There are clearly a large number of US directories to North American MBA courses, and other countries produce similar publications. However, information on shorter courses as covered by this Guide are rare. Now in its seventh edition, this directory to worldwide courses for middle and senior management has been extensively revised, and is linked to a dedicated website. The directory is backed up by a series of articles from leading business schools, management academics, and executives from leading companies. These articles focus on different aspects and approaches to executive education, pr

*Frailty Models in Survival Analysis* Andreas Wienke 2010-07-26 The concept of frailty offers a convenient way to introduce unobserved heterogeneity and associations into models for survival data. In its simplest form, frailty is an unobserved random proportionality factor that modifies the hazard function of an individual or a group of related individuals. *Frailty Models in Survival Analysis* presents a comprehensive overview of the fundamental approaches in the area of frailty models. The book extensively explores how univariate frailty models can represent unobserved heterogeneity. It also emphasizes correlated frailty models as extensions of univariate and shared frailty models. The author analyzes similarities and differences between frailty and copula models; discusses problems related to frailty models, such as tests for homogeneity; and describes parametric and semiparametric models using both frequentist and

Bayesian approaches. He also shows how to apply the models to real data using the statistical packages of R, SAS, and Stata. The appendix provides the technical mathematical results used throughout. Written in nontechnical terms accessible to nonspecialists, this book explains the basic ideas in frailty modeling and statistical techniques, with a focus on real-world data application and interpretation of the results. By applying several models to the same data, it allows for the comparison of their advantages and limitations under varying model assumptions. The book also employs simulations to analyze the finite sample size performance of the models.

**The Unwritten Laws of Engineering** W.J. King 1944 Some years ago the author became very much impressed with the fact, which can be observed in any engineering organization, that the chief obstacles to the success of individual engineers or of the group comprising a unit were of a personal and administrative rather than a technical nature. It was apparent that both the author and his associates were getting into much more trouble by violating the unwritten laws of professional conduct than by committing technical sins against the well-documented laws of science. Since the former appeared to be indeed unwritten at that time, as regards any adequate and convenient text, the following "laws" were originally formulated and collected into a sort of scrapbook, to provide a set of "house rules," or a professional code, for a design-engineering section of a large manufacturing organization. Although they are admittedly fragmentary and incomplete, they are offered here for whatever they may be worth to younger men just starting their careers, and to older men who know these things perfectly well but who all too often fail to apply them in practice. Just a few points should be emphasized: None of these "laws" is theoretical or imaginary, and however obvious and trite they may appear, their repeated violation is responsible for much of the frustration and embarrassment to which engineers everywhere are liable. In fact this paper is primarily a record, derived from direct observation over a period of seventeen years, of the experience of four engineering departments, three of them newly organized and struggling to establish themselves by the trial-and-error method. It has, however, been supplemented and confirmed by the experience of others as gathered from numerous discussions, lectures, and the literature, so that it most emphatically does not reflect the unique experience or characteristics of any one organization. Furthermore, many of these rules are generalizations to which exceptions will occur in special circumstances. There is no thought of urging a slavish adherence to rules and red tape, for there is no substitute for judgment, and at times vigorous individual initiative is needed to cut through formalities in an emergency. But in many respects these laws are like the basic laws of society; they cannot be violated too often with impunity, notwithstanding striking exceptions in individual cases.

*Intimacies and Cultural Change* Daniel Nehring 2016-05-06 Exploring cultural transformations of intimacy in contemporary Mexico, *Intimacies and Cultural Change* examines the ways in which globalization and rapid cultural change have transformed the cultural meanings of couple relationships, sexuality, and personal life in Mexican society. Through a range of contemporary case studies, the book sheds light on the ways in which people draw on these cultural meanings in everyday life to account for their experiences and practices of intimacy in different social settings. An interdisciplinary volume, presenting the latest research on the region from experts working in diverse fields within the social sciences, this book will appeal to scholars of sociology, anthropology, geography and social psychology with interests in gender and sexuality, social change and contemporary intimate relationships.

