Program Management Ginger Levin 2012-08-29 Program management is a rapidly emerging offshoot of project management. So much so that AT&T, IBM, and other organizations, both large and small in all sectors, have initiated a push to certify program managers. And, although universities offer courses in program management, there are few books available to guide program managers through this field that requires a broad level of knowledge and experience. The definitive reference on program management, *Program Management: A Life Cycle Approach* provides this much needed guidance. Edited by Dr. Ginger Levin, the second person to become a PMI® certified program manager (PgMP®), this handbook presents a cohesive compilation of program management knowledge from more than

20 certified PgMPs. It considers the entire program life cycle and its phases—from initiation to sustainability. Each chapter is written by an experienced PgMP from a wide range of industries and countries. Combining the rigor of an academic reference with easy-to-read language, the book covers the themes in the PMI Standard for Program Management and ties them to program managers' work. The chapters reference PMI's standards, complement the concepts in the standards, and expand on the concepts and issues that the standard mentions in passing. The book also addresses a few issues that the standard does not touch on at all. The book can be read in its entirety, or specific chapters of interest can be read separately. Overall, the book provides practitioners with a reliable source of information on the key themes and issues in program management. It is useful for individuals desiring to attain the PgMP credential and suitable for colleges and universities offering courses in program management.

**Competencies for Leading in Diversity** Aiah Foday-Khabenje 2016-11-14 The patriarchal approach to leadership in the African context is indeed an enigma, judging from the unpredictable outcomes and the quest for effective leadership. In many ways, the secularized big-man in the public square is no different from the sacralised great-man of God in the church. The Lord Jesus Christ calls his followers to servant leadership. The secular world has also established the efficacy of the servant leadership approach for cutting-edge leadership. This book looks at the nature of evangelical associations in their diversity and what it takes for leaders to build unity and harmony for effectiveness, especially in the African context.

**Competency-Models** Harper, Donta S. 2020-09-25 Utilizing a skill and ability-based competency approach can be used to develop both individuals and organizations. Whether the skills are developed through on-the-job training or trained through educational programs, to be proficient is to gain mastery in the defined area. These standards of proficiency separate the talented from those that have talent and utilize this talent. Competency-models, systematic integration, and application of competency-models are a focus in today's work environment to remain competitive and to attract quality talent. Therefore, focusing on the identification of management skillsets and the alignment of competency-models with organizational goals to achieve integration through the

use of a system are essential to move from good to great management. *Integration and Application of Business Graduate and Business Leader Competency-Models* is a pivotal reference source that examines how educational competency-based programs and industry needs are being met, along with how best to meet and achieve desired strategic organizational outcomes through integration. By highlighting the organizational need for recruitment, development, and success through scalable approaches at all organizational levels, this book is ideally designed for business graduates, organizational leaders, managers, students, academicians, and researchers in the fields of leadership, social science, organizational development, and business management.

*A Leader's Guide to Competency-Based Education* Laurie Dodge 2018-09-30 As interest in competency-based education (CBE) continues to grow by leaps and bounds, the need for a practical resource to guide development of high-quality CBE programs led the authors to write this book. Until now, there has been no how-to manual that captures in one place a big picture view of CBE along with the down-to-earth means for building a CBE program. A variety of pressures are driving the growth in CBE, including the need for alternatives to the current model of higher education (with its dismal completion rates); the potential to better manage the iron triangle of costs, access, and quality; the need for graduates to be better prepared for the workforce; and the demands of adult learners for programs with the flexible time and personalized learning that CBE offers. Designed to help institutional leaders become more competent in designing, building, and scaling high-quality competency-based education (CBE) programs, this book provides context, guidelines, and process. The process is based on ten design elements that emerged from research funded by the Gates Foundation, and sponsored by AAC&U, ACE, EDUCAUSE, and the Competency-Based Education Network (C-BEN), with thought partners CAEL and Quality Matters. In short, the book will serve administrators, higher education leaders, faculty, staff, and others who have an interest in CBE by: • Giving context to enable the audience to discover the importance of each design element and to help frame the CBE program (the “why”); • Providing models, checklists, and considerations to determine the “what” component for each design element; • Sharing outlines and templates for the design elements to enable institutions to build quality, relevant, and rigorous CBE programs (the “how”).

