THE EARLY GRADE READING ASSESSMENT Amber K. Gove 2011-09-28 The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Legends in Their Own Lunchbox James Roy 2015-01-01 Meet the Legends: six likeable, larger-than-life kids that any young reader can easily relate to. They have no super-human skills, no amazing gadgets, and none of them can travel through time and space. They're just your average kids only a little crazier and a little sillier. This diverse group of kids represents a wide range of personalities, from shy to confident, geeky to sporty, as they deal with common experiences in and out of the school. Written by leading authors who are masters of storytelling, these humorous chapter books bring the Legends to life as they stumble through their everyday wacky adventures. They may not be your typical heroes, but they're Legends in their Own Lunchbox "

Towards a Unified Italy Salvatore DiMaria 2018-07-18 Since unification in 1860, Italy has remained bitterly divided between the rich North and the underdeveloped South. This book examines the historical, literary, and cultural contexts that have informed and inflamed the debate on the Southern Question for over a century. It brings together analysis of cinema, literature, and newspaper archives to reconsider the myths and stereotypes that both Northerners and Southerners deploy in their narratives. Salvatore DiMaria offers a masterful assessment of the entangled issues that have produced the South's image as impoverished and backwards, such as organized crime, illiteracy, and mass emigration. Documenting the state's largely failed efforts to bring the South into its socio-economic fold, DiMaria also points to the future, arguing that the European Union and globalization are transformative forces that may finally produce a unified Italy.

The Curse of Lono Hunter S. Thompson 2014-05-01 A wild ride to the dark side of Americana. Hunter S. Thompson's and Ralph Steadman's most eccentric book The Curse of Lono is to Hawaii what Fear and Loathing was to Las Vegas: the crazy tales of a journalist's "coverage" of a news event that ends up being a wild ride to the dark side of Americana. Originally published in 1983, The Curse of Lono features all of the zany, hallucinogenic wordplay and feral artwork for which the Hunter S. Thompson/Ralph Steadman duo became known and loved. This curious book, considered an oddity among Hunter's oeuvre, was long out of print, prompting collectors to search high and low for an original copy. TASCHEN's signed, limited edition sold out before the book even hit the stores—this unlimited version, in a different, smaller format, makes The Curse of Lono accessible to everyone.

Evolution Education Around the Globe Hasan Deniz 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Health Benefits of Mediterranean Diet Giuseppe Grosso 2019-10-01 Growing evidence shows that a dietary pattern inspired by Mediterranean diet principles is associated with numerous health benefits. A Mediterranean-type diet has been demonstrated to exert a preventive effect toward cardiovascular diseases, in both Mediterranean and non-Mediterranean populations. Part of these properties may depend on a positive action toward healthier metabolism, decreasing the risk of diabetes and metabolic-syndrome-related conditions. Some studies also suggested a potential role in preventing certain cancers. Finally, newer research has showed that a higher adherence to the Mediterranean diet is associated with a lower risk of cognitive decline, depression, and other mental disorders. Overall, a better understanding of the key elements of this dietary pattern, the underlying mechanisms, and targets, are needed to corroborate current evidence and provide insights on new and potential outcomes. This Special Issue welcomes original research and reviews of literature concerning the Mediterranean diet and various health outcomes: Observational studies on established nutritional cohorts (preferred), case-control studies, or population sample on the association with non-communicable diseases; Level of evidence on the association with human health, including systematic reviews and metaanalyses; Evaluation of application of Mediterranean diet principles in non- Mediterranean countries; Description of mechanisms of action, pathways, and targets at the molecular level, including interaction with gut microbiota.

The World Bank Glossary World Bank 1996 This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

Competences for democratic culture Council of Europe 2016-04-04 A new Council of Europe reference framework of competences for democratic culture! Contemporary societies within Europe face many challenges, including declining levels of voter turnout in elections, increased distrust of politicians, high levels of hate crime, intolerance and prejudice towards minority ethnic and religious groups, and increasing levels of support for violent extremism. These challenges threaten the legitimacy of democratic institutions and peaceful co-existence within Europe. Formal education is a vital tool that can be used to tackle these challenges. Appropriate educational input and practices can boost democratic engagement, reduce intolerance and prejudice, and decrease support for violent extremism. However, to achieve these goals, educationists need a clear understanding of the democratic competences that should be targeted by the curriculum. This book presents a new conceptual model of the competences which citizens require to participate in democratic culture and live peacefully together with others in culturally diverse societies. The model is the product of intensive work over a two-year period, and has been strongly endorsed in an international consultation with leading educational experts. The book describes the competence model in detail, together with the methods used to develop it. The model provides a robust conceptual foundation for the future development of curricula, pedagogies and assessments in democratic citizenship and human rights education. Its application will enable educational systems to be harnessed effectively for the preparation of students for life as engaged and tolerant democratic citizens. The book forms the first component of a new Council of Europe reference framework of competences for democratic culture. It is vital reading for all educational policy makers and practitioners who work in the fields of education for democratic citizenship, human rights education and intercultural education.
