Asia on Tour Tim Winter 2008-09-24 With the vast majority of academic theory on tourism based on 'Western' tourists, *Asia on Tour* illustrates why the rapid growth of travel for leisure and recreation in Asia demands a reappraisal of how tourism is analyzed and understood. Examining domestic and intra-regional tourism, the book reveals how improvements in infrastructures, ever increasing disposable incomes, liberalized economies, the inter-connectivities of globalization and the lowering of borders, both physical and political, are now enabling millions of Asians to travel as tourists. Drawing upon multidisciplinary theoretical perspectives and up-to-date empirical research, the twenty-three accessible essays in this volume indicate why a rigorous and critical study of Asian tourism must become integral to both our analysis of this rapidly transforming region and our interpretation of global tourism in the twenty first century. As a rich collection of essays on heritage and tourism oriented around Asian tourists, *Asia on Tour* will be of particular interest to students and scholars working in the fields of tourism, Asian studies, geography, heritage, anthropology, development, sociology, and cultural and postcolonial studies.

Topophilia Yi-Fu Tuan 1990-11-20 What are the links between environment and world view? *Topophilia*, the affective bond between people and place, is the primary theme of this book that examines environmental perceptions and values at different levels: the species, the group, and the individual. Yi-Fu Tuan holds culture and environment and topophilia and environment as distinct in order to show how they mutually contribute to the formation of values. *Topophilia* examines the search for environment in the city, suburb, countryside, and wilderness from a dialectical perspective, distinguishes different types of environmental experience, and describes their character.

Rapport mondial des Nations Unies sur la mise en valeur des ressources en eau 2021 2021-03-22 L'eau est une ressource qui n'est pas infinie et qui est non substituable. En tant que fondement de la vie, des sociétés et des économies, l'eau comporte de multiples valeurs et avantages. Mais contrairement à la plupart des autres ressources naturelles, il s'est avéré extrêmement difficile de déterminer sa véritable «valeur». L'édition 2021 du rapport mondial sur la mise en valeur de l'eau des Nations Unies, intitulée «Valuing Water» évalue l'état actuel et les défis de la valorisation de l'eau dans différents secteurs et perspectives et identifie les moyens de promouvoir sa valorisation en tant qu'outil pour aider à améliorer sa gestion et parvenir à un développement durable à l'échelle mondiale.

From Pilgrimage to Package Tour David L. Gladstone 2013-01-11 When people in First World countries think of tourists in the vast expanses of the Third World today, they typically think of pampered westerners, filling up the luxury hotels and imposing their Orientalist gazes on the teeming masses. As David Gladstone shows us in this fascinating and provocative book, such preconceptions are wrong. Coupling incisive and colorful ethnographic accounts of tourism in India and Mexico with sharp analysis, Gladstone demonstrates the amazing complexity of this industry, which now comprises close to ten percent of the world economy. As he also shows, the vast majority of tourists in the Third World are indigenous people with few resources-often making pilgrimages to religious shrines. *From Pilgrimage to Package Tour* is a fresh and entirely original account that stands tourism studies on its head and proves that this industry is far more complicated than it initially appears.

Slow Travel and Tourism Janet Dickinson 2010-09-23 It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change. It is therefore vital that ways to reduce these impacts are developed and implemented. 'Slow travel' provides such a concept, drawing on ideas from the 'slow food' movement with a concern for locality, ecology and quality of life. The aim of this book is to define slow travel and to discuss how some underlining values are likely to pervade new forms of sustainable development. It also aims to provide insights into the travel experience; these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world. In order to do this the book explores the concept of slow travel and sets out its core ingredients, comparing it with related frameworks such as low-carbon tourism and sustainable tourism development. The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport, which generally take much longer and become incorporated as part of the holiday experience. The book critically examines the key trends in tourism transport and recent climate change debates, setting out the main issues facing tourism planners. It reviews the potential for new consumption patterns, as well as current business models that facilitate hyper-mobility. This provides a cutting edge critique of the 'upstream' drivers to unsustainable tourism. Finally, the authors illustrate their approach through a series of case studies from around the world, featuring travel by train, bus, cycling and walking. Examples are drawn from Europe, Asia, Australia and the Americas. Cases include the Eurostar train (as an alternative to air travel), walking in the Appalachian Trail (US), the Euro-Velo network of long-distance cycling routes, canoe tours on the Gudena River in Denmark, sea kayaking in British Columbia (Canada) and the Oz Bus Europe to Australia.

