Isis Unveiled H. P. Blavatsky 2012-06-28 Helena Petrovna Blavatsky (1831-91), writer, traveller and spiritualist, is well known for her role in nineteenth-century theosophy. Born in the Ukraine, Blavatsky travelled extensively and claimed to have spent seven years studying esoteric mysteries in Tibet. From 1863 she began working as a medium and later counted W. B. Yeats among her followers. In 1875 she founded the Theosophical Society with Henry Steel Olcott. Influenced by Eastern philosophy and the Templars, Freemasons and Rosicrucians, the Society aimed to unravel the occult mysteries of nature. First published in 1877, this book outlines theosophy's precepts. The book is a mishmash of Hermetic philosophy, Christian history and Asian theology, and was allegedly dictated astrally from authorities including Plato, Solomon and Roger Bacon. In Volume 1, Blavatsky addresses the 'infallibility of science', attacking the methods of Darwin and others by arguing that scientific truth can only be accessed through occult understanding.

Threads and Traces Carlo Ginzburg 2012-09-02 "This book is a translation of historian Carlo Ginzburg's latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions:

How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch, seventeenth-century antiquarianism, and twentieth-century historians."--Provided by publisher.

Light Against Darkness Armin Lange 2011 Light Against Darkness is comprised of articles that put on display the power and pervasiveness of dualistic thought. Dualism has proved a potent cultural tool for clarifying and ordering reality. Particularly in times of social stress and psychological insecurity, it can offer a valuable conceptual grid that provides orientation to the world and a clear sense of identity. At the same time, though, there are important questions to be asked about the social effects of binary thinking. As history amply illustrates, dualistic notions can readily be deployed to legitimate cultural demonization and to rationalize violence. At a deeper level, a dualist worldview can also obscure the possibilities to be found in multiplicity. The articles in this volume treat Dualism across a wide historical spectrum and from multiple methodological perspectives. The studies are organized around the religious and cultural contexts of Ancient Judaism and they include contributions from leading voices on ancient Persia, Israel, Greece, and Egypt. Experts on modern religious and philosophical thought not only lend context to concepts applied to the ancient world, but engage recent European and American experiments in binary thought. All of the studies contribute to a richer and more complete portrait of dualism in ancient Judaism.

Wills in the Roman Empire Maria Nowak 2016-03-31 The present book deals with the testamentary practice as seen through papyri, tablets, doctrinal and literary sources, manuscript tradition, etc. mostly in the period after the constitutio Antoniniana. The aim of *Wills in the Roman empire: a documentary approach* is to reconstruct how people applied law and how testamentary practice looked like in everyday life: how wills were made and opened, what was the meaning of particular dispositions. These questions constitute a part of a wider discussion concerning the level of knowledge and application of Roman law in the provinces after the edict of Caracalla. The book is supplemented with four Appendices, where all wills from the Hellenistic, Roman, and Byzantine periods are collected for the first time in scholarly literature.

Practical Lessons in Hypnotism William Wesley Cook 2007-03-01 Dr. William Wesley Cook's *Practical Lessons in Hypnotism* was originally published in 1901, but this scholarly study is as relevant as it ever was. In spite of the skeptics, hypnotism has long been a psychological science that has earned the respect of many in the medical profession (notably, Sigmund Freud) and hypnotherapy is widely used in many treatment programs. Here, Cook approaches the subject in a constructive way, covering the history and philosophy of the science, as well as practical techniques and considerations. Most compelling are the studies of hypnotism's many applications, such as in self-healing, anesthesia, behavioral therapy, and even persuasion in the field of business. Cook's work also includes intellectual discussions on tangential-and fascinating-subjects such as telepathy, clairvoyance, and magnetic healing. Comprehensive and erudite, it promises satisfaction for the curious as well as the studious.

Sarcophagi from the Jewish Catacombs of Ancient Rome Adia Konikoff 1990 This comprehensive inventory of all known sarcophagi from the Jewish catacombs of Rome, is the first specialized treatment of this subject in monograph form. It describes and analyses each sarcophagus and provides full reference material which it critically examines. This work thus fills a lacuna in the literature on this field, which has up to now been confined to the treatment of early Christian and pagan sarcophagi of the period. ♦We have here a complete overview of the Jewish sarcophagi of ancient Rome, all of them illustrated by photographs and provided with extensive bibliographies. This work thus fills a lacuna in the literature on

this field. ♦ Journal for the Study of Judaism ♦ Until this book, however, no one has attempted to assemble all of the Jewish sarcophagi separately in one place and to provide relevant information in the form of a well-ordered catalogue. For this reason, Konikoff's book provides a welcome resource for anyone interested in the material evidence of ancient Judaism and forms a good beginning for study of the sarcophagi, especially from a bibliographic point of view. ♦ Gnomon .

Historical Materialism and the Economics of Karl Marx Benedetto Croce 2020-09-28
Historical materialism is what is called a fashionable subject. The theory came into being fifty years ago, and for a time remained obscure and limited; but during the last six or seven years it has rapidly attained great fame and an extensive literature, which is daily increasing, has grown up around it. It is not my intention to write once again the account, already given many times, of the origin of this doctrine; nor to restate and criticise the now well-known passages in which Marx and Engels asserted the theory, nor the different views of its opponents, its supporters, its exponents, and its correctors and corruptors. My object is merely to submit to my colleagues some few remarks concerning the doctrine, taking it in the form in which it appears in a recent book by Professor Antonio Labriola, of the University of

Rome. For many reasons, it does not come within my province to praise Labriola's book. But I cannot help saying as a needful explanation, that it appears to me to be the fullest and most adequate treatment of the question. The book is free from pedantry and learned tattle, whilst it shows in every line signs of the author's complete knowledge of all that has been written on the subject: a book, in short, which saves the annoyance of controversy with erroneous and exaggerated opinions, which in it appear as superseded. It has a grand opportunity in Italy, where the materialistic theory of history is known almost solely in the spurious form bestowed on it by an ingenious professor of economics, who even pretends to be its inventor.

Dictionary of Languages Andrew Dalby 2015-10-28 Covering the political, social and historical background of each language, *Dictionary of Languages* offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor' languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.

Medioiranica Wojciech Skalmowski 1993 This volume contains eighteen contributions - revised and updated by their authors - to the International Colloquium on Middle Iranian Studies held in May 1990 at the University of Leuven in Belgium. The papers are mainly concerned with historical, archaeological, and especially linguistic aspects of the Middle Iranian period. Next to the Inscriptional Middle Iranian and Pahlavi the main aspects are: Khwarezmian, Khotanese and Alanian. The book contains also detailed studies concerning onomastics, Iranian loanwords in other languages (Aramaic and Uigur) and Nebenerlieferungen.

Sociolinguistics in African Contexts Augustin Emmanuel Ebongue 2017-05-11 This volume offers a new perspective on sociolinguistics in Africa. Eschewing the traditional approach which looks at the interaction between European and African languages in the wake of colonialism, this book turns its focus to the social dynamics of African languages and African societies. Divided into two sections, the book offers insight into the crucial topics

such as: language vitality and endangerment, the birth of 'new languages', a sociolinguistics of the city, language contact and language politics. It spans the continent from Algeria to South Africa, Guinea-Bissau to Kenya and addresses the following broad themes: Language variation, contact and changeThe dynamics of urban, rural and youth languagesPolicy and practice This book provides an alternative to the Eurocentric view of sociolinguistic dynamics in Africa, and will make an ideal read or supplemental textbook for scholars and students in the field/disciplines of African languages and linguistics, and those interested in southern theory or 'sociolinguistics in the margins'.
