Homeopathic Psychology Philip M. Bailey, M.D. 1995-11-30 This is a most interesting book that combines

psychology with homeopathy. Philip Bailey describes in depth the personality profiles of some 35 polychrests. The last pages of the book cover a mix of psychological astrology and homeopathy when he explores the elements and some polychrests. Bailey provides detailed information on 35 major types, giving insight on diagnosis, mental and emotional traits, and physical characteristics. His broad profiles of major constitutional remedies give the reader a good overall picture of the personality type and therefore ways of remembering facts about the archetype, by having a unifying theory for each remedy.

A Shot in the Dark Harris Livermore Coulter 1991-01-01 Every week, tens of thousands of children across America are injected with the DPT (diphtheria-pertussis-tetanus) vaccine. The law requires it, and most children will get four DPT shots before they are two years old. But what if one of the components of the vaccine was not safe? What if it caused not only pain, swelling, screaming, and high fever, but also shock, convulsions, brain damage, and even death? And, to make matters worse, what if there were a safer alternative but parents didn't know about it? Wouldn't the government require the drug manufacturers to produce the safer vaccine to protect the lives of the children who might otherwise suffer the shot's crippling side effects? The answer is, unfortunately, no. *A Shot in the Dark* is a chilling account of just how dangerous the whole-cell pertussis vaccine (the "P" part of the DPT shot) has proven to be. It provides accurate research into the history of the vaccine's development and usage. It exposes the roles played by the FDA and drug companies. It tells the tragic stories of the young victims of the vaccine. This book is also a guide for rightfully concerned parents who are looking for answers to important questions.

What are the warning signs to look for to tell if your child is likely to be sensitive to the vaccine? What should parents ask their doctors about the vaccine and their child's medical profile? What is being done, here and in other countries, to combat this frightening situation? What can parents do now to help? *A Shot in the Dark* is a responsible, eye-opening look at a potential problem that every parent of every young child living in this country must face. Armed with the facts in this important book, parents will be able to make informed decisions about their real medical options. Book jacket.

Introduction to Homoeopathic Prescribing S. M. Gunavante 2000 A comprehensive book on all aspects of homeopathy except *Materia medica* written for the medical graduates of modern medicine .

Homoeopathy Edzard Ernst 1998 This exciting new book is set to become the standard professional reference text on homoeopathy. A critical evaluation of the discipline, it reviews the known facts and defines the knowledge gaps, offering a reliable and much-needed critique of the uses of traditional homoeopathic remedies. As its title suggests, 'Homoeopathy: a critical appraisal' takes an evaluative approach, reviews known facts and defines knowledge gaps. It discusses the findings of clinical trials and research into effectiveness and safety, drug 'provings', the placebo effect/response, and the socio-economic aspects of homoeopathy. Recommended for all medical and professional homoeopaths, students of homoeopathy, GPs and health care professionals.