Increasing Awareness of Child and Adolescent Mental Health Elena M. Garralda 2010-03-03 M. Elena

Garralda and Jean-Philippe Raynaud aim to increase awareness of child and adolescent mental health within an international framework that gives special consideration to problems arising in different contexts around the world and through expert views supported by empirical evidence and considering clinical implications. Chapters address the effects on child mental health of issues including secular changes in family composition in both Western and Eastern countries, rapid industrialization, poverty, deprivation, adoption, refugee status, and aboriginal life. The book also considers emerging issues, such as cyber addiction, PTSD, ADHD across different cultures, and the autism 'epidemic.'

*The Women of Berkshire Hathaway* Karen Linder 2012-05-08 A fascinating look at the top women at Berkshire Hathaway and how they got there Although proportionally women continue to lag far behind men as CEOs and board members at major institutions, there has been a marked uptick in the number of female business leaders in recent years. Looking at the changes that have happened at Berkshire Hathaway—Warren Buffett's holding company, *The Women of Berkshire Hathaway: Lessons from Warren Buffett's Female CEOs and Directors* provides a unique look at the gradual shattering of the glass ceiling at one of America's top firms. An influx of female leadership over the past few years—today there are four female CEOs, up from just one a decade ago—has invigorated Berkshire Hathaway with energy and unique female insight. Profiling these remarkable women, the book provides motivational and management information for a wide range of readers, from business students to Buffett fans. Looks closely at the female board members of Berkshire Hathaway and the female managers who run Berkshire Hathaway companies Follows the paths that brought these women to their current positions Explores their working relationship with their employees and Warren Buffett, and how they balance work and their private lives The only book focusing on eight of the most powerful women at Berkshire Hathaway, *The Women of Berkshire Hathaway* is an inspirational read about the triumph of a group of remarkable women within a company once dominated by men.

**South African Social Attitudes** Udesch Pillay 2006 A country's attitudinal profile is as much a part of its social reality as are its demographic make-up, its culture and its distinctive social patterns. It helps to provide a nuanced picture of a country's circumstances, its continuities and changes, its democratic health, and how it feels to live there. It also helps to measure the country's progress towards the achievement of its economic, social and political goals, based on the measurement of both 'objective' and 'subjective' realities. *South African Social Attitudes: Changing Times, Diverse Voices* is a new series aimed at providing an analysis of attitudes and values towards a wide range of social and political issues relevant to life in contemporary South African society. As the series develops, we hope that readers will be able to draw meaningful comparisons with the findings of previous years and thus develop a richer picture and deeper appreciation of changing South African social values. This, the first volume in the series, presents the public's responses during extensive nation-wide interviews conducted by the HSRC in late 2003. The findings are analysed in three thematic sections: the first provides an in-depth examination of race, class and politics; the second gives a critical assessment of the public's perceptions of poverty, inequality and service delivery, and the last explores societal values such as partner violence

and moral attitudes. *South African Social Attitudes* is essential reading for anyone seeking a guide to contemporary social or political issues and debates. It should prove an indispensable tool not only for government policy-makers, social scientists and students, but also for general readers wishing to gain a better understanding of their fellow citizens and themselves.

**The 9th Engineer Battalion, First Marine Division, in Vietnam** Jean Shellenbarger 2015-09-03 The combat engineers of the First Marine Division, 9th Engineer Battalion, risked their lives daily in Vietnam as they cleared the roads of mines, repaired and paved the famous "Highway 1," disarmed booby traps, built bridges and culverts, and destroyed enemy bunkers and tunnels. Despite their sacrifices and pain, the combat engineers in Vietnam have heretofore largely been ignored. This is the first oral (or other) history of the 9th Engineers, the only Marine battalion formed specifically to go to Vietnam. More than 35 men of the 9th talk about why they joined the Marines and their experiences in basic training. They speak candidly and compellingly about their five years (1966 to 1970) in country. The soldiers also discuss what it was like to come home and get on with their lives.

