Interventions Kofi Annan 2013-09-03 A “candid, courageous, and unsparing memoir” (The New York Review of Books) of post-Cold War politics and global statecraft Written with eloquence and unprecedented candor, *Interventions* is the story of Kofi Annan’s remarkable time at the center of the world stage. After forty years of service at the United Nations, Annan—who received the Nobel Peace Prize in 2001—shares his unique experiences during the terrorist attacks of September 11; the American invasions of Iraq and Afghanistan; the war between Israel, Hizbollah, and Lebanon; the brutal conflicts of Somalia, Rwanda, and Bosnia; and the geopolitical transformations following the end of the Cold War. A personal biography of global statecraft, *Interventions* is as much a memoir as a guide to world order—past, present, and future.

The Tools Phil Stutz 2012-05-29 A groundbreaking book about personal growth that presents a uniquely effective set of four tools that bring about dynamic change in the present and impart a greater understanding of the depth and complexity of the human condition over the longterm. *The Tools* addresses the most common complaint patients have about psychotherapy: the interminable wait for change to begin. Barry Michels, an LA-based therapist, was frustrated by his inability to bring his patients faster relief from the issues that plagued them. He found a mentor in Phil Stutz, a psychiatrist who years before devised a methodology that arose from a similar disenchantment. The traditional therapeutic model sets its sights on the past, but Stutz and Michels employ an arsenal of tools--exercises that access the power of the unconscious and effectively meet the most persistent problems people face--and the results are electrifying. Stutz and Michels are much sought-after--a recent profile in *The New Yorker* touted them as an “open secret” in Hollywood--and treat a high-powered and creative clientele. Their first work, *The Tools* transcends the typical self-help genre because of its paradigm-changing material, the credibility of its authors, and the instant appeal and empowerment of its message.

Protection Hugo Slim 2006 This guide gives essential advice and insights to humanitarian practitioners who are involved in providing safety and protecting vulnerable people in war and disaster. It provides a framework for responsibility and action, which helps clarify conceptual issues and helps humanitarian field workers position themselves vis--vis other actors who have

overlapping mandates. A practical schema is also presented that gives practical advice on how to think through the various elements of protection focused programming in four clear steps: assessment; program design; implementation; and monitoring and evaluation. The guide also outlines key principles of best practice for protection-focused humanitarian work.

The New Microbiology Pascale Cossart 2020-07-10 Microbiology has undergone radical changes over the past few decades, ushering in an exciting new era in science. In *The New Microbiology*, Pascale Cossart tells a splendid story about the revolution in microbiology, especially in bacteriology. This story has wide-ranging implications for human health and medicine, agriculture, environmental science, and our understanding of evolution. The revolution results from the powerful tools of molecular and cellular biology, genomics, and bioinformatics, which have yielded amazing discoveries, from entire genome sequences to video of bacteria invading host cells. This book is for both scientists and especially nonscientists who would like to learn more about the extraordinary world of bacteria. Dr. Cossart's overview of the field of microbiology research, from infectious disease history to the ongoing scientific revolution resulting from CRISPR technologies, is presented in four parts. *New concepts in microbiology* introduces the world of bacteria and some recent discoveries about how they live, such as the role of regulatory RNAs including riboswitches, the CRISPR defense system, and resistance to antibiotics. *Sociomicrobiology: the social lives of bacteria* helps us see the new paradigm by which scientists view bacteria as highly social creatures that communicate in many ways, for example in the assemblies that reside in our intestine or in the environment. *The biology of infections* reviews some of history's worst epidemics and describes current and emerging infectious diseases, the organisms that cause them, and how they produce an infection. *Bacteria as tools* introduces us to molecules derived from microbes that scientists have harnessed in the service of research and medicine, including the CRISPR/Cas9 genome-editing technology. *The New Microbiology* takes us on a journey through a remarkable revolution in science that is occurring here and now.

Alcohol and Primary Health Care Peter Anderson 1996 This book goes some way to answering the questions of how the harm done by alcohol use can be prevented and managed in primary health care. It discusses strategies and approaches that can be adopted by primary health care providers in their everyday work with individuals and families, and outlines the possibilities for them to participate in community action and to advocate for healthy public policy on alcohol.

Human Nature David Berlinski 2019-11-04 Conventional wisdom holds that the murder rate has plummeted since the Middle Ages; humankind is growing more peaceful and enlightened; man is shortly to be much improved--better genes, better neural circuits, better biochemistry;

and we are approaching a technological singularity that well may usher in utopia. Human Nature eviscerates these and other doctrines of a contemporary nihilism masquerading as science. In this wide-ranging work polymath David Berlinski draws upon history, mathematics, logic, and literature to retrain our gaze on an old truth many are eager to forget: there is and will be about the human condition beauty, nobility, and moments of sublime insight, yes, but also ignorance and depravity. Men are not about to become like gods.

