Paths of Integration Leo Lucassen 2006 Why do some migrants integrate quickly, while others become long-term minorities? What is the role of the state in the settlement process? To what extent are experiences in the past different from the present? Are the recent migrants really integrating in another way than those in the past? Is Islam indeed an obstacle to integration? These are some of the burning questions, which dominate the current politicized debate on immigration in Western Europe. In this book, leading historians and social scientists analyze and compare a variety of settlement processes in past and present migration to Western Europe. Identifying general factors in the process of adaptation of new immigrants, the contributors trace social changes effected by recent European immigration, and the parallels with the great American migration of the 1880s-1920s. The history of migration to Western Europe and the way these migrants found their place in the receiving societies, is not only essential to understand the way nations deal with newcomers in the present, but also constitutes a highly interesting laboratory for different paths of integration now and then. By analyzing and comparing a wealth of settlement processes both in the past and in the present this book is both a bold interdisciplinary endeavor, and at the same time the first attempt to identify general factors underlying the way migrants adapt to their new surroundings, as well as how societies change under the influence of immigration. The chapters in the book both look at specific groups in various periods, but also analyses the structure of the state, churches unions and other important organized actors in Western European nation states. Moreover, the results are embedded in the more theoretical American literature on the comparison of old and new migrants. All chapters have an explicit comparative perspective, either by comparing different groups or different periods, whereas the general conclusion ties together the various outcomes in a systematic way, highlighting the main answers to the central questions about the various outcomes of settlement processes. --Publisher.

Asylum Law in the European Union Francesco Cherubini 2014-11-13 This book examines the rules governing the right to asylum in the European Union. Drawing on the 1951 United Nations Convention relating to the Status of Refugees, and the 1967 Protocol, Francesco Cherubini asks how asylum obligations under international refugee law have been incorporated into the European Union. The book draws from international law, EU law and the case law of the European Court of Human Rights, and focuses on the prohibition of refoulement; the main obligation the EU law must confront. Cherubini explores the dual nature of this principle, examining both the obligation to provide a fair procedure that determines the conditions of risk in the country of origin or destination, and the obligation to respond to a possible expulsion. Through this study the book sheds light on EU competence in asylum when regarding the different positions of Member States. The book will be of great use and interest to researchers and students of asylum and immigration law, EU law, and public international law.

Extradition, Politics, and Human Rights Christopher H. Pyle 2001 Three hundred years ago, few people cared about the murky past of new arrivals to the United States, and the countries they had left made few efforts to pursue them to their new home. Today with the growth of bureaucracy, telecommunications, and air travel, extradition has become a full-time business. But the public's knowledge of, and consequent concern about, extradition remains minimal, aroused from time to time by newspaper headlines, only to fade. In this

readable and compelling history of extradition in America, Christopher Pyle remedies that ignorance. Using American constitutional law and drawing on a wealth of historical cases, he describes the collision of law and politics that occurs when a foreign country demands the surrender of individuals held to be terrorists by some and freedom fighters by others. He shows how U.S. policymakers have attempted to substitute deportation for extradition, and turn the surrender of a foreign national (or even an American citizen) into a political rather than a judicial process. Beginning with the New England Puritans' refusal to surrender to the "regicides" who had signed the death warrant of King Charles I, he traces the attitudes and ideologies that have shaped American extradition practice, culminating in the efforts by the Reagan and Bush administrations to turn the legal extradition process into an executive tool of state policy. Along the way we meet such legal luminaries as James Madison and John Stuart Mill, William Rehnquist and Oliver North, as well as pirates and fugitive slaves, anarchists and refugees, drug lords and runaway sailors. Woven throughout this story is the author's belief that current developments in extradition law ignore or actually violate the principles of individual liberty, due process, and humanity on which we claim our country was built. As he remarks in the Introduction, "Extradition involves the surrender of human beings--persons under the protection of our Constitution--to foreign regimes, many of which are unjust. This reality was well understood in the eighteenth and nineteenth centuries, when the United States was a refuge for the victims of European oppression, but it has been disregarded frequently in the twentieth century as we have sought to stem the tide of immigration and develop advantageous economic and political relations with autocratic regimes of every stripe." Author note: Christopher H. Pyle is Professor of Politics at Mount Holyoke College. He is the author of several books and Congressional reports and has frequently testified before Congress on the subject of extradition and deportation.

Law and the Illicit in Medieval Europe Ruth Mazo Karras 2010-03-19 In the popular imagination, the Middle Ages are often associated with lawlessness. However, historians have long recognized that medieval culture was characterized by an enormous respect for law and legal procedure. This book makes the case that one cannot understand the era's cultural trends without considering the profound development of law.

Esoteric Islam in Modern French Thought Ziad Elmarsafy 2021-01-14 Why would a devout Catholic, a committed Protestant, and a Maoist atheist devote their lives and work to the study of esoteric aspects of Islam? How are these aspects 'good to think with'? What are the theoretical and intellectual problems to which they provide solutions? These are the questions at the heart of Esoteric Islam in Modern French Thought. The three French specialists of Islam described above form an intellectual and personal genealogy that structures the core of the text: Massignon taught Corbin, who taught Jambet in his turn. Each of them found in the esoteric a solution to otherwise insurmountable problems: desire for Massignon, certainty for Corbin, and resurrection/immortality for Jambet. Over the course of three long chapters focused on the life and work of each

writer, the book maps the central place of esoteric Islam in the intellectual life of twentieth and twenty-first century France.

