Answers to Your Biggest Questions About Teaching Secondary Math Frederick L. Dillon 2022-03-02 Let's face it, teaching secondary math can be hard. So much about how we teach math today may look and feel different from how we learned it. Teaching math in a student-centered way changes the role of the teacher from one who traditionally "delivers knowledge" to one who fosters thinking. Most importantly, we must ensure our practice gives each and every student the opportunity to learn, grow, and achieve at high levels, while providing opportunities to develop their agency and authority in the classroom which results in a positive math identity. Whether you are a brand new teacher or a veteran, if you find teaching math to be quite the challenge, this is the guide you want by your side. Designed for just-in-time learning and support, this practical resource gives you brief, actionable answers to your most pressing questions about teaching secondary math. Written by four experienced math educators representing diverse experiences, these authors offer the practical advice they wish they received years ago, from lessons they've learned over decades of practice, research, coaching, and through collaborating with teams, teachers and colleagues—especially new teachers—every day. Questions and answers are organized into five areas of effort that will help you most thrive in your secondary math classroom: How do I build a positive math community? How do I structure, organize, and manage my math class? How do I engage my students in math? How do I help my students talk about math? How do I know what my students know and move them forward? Woven throughout, you'll find helpful sidebar notes on fostering identity and agency; access and equity; teaching in different settings; and invaluable resources for deeper learning. The final question—Where do I go from here?—offers guidance for growing your practice over time. Strive to become the best math educator you can be; your students are counting on it! What will be your first step on the journey?

teachers understand and apply theory and research is one of the most challenging tasks of teacher preparation and professional development. As they learn about motivation and engagement, teachers need conceptually rich, yet easy-to-use, frameworks. At the same time, teachers must understand that student engagement is not separate from development, instructional decision-making, classroom management, student relationships, and assessment. This volume on teaching teachers about motivation addresses these challenges. The authors share multiple approaches and frameworks to cut through the growing complexity and variety of motivational theories, and tie theory and research to real-world experiences that teachers are likely to encounter in their courses and classroom experiences. Additionally, each chapter is summarized with key “take away” practices. A shared perspective across all the chapters in this volume on teaching teachers about motivation is “walking the talk.” In every chapter, readers will be provided with rich examples of how research on and principles of classroom motivation can be re-conceptualized through a variety of college teaching strategies. Teachers and future teachers learning about motivation need to experience explicit modeling, practice, and constructive feedback in their college courses and professional development in order to incorporate those into their own practice. In addition, a core assumption throughout this volume is the importance of understanding the situated nature of motivation, and avoiding a “one-size-fits” all approach in the classroom. Teachers need to fully interrogate their instructional practices not only in terms of motivational principles, but also for their cultural relevance, equity, and developmental appropriateness. Just like P-12 students, college students bring their histories as learners and beliefs about motivation to their formal study of motivation. That is why college instructors teaching motivation must begin by helping students evaluate their personal beliefs and experiences. Relatedly, college instructors need to know their students and model differentiating their interactions to support each of them. The authors in this volume have, collectively, decades of experience teaching at the college level and conducting research in motivation, and provide readers with a variety of strategies to help teachers and future teachers explore how motivation is supported and undermined. In each chapter in this volume, readers will learn how college instructors can demonstrate what effective, motivationally supportive classrooms look, sound, and feel like.

ESOL Lesson Planner Galina St George 2019-12-03 Every teacher knows that a good lesson needs planning and preparation. It applies to everything we teach, and ESOL is certainly no exception. I have been asked occasionally to teach classes at very short notice which means no preparation and I have managed to do it. However, it has always left me with a sense of frustration which is why I rarely agree to do it these days because I like to be prepared in order to make my lessons count. Having recently returned to teaching, I have discovered that I had two major issues: 1. I couldn't find a lesson plan template I liked. 2. My lesson plans kept getting lost among the paperwork. So I decided to create a book which I was going to use for my lesson planning. I worked out a plan template which I liked. I didn't want to make it too long. Like everyone else, I have a life and detailed plans are time-consuming. So it needed to be short. I aimed to fit it into 1 page, with the second page expanding on the activities, takeaways and other aspects should there be a need for a more detailed description. Once the book gets published, I will be ordering a couple of copies of the ESOL Lesson Planner for myself. I hope that you find the templates as useful as I have found it so far. It's just that from now on, I will have all of my plans in one place which can't be a bad thing!

West Meets East: Best Practices from Expert Teachers in the U.S. and China

Leslie Grant 2014-04-03 The United States and China: two nations drastically different in demographics, history, political structures, and education systems. Despite these differences, educators in each country have discovered they have much to learn from one another. The United States looks east and is captivated by the high assessment scores that many Chinese students achieve. China looks west and is enamored with how the United States fosters innovation and creativity in students. Teachers are increasingly looking across borders to expand, adapt, and offer their students a more balanced education. West Meets East is based on the fundamental premise that strong teaching is at the heart of educational quality and that we all benefit from understanding the practices and professional thinking of exemplary teachers. With this in mind, Grant and her colleagues set out to discover which beliefs and strategies of effective teachers can cross the cultural divide and help students in each nation make breakthrough advances. As educators, it's important to understand that even though we're setting new goals and improving outcomes, excellence is a moving target. In the globally connected 21st century, educational innovations in one country can reset the bar for students around the world. Only by learning from one another can we be sure all our students remain competitive and successful.

Being Frank Donna W. Earnhardt 2015-01-01 Frank follows the motto, "Honesty is the best policy." He tells the truth, the whole truth, and nothing but the truth. Frank never lies to his schoolmates, he always tells the truth to adults, and he's always honest with police officers. The balancing act of finding tact, that fine line between telling the truth and telling too much truth, is the main theme of this story, and it's very funny—although not necessarily to his friend Dotti whose freckles remind Frank of the Big Dipper, or to the teacher who hears that her breath smells like onions, or to the principal who is told that his toupee looks like a weasel. No one is quite as impressed with Frank's honesty as he thinks they should be. He is sweet and straightforward, and, well, very frank, but with everyone annoyed at him, Frank is now honestly unhappy. He decides to visit his confidante and pal, Grandpa Ernest, who has a history of frankness himself. With a few lessons from Grandpa, Frank begins to understand that the truth is important, but so is not being hurtful. With amusing characters and expressive artwork, this story tells the powerful message of finding the good in everything—a lesson that sends compassion and understanding to take the place of rudeness in the complex concept of truth.

Lesson Plans Judson G. Everitt 2017-12-21 In *Lesson Plans*, Judson G. Everitt takes readers into the everyday worlds of teacher training, and reveals the complexities and dilemmas teacher candidates confront as they learn how to perform a job that many people assume anybody can do. Using rich qualitative data, Everitt analyzes how people make sense of their prospective jobs as teachers, and how their introduction to this profession is shaped by the institutionalized rules and practices of higher education, K-12 education, and gender. Trained to constantly adapt to various contingencies that routinely arise in schools and classrooms, teacher candidates learn that they must continually try to reconcile the competing expectations of their jobs to meet students' needs in an era of accountability. *Lesson Plans* reveals how institutions shape the ways we produce teachers, and how new teachers make sense of the multiple and complicated demands they face in their efforts to educate students.