Purple Cow Seth Godin 2005-01-27 You're either a Purple Cow or you're not. You're either remarkable or invisible. Make your choice. What do Apple, Starbucks, Dyson and Pret a Manger have in common? How do they achieve spectacular growth, leaving behind former tried-and-true brands to gasp their last? The old checklist of P's used by marketers - Pricing, Promotion, Publicity - aren't working anymore. The golden age of advertising is over. It's time to add a new P - the Purple Cow. Purple Cow describes something phenomenal, something counterintuitive and exciting and flat-out unbelievable. In his new bestseller, Seth Godin urges

you to put a Purple Cow into everything you build, and everything you do, to create something truly noticeable. It's a manifesto for anyone who wants to help create products and services that are worth marketing in the first place.

Unravelling Complexity Francisco Antônio Doria 2020 The revolutions that Gregory Chaitin brought within the fields of science are well known. From his discovery of algorithmic information complexity to his work on Gödel's theorem, he has contributed deeply and expansively to such diverse fields. This book attempts to bring together a collection of articles written by his colleagues, collaborators and friends to celebrate his work in a festschrift. It encompasses various aspects of the scientific work that Chaitin has accomplished over the years. Topics range from philosophy to biology, from foundations of mathematics to physics, from logic to computer science, and all other areas Chaitin has worked on. It also includes sketches of his personality with the help of biographical accounts in some unconventional articles that will provide a rare glimpse into the personal life and nature of Chaitin. Compared to the other books that exist along a similar vein, this book stands out primarily due to its highly interdisciplinary nature and its scope that will attract readers into Chaitin's world

The Clash of Civilizations and the Remaking of World Order Samuel P. Huntington 2007-05-31 The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly "universal" Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.

The Power of Creative Destruction Philippe Aghion 2021-04-20 From one of the world's leading economists and his coauthors, a cutting-edge analysis of what drives economic growth and a blueprint for prosperity under capitalism. Crisis seems to follow crisis. Inequality is rising, growth is stagnant, the environment is suffering, and the COVID-19 pandemic has exposed every crack in the system. We hear more and more calls for radical change, even the overthrow of capitalism. But the answer to our problems is not revolution. The answer is to create a better capitalism by understanding and harnessing the power of creative destruction—innovation that disrupts, but that over the past two hundred years has also lifted societies to previously unimagined prosperity. To explain, Philippe Aghion, Céline Antonin, and Simon Bunel draw on cutting-edge theory and evidence to examine today's most fundamental economic questions, including the roots of growth and inequality, competition and globalization, the determinants of health and happiness, technological revolutions, secular stagnation, middle-income traps, climate change, and how to recover from economic shocks. They show that we owe our modern standard of living to innovations enabled by free-market capitalism. But we also need state intervention with the appropriate checks and balances to simultaneously foster ongoing economic creativity, manage the social disruption that innovation leaves in its wake, and ensure that yesterday's superstar innovators don't pull the ladder up after them to thwart tomorrow's. A powerful and ambitious reappraisal of the foundations of economic success and a blueprint for change, *The Power of Creative Destruction* shows that a fair and prosperous future is ultimately ours to make.

The Contrarian's Guide to Leadership Steven B. Sample 2003-04-18 In this offbeat approach to leadership, college president Steven B. Sample—the man who turned the University of Southern California into one of the most respected and highly rated universities in the country—challenges many conventional teachings on the subject. Here, Sample outlines an iconoclastic style of leadership that flies in the face of current leadership thought, but a style that unquestionably works, nevertheless. Sample urges leaders and aspiring leaders to focus on some key counterintuitive truths. He offers his own down-to-earth, homespun, and

often provocative advice on some complex and thoughtful issues. And he provides many practical, if controversial, tactics for successful leadership, suggesting, among other things, that leaders should sometimes compromise their principles, not read everything that comes across their desks, and always put off decisions.

