Mira Calligraphiae Monumenta Lee Hendrix 2020-09-29 Now back in print, "the ultimate book-lover's gift book" (Los Angeles Times) In 1561-62 the master calligrapher Georg Bocsday (died 1575), imperial secretary to the Holy Roman Emperor Ferdinand I, created *Mira calligraphiae monumenta* (Model Book of Calligraphy) as a demonstration of his own preeminence among scribes. Some thirty years later, Ferdinand's grandson, the Emperor Rudolf II, commissioned Europe's last great manuscript illuminator, Joris Hoefnagel (1542-1600), to embellish the work. The resulting book is at once a treasury of extraordinary beauty and a landmark in the cultural debate between word and image. Bocsday assembled a vast selection of contemporary and historical scripts for a work that summarized all that had been learned about writing to date—a testament to the universal power of the written word. Hoefnagel, desiring to prove the superiority of his art over Bocsday's words, employed every resource of illusionism, color, and form to devise all manner of brilliant grotesques, from flowers, fruit, insects, and animals to monsters and masks. Unavailable for nearly a decade, this gorgeous volume features over 180 color illustrations, as well as scholarly commentary and biographies of both artists to inspire scholars, bibliophiles, graphic designers, typographers, and calligraphers.

Copperplate Script Paul Antonio 2018-05-15 *Copperplate Script - A Yin & Yang Approach* by Paul Antonio, is an innovative, new technology applied to an historical script. The script presented in this manual is not an historical hand, but a geometric construct to aid in a more exacting understanding of the script. This construct assists with writing a cleaner and more beautiful copperplate script. The Technology reintroduces a comprehensive terminology for the parts of the letters - words used by the English Writing Masters in their Copybooks, in the 16th, 17th and 18th centuries, as well as additional names augmented from the historical record. Geometry and physics are used to explain how a curve works and where it sits in relation to the baseline. This concept, then compares how a car or a bicycle tackles a roundabout. Learning the skeletal forms, similar to learning Roman Capitals, is a key part of the manual. The process begins with using a pencil first, followed by the nib. The over-arching concept of the technology utilises 4Fold Symmetry. There are four facets in the 4Fold Symmetry, all of which have 2 aspects; simple and complex. Angular Confinement is the first facet. It shows how confining the curves, inside a plane sided figure (in this case a parallelogram), is like drawing a square to plot a circle. Additional pages of study include an extensive list of difficult-to-write practise words, exemplars of numbers and variations, ligatures of double letters and ampersands. Sections on Brush Copperplate, Flourishing and its rules, as well as a glossary, augment this fine body of work. This manual offers an extensive, in-depth study of Copperplate Script suitable for any level of ability and an extraordinary resource for the beginner, intermediate or advanced calligrapher.

finding the good that exists in the world around us every day. While the Danes are the happiest people on the planet, happiness isn't exclusively Danish; cultures around the world have their own unique approaches to leading a contented, fulfilled life. For his work at the Happiness Research Institute in Copenhagen, Meik Wiking travels the globe from Dubai to Finland, Rio de Janeiro to Bhutan, South Korea to the United States, to discover the secrets of the very happiest people. As he reveals, we can deepen our blissfulness and contentment with little adjustments in our behavior, whether it's eating like the French (sitting around a table and savoring our time) or dancing the tango like Argentinians in Buenos Aires. With his trademark warmth and wit, Meik explores the happiness gap for parents, how much money you really need to buy happiness, how we can be healthier without having to go to the gym, how we can learn to build trust and collaboration, how we can help ourselves by helping others, and why our expectations often outweigh our reality. Weaving together original research and personal anecdotes, *The Little Book of Lykke* is a global roadmap for joy that offers a new approach to achieving everyday happiness that not only improve our own lives, but help us build better communities and a better world.

Adrian Frutiger - Typefaces Heidrun Osterer 2014-05-08 The international creation of

typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture. This second, revised and expanded study edition, which now has an index, makes Frutiger's achievement even more accessible.
