La mano del autor y el espíritu del impresor Roger, Chartier 2018 En la temprana modernidad europea, los primeros lectores de un libro no eran quienes lo compraban: era los escribas que copiaban el manuscrito del autor o del traductor, los censores que lo autorizaban, el editor que decidía poner ese título en su catálogo, los revisores que preparaban el texto para la imprenta, lo dividían en capítulos o secciones y le añadían la puntuación, los cajistas que componían las páginas, los lectores de pruebas que lo corregían. La mano del autor no podía ser separada del espíritu del impresor. Este libro está dedicado al proceso de publicación de las obras que dan el marco a las representaciones que los lectores se hacen del pasado o del mundo.

Ateliê do pensamento social: métodos e modos de leituras com textos literários Borges Buarque Hollanda, Bernardo 2016-07-06 O tema do III Ateliê voltou-se à relação mais geral entre literatura, história e ciências sociais. O interesse específico incidiu na narrativa de textos literários e na historiografia das práticas de leitura, tal como desenvolvida nas últimas décadas por sociólogos, antropólogos e historiadores. Entre as formas de abordagem, enfatizaram-se os métodos de tratamento de arquivos literários, não apenas como fonte, mas também como condição de constructo epistêmico e de artefato histórico. Com base neles, interrogou-se a respeito da emergência da figura do autor na história moderna europeia e postulou-se a interlocução entre escritores por meio de cartas, de impressos e toda sorte de manuscritos privados.

Penser le corps au Maghreb LACHHEB Mona (sous la direction de) 2012-09-14 Ce livre traite du corps socialisé, que l'on habite et qui vous habite. Le corps que l'on regarde, que l'on danse, que l'on promène, que l'on photographie, que l'on écrit, que l'on touche, que l'on domine. Le corps vécu y est décrit dans ses expressions quotidiennes : selon la doctrine musulmane et les proverbes ou dictons populaires, à travers le culte du Saint et la spiritualité du Cheikh, par la transe et la communication avec l'au-delà, dans la déambulation de l'espace public, au hammam comme lieu de parole et d'expression du plaisir corporel, sous le hijab et le corps voilé et stratégiquement protégé du regard de l'homme. Le corps dominé est évoqué lors des illégitimes flâneries de femmes dans la rue. Mais c'est aussi le corps violenté. Violence symbolique par l'assignation d'une identité sociale au corps biologique. Violence physique du contrôle familial de la virginité, de l'excision et de l'amputation du désir, de la sexualité annexée et du corps féminin stigmatisé par le corps masculin. Le corps représenté est traité au prisme des arts qui en proposent une lecture critique et sublimée, voire transgressive : la danse contemporaine comme rejet des codes identitaires nationaux, la photographie comme témoin des transformations du corps social colonisé et des patrimoines à réhabiliter, le cinéma comme mise en images du corps intériorisé, la littérature et la poésie comme expressions du corps transfiguré. Puisant ses exemples dans des sociétés du Maghreb (Mauritanie, Maroc, Algérie, Tunisie), cet ouvrage s'interroge particulièrement sur la rencontre et sur la cohabitation souvent inégalitaires entre les corps masculin et féminin. Monia Lachheb est enseignante chercheure en sociologie à l'Institut supérieur du sport et de l'éducation physique de Tunis, associée à l'Institut de recherche sur le Maghreb contemporain. Ses travaux s'inscrivent dans le champ de la socio-anthropologie du corps et s'intéressent particulièrement aux formes de mise en jeu de la corporéité dans le champ du sport et de l'éducation physique. Les questions liées au genre, notamment dans l'espace sportif, relèvent aussi de ses intérêts. Les auteurs ont contribué à cet ouvrage : Zohra Abbassi, Meriem Alaoui Btarny, Lilia Beltaïef, Jean-Marie Brohm, Isabelle Charpentier, Abdelghani Fennane, Claude Fintz, Corinne Fortier, Meriem Guellouz, Abdellaziz Hlaoua, Christina Jones, Monia Lachheb, Khalid Mouna, Zeineb Majdouli, Fatima Mazmouz, Imane Mouani, Meryem Sellami.

Exploring the Biological Contributions to Human Health Institute of Medicine 2001-07-02 It's obvious why only men develop prostate cancer and why only women get ovarian cancer. But it is not obvious why women are more likely to recover language ability after a stroke than men or why women are more apt to develop autoimmune diseases such as lupus. Sex differences in health throughout the lifespan have been documented. Exploring the Biological Contributions to Human

Health begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex (being male or female, according to reproductive organs and chromosomes) and gender (one's sense of self as male or female in society). Exploring the Biological Contributions to Human Health discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. Exploring the Biological Contributions to Human Health will be important to health policy makers, basic, applied, and clinical researchers, educators, providers, and journalists—while being very accessible to interested lay readers.

