In *American Nations* he takes readers on a journey through the history of our fractured continent, offering a revolutionary and revelatory take on American identity, and how the conflicts between them have shaped our past and continue to mold our future. Sentinel of the Seas Dennis M. Powers 2007 One of the most rugged expanses in the continental U.S., the coast of northern California and Oregon saw frequent shipping disasters in the 19th century, before Congress ordered the construction of lighthouses on such dangerous promontories as Heceta Head, Cape Mendocino and a seaward-trending pile of rocks called St. George Reef. The brave, resourceful engineer who directed the Tillamook Rock lighthouse construction, Alexander Ballantyne, was later engaged for the St. George job, and it's this story that author Powers (*Treasure Ship*) chronicles here. Without any maps to illustrate it, however, readers will need an atlas to follow the movement of men and ships up and down the coast. Later chapters describing lighthouse life prove less problematic; lighthouse keepers were fascinating, courageous characters (and included a good number of women) who not only kept lights burning and fog horns sounding, but also risked life and limb to rescue people stranded in torrential weather.

Lighthouses and Lifesaving Stations of Virginia Patrick Evans-Hylton 2005 Traces the grand history of lighthouses and lifesaving stations across the Atlantic coast of Virginia, from the richly historic Old Cape Henry Light and the candy-striped Assateague Light on the state's Eastern Shore to the tales of the men of the United States Life-Saving Service, the forerunner of today's Coast Guard. Brilliant Beacons: A History of the American Lighthouse Eric Jay Dolin 2016-04-18 "What Moby-Dick is to whales, Brilliant Beacons is to lighthouses—a transformative account of a familiar yet mystical subject." —Laurence Bergreen, author of *Columbus: The Four Voyages* In this "magnificent compendium" (New Republic), best-selling author Eric Jay Dolin presents the definitive history of American lighthouses, and in so doing "illuminate[s] the history of America itself" (Entertainment Weekly). Women Who Kept the Lights Mary Louise Clifford 2013-09-15 Hundreds of American women have kept the lamps burning in lighthouses since Hannah Thomas tended Gurnet Point Light in Plymouth, Massachusetts, while her husband was away fighting in the War for Independence. *Women Who Kept the Lights* details the careers of 34 intrepid women who were official keepers of light stations on the Atlantic, Gulf, and Pacific coasts, on Lake Champlain and the Great Lakes, staying at their posts for periods ranging from a few years to half a century. Most of these women served in the nineteenth century, when the keeper lit a number of lamps in the tower at dusk, replenished their fuel or replaced them at midnight, and every morning polished the lamps and lanterns to keep their lights shining brightly. Several of these stalwart women were commended for their courage in remaining at their posts through severe storms and hurricanes. A few went to the rescue of seamen when ships capsized or were wrecked. Their varied stories paint a multifaceted picture of a unique profession in our maritime history.

The Lighthouse Stevensons Bella Bathurst 2011-06-28 For centuries the seas around Scotland were notorious for shipwrecks. Mariners' only aids were skill, luck, and single coal-fire light on the east coast, which was usually extinguished by rain. In 1786 the Northern Lighthouse Trust was established, with Robert Stevenson appointed as chief engineer a few years later. In this engrossing book, Bella Bathurst reveals that the Stevensons not only supervised the construction of the lighthouses under often desperate conditions but also perfected a design of precisely chiseled interlocking granite blocks

that would withstand the enormous waves that batter these stone pillars. The same Stevensons also developed the lamps and lenses of the lights themselves, which "sent a gleam across the wave" and prevented countless ships from being lost at sea. While it is the writing of Robert Louis Stevenson that brought fame to the family name, this mesmerizing account shows how his extraordinary ancestors changed the shape of the Scotland coast against incredible odds and with remarkable technical ingenuity.