**Letters to My Children** Jonathan D. Jansen 2012 It started as advice to his own two children entering adulthood, it spread to his students at the University of the Free State and now tens of thousands of his followers of Twitter and Facebook wait for Jonathan Jansen's words of wisdom every day. Each day Jansen (@JJ\_UFS) writes a Letter to my children -- a nugget of advice on life, love and becoming a compassionate, thinking human being. Jansen has become South Africa's moral barometer in a time when leadership seems to be sorely lacking in many areas of our country which explains why this project has struck such a chord with South Africans young and old alike. Jansen talks to young people using new media but continues to give them good old fashioned advice about how to conduct their lives as strong and caring citizens who live life to the fullest. In this book, Jansen explains his thinking behind his wildly popular Twitter campaign and shares the first 160 Tweets with his readers. The Tweets range in subject from politics, to love and relationships, to being a student and ensuring that you question the status quo. They include the following examples: condoms break; never under any circumstances become a politician; choose public service instead ; here is the secret to dealing with peer pressure--choose the right peers; go to university to screw-up; how else will you learn?

South African Social Attitudes, 2nd Report Benjamin Roberts 2010 "Since the transition to democracy in 1994, South Africa has become a well documented nation. A multitude of national and sub-national studies have been conducted, yielding a wealth of information about the characteristics of South African society, and how these have evolved over time. However, less is known about how South Africans feel about their world and themselves. There remains much scope for deepening our understanding of the public's values, chronicling how these have been changing, and determining the extent to which different segments of the population vary in their attitudes and beliefs. *South African Social Attitudes: Reflections on the Age of Hope* is the second in the HSRC series that aims to monitor the evolving dynamics of South African social values in relation to broader societal developments. It is based primarily on the findings of the 2004 and 2005 rounds of the South African Social Attitudes Survey (SASAS), which involved interviewing a nationally representative sample of more than 5000 individuals aged 16 years and older. Like its predecessor, *South African Social Attitudes: Changing Times, Diverse Voices*, this volume is structured according to three thematic sections. The first section on race, class and politics examines the public's views on issues such as national priorities, racial redress, local government, and includes an in-depth examination of youth attitudes. The second section addresses perceptions about poverty, inequality and service delivery. The final section on societal values focuses on attitudes in relation to religion, the environment, employment, and the fear of crime. *South African Social Attitudes* is essential reading for anyone seeking a guide to contemporary social or political issues and debates"--HSRC

**What the Moon Saw** Laura Resau 2008-04-08 An intimate, award winning story of immigrants and their families, the borders they cross, and the ties that bind us all together. Fourteen-year-old Clara Luna's name means "clear moon" in Spanish. But lately, her life has felt anything but clear. A letter has arrived from her grandparents in Mexico inviting her to stay with them for the summer. But Clara has never met her father's parents. All she knows is that he snuck over the border from Mexico as a teenager. When she arrives, she's stunned by how different her grandparents' life is from her own in the United States. They live in simple shacks in the mountains of southern Mexico, where most people speak not only Spanish, but an indigenous language, Mixteco. Their village of Yucuyoo holds other surprises, too—like the spirit waterfall, which is heard but never seen. And Pedro, a young goatherder who wants to help Clara find the waterfall. But as Clara discovers more about where she comes from, what will it mean for who she is now? *What The Moon Saw* is an enchanting story of family, home, and discovering your true self in the most unexpected place. "Filled with evocative language that is rich in imagery and nuance and speaks to the connections that bind us all. . . . a thrilling adventure . . ."—Kirkus Reviews, Starred "Readers . . . will find themselves swept up in this powerful, magical story, and they'll feel, along with Clara, 'the spiderweb's threads, connecting me to people miles and years away'."—Booklist, Starred

**Bombs and Bandwidth** Robert Latham 2003 For governments and businesses, social movements, criminal organizations and terrorists alike, Information technology has become central to the way groups organize themselves and pursue global objectives. With the emergence of the Internet and new digital technologies - and particularly in the post-9/11 era of homeland security - the relationship between IT and security has found a new and pressing relevance. Here, a collection of scholars explores the ways IT has made traditional boundaries increasingly irrelevant, challenging traditional concepts of privacy, surveillance, vulnerability and above all, security.

