**The Great Cat Massacre** Robert Darnton 2009-05-12 The landmark history of France and French culture in the eighteenth-century, a winner of the Los Angeles Times Book Prize When the apprentices of a Paris printing shop in the 1730s held a series of mock trials and then hanged all the cats they could lay their hands on, why did they find it so hilariously funny that they choked with laughter when they reenacted it in pantomime some twenty times? Why in the eighteenth-century version of Little Red Riding Hood did the wolf eat the child at the end? What did the anonymous townsman of Montpellier have in mind when he kept an exhaustive dossier on all the activities of his native city? These are some of the provocative questions the distinguished Harvard historian Robert Darnton answers The Great Cat Massacre, a kaleidoscopic view of European culture during in what we like to call "The Age of Enlightenment." *Destinations in Mind* Kimberly Cassibry 2021-05-18 In *Destinations in Mind*, Kimberly Cassibry asks how objects depicting different sites helped Romans understand their vast empire. At a time when many cities were written about but only a few were represented in art, four distinct sets of artifacts circulated new information. Engraved silver cups list all the stops from Spanish Cádiz to Rome, while resembling the milestones that helped travelers track their progress. Vivid glass cups represent famous charioteers and gladiators competing in circuses and amphitheaters, and offered virtual experiences of spectacles that were new to many regions. Bronze bowls commemorate forts along Hadrian's Wall with colorful enameling typical of Celtic craftsmanship. Glass bottles display labeled cityscapes of Baiae, a notorious resort, and Puteoli, a busy port, both in the Bay of Naples. These artifacts and their journeys reveal an empire divided not into center and periphery, but connected by roads that did not all lead to Rome. They bear witness to a shared visual culture that was divided not into high and low art, but united by extraordinary craftsmanship. New aspects of globalization are apparent in the multi-lingual placenames that the vessels bear, in the transformed places that they visualize, and in the enriched understanding of the empire's landmarks that they impart. With in-depth case studies, Cassibry argues that the best way to comprehend the Roman Empire is to look closely at objects depicting its fascinating places.
