more demanding than ever before. In addition, parents are guided through each stage of child development, from birth to young adulthood, with attention to typical problems any parent may anticipate. Resources that parents

can use to help them resolve family discords are discussed, to include working with educators, clergy, pediatricians, private practitioners and others. With compassion, humor and wisdom gained through practical experience, Drs. Larson and Dockstader offer information and advice that provides any parent with the skills to raise successful children without guilt, anxiety or distress.
