Capitalist Nigger Chika Onyeani 2012-03-27 *Capitalist Nigger* is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' - discipline, self-reliance, ruthlessness - to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

Stuff They Don't Want You to Know Ben Bowlin 2022-10-11 "Interesting...Bowlin's calmly rational approach to the subject of conspiracy theories shows the importance of logic and evidence."—Booklist "A page-turning book to give to someone who believes in pizza pedophilia or that the Illuminati rule the world."—Kirkus Reviews The co-hosts of the hit podcast *Stuff They Don't Want You to Know*, Ben Bowlin, Matthew Frederick, & Noel Brown, discern conspiracy fact from fiction in this sharp, humorous, compulsively readable, and gorgeously illustrated book. In times of chaos and uncertainty, when trust is low and economic disparity is high, when political institutions are crumbling and cultural animosities are building, conspiracy theories find fertile ground. Many are wild, most are untrue, a few are hard to ignore, but all of them share one vital trait: there's a seed of truth at their center. That seed carries the sordid, conspiracy-riddled history of our institutions and corporations woven into its DNA. Ben Bowlin, Matt Frederick, and Noel Brown host the popular iHeart Media podcast, *Stuff They Don't Want You To Know*. They are experts at exploring, explaining, and interrogating today's emergent conspiracies—from chem trails and biological testing to the secrets of lobbying and the indisputable evidence of UFOs. Written in a smart, witty, and conversational style, elevated with amazing illustrations, *Stuff They Don't Want You to Know* is a vital book in understanding the nature of conspiracy and using truth as a powerful weapon against ignorance, misinformation, and lies.

Netflix and the Re-invention of Television Mareike Jenner 2018-07-24 This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television's existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge-watching in its organisation and marketing, and Netflix's position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge-watching as Netflix's iteration of giving control to the viewers. By focusing on Netflix's relationship with the linear television schedule, its negotiations of quality and marketing, as well as the way Netflix integrates into national media systems, Netflix and the Re-invention of Television illuminates the importance of Netflix's role within the processes of TV IV.

Taboo Comedy Chiara Bucaria 2016-11-26 The essays in this collection explore taboo and controversial humour in traditional scripted (sitcoms and other comedy series, animated series) and non-scripted

forms (stand-up comedy, factual and reality shows, and advertising) both on cable and network television. Whilst the focus is predominantly on the US and UK, the contributors also address more general and global issues and different contexts of reception, in an attempt to look at this kind of comedy from different perspectives. Over the last few decades, taboo comedy has become a staple of television programming, thus raising issues concerning its functions and appropriateness, and making it an extremely relevant subject for those interested in how both humour and television work.

Upstairs and Downstairs James Leggott 2014-12-11 This collection addresses the social and political contexts that have shaped the British TV costume drama as well as the changing historical contexts in which such programs are viewed again and again (in syndication, on DVD, youtube, etc.) and are reinterpreted by a thriving twenty-first-century global fan culture.

Electronics for Absolute Beginners Philip Dixon 2020-12-27 The history of electronics can be traced back to 1874 when Irish scientist George Johnstone Stoney (1826-1911) suggested that electricity must be "built" out of tiny electrical charges. Twenty years later, he coined the name "electron". Interest in electronics gradually increased over the decades following Stoney's discovery. In 1947 the transistor was invented by William Shockley, John Bardeen and Walter Brattain at Bell Labs, which revolutionized the computer industry by replacing fragile, power hungry valves with much smaller and reliable devices. During the 1950s and 60s, computers became more powerful and smaller, eventually leading to the introduction of the home personal computer (PC) in the 1970s. Today, electronic devices are all around us ... computers, cell (mobile) phones, televisions, calculators, hearing aids, and cars are just a few examples of devices that form part of everyday life in the 21st century and which make use of electronics. The purpose of this book is to introduce the subject of electronics to people who have no prior knowledge of the subject. If you don't know what a prototyping breadboard is, or have no idea what a resistor or diode do, then this book will help you to gain a basic understanding of what electronics components exist and what they are used for. You will also learn how to combine such components to build electronics circuits. Although there is a logical flow in the way that information is presented, you can pretty much jump around from chapter to chapter as it suits you, picking out the material that is of most interest. The book is split into two parts - the first introduces the subject of electronics, and the second contains a range of simple circuits to design and build. Part 1 - Getting Started with Electronics * Chapter 1 - Electricity and Electric Circuits * Chapter 2 - Equipment You Need in Your Electronics Laboratory * Chapter 3 - Safety * Chapter 4 - Resistors * Chapter 5 - Capacitors * Chapter 6 - Diodes * Chapter 7 - Light Emitting Diodes (LEDs) * Chapter 8 - Transistors * Chapter 9 - Integrated Circuits * Chapter 10 - The 555 Timer * Chapter 11 - Combining Electronics with Software Part 2 - Designing and Building Electronics Circuits * Chapter 12 - Using an Electronics Prototyping Breadboard * Chapter 13 - Illuminating a Single LED * Chapter 14 - Using a Multimeter to Measure Voltage, Current and Resistance * Chapter 15 - Connecting Multiple LEDs in Series * Chapter 16 - Connecting Multiple LEDs in Parallel * Chapter 17 - Using a Variable Resistor to Control the Speed of a Small DC Motor * Chapter 18 - Using Wind Power * Chapter 19 - Using a Transistor to Switch On an LED * Chapter 20 - Charging and Discharging a Capacitor * Chapter 21 - Building a Light Sensor - Night Light * Chapter 22 - Introduction to Solar Power

Until We Reckon Danielle Sered 2019-03-05 "Profoundly necessary." —Michelle Alexander, New York Times columnist and author of *The New Jim Crow* In the eloquent tradition of Bryan Stevenson's *Just Mercy*, an award-winning leader in the movement to end mass incarceration takes on the vexing problem of violent crime Although over half the people incarcerated in America today have committed violent offenses, the focus of reformers has been almost entirely on nonviolent and drug offenses. Danielle Sered's brilliant and groundbreaking *Until We Reckon* steers directly and unapologetically into the question of violence, offering approaches that will help end mass incarceration and increase safety. Widely recognized as one of the leading proponents of a restorative approach to violent crime, Sered asks us to reconsider the purposes of incarceration and argues persuasively that the needs of survivors of violent crime are better met by asking people who commit violence to accept responsibility for their actions and make amends in ways that are meaningful to those they have hurt—none of which happens in the context of a criminal trial or a prison sentence. Sered launched and directs Common Justice, one of the few organizations offering alternatives to incarceration for people who commit serious violent crime and which has produced immensely promising results. Critically, Sered argues that the reckoning owed is not only on the part of those who have committed violence, but also by our nation's overreliance on incarceration to produce safety—at great cost to communities, survivors, racial equity, and the very fabric of our democracy.