Digital Borders and Real Rights Evelien Renate Brouwer 2008 Since its launch in 1995, the majority of personal data held in the Schengen Information System (SIS) concerns third-country nationals to be refused entry to the Schengen territory. This study reveals why the use of the SIS (and the second generation SIS or SIS II) entails a risk to the protection of human rights such as the right to privacy and the right to data protection, but also the freedom of movement of persons and the principle of non-discrimination. This study describes the implementation of the SIS in respectively France, Germany, and the Netherlands and the available legal remedies in both data protection and immigration law. On the basis of three general principles of European law, minimum standards are developed for effective remedies for individuals registered in the SIS, but also other databases such as Eurodac or the Visa Information System.

Asylum Determination in Europe Nick Gill 2018-01-01 Drawing on new research material from ten European countries, *Asylum Determination in Europe: Ethnographic Perspectives* brings together a range of detailed accounts of the legal and bureaucratic processes by which asylum claims are decided. The book includes a legal overview of European asylum determination procedures, followed by sections on the diverse actors involved, the means by which they communicate, and the ways in which they make life and death decisions on a daily basis. It offers a contextually rich account that moves beyond doctrinal law to uncover the gaps and variances between formal policy and legislation, and law as actually practiced. The contributors employ a variety of disciplinary perspectives - sociological, anthropological, geographical and linguistic - but are united in their use of an ethnographic methodological

approach. Through this lens, the book captures the confusion, improvisation, inconsistency, complexity and emotional turmoil inherent to the process of claiming asylum in Europe.

Paul's Offer of Leniency (2 Cor 10:1) Donald Dale Walker 2002 Donald Dale Walker examines one of Paul's most rhetorically dramatic texts in order to reveal how it relies on the commonplace ideas and argumentative strategies of the Hellenistic world. As a result, the reader can see how the apostle invented his ideas and appreciate how inextricably Paul's mission was wrapped up in the world in which he lived.

Migration Policies and Materialities of Identification in European Cities Hilde Greefs 2018-10-08 This book focusses on the instruments, practices, and materialities produced by various authorities to monitor, regulate, and identify migrants in European cities from the sixteenth to the twentieth centuries. Whereas research on migration regulation typically looks at local policies for the early modern period and at state policies for the contemporary period, this book avoids the stalemate of modernity narratives by exploring a long-term genealogy of migration regulation in which cities played a pivotal role. The case studies range from early modern Venice, Stockholm and Constantinople, to nineteenth- and twentieth-century port towns and capital cities such as London and Vienna.

provisions of the TFEU, discussing the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors are academics and practitioners from twenty-eight European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law. Reflecting the various approaches to European legal culture, this book promotes a system concept of European Union law toward more unity notwithstanding its rich diversity grounded in national traditions.

Switzerland and Migration Barbara Lüthi 2019-04-30 This book explores the history of migration in Switzerland from the late nineteenth century to the present day. It brings together recent scholarship on Switzerland in the field of cultural and migration studies, as well as migration history, and combines various research approaches from postcolonial studies, transnational studies, border studies, and history of knowledge. Since the late nineteenth century, Switzerland has gradually transformed into a migration society, becoming one of the countries in Europe with the highest percentage of migrant population. While migration has become one of most contentious issues in Swiss public and political debates, the volume also shows how migrants have developed various strategies to deal with the country's discriminatory policies and distinct institutional settings. The authors of the volume convincingly challenge the view that Switzerland still does not represent a migration (or even post-migrant) society and substantially contributes to the long overdue acknowledgement of Switzerland in migration history and studies at the international level.

Citizenship After Orientalism Engin F Isin 2015-10-14 This collection offers a postcolonial critique of the ostensible superiority or originality of 'Western' political theory and one of its fundamental concepts, 'citizenship'. The chapters analyse the undoing, uncovering, and reinventing of citizenship as a way of investigating citizenship as political subjectivity. If it has now become very difficult to imagine citizenship merely as nationality or membership in the nation-state, this is at least in part because of the anticolonial struggles and the project of reimagining citizenship after orientalism that they precipitated. If it has become difficult to sustain the orientalist assumption, the question arises; how do we investigate citizenship as political subjectivity after orientalism? This book was originally published as a special issue of *Citizenship Studies*.

Legal Status and Protection of Environmentally-Displaced Persons: A European Perspective examines the applicability of refugee law and international human rights law in situations of environmentally-induced displacement, and explores possible future approaches to addressing the issue.

The Refugee in International Law Guy S. Goodwin-Gill 2021-09-09 The status of the refugee in international law, and of everyone entitled to protection, has ever been precarious, not least in times of heightened and heated debate: people have always moved in search of safety, and they always will. In this completely revised and updated edition, the authors cast new light on the refugee definition, the meaning of persecution, including with regard to gender and sexual orientation, and the protection due to refugees and those affected by statelessness or disasters. They review the fundamental principle of non-refoulement as a restraint on the conduct of States, even as States themselves seek new ways to prevent the arrival of those in search of refuge. Related principles of protection—non-discrimination, due process, rescue at sea, and solutions—are analysed in light of the actual practice of States, UNHCR, and treaty-monitoring bodies. The authors closely examine relevant international standards, and the role of UNHCR, States, and civil society, in providing protection, contributing to the development of international refugee law, and promoting solutions. New chapters focus on the evolving rules on nationality, statelessness, and displacement due to disasters and climate change. This expanded edition factors in the challenges posed by the movement of people across land and sea in search of refuge, and their interception, reception, and later treatment. The overall aim remains the same as in previous editions: to provide a sound basis for protection in international law, taking full account of State and community interests and recognizing the need to bridge gaps in the regime which now has 100 years of law and practice behind it.

Refuge in the Land of Liberty Greg Burgess 2008-02-14 This book examines changing responses towards refugees in modern France through French legal, intellectual, political and social history. Critical questions framed debates and policy: whether individuals had a natural human right to receive asylum and whether refugee policy was a matter for national government, or international agreement.