*Partial Faiths* John A. McClure 2010-01-25 Spiritual conversions figure heavily in such novels as Thomas Pynchon's *Vineland*, Toni Morrison's *Paradise*, and Louise Erdrich's *Love Medicine*. What connects such

varied works is that their convert-characters are disenchanted with secularism yet apprehensive of dogmatic religiosity. *Partial Faiths* is the first study to identify a body of contemporary fiction in such terms, take the measure of its structures and strategies, and evaluate its contribution to public discourse on religion's place in postmodern life. Postsecularism is most often associated with philosophers and theorists such as Jacques Derrida, Richard Rorty, Charles Taylor, William Connolly, Jürgen Habermas, and Gianni Vattimo. But it is also being explored and invented, says John A. McClure, by many novelists: Leslie Marmon Silko, Don DeLillo, Michael Ondaatje, and N. Scott Momaday among others. These novelists, who are often regarded as belonging to different domains of contemporary fiction, are fleshing out the postsecular issues that scholars treat more abstractly. But the modes of belief elaborated in these novels and the new narrative forms synchronized with these modes are dramatically partial and open-ended. Postsecular fiction does not aspire to any full "mapping" of the reenchanting cosmos or any formal moral code, nor does it promise anything like full redemption. It is partial in another sense as well: it is emphatically dedicated to progressive ideals of social transformation and well-being, in repudiation of resurgent fundamentalist prescriptions for the same.

2012 and Beyond Yehuda Berg 2011-10-20 Drawing wisdom from the Zohar, this short kabbalistic text redefines this legendary period of time as a window for individuals and communities to reach "messiah consciousness." That means it's up to people, not some celestial savior, to ignite global change. All the natural disasters poverty, revolutions, anarchy, are wake-up calls to a fragmented humanity. The end is near, but as Yehuda explains this really means "the end of dominance of the human ego. In its place we will experience the unleashing of our true selves - the illuminated human soul." There must be a critical mass, a certain threshold of transformation to capitalize on this window, and when that occurs, the peoples of the world will function as one body while still appreciating our differences. Our collective minds have the power to bring an end to negative consciousness and birth a new existence right now.

**Housing Microfinance** Franck Daphnis 2004-01-01 Annotation This is the first book to give a comprehensive overview of the new field of housing microfinance practice worldwide. The expert contributors provide guidance to practitioners and policymakers on what works best, and look at the applicability of developing world experience of housing microfinance in the United States. The book takes experience from the separate fields of housing policy and microfinance and explores what each can learn from the other. The contributors review the important issues for microfinance institutions which are considering expanding into housing, or providers of conventional housing loans who seek to offer products for poor clients who lack collateral or a regular salary income. Although there are differences between the low-income housing market in the United States and in developing countries, the book explores lessons from international experience that can be applied domestically. With lessons for both housing policymakers and housing microfinance practitioners, this will be a crucial book in putting the new field of housing microfinance on the map.

**Governmental and Nonprofit Accounting** Robert J. Freeman 2000 *Governmental and Nonprofit Accounting, Revised Sixth Edition* provides a better balance between theory and practice than other texts, with the most up-to-date coverage. It provides readers with a thorough basis for understanding the logic for and nature of all of the funds and account groups of a government, with a unique approach that enables readers to grasp the entire accounting and reporting framework for a government before focusing on specific individual fund types and account groups. Includes coverage of the new reporting model standard: GASB Statement 34. Includes illustrations of government-wide financial statements and fund-based financial statements presented using the major fund approach. Points out the major changes

required from the current guidance and explains and illustrates the requirements of the new model. Explains and illustrates the GASB Statement 31. Contains the latest revision of OMB Circular A-133 on single audits. Appropriate for undergraduate Accounting courses, such as Governmental Accounting, Public Sector accounting, Government and Nonprofit Accounting, and Fund Accounting.