European rural peripheries revalued Ulrike Grabski-Kieron 2016 This volume provides an overview of research on seemingly, current and former peripheral areas and on processes of peripheralisation in Europe. Particular emphasis is given to questions of local and regional governance, to multiple actors of peripheralisation and residential revitalisation as well as to economic and ecological transformations. --

Prison Breaks Tomas Max Martin 2018-02-12 This edited collection analyses the prison through the most fundamental challenge it faces: escapes. The chapters comprise original research from established prison scholars who develop the contours of a sociology of prison escapes. Drawing on firm empirical evidence from places like India, Tunisia, Canada, the UK, France, Uganda, Italy, Sierra Leone, and Mexico, the authors show how escapes not only break the prison, but are also fundamental to the existence of such institutions: how they are imagined, designed, organized, justified, reproduced and transformed. The chapters are organised in four interconnected themes: resistance and everyday life; politics and transition; imaginaries and popular culture; and law and bureaucracy, which reflect how escapes are productive, local, historical, and equivocal social practices, and integral to the mysterious intransigence of the prison. The result is a critical and theoretically informed understanding of prison escapes - which has so far been absent in prison scholarship - and which will hold broad appeal to academics and students of prisons and penology, as well as practitioners.

Cities and the Creative Class Richard L. Florida 2005 Richard Florida outlines how certain cities succeed in attracting members of the 'creative class' - the key economic growth asset - and argues that, in order to prosper, cities must harness this creative potential.

Travels with a Donkey in the Cévennes Robert Louis Stevenson 1879 "We are all travellers in what John Bunyan calls the wilderness of this world-all, too, travellers with a donkey: and the best that we find in our travels is an honest friend. He is a fortunate voyager who finds many." -Robert Louis Stevenson, *Travels with a Donkey in the Cévennes* (1879) *Travels with a Donkey in the Cévennes* (1879) is a classic of travel literature by Robert Louis Stevenson about his 12-day, 120-mile walking tour in the French Cévennes mountain range, accompanied by his donkey, Modestine. This book is one of the first to present hiking and camping as recreational activities, and is as influential as Stevenson's fiction.

Community Management of Natural Resources in Africa Dilys Roe 2009 Provides a pan-African synthesis of community-based natural resource management (CBNRM), drawing on multiple authors and a wide range of documented experiences from Southern, Eastern, Western and Central Africa. Iceland and Images of the North Sumarlidi Isleifsson 2011-05-20T00:00:00-04:00 With a radically changing world, cultural identity and images have emerged as one of the most challenging issues in the social and cultural sciences. These changes provide an occasion for a thorough reexamination of cultural, historical, political, and economic aspects of society. The INOR (Iceland and Images of the North) group is an interdisciplinary group of Icelandic and non-Icelandic scholars whose recent research on contemporary and historical images of Iceland and the North seeks to analyze the forms these images assume, as well as their function and dynamics. The 21 articles in this book allow readers to seize the variety and complexity of the issues related to images of Iceland.

The New Spirit of Capitalism Luc Boltanski 2005 In this major work, the sociologists Eve Chiapello and Luc Boltanski go to the heart of the changes in contemporary business culture. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their organization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization which was founded on employee initiative and autonomy in the workplace - a 'freedom' that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and 'Ben and Jerry') arguing that they practice a more successful and subtle form of exploitation. In a work that is already a classic in Europe, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the Left's critique of the alienation of everyday life - a recuperation that simultaneously undermined the power of its social critique.

The Peaks of the Balkans Trail Rudolf Abraham 2018-03-15 A guidebook to the Peaks of the Balkans Trail, a circular route through the wild and rugged borderlands of Montenegro, Albania and Kosovo. The 192km trail winds its way through the spectacular scenery of the Prokletije Mountains (the southernmost range of the Dinaric Alps), taking in high passes, sweeping valleys and striking limestone

peaks. It can be completed in around two weeks: the walking itself is not difficult though the route passes through some remote areas and demands a moderate level of fitness. The guide presents the trail in 10 daily stages and also includes suggestions for excursions to bag neighbouring peaks and visit local sites of interest. Comprehensive route description is accompanied by mapping and colour photos. Welcoming guesthouses and homestays offer accommodation and delicious local cuisine on route, though camping is also a possibility. You will find everything you need to plan a successful trip: guidance on how to get to the route, advice on when to go, where to start your trek and what to take, and information on cross-border permits. Appendices include accommodation listings, useful contacts and an English-Albanian-Montenegrin glossary.

Connectivity Conservation Kevin R. Crooks 2006-11-02 One of the biggest threats to the survival of many plant and animal species is the destruction or fragmentation of their natural habitats. The conservation of landscape connections, where animals, plants, and ecological processes can move freely from one habitat to another, is therefore an essential part of any new conservation or environmental protection plan. In practice, however, maintaining, creating, and protecting connectivity in our increasingly dissected world is a daunting challenge. This fascinating volume provides a synthesis on the current status and literature of connectivity conservation research and implementation. It shows the challenges involved in applying existing knowledge to real-world examples and highlights areas in need of further study. Containing contributions from leading scientists and practitioners, this topical and thought-provoking volume will be essential reading for graduate students, researchers, and practitioners working in conservation biology and natural resource management.