Amori venali Jacques Rossiaud 2014-01-10T00:00:00+01:00 Donne di strada e grandi cortigiane, ruffiane e mezzane, case chiuse private e pubblici bordelli: fino al XVI secolo il mondo degli amori venali è onnipresente e tollerato. Gli uomini di governo e di Chiesa considerano la prostituzione inestirpabile e naturale, una forma di risposta spontanea alla miseria dei tempi e l'arma più efficace di lotta contro il caos. La Chiesa gregoriana, pur instauratrice di un ordine coniugale rigoroso, accetta la concupiscenza maschile e ammette donne votate al peccato. La giustificazione è quella del male minore: minore rispetto alla violenza, allo stupro, all'adulterio, all'incesto. L'elemento monetario aggiunge paradossalmente all'insieme un elemento positivo; il denaro, questo nemico di Dio, è l'amico della donna venale: giustifica e legittima la sua pratica e fa di lei una lavoratrice che riceve il prezzo della sua fatica. Rese socialmente visibili, le prostitute pubbliche si ritengono in grado, in Alta Germania come in Linguadoca, di far fronte agli abusi e di reclamare i propri diritti. Perfettamente integrate? Certamente no. Ma in grado di diventarlo? Probabilmente. Ma il tempo di promozione del corpo finisce bruscamente a metà del XVI secolo quando, sullo sfondo di disastri sociali e di guerre religiose, il clero della Controriforma decide di porre fine alla tolleranza. Da allora viene attuata una strategia repressiva fatta di incarceramenti, punizioni ed esclusioni. Gli anni 1550-1560 si aprono così su un mondo completamente diverso.

Eloge du désir sexuel Simon Blackburn 2009 Les puritains se trompent : la recherche du plaisir sexuel est une bonne chose ! C'est ce que nous explique le philosophe Simon Blackburn dans cet essai délicieux qui se lit comme un dialogue critique avec les penseurs du passé et les théoriciens du présent, de Platon à Freud et au-delà.

The Monkey Wrench Gang Edward Abbey 2011-08-19 A motley crew of saboteurs wreak outrageous havoc on the corporations destroying America's Western wilderness in this classic, comic extravaganza. When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate coconspirators. And the manic, beer-guzzling, rabidly antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, *The Monkey Wrench Gang* is an outrageous romp with ultra-serious undertones that is as relevant today as it was in the early days of the environmental movement. The author who Larry McMurtry (Lonesome Dove) once dubbed "The Thoreau of the American West" has written a true comedic classic with brains, heart, and soul that more than justifies the call from the Los Angeles Times Book Review that we should all "praise the earth for Edward Abbey!"

Grand Transitions Vaclav Smil 2021-02-12 What makes the modern world work? The answer to this deceptively simple question lies in four "grand transitions" of civilization--in populations, agriculture, energy, and economics--which have transformed the way we live. Societies that have undergone all four transitions emerge into an era of radically different population dynamics, food surpluses (and waste), abundant energy use, and expanding economic opportunities. Simultaneously, in other parts of the world, hundreds of millions remain largely untouched by these developments. Through erudite storytelling, Vaclav Smil investigates the fascinating and complex interactions of these transitions. He argues that the moral imperative to share modernity's benefits has become more acute with increasing economic inequality, but addressing this imbalance would make it exceedingly difficult to implement the changes necessary for the long-term preservation of the environment. Thus, managing the fifth transition--environmental changes from natural-resource depletion, biodiversity loss, and global warming--will determine the success or eventual failure of the grand transitions that have made the world we live in today.

Albert Camus, ou, La fatalité des natures Frédéric Musso 2006 Chaque chapitre de cet essai constitue une nouvelle autonome, développée à partir d'une anecdote, afin de restituer la personnalité d' A. Camus en s'appuyant sur ses contradictions intimes. Le propos de l'auteur est d'éclairer les malentendus constants suscités par l'oeuvre d' A. Camus et de le proposer à la lecture en dehors des a priori polémiques et idéologiques.

CRC Handbook of Avian Body Masses, Second Edition John B. Dunning, Jr. 2007-12-05 See what's new in the Second Edition: · Number of species included is increased from 6300 to over 8700, about 85% of the world's birds · Better data for many of the species included in the first edition – an exhaustive compilation of new data published from 1992 through 2007 · More comprehensive coverage of Latin America, Japan, Taiwan, Southeast Asia, and more coverage of

research published in non-English language journals In 1992 the CRC Handbook of Avian Body Masses broke new ground by providing a compilation of body masses for 6300 species, about two-thirds of the world's species. The handbook instantly became the gold standard, cited in hundreds of scientific studies and a prominent fixture on the shelves of many ornithologists. Keeping the format that made the first edition so popular, the second edition features dramatic changes both in species coverage and the data quality. The new edition compiles the results of new samples that have been published for many of the birds included in the first edition, and data found for about 2400 new species, increasing the coverage to over 8700 species, about 85% of the world's birds. The order of species and families has been revised in the text to fit with the latest publications in avian taxonomy and systematics. The second edition includes an accompanying CD-ROM with a searchable electronic database.
