The Memoirs of Sir Ronald Storrs Sir Ronald Storrs 2008-11 SIR RONALD STORRS - PREFACE THIS has not been been an easy book to write. My books and papers were destroyed by fire with the rest of my property in 1931, so that of material, consciously prepared or preserved as such, I have none. I had, however, the habit ever since leaving England in 1904 of writing weekly to my mother, and of enclosing briefly minuted items I thought might entertain her. All these documents she kept with my letters, including a few diaries of special missions or journeys during the Wan In the longest of these, describing Baghdad in 1917, she inked over my pencil version with the result, as in a palimpsest, that some of the words she could not read then I cannot decipher now. These surviving records I have wherever possible quoted in original with, I hope, a gain in immediacy and actuality by recording not only historic facts, sometimes already known, but also my feelings at the time with stories and details, trifling in themselves yet constituting atmosphere the hardest of all things to recapture after many years. There are no corrections but many omissions, especially of personal remarks intended only for home consumption. The retention of many faults of youthful slang and flippancy proceeds not so much from any illusion as to their intrinsic demerits as from a preference for the varied patina of the past over the shiny smoothness of a Vernis Martin surface. The loss of a slowly collected library bearing on the chief interests of a mans life is a handicap, less only than the loss of serious documents. Not total replacement, not even the Socialist ideal of the British Museum Library access to everything, possession of nothing can recall the annotations and cross-

references of many years. In a book full of Oriental names it is impossible to avoid the vexed question of transliteration. That is a subject upon which, as indicated, I have strong ideas and even stronger feelings. In 1920 Sir Herbert Samuel made me Chairman of a small Committee appointed for the purpose of transliterating Palestinian Arabic. We worked long and hard, and in due course submitted to His Excellency the neat little viii . Preface brochure which at this moment meets my resentful gaze. By the time it had reached London the Colonial Office had decided to adopt the system of the Royal Geographical Society. Lawrence was pleasant about his spelling members of our Committee cannot be. My object now is to present the strange sounds and symbols of the East with a minimum of fatigue to the reader. The system is that of English consonants with Italian vowels, and I add accents and quantities. There are one or two irregularities. The name of the founder of Islam is accurately rendered to convey the pronunciation of Muhammad even for personages such as Prince Mahomed All, in whose reigning house is a tradition of pronuncia tion alia Turca. By the time the name has reached Cyprus it has become Mehmet. Nevertheless, with a positive advantage of differentiation, I write the Sharif and King Husain ibn All of Arabia correctly according to system but the Prince and Sultan Hussein of Egypt, with the French spelling that comes close to his own Turkish utterance. By holding, though illogically, to accepted spellings of some famous words, I have at least avoided the exasperation of Quran and Makkah and of that in tolerable clenching of the glottis, the letter, ain...

Aide-mémoire - EFT, Emotional Freedom Technique en 45 notions Marie-Odile Brus

2022-01-05 La psychoénergétique vise à obtenir une transformation rapide et durable des états psychiques, émotionnels et psycho-comportementaux, en intervenant sur le système énergétique corporel. Parmi les approches de ce champ, l'Emotional Freedom Techniques (EFT) impacte positivement tous les domaines de la vie, tant au quotidien que pour faciliter l'intégration d'évènements traumatiques. Son fondateur, Gary Craig, élabore l'EFT en associant stimulation de points d'acupuncture et focalisation sur une problématique émotionnelle. L'EFT peut être pratiqué sur soi autant que dans le cadre d'accompagnements thérapeutiques, du développement personnel ou pour des problématiques plus complexes dès lors que les émotions entrent en jeu. Cet Aide-mémoire propose un panorama détaillé de l'EFT. Référence à la fois théorique et pratique pour les étudiants et leurs formateurs ainsi que pour les praticiens, il aborde : - les repères historiques, scientifiques et les évolutions majeures ; - les principes de base avec les techniques clés pour une mise en oeuvre structurée ; - l'approfondissement de la pratique, permettant notamment d'accompagner les cas complexes ; - les champs d'application variés qui rendent compte de la fécondité de cette approche.

