Bengali Hanne-Ruth Thompson 2012 Bangla (Bengali), an Eastern Indo-Aryan Language, is the national language of Bangladesh with 150 million speakers and the state language of Paschim Banga (West Bengal) in India with 90 million speakers. There are sizeable communities of Bengalis scattered all over the world. Altogether, the number of native speakers make Bangla the fifth or sixth largest language in the world. A Descriptive Study of Bengali Words Niladri Sekhar Dash 2015-01-15 This book is a study of modern Bengali words based on the data obtained from a corpus of written texts. The author has used all kinds of data, information and examples from the Bengali corpus to shape up this text. He has made an empirical attempt to analyse Bengali words and other lexical items from the perspective of their surface orthographic representation to understand the internal structure of their composition with a focus on their functional roles in various contexts of their usage within texts. In order to achieve this goal, he has established a link between the internal composition and external representation of words within an interface of usage and function of words in texts. The issues addressed in the book include decomposition of words, interpretation of function of word-formative elements and analysis of lexico-semantic identities of the word-formative elements in relation to their function in words.