Restoration of Motion Picture Film Paul Read 2000-08-14 This is the first book to bring together the work of a modern motion picture film laboratory together with the specialist techniques for preservation and restoration of archival film. The book's data has its origins in a training programme called FILM which was written by members of the Gamma Group with funding from the EU fund Force. The committee comprised senior film archivists and technicians in charge of film conservation departments or working film laboratories within national film archives, together with technicians from commercial laboratories which specialise in archival film conservation and who do not work for national and local archives. The final group consisted of many of the most experienced individuals in their fields. *Restoration of Motion Picture Film* is an extremely informative, well-researched book which is an unmissable addition to the bookshelves of conservators, archivists and curators worldwide. Film history and film conservation students will also find it of great interest and use. * Only book in English on this subject * Prepared by leading specialists in their field * Includes coverage of digital technology

Oil, Power, and War Matthieu Auzanneau 2018 "The story of oil is one of hubris, fortune, betrayal, and destruction. It is the story of a resource undeniably central to the advancement of what we consider modern culture - one that continues to be ever-present during the darkest exploits of empire the world over"--Provided by publisher

Joining the Resistance Carol Gilligan 2013-05-22 Since the publication of her landmark book *In a Different Voice*, Carol Gilligan has transformed the way we think about women and men and the relations between them. It was 'the little book that started a revolution', and with more than 800,000 copies in print it has become one of the most widely read and influential books ever written on gender and human development. In her new book *Joining the Resistance* Carol Gilligan reflects on the evolution of her thinking and shows how her key ideas were interwoven with her own life experiences. Her work began with the question of voice: who is speaking to whom, in what body, telling what stories about which relationships? By listening carefully she heard a voice that had been held in silence, and in the process realized the extent to which we - both women and men - had been telling false stories about ourselves. In her subsequent work Gilligan found that adolescent girls resisted pressures to disengage themselves from their honest voices, and by joining their resistance she opened the way for the development of a more humane way of thinking about personal and political relationships. For the central conviction of her work today - and the central thesis of this book - is that the requisites for love and the requisites for citizenship in a democratic society are one and the same. Both voice and the desire to live in relationships inherent in our human nature, together with the capacity to resist false authority. Combining autobiographical reflection with an analysis of key questions about gender and human development, this timely and highly readable book by one

of America's greatest contemporary thinkers will appeal to a wide readership.

Crafting Service Processes Jean L. Harvey 2019-03-22 As the title makes clear, this book is about the design and delivery of service experiences. This includes the design of installations, facilities, technologies and scripts used in the staging of such experiences. It introduces the reader to many fundamental notions in service operations, from positioning to execution, with much attention paid to human experiences such as those of customers and service workers; be they performing simple repetitive tasks or complex mental tasks. The subject is treated in an user-friendly manner with a storytelling context, focusing initially on every day services (coffee shops, fast food, supermarkets) and then moving on to complex services (lawyers, physicians, engineers, accountants). Contrary to popular hype, not all service experiences are meant to be memorable. If all you need is a cup of coffee and this is done quickly, effortlessly, and painlessly, that's good. If there's a little plus along the way, that's better: you'll make a mental note that this is a good place to stop next time you are in the area. In an age of exponential technological change, service delivery processes are changing quickly and service industries are being creatively destroyed. You want to be the disruptor, willing to disrupt a large part of your actual income streams. The ability to maintain differentiation rests largely on an in-depth understanding of the service experience and operational excellence. The future belongs to the fastest learner. Intuition is only part of the story.

Ultimate Ferrari 250 GTO James Page 2021-06 Ultimate Ferrari GTO explores the story of this iconic family of cars in more detail and with more authority than ever before. Introduced in 1962 as the final evolutionary step in the long-running 250 GT series, the GTO was the last and best GT racer of the front-engine era. It remained at the forefront for three seasons, winning a hat-trick of World Championship titles for Ferrari. Ever since, GTOs have retained their exalted status not just because of their racing achievements but also their exquisite beauty, undoubted charisma and -- for those lucky enough to have experienced this -- peerless driveability. Indeed, the GTO's illustrative reputation has made it the world's most desirable car, as confirmed by the record-breaking prices repeatedly paid for the finest examples. Packed with superb photographs, many not previously published, this lavish two-volume production does true justice to this ultimate car.

BMW E30 James Taylor 2021-06-28 The E30 3 Series was the car that defined BMW more than any other during the 1980s, and it has gone on to become a much-loved modern classic. This book tells the full story of the cars from the time in 1976 when work first began on the successor to the original E21 3 Series. This new book features the story of how and why BMW designed their new compact E30 saloon for the 1980s; the styling, engineering and specification changes introduced over the lifetime of the model. There are full technical specifications, including paint and interior trim choices given along with a chapter on the special US variants. Details of the M3 and the cars produced by the leading German tuners and finally, there is a chapter on buying and owning a BMW E30.

