The Cambridge Guide to Homer examines the influence and meaning of Homeric poetry from its earliest form as ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter complementary 'micropedia' articles. The Cambridge Guide to Homer thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Tau Zero Poul Anderson 2018-09-18 This Hugo Award finalist, “justifiably regarded as a classic” (SFReviews.net), is the tale of an epic space voyage where time dilation goes horribly wrong. Aboard the spacecraft Leonora Christine, fifty crewmembers, half men and half women, have embarked on a journey of discovery like no other to a planet thirty light-years away. Since their ship is not capable of traveling faster than light, the crew will be subject to the effects of time dilation and relativity. They will age five years on board the ship before reaching their destination, but thirty-three years will pass on Earth. Experienced scientists and researchers, they have come to terms with the time conditions of their space travel. Until . . . the Leonora Christine passes through an uncharted nebula, which damages the engine, making it impossible to decelerate the ship on the second half of their trip. To survive, the crewmembers have no choice but to bypass their destination and continue to accelerate toward the speed of light. But how will they keep hope alive and maintain order as they hurtle deeper into space with time passing more and more rapidly, and their ultimate fate unknown? With its combination of mind-blowing hard science and compelling human drama, *Tau Zero* is “the ultimate hard science novel” (Mike Resnick).

The Serpent of Stars Jean Giono 2004-04-23 *The Serpent of Stars* (Le serpent d'étoiles, 1993; reprinted 1999 Grasset) takes place in rural southern France in the early part of the century. The novel's elusive narrative thread ties landscape to character to an expanse just beyond our grasp. The narrator encounters a shepherding family and glimpse by glimpse, each family member and the shepherding way of life is revealed to us. The novel culminates in a large shepherds' gathering where a traditional Shepherd's Play—a kind of creation myth that includes in its cast The River, The Sea, The Man, and The Mountain—is enacted. The work's proto-environmental world view as well as its hybrid form—part play, part novel—makes *The Serpent of Stars* astonishingly contemporary. W.S. Merwin's "Green Fields"

begins, "By this part of the century few are left who believe/in the animals for they are not there in the carved parts/of them served on plates and the pleas from slatted trucks..." This novel leaves the reader believing not only in the animals, but the terrain they are part of, the people who tend them, and the life all these elements together compose.