Myers 2008-01-17 *The Fundamentals of Small Group Communication* provides readers with the fundamentals they need to become functional and productive members of any small group. procedures utilized by effective small groups (for example, task accomplishment, decision making, climate). **International Perspectives and Strategies for Managing an Aging Workforce** Ince, Fatma 2022-03-11 Older employees are often seen as an obstacle and not as an opportunity for companies, especially regarding the transfer of knowledge and experience. Effective development and utilization of older professional and managerial employees is an important issue as most organizations are not prepared to tailor their training methods to the needs and preferences of these employees due to negative stereotypes. Managing a rapidly aging workforce and sustaining economic dynamism calls for systematic research to prevent age discrimination due to an incomplete knowledge of older workers and politically challenging policy choices that require strong political commitments, robust management leadership, and social consensus. *International Perspectives and Strategies for Managing an Aging Workforce* examines the differences in stereotypes of older employees compared to younger employees in companies; analyzes the impact of the aging workforce on retention, productivity, and well-being; and investigates organizational systems, processes, and practices for managing older workers. Covering a range of topics such as retention and retirement, this reference work is ideal for researchers, academicians, practitioners, business owners, managers, human resource workers, instructors, and students.

This guidebook gives leadership educators the tools they need to help students develop the competencies necessary for their chosen careers and required by their academic programs. It also offers a way to understand and demonstrate the effectiveness of leadership programs. Organized into chapters each focused on one of 60 leadership competencies common across 522 academic degree programs accredited by 97 agencies, each chapter covers: a definition and description of the competency through the lens of each of four dimensions: knowledge, value, ability, and behavior; a scenario related to college student leadership that showcases the competency in action; related competencies to help readers understand how developing one competency may also intentionally or unintentionally develop another; a correlation of the competency to the Relational Leadership Model, the Social Change Model, the Five Practices of Exemplary Leadership, and/or Emotionally Intelligent Leadership; and tangible curricular ideas to use with students to help them develop each dimension of the competency.

Gender, Communication, and the Leadership Gap Carolyn M. Cunningham 2017-09-01 *Gender, Communication, and the Leadership Gap* is the sixth volume in the *Women and Leadership: Research, Theory, and Practice* series. This cross-disciplinary

series, from the International Leadership Association, enhances leadership knowledge and improves leadership development of women around the world. The purpose of this volume is to highlight connections between the fields of communication and leadership to help address the problem of underrepresentation of women in leadership. Readers will profit from the accessible writing style as they encounter cutting-edge scholarship on gender and leadership. Chapters of note cover microaggressions, authentic leadership, courageous leadership, inclusive leadership, implicit bias, career barriers and levers, impression management, and the visual rhetoric of famous women leaders. Because women in leadership positions occupy a contested landscape, one goal of this collection is to clarify the contradictory communication dynamics that occur in everyday interactions, in national and international contexts, and when leadership is digital. Another goal is to illuminate the complexities of leadership identity, intersectionality, and perceptions that become obstacles on the path to leadership. The renowned thinkers and scholars in this volume hail from both Leadership and Communication disciplines. The book begins with Sally Helgesen and Brenda J. Allen. Helgesen, co-author of *The Female Vision: Women's Real Power at Work*, discusses the two-fold challenge women face as they struggle to articulate their visions. Her chapter offers six practices women can use to relieve this struggle. Allen, author of the groundbreaking book, *Difference Matters: Communicating Social Identity*, discusses the implications of how inclusive leadership matters to women and what it means to think about women as people who embody both dominant and non-dominant social identity categories. She then offers practical communication strategies and an intersectional ethic to the six signature traits of highly inclusive leaders. Each chapter includes practical solutions from a communication and leadership perspective that all readers can employ to advance the work of equality. Some solutions will be of use in organizational contexts, such as leadership development and training initiatives, or tools to change organizational culture. Some solutions will be of use to individuals, such as how to identify and respond productively to micro-aggressions or how to be cautious rather than optimistic about practicing authentic leadership. The writing in this volume also reflects a range of styles, from in-depth scholarship that produces new knowledge to shorter forums that feature interesting ideas worth considering.

**Publications Combined: EMOTIONAL INTELLIGENCE COMPETENCIES AND MILITARY LEADERSHIP** U.S. Department Of Defense Over 700 total pages ... Introduction: Leadership has often been viewed as more of an art than a science. However, the expanding field of neuroscience is confirming that leadership may be more science than art. While the thinking components of the brain have been noticeably evolving along with the pace of technology, the emotional parts are still very primitive, yet play an important role in leadership and behavior. The latest neurological, psychological, and organizational research is converging towards the fact that emotional leadership is the key ingredient to an organization's performance. Successfully leading in dynamic, complex environments, making wise decisions while facing tremendous resource constraints, avoiding moral and ethical lapses, preventing failures in leadership, building healthy relationships, and fostering resiliency across the workforce is less about the hard skills of cognitive intelligence and more about the soft skills of emotional intelligence. Leaders still need foundational, cognitive skills, but they cannot lead solely from their