Nils Jerome Hamon 2020-02-11 A dystopic Nordic fantasy world, where spirits of light are the key to life, but seemingly have abandoned the world. Young Nils and his father set out to discover why the ground has grown infertile, heading north where the drought seems worse to find the cause. Far along the way, they find signs of fresh and vibrant life, caretaken by these little light spirits. But before they know it, a large metal creature arrives and attacks the creatures, apparently hunting and gathering them. From out of the woods, a woman attacks the creature, bringing it to its knees... apparently the plant was bait for the spirits, which in turn were bait for the metal creature, which serves the high-tech Cyan Nation. This huntress, named Alba, takes Nils and his father into their tribe, where the battle between the shamanistic people and the Cyan Nation is paramount, a battle over the protection vs exploitation of the light spirits power... Meanwhile, three goddesses watch these events, lamenting the fact that man had abandoned all belief in their power long ago. They watch but do not intervene, despite the fact that the spirits are being harvested en masse by the Cyan Nation, wreaking ruin on the world outside their city. Realizing that this conflict will in one way or another change the very fabric of this world, they slowly begin to intervene... As they continue their travels, Nils has a dream (seeded by one of the goddesses) about the World Tree, Yggdrasil, which is being consumed by a metal plague. He knows he must now find and save the tree, and in the process, save the world. But the high council of the Cyan Nation would have otherwise... Having been separated in their quest, Nils's father finds himself a guest of the Cyan Prince, where he learns that they do indeed understand the power of the spirits, which they call Ethernium, serving as the power source for their technological advancement. More sinister than that, however, is the fact that they've used the Ethernium as

a means of near-eternal longevity, having wiped out all competitors to their power and resource long ago. And now, they believe they have unlocked the secrets for using the Ethernium to revive the dead... And for the goddesses, that is a step too far. They intervene, but in the process find one of themselves surprisingly captured by the Cyan royalty... and then killed. The remaining two goddesses are torn by this affront. One vows to wipe mankind off the planet for good, while the other goes to help Nils save the Life Tree. High fantasy adventure combining science-fiction with pseudo-spiritual magic, posing dramatic examinations of man vs nature, life vs death, fact vs faith, and man's desire to play god.

Convention Européenne en Matière D'adoption Des Enfants (révisée) Council of Europe 2008-01-01 The aim of the Convention is to take account of social and legal developments while keeping to the European Convention on Human Rights and bearing in mind that the child's best interests must always take precedence over any other considerations. New provisions are introduced by the Convention. The father's consent is required in all cases, even when the child was born out of wedlock. The child's consent is necessary if the child has sufficient understanding to give it. The Convention extends to heterosexual unmarried couples who have entered into a registered partnership in States which recognise that institution. It also leaves States free to extend adoptions to homosexual couples and same sex-couples living together in a stable relationship. The new convention strikes a better balance between adopted children's right to know their identity and the right of the biological parents to remain anonymous. The minimum age of the adopter must be between 18 and 30, and the age difference between adopter and child should preferably be at least 16 years

The Pull of Postcolonial Nationhood Ayo A. Coly 2010-06-23 Gender, Migration, and the Claims of Postcolonial Nationhood in Francophone Africa examines three major migrant women writers from Francophone Africa: Ken Bugul, Calixthe Beyala, and Fatou Diome. Coly studies what home means in the context of migration and how gender shapes the meaning of home. This is the first study to bring together migrant women from Francophone Africa. This is also the first study to offer a feminist critique of postnationalist discourses of home, specifically the application of postnationalism to the postcolonial context.

The Enigma of Room 622 Joël Dicker 2022-09-13 “Dicker salutes Agatha Christie even as he drops the reader through one trapdoor into another, so that by the end, we doubt we’ve ever read another novel quite like it. (We haven’t.) Fans of Ruth Ware and Lucy Foley will hug this book in between chapters; the many readers who love Anthony Horowitz’s mysteries will celebrate. And me? I’ll be reading it again.”—A. J. Finn, #1 New York Times bestselling author of *The Woman in the Window* A burnt-out writer’s retreat at a fancy Swiss hotel is interrupted by a murder mystery in this metafictional, meticulously crafted whodunit from the New York Times bestselling author of *The Truth About the Harry Quebert Affair*. A writer named Joël, Switzerland’s most prominent novelist, flees to the Hôtel de Verbier, a luxury resort in the Swiss Alps. Disheartened over a recent breakup and his longtime publisher’s death, Joël hopes to rest. However, his plans quickly go awry. It all starts with a seemingly innocuous detail: at the Verbier, there is no room 622. Before long, Joël and fellow guest Scarlett uncover a long-unsolved murder that transpired in the hotel’s room 622. The attendant circumstances: the succession of Switzerland’s largest private bank, a mysterious counterintelligence operation called P-30, and a most disreputable sabotage of hotel hospitality. A European phenomenon, *The Enigma of Room 622* is a matryoshka doll of intrigue—as precise as a Swiss watch—and Dicker’s most diabolically addictive thriller yet. Translated from the French by Robert Bononno