The Lighthouse Effect Steve Pemberton 2021-09-28 In this stirring follow-up to his memoir, Steve Pemberton gives practical encouragement for how you can be a "human lighthouse" for others and through these inspiring stories will renew your hope for humanity. Our polarized, divisive culture seems to be without heroes and role models. We are adrift in a dark sea of disillusionment and distrust and we need "human lighthouses" to give us hope and direct us back to the goodness in each other and in our own hearts. Steve Pemberton found a lighthouse in an ordinary man named John Sykes, his former high school counselor. John gave Steve a safe harbor after Steve escaped an abusive foster home and together they navigated a new path that led to personal and professional success. Through stories of people like John and several others, you will identify how the hardships you have overcome equip you to be a "human lighthouse," inspiring those around you. The humble gestures of kindness that

change the course of our lives can shift the course for America too. With a unique vision for building up individuals and communities and restoring trust, The Lighthouse Effect opens your eyes to those who are quietly heroic. You will reflect on the lighthouses in your own life and be reminded that the greatest heroes are alongside us--and within us.

The View from Lazy Point Carl Safina 2011-01-04 An exhilarating journey of natural renewal through a year with MacArthur fellow Carl Safina Beginning in his kayak in his home waters of eastern Long Island, Carl Safina's *The View from Lazy Point* takes us through the four seasons to the four points of the compass, from the high Arctic south to Antarctica, across the warm belly of the tropics from the Caribbean to the west Pacific, then home again. We meet Eskimos whose way of life is melting away, explore a secret global seed vault hidden above the Arctic Circle, investigate dilemmas facing foraging bears and breeding penguins, and sail to formerly devastated reefs that are resurrecting as fish graze the corals algae-free. "Each time science tightens a coil in the slack of our understanding," Safina writes, "it elaborates its fundamental discovery: connection." He shows how problems of the environment drive very real matters of human justice, well-being, and our prospects for peace. In Safina's hands, nature's continuous renewal points toward our future. His lively stories grant new insights into how our world is changing, and what our response ought to be.

Endpapers Alexander Wolff 2021-03-02 A sweeping portrait of the turmoil of the twentieth century and the legacy of immigration, as seen through the German-American family of the celebrated book publisher Kurt Wolff A literary gem researched over a year the author spent living in Berlin, *Endpapers* excavates the extraordinary histories of the author's grandfather and father: the renowned publisher Kurt Wolff, dubbed "perhaps the twentieth century's most discriminating publisher" by the *New York Times Book Review*, and his son Niko, who fought in the Wehrmacht during World War II before coming to America. Kurt Wolff was born in Bonn into a highly cultured German-Jewish family, whose ancestors included converts to Christianity, among them Baron Moritz von Haber, whose desire to demand satisfaction in a duel sparked off bloody antisemitic riots. Always bookish, Kurt became a publisher at twenty-three, setting up his own firm and publishing Franz Kafka, Joseph Roth, Karl Kraus, and many other authors whose books would soon be burned by the Nazis. Fleeing Germany in 1933, a day after the Reichstag fire, Kurt and his second wife, Helen, sought refuge in France, Italy, and ultimately New York, where in a small Greenwich Village apartment they founded Pantheon Books. Pantheon would soon take its own place in literary history with the publication of Nobel laureate Boris Pasternak's novel *Doctor Zhivago*, and as the conduit that brought major European works to the States. But Kurt's taciturn son Niko, offspring of his first marriage to Elisabeth Merck, was left behind in Germany, where despite his Jewish heritage he served the Nazis on two fronts. As Alexander Wolff visits dusty archives and meets distant relatives, he discovers secrets that never made it to the land of fresh starts, including the connection between Hitler and the family pharmaceutical firm E. Merck, and the story of a half-brother Niko never knew.

With surprising revelations from never-before-published family letters, diaries, and photographs, *Endpapers* is a moving and intimate family story, weaving a literary tapestry of the perils, triumphs, and secrets of history and exile.