World Heritage Amareswar Galla 2012-11-22 Published on the 40th anniversary of the World Heritage Convention, this thematic collection of case studies provides a thorough understanding of World Heritage sites and their Outstanding Universal Value in the context of sustainable development. The case studies describe twenty-six thematically, typologically and regionally diverse World Heritage sites illustrating their benefits to local communities and ecosystems and sharing the lessons learned with the diverse range of stakeholders involved. The volume emphasises a holistic and integrated view of World Heritage, linking it to the role local communities play in management and protection, and to issues of ecosystem sustainability, and the maintenance of biological, linguistic and cultural diversity. Cross-disciplinary in its scope, this book will provide a meeting point for researchers, practitioners, community representatives and the wider public and will promote cultural and natural heritage conservation as a key vector of sustainable development and social cohesion.

Quebec under Free Trade : Making Public Policy in North America Guy Lachapelle 2011-04-22T12:14:41-04:00 Quebec has undertaken a major policy change in recent years to meet the challenges posed by the emerging structure of a continental economy. Quebecers are ready to meet these challenges and regard the future with optimism. This book explores some of these issues looking from the historical, political, social, and economic dimensions posed by transnationalism and greater interdependence.

State of World Aquaculture 2006 Food and Agriculture Organization of the United Nations. Inland Water Resources and Aquaculture Service 2006 Aquaculture is developing, expanding and intensifying in almost all regions of the world, except in sub-Saharan Africa. Although the sector appears to be capable of meeting the gap between future demand and supply for aquatic food, there are many constraints and challenges which must be addressed in order to at least maintain the present level of per capita consumption at the global level. Key issues are the need for enhanced enforcement of regulation and better governance of the sector, as well as greater producer participation in the decision-making and regulation process. This publication examines past trends in aquaculture development as well as the current global status, drawing on a number of national and regional reviews.

Best Practice Guidelines for Great Ape Tourism Elizabeth J. Macfie 2010 Executive summary: Tourism is often proposed 1) as a strategy to fund conservation efforts to protect great apes and their habitats, 2) as a way for local communities to participate in, and benefit from, conservation activities on

behalf of great apes, or 3) as a business. A few very successful sites point to the considerable potential of conservation-based great ape tourism, but it will not be possible to replicate this success everywhere. The number of significant risks to great apes that can arise from tourism require a cautious approach. If great ape tourism is not based on sound conservation principles right from the start, the odds are that economic objectives will take precedence, the consequences of which in all likelihood would be damaging to the well-being and eventual survival of the apes, and detrimental to the continued preservation of their habitat. All great ape species and subspecies are classified as Endangered or Critically Endangered on the IUCN Red List of Threatened Species (IUCN 2010), therefore it is imperative that great ape tourism adhere to the best practice guidelines in this document. The guiding principles of best practice in great ape tourism are: Tourism is not a panacea for great ape conservation or revenue generation; Tourism can enhance long-term support for the conservation of great apes and their habitat; Conservation comes first--it must be the primary goal at any great ape site and tourism can be a tool to help fund it; Great ape tourism should only be developed if the anticipated conservation benefits, as identified in impact studies, significantly outweigh the risks; Enhanced conservation investment and action at great ape tourism sites must be sustained in perpetuity; Great ape tourism management must be based on sound and objective science; Benefits and profit for communities adjacent to great ape habitat should be maximised; Profit to private sector partners and others who earn income associated with tourism is also important, but should not be the driving force for great ape tourism development or expansion; Comprehensive understanding of potential impacts must guide tourism development. positive impacts from tourism must be maximised and negative impacts must be avoided or, if inevitable, better understood and mitigated. The ultimate success or failure of great ape tourism can lie in variables that may not be obvious to policymakers who base their decisions primarily on earning revenue for struggling conservation programmes. However, a number of biological, geographical, economic and global factors can affect a site so as to render ape tourism ill-advised or unsustainable. This can be due, for example, to the failure of the tourism market for a particular site to provide revenue sufficient to cover the development and operating costs, or it can result from failure to protect the target great apes from the large number of significant negative aspects inherent in tourism. Either of these failures will have serious consequences for the great ape population. Once apes are habituated to human observers, they are at increased risk from poaching and other forms of conflict with humans. They must be protected in perpetuity even if tourism fails or ceases for any reason. Great ape tourism should not be developed without conducting critical feasibility analyses to ensure there is sufficient potential for success. Strict attention must be paid to the design of the enterprise, its implementation and continual management capacity in a manner that avoids, or at least minimises, the negative impacts of tourism on local communities and on the apes themselves. Monitoring programmes to track costs and impacts, as well as benefits, [is] essential to inform management on how to optimise tourism for conservation benefits. These guidelines have been developed for both existing and potential great ape tourism sites that wish to improve the degree to which their programme contributes to the conservation rather than the exploitation of great apes.