has already helped thousands of young people show the disorder that it doesn't call the shots--they do. This uniquely designed volume is really two books in one. Each chapter begins with a section that helps kids and teens zero in on specific problems and develop skills they can use to tune out obsessions and resist compulsions. The pages that follow show parents how to be supportive without getting in the way. The next time OCD butts in, your family will be prepared to boss back--and show an unwelcome visitor to the door. Hearing, Speech, and Communication Disorders Information Center for Hearing Speech and Disorders 2012-12-06 Information analysis centers were developed to help the scientist and practitioner cope with the ever increasing mass of published and unpublished information in a specific field. Their establishment resulted from a further extension of those pressures that had brought about the formation of the specialized primary journal and the abstracting services at the turn of the century. The information analysis center concept was greatly advanced by the 1963 report of the President's Science Advisory Committee Panel on Science Information. This report stated: ". . . scientific interpreters who can collect relevant data, review a field, and distill information in a manner that goes to the heart of a technical situation are more help to the overburdened specialist than is a mere pile of relevant documents." Such specialized information centers are operated in closest possible contact with working scientists in the field. These centers not only furnish information about ongoing research and disseminate and retrieve information but also create new information and develop new methods of information analysis, synthesis, and dissemination. The continually expanding biomedical literature produced by scientists from the world's laboratories, research centers, and medical centers led the National Institute of Neurological Diseases and Stroke in 1964 to initiate a National Neurological Information Network of specialized centers for neurological information. The Centers are designed to bring under control and to promote ready access to important segments of the literature.

Rebalancing Society Henry Mintzberg 2015-01-05 Enough of the imbalance that is causing the degradation of our environment, the demise of our democracies, and the denigration of ourselves. Enough of the pendulum politics of left and right and paralysis in the political center. We require an unprecedented form of radical renewal. In this book Henry Mintzberg offers a new understanding of the root of our current crisis and a strategy for restoring the balance so vital to the survival of our progeny and our planet. With the collapse of the communist regimes of Eastern Europe, Western pundits declared that capitalism had triumphed. They were wrong—balance triumphed. A healthy society balances a public sector of respected governments, a private sector of responsible businesses, and a plural sector of robust communities. Communism collapsed under the weight of its overbearing public sector. Now the “liberal democracies” are threatened—socially, politically, even economically—by the unchecked excesses of the private sector. Radical renewal will have to begin in

the plural sector, which alone has the inclination and the independence to challenge unacceptable practices and develop better ones. Too many governments have been co-opted by the private sector. And corporate social responsibility can't compensate for the corporate social irresponsibility we see around us "They" won't do it. We shall have to do it, each of us and all of us, not as passive "human resources," but as resourceful human beings. Tom Paine wrote in 1776, "We have it in our power to begin the world over again." He was right then. Can we be right again now? Can we afford not to be?

Swimming Out Of Water Catherine Garceau 2012-09-01 Most people who knew Catherine Garceau during the early years of this century were struck by just how much she had going for her. The tall blonde with a body to kill for had won a Bronze medal at the 2000 Olympic Games as part of Canada's synchronized swimming team. But no one knew that Catherine, having lost her main outlet for her obsession with perfection, was floundering in her post-Olympic life. Performing in Las Vegas and building a career in business and marketing weren't fulfilling. In fact, part of her felt she was losing it all: her athletic body, her high-achieving mind and most humiliating, her image of excellence. Now, in *Swimming Out of Water*, Garceau goes beneath the surface of her life. From the lens of a life-changing experience she had while hiking in the Red Rock National Park outside Las Vegas. Stuck on a cliff, alone, for twenty-four hours, she flashes back to moments of fear, failure, loss, triumph, and breakthrough, which all decorated her journey with valuable lessons. Written in the journal she took with her that day, Garceau realizes and reveals the negative effects of sugar and many chemicals found in our food and environments, including the chlorine she had bathed in for so many years. Alas, with no one coming to her rescue, how did she get herself up from the ledge? How has her dream of a chlorine free swimming evolved? And how has she turned the stubborn eating disorders she faced into programs to help free other women from emotional eating? Birthed from the edge of the Red Rocks and brought to completion in her continued years of integration, education and healing, *Swimming Out of Water's* raw nature takes on the transparent quality of water, the very element Garceau is here to both defend and embody. Spend this day on the rocks with her...and discover the grace of swimming out of water.