The Sea and Civilization Lincoln Paine 2015 A monumental, wholly accessible work of scholarship that retells human history through the story of mankind's relationship with the sea. An accomplishment of both great sweep and illuminating detail, *The Sea and Civilization* is a stunning work of history that reveals in breathtaking depth how people first came into contact with one another by ocean and river, and how goods, languages, religions, and entire cultures spread across and along the world's waterways. Lincoln Paine takes us back to the origins of long-distance migration by sea with our ancestors' first forays from Africa and Eurasia to Australia and the Americas. He demonstrates the critical role of maritime trade to the civilizations of ancient Egypt and Mesopotamia, and the Indus Valley. He reacquaints us with the great seafaring cultures of antiquity like those of the Phoenicians and Greeks, as well as those of India, Southeast and East Asia who parlayed their navigational skills, shipbuilding techniques, and commercial acumen to establish vibrant overseas colonies and trade routes in the centuries leading up to the age of European overseas expansion. His narrative traces subsequent developments in commercial and naval shipping through the post-Cold War era. Above all, Paine makes clear how the rise and fall of civilizations can be traced to the sea.

Stigma Erving Goffman 2009-11-24 From the author of *The Presentation of Self in Everyday Life*, *Stigma* analyzes a person's feelings about himself and his relationship to people whom society calls "normal." *Stigma* is an illuminating excursion into the situation of persons who are unable to conform to standards that society calls normal. Disqualified from full social acceptance, they are stigmatized individuals. Physically deformed people, ex-mental patients, drug addicts, prostitutes, or those ostracized for other reasons must constantly strive to adjust to their precarious social identities. Their image of themselves must daily confront and be affronted by the image which others reflect back to them. Drawing extensively on autobiographies and case studies, sociologist Erving Goffman analyzes the stigmatized person's feelings about himself and his relationship to "normals" He explores the variety of strategies stigmatized individuals employ to deal with the rejection of others, and the complex sorts of information about themselves they project. In *Stigma* the interplay of alternatives the stigmatized individual must face every day is brilliantly examined by one of America's leading social analysts.

Where Light in Darkness Lies Veronica della Dora 2022-04-14 An illuminating history of both real-life lighthouses and the beacons of literature and art alike, shedding light on the multifaceted power of these liminal structures. Suspended between sea and sky, battered by the waves and the wind, lighthouses mark the battle lines between the elements. They guard the boundaries between the solid human world and the primordial chaos of the waters; between stability and instability; between the known and the unknown. As such, they have a strange, universal appeal that few other manmade structures possess. Engineered to draw the gaze of sailors, lighthouses have likewise long attracted the attention of soldiers and saints, artists and poets, novelists and filmmakers, colonizers and migrants, and, today more than ever, heritage tourists and developers. Their evocative locations, isolation, and resilience, have turned these structures into complex metaphors, magnets for stories. This book explores the rich story of the lighthouse in the human imagination.

A Short Bright Flash: Augustin Fresnel and the Birth of the Modern Lighthouse Theresa Levitt 2013-06-03 Describes the life of the man who invented a new lighthouse lens, capable of shining brighter, farther and more efficiently than existing light sources, and his fight against the scientific elite, his poor health and the limits of his era's technology. 13,000 first printing.

Sentinels of the Sea R. G. Grant 2018-04 Lighthouses have always unsettled and attracted in equal measure, highlighting the triumphs and failures in humanity's battle with the forces of nature. Taking as its heroes the lighthouses themselves, *Sentinels of the Sea* describes the engineering genius that allowed their construction on even the smallest of rock outcrops and the innovations that made the lights so powerful and reliable. Intricate, elegant architectural plans and elevations, and evocative period drawings and photographs showcase the innovative designs and technologies behind fifty historic lighthouses built around the world from the 17th to the 20th century. R.G. Grant's engaging and authoritative text chronicles the incredible feats of engineering and endurance that brought these iconic, isolated towers into being, the advances in lens technology that made the lights so effective, and the everyday routines of the lighthouse keepers and the heroic rescues that some performed. Packed with extraordinary stories of human endeavour, desperate shipwrecks, builders defying the elements and heroic sea rescues, the book also reveals the isolation and vulnerability of the dedicated lighthouse keepers.