**Liberating the Corporate Soul** Richard Barrett 2013-09-13 The two most critical issues for business today, according to CEO's Barrett has worked with, are: "How to tap the deepest levels of creativity and the highest levels of productivity of our employees." In a world where competition has become global, successful companies are learning to build competitive advantage through their human capital. In the 21st Century, even that will not be enough. Success will also hinge on whether, in the eyes of the employees and society-at-large, the organization is a trusted member of the community and a good global citizen. Developing a values-driven approach to business is quickly becoming essential for financial success. Who you are and what you stand for are becoming just as important as what you sell.

**Defining Moments** Wendy Luhabe 2002 Black professionals in business have become an important grouping in South African society. But this is a relatively recent development. Defining Moments presents the stories of three decades of black executives, drawing on significant aspects of management theory and practice in the context of the changing socio-economic conditions that prevailed in each decade. The first generation of black professionals who braved the corporate world in the 1970s was handicapped by Bantu Education and apartheid legislation, but they were imbued with a vigorous culture of debate born of the struggle. During the 1980s they increased in numbers and included black females with qualifications in commerce and finance. The 1990's generation was supported by changes in the political landscape in South Africa which gave birth to the country's new democracy and universally admired Constitution. This book offers the experiences and attitudes of black executives of the past three decades to future generations and invites professionals to use this book as a tool to create a better understanding and bridge the gap between cultures.

A Familiar Strangeness Stuart Burrows 2010-03-01 Literary critics have traditionally suggested that the invention of photography led to the rise of the realist novel, which is believed to imitate the detail and accuracy of the photographic image. Instead, says Stuart Burrows, photography's influence on American fiction had less to do with any formal similarity between the two media than with the capacity of photography to render American identity and history homogeneous and reproducible. The camera, according to Burrows, provoked a representational crisis, one broadly modernist in character. Since the photograph is not only a copy of its subject but a physical product of it, the camera can be seen as actually challenging mimetic or realistic theories of representation, which depend on a recognizable gap between original and reproduction. Burrows argues for the centrality of photography to a set of writers commonly thought of as hostile to the camera—including Nathaniel Hawthorne, Henry James, William Faulkner, and Zora Neale Hurston. The photographic metaphors and allusions to the medium that appear throughout these writers' work demonstrate the ways in which one representational form actually influences another—by changing how artists conceive of identity, history, and art itself. *A Familiar Strangeness* thus challenges the notion of an absolute break between nineteenth-century realism and twentieth-century modernism, a break that typically centers precisely on the two movements' supposedly differing relation to the camera. Just as modernist fiction interrupts and questions the link between visibility and knowledge, so American realist fiction can be understood as making the world less knowable precisely by making it more visible.

**Courage to Lead** Daphna Horowitz 2014-07-31 The story of climbing a mountain has much to do with every leader's story of leadership. This book shows you the way. *Courage to Lead* is based on Daphna Horowitz's life-transforming journey up Africa's tallest mountain. It was a journey that posed challenges for this executive life coach. Used to a yuppie life in the corporate capital, Daphna had to adapt to the back-to-basics approach to life. Jimmy Choos and designer suits were swapped for sensible climbing boots and thermal clothing. *Courage to Lead* is a practical guide to leadership. This is a 'how to' of leadership development, so that you can walk away with useful tips to develop and enhance your leadership. Don't expect abstract leadership concepts, theories and frameworks. This book extends beyond the boardroom and is a relevant read for anyone who needs to take charge of their leadership and life. Like the mountain that loomed constantly ahead of Daphna Horowitz, leadership is not the domain of a select few, but for anyone who wants to rise to the challenge. - If you're a leader, an aspiring leader or if you work with leaders to enhance their leadership effectiveness, this book, with its lessons and challenges, can serve as your coach and guide. - If you're an ordinary person thinking of taking on an extraordinary challenge, like climbing Kilimanjaro, this book contains tips and tools to transform any challenge into a purposeful adventure. *Courage to Lead* is a book that inspires, challenges and transforms.