Floating Coast: An Environmental History of the Bering Strait Bathsheba Demuth 2019-08-20 A groundbreaking exploration of the relationship between capitalism, communism, and Arctic ecology since the dawn of the industrial age. Whales and walrus, caribou and fox, gold and oil: through the stories of these animals and resources, Bathsheba Demuth reveals how people have turned ecological wealth in a remote region into economic growth and state power for more than 150 years. The first-ever comprehensive history of Beringia, the Arctic land and waters stretching from Russia to Canada, *Floating Coast* breaks away from familiar narratives to provide a fresh and fascinating perspective on an overlooked landscape. The unforgiving territory along the Bering Strait had long been home to humans—the Inupiat and Yupik in Alaska, and the Yupik and

Chukchi in Russia—before Americans and Europeans arrived with revolutionary ideas for progress. Rapidly, these frigid lands and waters became the site of an ongoing experiment: How, under conditions of extreme scarcity, would the great modern ideologies of capitalism and communism control and manage the resources they craved? Drawing on her own experience living with and interviewing indigenous people in the region, as well as from archival sources, Demuth shows how the social, the political, and the environmental clashed in this liminal space. Through the lens of the natural world, she views human life and economics as fundamentally about cycles of energy, bringing a fresh and visionary spin to the writing of human history. *Floating Coast* is a profoundly resonant tale of the dynamic changes and unforeseen consequences that immense human needs and ambitions have brought, and will continue to bring, to a finite planet.

To the Lighthouse Virginia Woolf 2021-06-24 Described by Virginia Woolf herself as 'easily the best of my books', and by her husband Leonard as a 'masterpiece', *To the Lighthouse*, first published in 1927, is one of the milestones of Modernism. Set on the Isle of Skye, over a decade spanning the First World War, the narrative centres on the Ramsay family, and is framed by Mrs Ramsay's promise to take a trip to the lighthouse the next day – a promise which isn't to be fulfilled for a decade. Flowing from character to character and from year to year, the novel paints a moving portrait of love, loss and perception. Bearing all the hallmarks of Woolf's prose, with her delicate handling of the complexities of human relationships, *To the Lighthouse* has earned its reputation – frequently appearing in lists of the best novels of the twentieth century, it has lost not an iota of brilliance.

From the day he is five-years-old and dropped off at his foster home of the next eleven years, Stephen is mentally and physically tortured. No one in the system can help him. From one of those books he learns that he has to fight in any way he can—for victory is in the battle. His victory is to excel in school. Against all odds, the author succeeded. He attended college, graduated, became a successful corporate executive, and married a wonderful woman with whom he established a loving family of his own. King and Emperor Janet L. Nelson 2019-09-17 Charles I, often known as Charlemagne, is one of the most extraordinary figures ever to rule an empire. Driven by unremitting physical energy and intellectual curiosity, he was a man of many parts, a warlord and conqueror, a judge who promised "for each their law and justice," a defender of the Latin Church, a man of flesh and blood. In the twelve centuries since his death, warfare, accident, vermin, and the elements have destroyed much of the writing on his rule, but a remarkable amount has survived. Janet Nelson's wonderful new book brings together everything we know about Charles I, sifting through the available evidence, literary and material, to paint a vivid portrait of the man and his motives. Building on Nelson's own extraordinary knowledge, this biography is a sort of detective story, prying into and interpreting fascinating and often obdurate scraps of evidence, from prayer books to skeletons, gossip to artwork. Charles's legacy lies in his deeds and their continuing resonance, as he shaped counties, countries, and continents; founded and rebuilt towns and monasteries; and consciously set himself up not just as King of the Franks, but as the head of the renewed Roman Empire. His successors—even to the present day—have struggled to interpret, misinterpret, copy, or subvert his legacy. Janet Nelson gets us as close as we can hope to come to the real figure of Charles the man as he was understood in his own time.

Autoethnography as a Lighthouse Stephen Hancock 2015-02-01 This work uses autoethnography as an enterprise to deconstruct barriers that support the invisibility of diverse epistemologies. The reality of invisibility and silence has plagued "unvalued others" in their attempt to make known the cultural significance found in the planning and execution of research. As a result, this book purposes to support the visibility and voice of marginalized scholars who conduct autoethnographic research from a racial, gendered, and critical theoretical framework. This work further supports authentic inquiry as it examines and reexamines culturally diverse epistemologies as a viable and valuable framework for conducting autoethnographic research. Specifically, this work highlights racialized epistemologies as an inescapable factor in autoethnographic research in the context of schools.
